PART B TECHNICAL PROPOSAL

STATEMENTS AND CERTIFICATES REGARDING ELIGIBILITY

(Volume 2 of 2)

ATTACHMENT 4 TO B-2

RESPONSE TO QUESTIONS CONCERNING ELIGINBILITY

FROM POTENTIAL SUPPLIERS

SECTION B
PART B TECHNICAL PROPOSAL AND STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

QUALIFICATIONS AND CERTIFICATIONS

NOTE: The Authority reserves the right to audit compliance with respect to each of the required statements and certifications in the forms submitted by Offerors, including but not limited to the Domestic U.S. Content Certification, Domestic U.S. Content Worksheet, and Final Assembly of Production (Non-Pilot) Vehicles in Massachusetts.

Questions Concerning Eligibility

Provide short answers (and attach relevant documents) to the following questions and requests:

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.
   See attached Certificate of Good Standing from Massachusetts

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.
   Alstom Transport Holding US Inc.; (212) 557-7265

3. Provide the names, title and telephone numbers of all officers.
   See attached Director's List

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.
   Yes – signaling system contract (MBTA Blue Line) and signaling equipment product orders.

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause. **No**

6. Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances. **No**

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.
   1 minor personal injury lawsuit

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

   James T. Haggerty
   Senior VP
   Marsh Casualty – Advisory Specialist
   20 Church Street
   Hartford, CT 06103
   (860) 723-5759

9. Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.

   Information to be provided upon our receipt.

10. Has the business or any of the business's owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law? **No**

11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, provide the last three (3) years audited financial statements for each entity.
    See attached Consolidated Financial Statements

12. Provide the business's current code of business ethics or equivalent.
    See attached Code of Business Ethics

The Commonwealth of Massachusetts
Secretary of the Commonwealth
State House, Boston, Massachusetts 02133

William Francis Galvin
Secretary of the
Commonwealth

Date: February 28, 2014

To Whom It May Concern :

I hereby certify that according to the records of this office,

ALSTOM SIGNALING INC.

a corporation organized under the laws of

DELAWARE

on **October 05, 1990** was qualified to do business in this Commonwealth on

March 19, 1991 under the provisions of the General Laws, and I further certify that said

corporation is still qualified to do business in this Commonwealth.

Our code of ethics

we are shaping the future | ALSTOM

Corporate Communications - January 2010 (revised August 2013)

Table of contents

"Ethical rules and values guarantee our future"

Our core values - Trust, Team and Action - ensure Alstom's overall cohesion, inspire trust among our partners, reinforce our image and, quite simply, guarantee our future.

Alstom's reputation and integrity can only be built by continuously strengthening ethical rules and procedures. Our growth is underpinned and guided by our fundamental principles of integrity and transparency, applied scrupulously and without exception with regard to employees, shareholders, customers in the public and private sectors, suppliers, competitors and partners. Our Code of Ethics is essential and all employees, in their day-to-day work, need to share the same clear values and observe the same rules of personal and collective conduct that define Alstom as an ethical company.

Through the Alstom Integrity Programme, I constantly strive to strengthen this approach and ensure that our values and rules are strictly applied, without exception. Since March 2009, the Group has been engaged in a certification process to assess that its rules and their implementation are in line with the highest international business standards.

All our ethical rules are important. However, three rules, covering competition, corruption and internal control, deserve special attention, as they are central to our individual and collective responsibilities. To ensure nothing is overlooked, any employee who has reason to believe that our Code of Ethics is being violated can immediately report the matter to his or her direct manager or use Alstom's Alert Procedure, in accordance with the relevant national laws and rules.

I rely on each and everyone of you, individually and collectively, to ensure that all our rules are respected on a daily basis.

Patrick Kron
Chairman & CEO

OUR GROWTH IS BUILT ON FUNDAMENTAL PRINCIPLES

The Code of Ethics and all relevant Group Instructions apply to everyone in the Group and those who conduct business on behalf of Alstom.

Employees are expected to assume personal responsibility for performing their duties with fairness and integrity, to have an understanding of the Code of Ethics and to refer to it regularly, to have a detailed knowledge of its provisions that apply specifically to their job and to consult their direct manager if in doubt.

Managers' responsibilities go beyond those of other employees. They must actively promote the Code of Ethics in the workplace, showing commitment through their actions. They must be vigilant in preventing, detecting and responding to any violation of the Code of Ethics, and protect employees who report violations.

OUR BASIC PRINCIPLES

Respect laws and regulations

“Do not involve the Group in unlawful practices”

Alstom's reputation for integrity is built on its respect for laws, regulations and other requirements that apply to the conduct of business in all countries in which it is present. It is the personal responsibility of Alstom employees to know the laws, regulations and requirements relating to their job. Any breach of these laws may lead to civil and criminal prosecution. Activities which could involve the Group in unlawful practices are prohibited.

Alstom is a multinational corporation with operations around the world. To ensure our high ethical goals, we require compliance with certain standards that exceed those required by applicable law. Among others, Alstom is attached to the spirit and the letter of laws governing human rights and labour, health and safety standards, environment protection, prevention of corruption, fair competition, taxation and the accurate communication of financial information. We comply with the guiding principles of the OECD, the United Nations Universal Declaration of Human Rights and the principles of the Global Compact and those of the International Chamber of Commerce (ICC). Alstom is also a member of the World Business Council for Sustainable Development (WBCSD).

Apply the principles of honesty and fairness

“No objective justifies a deviation from the rules”

Many of Alstom's activities are not the subject of laws, regulations or other mandatory requirements, in which case principles of fairness and honesty must govern our conduct. It is each employee's responsibility to apply these principles at all times. No performance objectives should be imposed or accepted if they can only be achieved by compromising our ethical standards.

OUR THREE FUNDAMENTAL RULES

The following three rules are fundamental because any deviation from their application exposes the Group and those concerned to considerable risks.

Agreements and understandings with competitors

Competition laws or antitrust laws are intended to ensure open and fair competition among companies. Open and fair competition is in the best interest of Alstom and benefits customers, consumers and society as a whole. Such laws must be complied with at all times. Severe civil and criminal sanctions can be imposed on the company and on individuals if such laws are broken.

> "Respect the rules of competition"

Alstom employees must not participate in any agreement with competitors that have the intent or effect of fixing prices, distorting a bidding process, dividing a market, limiting production or boycotting a customer or supplier. Alstom employees must not exchange sensitive information with competitors in infringement of the competition laws.

Because rules are complex and differ from one country to another, employees should consult their Legal department for clarification as necessary.

Prevention of corruption and bribery

Alstom's policy is to prohibit all unlawful payments and practices. The Group is fully committed to the elimination of corruption and bribery in its business transactions and complies with the requirements of the OECD Anti-Bribery Convention, of the US Foreign Corrupt Practices Act (FCPA), of the UK Bribery Act 2010, and with all applicable laws in the countries where it is present and follows the guidance of the "Resource Guide to the US Foreign Corrupt Practices Act".

> "Always refuse corruption in business transactions"

Alstom companies, officers, directors and employees must not offer or provide, directly or indirectly, by requesting assistance from a third party, any pecuniary or other advantage to any person in violation of any legal requirements or Alstom's ethical principles, with a view to obtaining or retaining business or securing any facility or favour that infringes regulations.

"Person" means a public official, political party, employee or agent of a customer in the public or private sectors or employee or agent of a lending agency or bank. Public officials include, but are not limited to public or government officials, agents, employees, or representatives; any political party or political party officials, agents, employees or representatives, candidates for public or political party office, members of public assemblies, officials and employees of international organisations, judges or officials of international courts, government controlled administrations' and state owned companies' employees.

Alstom companies, officers, directors and employees must not offer or provide any advantage or respond to solicitations from any party claiming real or implied influence on an agent in the public or private sector and offering to use that influence to obtain any favourable decision or market share.

Subsequently, Alstom will not take any sanction against employees for being compliant with Alstom rules by refusing any form of corruption and bribery, even if such a decision results in losing business or any other adverse consequences.

Facilitation payments are used to facilitate mandatory administrative procedures and formalities normally carried out through the proper legal channels. Such payments are petty corruption, and although they may be tolerated in some countries, they are illegal in many countries. To avoid any confusion or misunderstanding with regard to acceptable limits, Alstom prohibits any such practices.

Internal control and disclosure of information

> "Every employee has a role to play in internal control"

Internal control is key as it is designed to provide reasonable assurance to the management at every level in regard to the quality and reliability of financial and business information along with conformity to the applicable laws and regulations, and internal rules in force.

The management of the respective entities (Corporate, Country, Sector, Business or Unit) is responsible for internal control in compliance with the Group's Internal Control Manual and must confirm that it has achieved its task. The integrity of our financial and business information is essential to run our operations legally, honestly and efficiently. As a consequence, all financial and accounting information must be correctly recorded in the Group's books and accounts.

Employees are individually responsible for the records and reports they write and the information they provide (including information entered into information systems). Records should be retained in compliance with Alstom's Records Retention Policy. Management must ensure that the data recorded in the reporting system is perfectly in line with the information due to be published, with the results of the period and with the financial position at the end of the period.

At every level of the Group, employees must ensure that any records, reports, or information they use or communicate to management of the various entities (Corporate, Country, Sector, Business or Unit) enable Alstom to make full, fair, accurate and timely disclosure in reports, documents and other public communications.

These documents include financial reports and projections, research reports, marketing information, sales reports, tax returns, expense accounts, time sheets, claims, environmental and social information and other documents, including those submitted to governmental or regulatory authorities.

In no case should any financial or business records be subject to fraudulent treatment. Fraud, or the act or intent to cheat, steal, deceive or lie, is both dishonest and, in most cases, criminal. Fraud can include, but is not limited to: submitting false expense reports, forging or altering checks, misappropriating assets or misusing the Group's assets, unauthorised handling of transactions, mishandling petty cash, making an entry on records or financial statements that is not in accordance with proper accounting standards.

THE ROLE OF EMPLOYEES AND THE ALSTOM ALERT PROCEDURE

Employees may use the Group's Alert Procedure, in accordance with the laws and rules applicable in the country where they live or work, if they have reason to suspect a violation of anti-corruption, competition and securities or accounting laws and regulations.

The Alert Procedure should only be used if the employee has reason to believe that informing his or her direct manager could cause difficulties or has reason to believe that the reported alleged irregularity will not receive the proper follow-up.

In this case, employees have the choice of reporting by:

- Contacting any one of the following:
- The Country President,
- The Country Counsel,
- The Group General Counsel: Keith Carr
3 avenue André Malraux 92309 Levallois-Perret, France
keith.carr@chq.alstom.com
+33 1 41 49 31 14

- The SVP Ethics & Compliance: Romain Marie
3 avenue André Malraux 92309 Levallois-Perret, France
romain.marie@chq.alstom.com
+33 1 41 49 21 31

- Or using the two methods of communication, reachable 24 hours a day, 7 days a week, 365 days a year:
- The secure website: www.alstom.ethicspoint.com
- The toll-free hotline (dial-in numbers available on the secure website).

Every measure will be taken to respect employee confidentiality. Alstom shall honour its commitment that no employee will suffer from retaliation, such as a change of status, harassment or any other form of discrimination as a result of using the Alert Procedure or disclosing information in good faith

Relationships with our business partners

• Customers

Alstom must treat all its customers honestly and fairly, regardless of the size of their business. The Group is committed to providing customers with high-quality products and services that meet their needs.

"Be trustworthy"

Alstom gives detailed information on its products and services in its advertising, public statements and offers to individual customers. Employees who negotiate contracts must ensure that any statements, communications and presentations made to customers are accurate and truthful.

Customer confidential, sensitive or private information must not be disclosed by an Alstom employee to any person except as required or permitted within a project or contract.

• Suppliers and sub-contractors

Suppliers' and sub-contractors' inputs represent a high proportion of the value of Alstom's products and services and play an important role in customer satisfaction.

Purchasing decisions are based on objective assessment of the supplier's or sub-contractor's reliability and integrity and on the overall value of the offering in view of short and long-term considerations and objectives. For the interest of Alstom, the purchase of goods and services is based on the merits of price, quality, performance, delivery and suitability. The purchaser endeavours to ensure that a situation of dependence is not established with suppliers and sub-contractors, and therefore systematically develops credible alternatives.

"Fair selection process and observance of the Alstom Charter for Sustainable Development"

Care must be taken to avoid conflicts of interest and any appearance of partiality. Kickbacks are prohibited.

Relations with suppliers and sub-contractors are governed by procedures set out by Sourcing and Supply Chain, which should be applied by everyone and are designed to ensure all suppliers and sub-contractors are treated equally.

Alstom requires its suppliers and sub-contractors to strictly comply with all applicable legal requirements related to their activities and business environment. The Group requires its suppliers and sub-contractors to sign its Charter for Sustainable Development, underpinned by respect for human rights, employee health and safety, ethical rules, in particular those related to anti-corruption and fair competition, environmental protection and compliance with applicable laws and regulations. Alstom takes steps to ensure that these commitments are met, both during the selection process and during the contract execution.

• Business Advisors

In order to avoid any occurrence of bribery or unlawful practices exposing the Group to liability, relations with business advisors are guided by strict internal procedures.

"Strictly follow the procedures"

Business Advisor means any representative, business development consultant, agent, sponsor or lobbyist involved directly or indirectly in activities pertaining to sales or project execution. It refers also to third parties acting on behalf of Alstom, including, but not limited to, lawyers, tax advisors, customs agents, engineers, financial advisors, who interact with customers or any public or private authorities.

To prevent public and private corruption, the use of business advisors is subject to approval at Sector and Corporate levels and is supervised by the Ethics & Compliance department as far as the respect of compliance principles is concerned.

• Government and other public procurement contracts

Contracts with government-owned or public entities often require compliance with very high standards. Alstom observes the laws and regulations that govern the acquisition of goods and services by governments in all its markets, including laws prohibiting efforts to influence government officials.

"Apply the rules"

Alstom is committed to competing fairly, to being truthful and accurate and, when awarded, to perform contracts in accordance with all contractual and legal obligations.

Where government contracts involve the possession, use of, or access to classified or otherwise restricted information, it is essential that the employees involved strictly follow the security procedures applicable to such information.

Although some of Alstom's former public customers have been partially or wholly privatised, they may still be subject to the

same or similar stringent rules. In order to prevent conflicts of interest, special care must be given to the hiring of a former or current government employee. This needs to be carefully reviewed and approved by the Human Resources department.

• Export controls and trade restrictions

Local, national or international laws, regulations or similar requirements establishing embargoes, boycotts or other trade restrictions on goods, services, software or technology are enacted from time to time.

“Abide by international trade laws”

All Alstom companies, exporting goods and services or performing services outside their own countries (including technical assistance or training), must strictly comply with all applicable Export Control laws of the country in which they are present. Special care needs to be given for dual-use items (products, software and technical data which can have an application both in the civil and military fields). Employees involved in international trade must ensure they comply with the latest applicable regulations and seek guidance from their Legal department.

Failure to observe these laws and regulations could expose both the Company and the employees involved to severe penalties, including prohibition of future exports.

• Money laundering

Money laundering is the processing of criminal proceeds in order to disguise their illegal origin.

“Work only with reputable business partners”

In compliance with all laws related to this matter, Alstom conducts business with reputable partners. Employees need to be cautious with the way payments are made to detect if irregularities may exist and with partners who demonstrate suspicious behaviours in their operations.

• Conflicts of interest

Conflicts of interest distort judgement. Alstom employees must avoid any situation that involves or may involve a conflict between their personal interests (or those of family members or relatives) and those of the Group.

To protect employees and Alstom from actual or apparent conflicts of interest, employees must not make or hold any investments in a supplier, customer, competitor, consulting company or any business partner if the nature of such investments might affect a business decision taken on behalf of Alstom. Employees must not deal directly with a business partner that can be a customer, a supplier, an agent, a consultant or any other third party, if they or their family members or relatives have an interest in such third parties. If such situations arise, employees must clearly inform their Unit manager of the matter and obtain written approval to proceed.

“Raise any potential conflict of interest with your management”

Employees must refrain from accepting outside work from a supplier, customer or competitor and should not be involved in any outside work that may adversely affect their performance or judgement on the job. Employees must disclose any outside employment to their manager.

• Gifts and hospitality

Alstom aims to ensure that any business decisions taken by its employees, customers or suppliers are made solely through the proper business channels — fundamentally based on competitiveness, performance and the quality of the products and technologies it offers — and are not driven by any form of personal improper advantage or conflict of interest.

In some cultures, good business relations may sometimes involve the exchange of symbolic gifts and hospitality. Employees must not offer, accept or authorise a family member or relative to accept gifts, money, loans, invitations or any other form of special treatment from anyone involved in business dealings with the Group, if the ultimate goal is to influence business decisions.

“Do not allow decisions to be influenced”

Employees may accept or offer, on behalf of Alstom, an occasional business meal invitation or an occasional non-pecuniary symbolic gift of low value if it can be reciprocated on another occasion. Any employee required to offer or accept a gift or invitation of value as a result of protocol, courtesy or other reasons must first inform his or her Unit manager and the Legal department.

A socially responsible company

“Promote sustainable development”

Alstom applies its policies and standards in all countries in which it is present. The Group respects the cultures of local communities with which it interacts and takes into account the interests of its different stakeholders.

• Protecting the environment

Alstom has given itself the ambition and the means to make a significant contribution to environmental protection through the systems, equipment and services it sells. The Group's core activities are focused on providing advanced technology and services to improve the management of natural resources, significantly reduce emissions and greenhouse gas effects and enhance the quality of life, while contributing to economic and social progress. Alstom also communicates to its customers information on the environmental impact of its products.

“Be recognised as a reference in this domain”

Furthermore, Alstom designs its equipment and manufacturing processes for minimum consumption of energy, eliminates hazardous products and favours materials that can be recycled. Alstom includes the environmental impact in the criteria for major decisions. At all manufacturing sites and offices, this impact is managed in line with the rules set out in the Environment, Health and Safety (EHS) policy and covered by quarterly reports. Each Unit is responsible for setting its own targets in line with the policy pursued by the Group and the Sectors. In their day-to-day activities, all employees contribute to this collective effort.

• Community relations

Alstom takes into account the social, economic and environmental interests of local communities. The Group encourages its employees to build relations with local institutions, universities and schools.

“Be involved in communities”

Alstom encourages its employees to volunteer and play a role in the local community. Activities undertaken by employees on their own initiative are done so in their name and in their own time. Conflicts of interest are to be carefully avoided.

• Political contributions and activity

“No promotion of particular political interests”

Political contributions are often subject to national laws and vary from country to country. Even when legally permitted, such contributions can be a source of abuse or otherwise perceived as a questionable practice. Alstom's policy is not to make contributions, financial or in kind, to political parties or organisations, or to individual politicians.

Alstom respects the rights of its employees to participate as individuals in their community and civic affairs. This must be done at a personal level, in their own time and at their own expense, consistent with applicable laws. Alstom's stationery, funds and other property must not be used for personal political activities. Employees need to carefully separate their own political activities from Alstom activities and avoid any conflict of interest.

• Charitable contributions

“Enhance Alstom's reputation as a good citizen”

Charitable contributions made in the Group's name or using its financial resources are permitted as long as they comply with applicable laws and regulations. Contributions should have relevance to the community in which Alstom operates and must effectively serve the purpose of the charitable organisation concerned while enhancing Alstom's reputation as a good citizen. Charitable contributions must not be made without prior written approval and must be properly recorded.

• Sponsorship

Sponsorship is part of the marketing and communication strategy. It is authorised in compliance with applicable laws and regulations and solely within the framework of the Group's communications policy.

“Reflect Alstom's communications policy”

Decisions to engage the Group in any sponsorship is subject to prior approval from the Communications departments (Corporate or Sectors) and must be properly recorded.

Human Resources

“Encourage individual and collective expression”

It is Alstom's policy to fully comply with the United Nations Universal Declaration of Human Rights and with the International Labour Organization's Fundamental Conventions.

In line with these principles, Alstom applies a human resources policy based on fair treatment and respect for individuals, their dignity, rights and individual liberties, and promotes their involvement in company life. The Group promotes all forms of dialogue with both individual employees and their representatives.

• Health and safety

Alstom is committed to providing a safe and healthy work environment at all its sites, offering the same high standards wherever it has operations. These standards are set out in the

Environment, Health and Safety (EHS) policy and apply to employees and sub-contractors working at Alstom's sites or under Alstom's supervision at customer sites.

"Promote a safe work environment"

Measures to offset any risk related to health and safety issues are applied at all sites and throughout projects. These measures are implemented in partnership with the relevant bodies and committees.

Employees are responsible for reporting any hazardous situations they may witness, or any incidents indicating such risks, and for helping to implement preventive measures. Safety guidelines must be strictly adhered to.

• Security of employees

"Limit risks"

Alstom does its utmost to protect its employees, wherever they are working. The Group issues regular instructions to inform people of risks and to set out procedures to be followed, such as in the event of unstable political situations, criminal acts or health matters. All employees should familiarise themselves with these regularly updated instructions, particularly with regard to business travel.

• Social relations

"Collective interest"

Alstom respects the right of all employees to form and join trade unions and workers' organisations of their choice and to organise and bargain collectively. The social relations policy recognises that differences are a source of strength for the Group. Alstom respects the role and responsibilities of the social partners and commits to communicating and negotiating openly to address issues of collective interest.

• Equal opportunity and diversity

Alstom employees are required to comply with all laws and regulations forbidding any discrimination with respect to age, race, gender, ethnic origin, nationality, religion, health, disability, marital status, sexual preference, political or philosophical opinions, trade-union membership or other characteristics protected by applicable law.

"No discrimination"

Alstom does not tolerate any form of harassment, sexual, physical or psychological, coercion or bullying. If employees observe or experience any form of abuse, they can report it to their HR management. No adverse action can be undertaken against employees making such a good faith report. The recruitment process is exclusively based on the applicant's qualifications and skills. Remuneration is solely determined on the basis of the employee's contribution to the Group.

The recruitment, training and personal development of employees from different backgrounds is an important asset for Alstom. The Group seeks to recognise and value these differences by building teams that reflect the markets and communities in which it operates.

• Career management for employees

"Promote personal development"

As part of Alstom's "It's all about people!" policy, the Group aims to promote personal development through regular face-to-face interviews between employees and their managers. These interviews help focus on required skills, achievements, development plans and career paths according to individual needs and aspirations and business needs. Training programmes and collaborative ways of working also contribute to this process. Looking for solutions adapted to the skills of employees is maintained throughout their career, even in the event of reorganisation.

• Data privacy

Alstom and each of its employees must be particularly attentive to laws and regulations concerning privacy and protection of information concerning individuals, employees or third parties and comply with them.

"Respect individual rights"

Employees who have access to personal data shall be only those whose function and responsibility specifically include the handling of personal data; the right of access is restricted according to the nature and scope of the individual function and responsibility. Alstom does not communicate personal information to third parties, except to the extent necessary and permitted by applicable laws or regulations.

Protecting Alstom's assets

All Alstom employees should do their utmost to protect the Group's assets. Alstom's funds and assets must not be used for illegal purposes or for purposes not related to Alstom's activities.

Employees should not appropriate any of Alstom's assets for their own use or make them available to others for a non-

Alstom use. Employees must not use Alstom's assets for personal gain or personal business, nor may they allow any other person not employed or authorised by the Group to use them. Misappropriation or theft of these assets may give rise to sanctions and may constitute a violation of law, giving rise to civil or criminal prosecution.

> "Do not appropriate Alstom's assets"

Alstom's assets are not only physical or tangible items (such as funds, supplies, patented inventions, or computer and telephone networks); they also include intangibles (such as ideas, concepts or know-how) which employees develop in the course of their work for Alstom. In addition, assets cover customer/supplier lists and other market data, along with any information to which employees have access as a result of their work responsibilities.

• Respecting confidential information

Employees who may have access to confidential and proprietary data relating to Alstom's business activities, including information on customers and suppliers must only be those whose function and responsibility specifically include the handling, use and communication of such data. The right of access is restricted according to the nature and scope of the individual function and responsibility. Moreover, any employee who comes into possession of confidential or proprietary information must keep such information confidential and use it only for authorised purposes.

> "Share information with caution"

Examples of confidential information include, but are not limited to, results, forecasts and other financial data, human resources and personal data, information with respect to acquisitions and divestitures, new products and orders. Examples of proprietary information include, but are not limited to, business strategies, product improvements, technical information, systems, inventions, trade secrets or know-how developed or acquired by Alstom. This definition includes matters covered by secrecy agreements.

Employees who are not sure whether they may properly disclose or act on information in their possession should seek guidance from their manager. Employees' obligations with respect to such information continue beyond their term of employment.

• Intellectual property

> "One of our most valuable assets"

Alstom's intellectual property rights which include patents, know-how, trade secrets, trademarks, domain names, industrial designs and copyrights, are one of its most valuable assets, and are therefore protected by law, whenever possible. Employees have a duty to safeguard these assets. Alstom ensures that valid intellectual property of others are respected and not infringed by its employees.

• Using Group communications resources

The Group's communications resources – email, voicemail, internet, telephone (including mobile phone) and other means of communication – are the property of Alstom and are to be used for professional purposes.

> "Not to be used for improper purposes"

Their use for private purposes is based on the recognition that private and business lives are closely linked and that the right balance between the two is beneficial to Alstom and its employees. However, such use should be limited to what is reasonable and necessary in the circumstances. Employees are strictly forbidden from using the Alstom email system or the internet or any other means of communication for any improper purpose, and must avoid the transmission or receipt of messages or images that may be viewed as insulting, offensive or demeaning to the individual.

• Insider dealing

In the normal course of business, some employees may have access to information that can affect the value of shares, options or other securities, if such information were to become public. Since Alstom is a publicly quoted company, it is subject to the securities laws and regulations of several jurisdictions which regulate disclosure of information to the public.

> "Access to privileged information imposes obligations"

Information which may affect the value of Alstom's shares, options or other securities, is considered "inside" information and must be kept confidential until publicly disclosed by the Group. Acting on this information for personal gain or disclosing it to anyone else before it has been officially released is likely to violate securities laws and is not in accordance with Alstom policy. Penalties for violations are severe and can include fines and imprisonment.

This rule also applies to securities issued by other companies, including customers, suppliers and any business partner, listed on any stock exchange, should the employee have privileged information concerning that company.

• Communication with the media and investors

Alstom develops active communications to reinforce its image among customers, opinion leaders, analysts, investors and the public. Alstom is a publicly quoted company and

any communication with the media or analysts may affect Alstom's image or reputation and must be carefully reviewed and controlled.

Media relations are the responsibility of Corporate and Sector Communications departments. All statements to the media or responses to inquiries from the media must be handled through the Communications departments or coordinated with them. The Investor Relations department is responsible for all financial communications with analysts and investors. Any communication from an analyst or investor requesting information relating to Alstom should be forwarded to the Investor Relations department, which will deal with the matter.

"Under strict control"

Unless approved in advance by the Communications departments, employees are not authorised to represent Alstom on internet social networking platforms like social forum web sites, blogs or chat rooms.

The Code of Ethics cannot cover every conceivable situation to which an employee could potentially be exposed. Each of us must use common sense and judgement in applying these principles, refer to existing rules and guidelines, and seek advice either from management or from the relevant VP Human Resources and/or the General Counsel and/or the SVP Ethics & Compliance, if in doubt.

IMPLEMENTATION

The Alstom Integrity Programme is being implemented and monitored throughout the Group under the responsibility of the SVP Ethics & Compliance. Alstom is engaged in an Ethics & Compliance certification process. Its rules, procedures and guidelines for dealing with sales consultants were successfully certified in March 2009 by Ethic Intelligence, an international independent body, after an audit performed by SGS, a Swiss company.

Awareness and training

These principles are conveyed through rules, procedures and instructions, along with relevant training to promote the widest possible distribution within the Group, via the Alstom Integrity Programme introduced by the Ethics & Compliance department. The Alstom Integrity Programme is to be applied scrupulously in all areas of the Group and in all countries where Alstom is present.

The Code of Ethics is available to all Alstom employees on the Group's intranet site and is published on the Alstom internet site for our stakeholders. A practical guide to the Code of Ethics is available to all Alstom employees through an intranet-based e-learning programme. Other ethics e-learning programmes are available for employees who need them in their daily activities.

Alstom values and ethics are included in the induction programme for new employees. In addition, employees have access to the Ethics section on the Alstom intranet site where they can find detailed guidelines and tools.

Consequences of violations of corporate policies

All employees are personally responsible for ensuring that their conduct and that of those reporting to them fully complies with this Code of Ethics and all applicable Corporate Instructions. Violations of certain instructions may have a severe and/or lasting impact on Alstom's image, business relations and financial situation. Where circumstances warrant, Alstom may seek civil or criminal prosecution and apply relevant internal measures.

The Code of Ethics serves as a guide to our standards and does not replace the Group Instructions, which outline the rules of conduct summarised in this document. All employees must refer to the operation rules relevant to their responsibilities detailed in the Group's "e-Book", compilation of the Group Instructions as well as the Sectors directives, available on the Alstom intranet site.

OUR CORE VALUES

We share three essential values - Trust, Team and Action - corresponding to the way in which the Group has defined its fundamental rules.

Trust

Alstom, with its activities, several management structures, units, production sites and countries, is by definition a complex company. Mutual trust between colleagues and management is essential for the proper conduct of our business and the efficient management of our projects.

This trust is built on the **responsibility** given to each decision-maker, the **delegation** of authority given and the **belief** of all employees in the importance of their role in the Group's well-being and development. It is also built on the **openness** of each individual to his or her professional environment, ensuring **transparency,** which is vital in the management of risks.

Team

Alstom's business is based on delivering projects which require our collective **discipline** and efforts to execute them successfully, and **networking** to ensure we take full advantage of all the competencies available. This team spirit, supported by the desire to **develop each employee,** extends to our collaboration with our partners and customers.

Action

Alstom commits to delivering products and services to its customers which meet their expectations in terms of price, quality and delivery schedules. To meet our commitments to our customers, action is a priority for all of us.

Action is built on **strategic thinking,** established at Group and Sector level, and underlined by our sense of **customer orientation,** integrated into our daily activities and into each project. Action involves adopting a **sense of urgency** in our activities, **speed of execution** to differentiate us from our competitors, and the ability to **report** ensuring the achievement of our business objectives. **Leadership** is essential to drive action.

ALSTOM

SECTION B
PART B TECHNICAL PROPOSAL AND
STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

QUALIFICATIONS AND CERTIFICATIONS

NOTE: The Authority reserves the right to audit compliance with respect to each of the required statements and certifications in the forms submitted by Offerors, including but not limited to the Domestic U.S. Content Certification, Domestic U.S. Content Worksheet, and Final Assembly of Production (Non-Pilot) Vehicles in Massachusetts.

Questions Concerning Eligibility

Provide short answers (and attach relevant documents) to the following questions and requests:

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.

   Attached.

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.

   The sole shareholder of ALSTOM Transportation Inc. is ALSTOM Transport Holding US Inc. 212-551-7262.

3. Provide the names, title and telephone numbers of all officers.

Guillaume Mehlman	PRESIDENT	(212) 551-7262
Joseph Quigley	VICE PRESIDENT	(800) 717-4477
Scott Sherin	VICE PRESIDENT	(800) 717-4477
Stephanie Brun-Brunet	VICE PRESIDENT	(212) 551-7262
Alexandre-Pierre Mery	VICE PRESIDENT	(212) 551-7262
Derek Hurst	VICE PRESIDENT	(800) 717-4477
Frederic Matsoukis	TREASURER	(800) 717-4477
Richard D. Austin	SECRETARY	(865) 693-7550
Joseph Sce	ASSISTANT TREASURER	(860) 688-1911
Michael Tolpa	ASSISTANT TREASURER	(860) 688-1911
Stacey Joslin	ASSISTANT SECRETARY	(212) 551-7262

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.

Yes. ALSTOM Transportation Inc. has two contracts with MBTA as follows:

a. Formal Contract No. 674 for Midlife Overhaul of 74 Bi-Level Commuter Rail Coaches, RFP No. CAP 177-08, Technical Specification SR-43, dated [August 27, 2012]; and

b. Formal Contract No. 673 for Green Line Type 7 Selective Systems Overhaul, RFP No. CAP 77-09, Technical Specification VE-09-028, dated August 23, 2012.

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.

No.

6. Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.

No.

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.

BNSF Railway Company / ALSTOM Transportation Inc. Arbitration

On November 4, 2002, BNSF Railway Company ("**BNSF**") and ATI entered into a Maintenance Agreement for the maintenance of a fleet of 434 coal-hauling locomotives with a 12-year term starting from March 2003. On June 2009, BNSF made use of a clause under the contract allowing termination of contract without cause with a 30-day notice. A dispute arose thereafter between the parties on the exercise of this right and the level of compensation due to ATI as a result of such termination. This dispute was brought to an arbitration panel. On January 23, 2012, the arbitration panel issued its final award in favor of ATI and a motion to confirm this award was filed with the United States District Court for the Northern District of Texas. On November 7, 2013, the District Court denied the motion to confirm the arbitral award and the matter is now pending before the Fifth Circuit Court of Appeals.

[WMATA]

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

James T. Haggerty
Senior Vice President
Marsh Casualty - Advisory Specialist
20 Church Street
Hartford, CT 06103
Direct Dial: (860) 723-5759
Main Reception Phone: (860) 723-5600
Fax: (212) 948-5235
Email:James.Haggerty@marsh.com

9. Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.

Information to be provided upon our receipt.

10. Has the business or any of the business's owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?

No.

11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, provide the last three (3) years audited financial statements for each entity.

See attached Consolidated Financial Statements

12. Provide the business's current code of business ethics or equivalent.

Attached.

The Commonwealth of Massachusetts
Secretary of the Commonwealth
State House, Boston, Massachusetts 02133

William Francis Galvin
Secretary of the
Commonwealth

Date: March 03, 2014

To Whom It May Concern :

I hereby certify that according to the records of this office,

ALSTOM TRANSPORTATION INC.

a corporation organized under the laws of

NEW YORK

on **September 22, 1986** was qualified to do business in this Commonwealth on

April 11, 2001 under the provisions of the General Laws, and I further certify that said

corporation is still qualified to do business in this Commonwealth.

I also certify that said corporation is not delinquent in the filing of any annual reports required to

date.

In testimony of which,
I have hereunto affixed the
Great Seal of the Commonwealth
on the date first above written.

William Francis Galvin

Secretary of the Commonwealth

ALSTOM

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

ALSTOM

NOTE 1. PRESENTATION OF THE GROUP

Alstom ("the Group") serves the power generation market through its Power Sector, and the rail transport market through its Transport Sector. The Group designs, supplies, and services a complete range of technologically-advanced products and systems for its customers, and possesses a unique expertise in systems integration and through-life maintenance and services.

By its acquisition on 7 June 2010 of Areva T&D's transmission business, Alstom has completed a decisive stage in its development by forming a new sector, named Alstom Grid, to supplement the existing two sectors.

- ***Power***

Power provides steam turbines, gas turbines, wind turbines, generators and power plant engineering, as well as hydro equipments and systems. It also focuses on boilers, emissions control equipment in the power generation, as well as petrochemical and industrial markets, and serves demand for upgrades and modernisation of existing power plants. Finally, it provides service activities in all geographical markets.

- ***Transport***

Transport provides equipment, systems, and customer support for rail transportation activities, including passenger trains, locomotives, signalling equipment, rail components and services.

- ***Grid***

Grid provides equipment to transport electricity over long distances and manage the electrical networks . Its offering encompasses advanced technologies and expertise in key domains such as power electronics, ultra high voltage, direct current interconnections, integration of renewables into the grid and network management solutions.

The consolidated financial statements are presented in euro and have been authorised for issue by the Board of Directors held on 3 May 2011. In accordance with French legislation, they will be final once approved by the shareholders of Alstom at the Annual General Meeting convened for 28 June 2011.

ALSTOM

NOTE 2. ACCOUNTING POLICIES

2.1 Basis of preparation of the consolidated financial statements

Alstom consolidated financial statements for the year ended 31 March 2011 have been prepared:

- in accordance with the International Financial Reporting Standards (IFRS) and interpretations published by the International Accounting Standards Board (IASB) and endorsed by the European Union and whose application was mandatory as of 1 April 2010;
- using the same accounting policies and measurement methods as at 31 March 2010, with the exceptions of changes required by the enforcement of new standards and interpretations as described below.

The full set of standards endorsed by the European Union can be consulted on the website of the European Commission at:
http://ec.europa.eu/internal_market/accounting/ias/index-fr.htm

2.1.1.Changes in accounting policies due to new, revised or amended standards and interpretations mandatorily applicable for financial periods beginning on 1 April 2010

- ***Revised IFRS 3 – Business combinations***

Revised IFRS 3 is applicable prospectively to business combinations carried out on or after 1 April 2010.
The acquisition method (also known as purchase accounting method) is confirmed, but the following main changes have been introduced:

- Acquisition-related costs are recorded as an expense in the period in which they are incurred.
- Earn-outs are initially recorded at fair value and adjustments made beyond the 12-month measurement period following the acquisition are systematically recognised through profit or loss.
- For each business combination, any non controlling interest in the acquiree may be measured either at the acquisition-date fair value, leading to the recognition of the non controlling interest's share of goodwill (full goodwill method) or at the non controlling interest's proportionate share of the acquiree's identifiable net assets, resulting in recognition of only the share of goodwill attributable to equity holders of the parent (partial goodwill method).
- In case of a step-acquisition that leads to the Group acquiring control of the acquiree, the equity interest previously held by the Group is remeasured at its acquisition-date fair value and any resulting gain or loss is recognised in profit or loss.

* ***Revised IAS 27 – Consolidated and separate financial statements***

Under revised IAS 27, the consolidated financial statements of a group are presented as those of a single economic entity with two categories of owners: the owners of the parent and those of the owners of non-controlling interests in the subsidiaries of the group.
As a result of this new approach,

* Changes in ownership interest that do not result in the acquisition or loss of control of an entity do not affect profit or loss, but lead to a new allocation of equity between equity holders of the parent and non controlling interests.
* In absence of explicit agreements to the contrary, subsidiaries' losses are systematically allocated between equity holders of the parent and non controlling interests based on their respective ownership interests even if this results in the non controlling interests having a deficit balance.

* ***Other new, revised or amended standards and interpretations***

The Group's consolidated financial statements are not affected by the enforcement of the other new, revised, or amended standards and interpretations becoming effective in the European Union starting from 1 April 2010.

2.1.2.New standards and interpretations not yet mandatorily applicable

The Group has not opted for an early application in the consolidated financial statements at 31 March 2011 of the already released chapters of IFRS 9- Financial instruments, whose effective date is 1 April 2013, subject to endorsement by the European Union.
The Group's consolidated financial statements are not affected by other new, revised or amended standards or interpretations issued, but not yet mandatorily applicable.
At this stage, the Group considers that the impact of the implementation of these requirements cannot be determined with sufficient accuracy.

2.1.3.Reminder of IFRS 1 transition options

When preparing the opening balance sheet at transition date (1 April 2004), the Group has applied the following exemptions as authorised by IFRS 1:

* Business combinations: the Group elected not to apply retrospectively IFRS 3 to business combinations undertaken prior to 1 April 2004,
* Translation differences: all cumulative translation differences at 1 April 2004 have been transferred to the retained earnings.

2.2. Use of estimates

The preparation of the consolidated financial statements in conformity with IFRS requires management to make various estimates and to use assumptions regarded as realistic and reasonable. These estimates or assumptions could affect the value of the Group's assets, liabilities, equity, net income and contingent assets and liabilities at the closing date. Management reviews estimates on an ongoing basis using information currently available. Actual results may differ from those estimates due to changes in facts and circumstances.

The accounting policies most affected by the use of estimates are the following:

- **Revenue and margin recognition on construction and long-term service contracts and related provisions**

The Group recognises revenue and gross margin on construction and long-term service contracts using the percentage of completion method based on milestones; when a project review indicates a negative gross margin, the loss related to work not yet performed is immediately recognised.

Recognised revenue and margin are based on estimates of total expected contract revenue and cost, which are subject to revisions as the contract progresses. Total expected revenue and cost on a contract reflect management's current best estimate of the probable future benefits and obligations associated with the contract. Assumptions to calculate present and future obligations take into account current technology as well as the commercial and contractual positions, assessed on a contract-by-contract basis. The introduction of technologically-advanced products exposes the Group to risks of product failure significantly beyond the terms of standard contractual warranties applicable to suppliers of equipment only.

Obligations on contracts may result in penalties due to late completion of contractual milestones, or unanticipated costs due to project modifications, suppliers or subcontractors' failure to perform or delays caused by unexpected conditions or events. Warranty obligations are affected by product failure rates, material usage and service delivery costs incurred in correcting failures.

Although the Group makes individual assessments on contracts, there is a risk that actual costs related to those obligations may exceed initial estimates. Estimates of contract costs and revenues at completion in case of contracts in progress and estimates of provisions in case of completed contracts may then have to be re-assessed.

- **Estimate of provisions relating to litigations**

The Group identifies and analyses on a regular basis current litigations and measures, when necessary, provisions on the basis of its best estimate of the expenditure required to settle the obligation at the balance sheet date. These estimates take into account information available and different possible outcomes.

- **Valuation of deferred tax assets**

Management judgment is required to determine the extent to which deferred tax assets can be recognised. Future sources of taxable income and the effects of the Group global income tax strategies are taken into account in making this determination. This assessment is conducted through a detailed review of deferred tax assets by jurisdiction and takes into account past, current and future performance deriving from existing contracts in the order book, the budget and the three-year plan, and the length of carry back, carry forwards and expiry periods of net operating losses.

- **Measurement of post-employment and other long-term defined employee benefits**

The measurement of obligations and assets related to defined benefit plans makes it necessary to use several statistical and other factors that attempt to anticipate future events. These factors include assumptions about the discount rate, the expected return on plan assets, the rate of future compensation increases as well as withdrawal and mortality rates. If actuarial assumptions materially differ from actual results, it could result in a significant change in employee benefit expense recognised in the income statement, actuarial gains and losses recognised in equity and prepaid and accrued benefits.

- **Valuation of assets**

The discounted cash flow model used to determine the recoverable value of the groups of cash generating units to which goodwill is allocated includes a number of inputs including estimates of future cash flows, discount rates and other variables, and then requires significant judgment.

Impairment tests performed on intangible and tangible assets are also based on assumptions. Future adverse changes in market conditions or poor operating results from underlying assets could result in an inability to recover their current carrying value.

- **Inventories**

Inventories, including work in progress, are measured at the lower of cost or net realisable value. Write-down of inventories are calculated based on an analysis of foreseeable changes in demand, technology or market conditions in order to determine obsolete or excess inventories. If actual market conditions are less favourable than those projected, additional inventory write-downs may be required.

ALSTOM

2.3. Significant accounting policies

2.3.1. Consolidation methods

- **Subsidiaries**

Entities over which the Group exercises exclusive control are fully consolidated. Exclusive control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of a company so as to obtain benefits from its activities, whether it holds shares or not.

Inter company balances and transactions are eliminated.

Results of operations of subsidiaries acquired or disposed of during the year are recognised in the consolidated income statements as from the date of acquisition or up to the date of disposal, respectively.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the equity attributable to the equity holders of the parent. Non-controlling interests consist of the amount of those interests at the date of the original business combination and their share of changes in equity since the date of the combination. In absence of explicit agreements to the contrary, subsidiaries' losses are allocated between equity holders of the parent and minority interests based on their respective ownership interests even if this results in the minority interests having a deficit balance.

- **Interests in joint ventures**

Entities over which the Group exercises joint control are consolidated according to the proportionate method whereby the Group's share of the joint ventures' results, assets and liabilities is recorded in the consolidated financial statements.

- **Investments in associates**

Entities in which the Group exercises significant influence but not control, are accounted for under the equity method.

Under the equity method, investments in associates are carried in the consolidated balance sheet at cost. The group's share of its associates' profits or losses is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Losses of an associate in excess of the Group's interest in that associate are not recognised, except if the Group has a legal or implicit obligation.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the associate recognised at the date of acquisition is recognised as goodwill. The goodwill is included within the carrying amount of the investment and is assessed for impairment as part of the investment.

2.3.2. Sales and costs generated by operating activities

- **Measurement of sales and costs**

The amount of revenue arising from a transaction is usually determined by the contractual agreement with the customer. In the case of construction contracts, claims are considered in the determination of contract revenue only when it is highly probable that the claim will result in additional revenue and the amount can be reliably estimated.
Penalties are taken into account in reduction of contract revenue as soon as they are probable.

Production costs include direct costs (such as material, labour and warranty costs) and indirect costs. On the basis of the funding required for the execution of contracts, borrowing costs may be attributed to construction contracts whose execution period exceeds one year. Warranty costs are estimated on the basis of contractual agreement, available statistical data and weighting of all possible outcomes against their associated probabilities. Warranty periods may extend up to five years. Selling and administrative expenses are excluded from production costs.

- **Recognition of sales and costs**

Revenue on sale of manufactured products is recognised when the significant risks and rewards of ownership are transferred to the customer, which generally occurs on delivery. Revenue on short-term service contracts is recognised on performance of the related service. All production costs incurred or to be incurred in respect of the sale are charged to cost of sales at the date of recognition of sales.

Revenue on construction contracts and long-term service agreements is recognised based on the percentage of completion method: the stage of completion is assessed by milestones which ascertain the completion of a physical proportion of the contract work or the performance of services provided for in the agreement. The revenue for the period is the excess of revenue measured according to the percentage of completion over the revenue recognised in prior periods.

Cost of sales on construction contracts and long-term service agreements is computed on the same basis. The cost of sales for the period is the excess of cost measured according to the percentage of completion over the cost of sales recognised in prior periods. As a consequence, adjustments to contract estimates resulting from work conditions and performance are recognised in cost of sales as soon as they occur, prorated to the stage of completion.

When the outcome of a contract cannot be estimated reliably but the contract overall is expected to be profitable, revenue is still recognised based on milestones, but margin at completion is adjusted to nil.

When it is probable that contract costs at completion will exceed total contract revenue, the expected loss is recognised immediately as an expense.
Bid costs are directly recorded as expenses when a contract is not secured.

With respect to construction contracts and long-term service agreements, the aggregate amount of costs incurred to date *plus* recognised margin *less* progress billings is determined on a contract-by-contract basis. If the amount is positive, it is included as an asset designated as "Construction contracts in progress, assets". If the amount is negative, it is included as a liability designated as "Construction contracts in progress, liabilities".
The caption "Construction contracts in progress, liabilities" also includes down payments received from customers.

- **Recognition of overhead expenses**

Research expenditure is expensed as incurred. Development costs are expensed as incurred unless the project they relate to meets the criteria for capitalisation (see Note 2.3.9). Selling and administrative expenses are expensed as incurred.

2.3.3. Income from operations

Income from operations is the indicator used by the Group to present the level of operational performance that can be used as part of an approach to forecast recurring performance. This complies with the recommendation 2009-R03 of the CNC, the French standard setter, on the format of financial statements of entities applying IFRS.
Income from operations includes gross margin, research and development expenditure, selling and administrative expenses. It includes in particular the service cost of employee defined benefits, the cost of share-based payments and employee profit sharing, foreign exchange gains or losses associated with operating transactions and capital gains or losses on disposal of intangible and tangible assets arising from ordinary activities.

2.3.4. Other income and other expenses

Other income and expense are representative of items which are inherently difficult to predict due to their unusual, irregular or non-recurring nature.

Other income include capital gains on disposal of investments or activities and capital gains on disposal of tangible and intangible assets arising from activities disposed of or facing restructuring plans as well as any income associated to past disposals.

Other expenses include capital losses on disposal of investments or activities and capital losses on disposal of tangible and intangible assets arising from activities disposed of or facing restructuring plans as well as any costs associated to past disposals, restructuring costs, costs incurred to become business combinations effective and amortisation expense of assets exclusively acquired in the context of business combinations (margin in backlog, customer relationships, margin in inventory), significant impairment losses on assets, and a portion of post-employment and other long term defined benefit expense (amortisation of unrecognised prior service cost, impacts of curtailments and settlements and amortisation of actuarial gains and losses referring to long-term benefits other than post-employment benefits).

2.3.5. Financial income and expense

Financial income and expense include:

- Interest income representing the remuneration of the cash position;
- Interest expense related to the financial debt (financial debt consists of bonds, the debt component of compound instruments, other borrowings and lease-financing liabilities);
- Other expenses paid to financial institutions for financing operations;
- The financial component of the cost of employee defined benefits (interest cost and expected return on assets);
- Dividends received from non consolidated investments;
- Foreign exchange gains and losses associated with financing transactions;
- Other income or expense from cash and cash equivalents and marketable securities.

2.3.6. Translation of financial statements denominated in currencies other than euro

The Group's consolidated financial statements are presented in euros.

Functional currency is the currency of the primary economic environment in which a reporting entity operates, which in most cases, corresponds to the local currency. However, some reporting entities may have a functional currency different from local currency when that other currency is used for the entity's main transactions and faithfully reflects its economic environment.

Assets and liabilities of entities whose functional currency is other than the euro are translated into euro at closing exchange rate at the end of each reporting period while their income and cash flow statements are translated at the average exchange rate for the period. The currency translation adjustments resulting from the use of different currency rates for opening balance sheet positions, transactions of the period and closing balance sheet positions are recorded in other comprehensive income. Translation adjustments are transferred to the consolidated income statement at the time of the disposal of the related entity.

Goodwill and fair value adjustments arising from the acquisition of entities whose functional currency is not euro are designated as assets and liabilities of those entities and therefore denominated in their functional currencies and translated at the closing rate at the end of each reporting period.

2.3.7. Foreign currency transactions

Foreign currency transactions are initially recognised by applying to the foreign currency amount the spot exchange rate between the functional currency of the reporting unit and the foreign currency at the date of the transaction. Currency units held, assets to be received and liabilities to be paid resulting from those transactions are re-measured at closing exchange rates at the end of each reporting period. Realised exchange gains or losses at date of payment as well as unrealised gains or losses deriving from re-measurement are recorded within income from operations when they relate to operating activities or within financial income or expense when they relate to financing activities.

Since the Group is exposed to foreign currency volatility, the Group puts in place a significant volume of hedges to cover this exposure. These derivatives are recognised on the balance sheet at their fair value at the closing date. Providing that the relationships between the foreign currency exposure and the related derivatives are qualifying relationships, the Group uses the specific accounting treatments designated as hedge accounting. A relationship qualifies for hedge accounting if, at the inception of the hedge, it is formally designated and documented and if it proves to be highly effective throughout the financial reporting periods for which the hedge was designated.

Hedging relationships may be of two types:

- Cash flow hedge in case of hedge of the exposure to variability of cash flows attributable to highly probable forecast transactions;
- Fair value hedge in case of hedge of the exposure attributable to recognised assets, liabilities or firm commitments.

- **Cash flow hedge**

When cash flow hedge accounting applies, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in other comprehensive income. When the forecast transaction results in the recognition of a financial asset or liability, the amounts previously recognised directly in other comprehensive income are recycled into the income statement. When the forecast transaction results in the recognition of a non financial asset or liability (for instance, inventories or construction contracts in progress), the gain or loss that was directly recognised in equity is included in the carrying amount of the asset or liability.

- **Fair value hedge**

When fair value hedge accounting applies, changes in the fair value of derivatives and changes in the fair value of hedged items are both recognised in the income statement and offset each other up to the gain or loss on the effective portion on the hedging instrument.

Whatever the type of hedge, the ineffective portion on the hedging instrument is recognised in the income statement. Realised and unrealised exchange gains and losses on hedged items and hedging instruments are recorded within income from operations when they relate to operating activities or within financial income or expense when they relate to financing activities.

As the effective portion on the hedging instrument offsets the difference between the spot rate at inception of the hedge and the effective spot rate at the outcome of the hedge, sales and costs resulting from commercial contracts are recognised at the spot rate at inception of the hedge throughout the life of the related commercial contracts, provided that the corresponding hedging relationships keep on qualifying for hedge accounting.

The Group also uses export insurance policies to hedge its currency exposure on certain contracts during the open bid period as well as after the award of the contracts. During the bid period, the fair values of these insurance instruments cannot be reliably determined due to the uncertainty on the award of commercial contracts. As a consequence, at this stage, the instruments are not recognised on the balance sheet. When commercial contracts are awarded, insurance instruments are recognised and remeasured in the same way as foreign currency exchange forward contracts.

2.3.8. Goodwill

Goodwill arising from a business combination is measured as the difference between:

- the fair value of the consideration transferred for an acquiree plus the amount of any non-controlling interests of the acquiree; and
- the net fair value of the identifiable assets acquired and liabilities assumed at the acquisition date.

Initial estimates of consideration transferred and fair values of assets acquired and liabilities assumed are finalised within twelve months after the date of acquisition and any adjustments are accounted for as retroactive adjustments to goodwill. Beyond this twelve-month period, any adjustment is directly recognised in the income statement.

Goodwill is not amortised but tested for impairment at least annually at closing date.

2.3.9. Intangible assets

- **Acquired intangible assets**

Acquired intangible assets are initially measured at cost and amortised on a straight-line basis over their estimated useful lives. Useful lives can extend up to twenty years due to the long-term nature of the underlying contracts and activities. The amortisation expense of assets acquired through ordinary transactions is recorded in cost of sales, research and development expenditure, selling expenses or administrative expenses, based on the function of the underlying assets. The amortisation expense of assets exclusively acquired in the context of a business combination (margin in backlog, customer relationships) is recognised as other expense.

- **Internally generated intangible assets**

Development costs are capitalised if and only if the project they relate to meets the following criteria:

- The project is clearly defined and its related costs are separately identified and reliably measured,
- The technical feasibility of the project is demonstrated,
- The intention exists to complete the project and to use or sell it,
- Adequate technical and financial resources are available to complete the project,
- It is probable that the future economic benefits attributable to the project will flow to the Group.

Capitalised development costs are amortised on a straight-line basis over the estimated useful life of the asset. The amortisation charge is reported in research and development expenses.

2.3.10. Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment loss. When an item of property, plant and equipment is made up of components with different useful lives, the total cost is allocated between the various components. Components are then separately depreciated.

Depreciation is computed using the straight-line method over the estimated useful lives of each component. The useful lives most commonly used are the following:

	Estimated useful life in years
Buildings	7-40
Machinery and equipment	3-20
Tools, furniture, fixtures and others	1-10

Useful lives are reviewed on a regular basis and changes in estimates, when relevant, are accounted for on a prospective basis. The depreciation expense is recorded in cost of sales, selling expenses or administrative expenses, based on the function of the underlying assets.

Borrowing costs that are attributable to an asset whose construction period exceeds one year are capitalised as part of the costs of the asset.

Property, plant and equipment acquired through finance lease arrangements or long-term rental arrangements that transfer substantially all the risks and rewards incidental to ownership are capitalised. They are recognised at their fair value at the inception of the lease, or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a financing obligation. Lease payments are apportioned between finance charges and repayment of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or the term of the relevant lease, when shorter.

Leases that do not transfer substantially all risks and rewards incidental to ownership are classified as operating leases. Rentals payable are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised on a straight-line basis over the lease term.

2.3.11. Impairment of goodwill, tangible and intangible assets

Goodwill and intangible assets not yet available for use are tested for impairment at least annually or when there are indicators that they may be impaired. Other intangible assets and tangible assets are tested for impairment only if there are indicators of impairment.

The impairment test methodology is based on a comparison between the recoverable amount of an asset and its net carrying value. A cash-generating unit (CGU) is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other groups of assets. If an asset does not generate cash inflows that are largely independent of other assets or groups of assets, the recoverable amount is determined at a cash-generating unit level.

For management purposes, goodwill acquired in a business combination is monitored at the level of Sectors as defined in Note 1: therefore goodwill is tested for impairment at the level of the group of cash-generating units constituting each Sector.

The recoverable amount is the higher of fair value less costs to sell and value in use. The valuation performed is based upon the Group's internal three-year business plan. Cash flows beyond this period are estimated using a perpetual long-term growth rate for the subsequent years. The recoverable amount is the sum of the discounted cash flows and the discounted terminal residual value. Discount rates are determined using the weighted-average cost of capital of each Sector.

If the recoverable amount of an asset or a cash-generating unit is estimated to be less than its carrying amount, the carrying amount is reduced to its recoverable amount and the impairment loss is recognised immediately in the income statement. In the case of goodwill allocated to a group of CGUs, the impairment loss is allocated first to reduce the carrying amount of goodwill and then to the other assets on a pro-rata basis of the carrying amount of each asset.

Impairment losses recognised in respect of goodwill cannot be reversed. The impairment losses recognized in respect of assets or cash-generating units may be reversed in a later period and recognized immediately in the income statement. The carrying amount is increased to the revised estimate of recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined, had no impairment loss been recognized in prior years.

2.3.12. Financial assets

- **Loans and deposits**

Loans are initially measured at their fair value, plus directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method. Deposits are reported as financial assets when their initial maturity is more than three months and as cash and cash equivalents in case of demand deposits or when the initial maturity is less than three months.

If there is any indication that those assets may be impaired, they are reviewed for impairment. Any difference between the carrying value and the impaired value (net realisable value) is recorded as a financial expense. The impairment loss can be reversed if the value is recovered in the future. In that case, the reversal of the impairment loss is reported as a financial income.

- **Investments and debt securities**

Investments in non consolidated companies are designated as available-for-sale financial assets. They are initially measured at their fair value, plus directly attributable transaction costs and subsequently re-measured at fair value.

A valuation model is used in case of unlisted securities. Changes in fair value are directly recognised in other comprehensive income until the security is disposed of or is determined to be impaired. On disposal or in case of significant or prolonged decline in the fair value, the cumulative gain or loss previously recognised in other comprehensive income is included in the profit or loss for the period. Unlike impairment losses recognised in respect of investments in a debt instrument, impairment losses recognised in respect of investments in equity instruments cannot be reversed through profit and loss.

When the fair value cannot be determined reliably, investments in non consolidated companies are measured at cost. Any impairment loss recognised for such investment is not reversed in a subsequent period, except when disposed of.

All debt securities that the Group has the expressed intention and ability to hold to maturity are designated as held-to-maturity financial assets. They are measured at amortised cost using the effective interest rate method, less any impairment loss recognised to reflect amounts expected not to be recoverable. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired and is measured as the difference between the investment's carrying value and the present value of the estimated future cash flows discounted at the effective interest rate computed at initial recognition. Impairment losses may be reversed through profit and loss in subsequent periods.

Marketable securities are securities held for trading which cannot be considered as cash and cash equivalents. They are designated as financial asset at fair value through profit or loss. Changes in fair value are reported as financial income or expense.

ALSTOM

- **Derivative financial instruments**

Derivative financial instruments are recognised and re-measured at fair value (see Note 2.3.7 for foreign currency hedging instruments and Note 2.3.18 for interest rate hedging instruments).

- **Receivables**

Receivables are initially recognised at fair value, which in most cases approximates the nominal value. If there is any subsequent indication that those assets may be impaired, they are reviewed for impairment. Any difference between the carrying value and the impaired value (net realisable value) is recorded within income from operations. The impairment loss can be reversed if the value is recovered in the future. In that case, the reversal of the impairment loss is reported within income from operations.

2.3.13. Inventories

Raw materials and supplies, work in progress and finished products are stated at the lower of cost, using the weighted average cost method, or net realisable value. Inventory cost includes direct material and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

2.3.14. Cash and cash equivalents

Cash and cash equivalents consist of cash and short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash, which are subject to an insignificant risk of change in value.
Bank overdraft are shown within borrowings in current liabilities on the balance sheet.

2.3.15. Taxation

The group computes taxes in accordance with prevailing tax legislation in the countries where income is taxable.

The CVAE component (Cotisation sur la Valeur Ajoutée des Entreprises) of the new business tax (Contribution Economique Territoriale - CET) applicable in France as from January 1, 2010 is recognized as an income tax.

Temporary differences arising between the carrying amount and the tax base of assets and liabilities, unused tax losses and unused tax credits are identified for each taxable entity. Corresponding deferred taxes are calculated at the enacted or substantively enacted tax rates that are expected to apply in the period when the asset is realised or the liability settled.

Deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profits will be available in the future against which the deductible differences, unused tax losses and unused tax credits can be utilised. The carrying amount of deferred tax assets is reviewed at each balance sheet date.

Deferred tax liabilities are recognised for all taxable temporary differences, with the exception of certain taxable temporary differences between the Group's share in the net assets in subsidiaries, joint ventures and associates and their tax bases. The most common situation when such exception applies relates to undistributed profits of subsidiaries where distribution to the shareholders would trigger a tax liability: when the Group has determined that profits retained by the subsidiary will not be distributed in the foreseeable future, no deferred tax liability is recognised.

Deferred tax assets and liabilities are offset when both of the following conditions are met:

- the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and
- the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority.

Deferred tax is charged or credited to net income, except when it relates to items charged or credited directly to other comprehensive income, in which case the deferred tax is classified in other comprehensive income.

2.3.16. Provisions

As long as a construction contract or a long-term service agreement is in progress, obligations attributable to such a contract are taken into account in the assessment of the margin to be recognised and are therefore reported within the accounts "Construction contracts in progress, assets" or "Construction contracts in progress, liabilities".

Upon completion of the contract, such obligations are recognised as distinct liabilities when they satisfy the following criteria:

- the Group has a present legal or constructive obligation as a result of a past event;
- it is probable that an outflow of economic resources will be required to settle the obligation; and
- such outflow can be reliably estimated.

These liabilities are presented as provisions when they are of uncertain timing or amount. When this uncertainty is dispelled, they are presented as trade payables or other current liabilities.

Obligations resulting from transactions other than construction contracts and long-term service agreements are directly recognised as provisions as soon as the above-mentioned criteria are met.

Where the effect of the time value of money is material, provisions are measured at their present value.

Restructuring provisions are made when plans to reduce or close facilities, or to reduce the workforce have been finalised and approved by the Group management and have been announced before the balance sheet date, resulting in an obligation of the Group to third parties. Restructuring costs include employees' severance and termination benefits and estimated facility closing costs. In addition to such provisions, restructuring costs may include asset write-off relating to the restructured activities.

2.3.17. Financial liabilities

- **Bonds and borrowings**

Bonds and interest-bearing bank loans are initially recognised at fair value, less any transaction costs directly attributable to the issuance of the liability. These financial liabilities are subsequently measured at amortised cost, using the effective interest rate method.

- **Derivative financial instruments**

Derivative financial instruments are recognised and re-measured at fair value (see Note 2.3.7 for foreign currency hedging instruments and Note 2.3.18 for interest rate hedging instruments).

- **Payables**

Payables are initially recognised at fair value, which in most cases approximates the nominal value. They are subsequently re-measured at amortised cost.

2.3.18. Interest rate derivatives

The Group may enter into hedges for the purpose of managing its exposure to movements in interest rates. Derivatives are recognised on the balance sheet at fair value at the closing date. Providing that the relationships between the interest rate exposure and the related derivatives are qualifying relationships, the Group uses the specific accounting treatments designated as hedge accounting. Fair value hedge accounting and cash flow hedge accounting are applied to fixed and floating rate borrowings, respectively.

In the case of fair value hedge relationships, the re-measurement of the fixed rate borrowing is offset in the income statement by the movement in the fair value of the derivative up to the effective part of hedged risk. In the case of cash flow hedge relationships, the change in fair value of the derivative is recognised directly in equity. When the forecast transaction results in the recognition of a monetary item, the amounts previously recognised directly in equity are reclassified to the income statement.

2.3.19. Share-based payments

The Group issues equity-settled and cash-settled share-based payments to certain employees.

- **Equity-settled share-based payments**

Equity-settled share-based payments are measured at fair value at the grant date (excluding the effect of non market-based conditions) using the binomial pricing model. The cumulative recognised expense is based on the fair value at grant date and on the estimated number of shares that will eventually vest (including the effect of non market-based vesting conditions). It is recorded in income from operations throughout the vesting period with a counterpart in equity.

- **Cash-settled share-based payments**

For cash-settled share-based payments, a liability equal to the portion of the goods or services rendered is recognised at the current fair value determined at each balance sheet date.

The Group may also provide employees with the ability to purchase the Group's ordinary shares at a discounted price compared to that of the current market value. In that case, the Group records an expense based on the discount given and its estimate of the shares expected to vest.

2.3.20. Post-employment and other long-term defined employee benefits

The Group provides its employees with various types of post-employment benefits, such as pensions, retirement bonuses and medical care, and other long-term benefits, such as jubilee awards and deferred compensation schemes. The type of benefits offered to individual employees is related to local legal requirements as well as practices of the specific subsidiaries.

The Group's health care plans are generally contributory with participants' contributions adjusted annually.

- **Post-employment defined benefit plans**

For single employer defined benefit plans, the Group uses the Projected Unit Credit Method to determine the present value of its obligations and the related current and past service costs/profits. This method considers the actuarial assumptions' best estimates (for example, the expected turnover, the expected future salary increase and the expected mortality).

Most defined benefit pension liabilities are funded through pension funds legally distinct from the entities constituting the Group. Plan assets related to funded plans are invested mainly in equity and debt securities. Other supplemental pension plans sponsored by the Group for certain employees are directly paid by the employer as they become due. Post-employment medical benefit plans are predominantly unfunded.

The Group periodically reviews plan assets and obligations. The effects of any change in actuarial assumptions together with the differences between forecast and actual experience are assessed.

The Group recognises in other comprehensive income the full amount of any actuarial gains and losses as well as the effect of any asset ceiling.

The estimated cost of providing defined benefits to employees is accrued during the years in which the employees render services. In the income statement, the service cost is included in the income from operations. The amortisation of unrecognised prior service cost/profit and specific events impacts (e.g. curtailments) are recognised in other expenses. Interest cost and expected return on assets are included in financial income (expenses).

The Group also participates in multi-employer defined benefit plans, mainly in the United States and Canada. As corresponding funds are not able to provide sufficient information to use defined benefit accounting, these plans are accounted for as defined contribution plans (see below).

- **Post-employment defined contribution plans**

For defined contribution plans, the Group pays contributions to independently administered funds at a fixed percentage of employees' pay. These contributions are recorded as operating expenses.

- **Other long-term employee benefits**

The accounting method used when recognising obligations arising from other long-term employee benefits is similar to the method used for post-employment defined benefits, except that prior service cost and actuarial gains/losses are immediately recognised in full in "other income/expense" in the income statement.

2.3.21. Off balance sheet commitments

- **Commitments arising from execution of operations controlled by the Group**

In the ordinary course of business, the Group is committed to fulfil various types of obligations arising from customer contracts (among which full performance and warranty obligations). Obligations may also arise from leases and regulations in respect of tax, custom duties, environment, health and safety. These obligations may or may not be guaranteed by bonds issued by banks or insurance companies.

As the Group is in a position to control the execution of these obligations, a liability only arises if an obligating event (such as a dispute or a late completion) has occurred and makes it likely that an outflow of resources will occur.

When the liability is considered as only possible but not probable or, when probable, cannot be reliably measured, it is disclosed as a contingent liability.

When the liability is considered as probable and can be reliably measured, the impact on the financial statements is the following:

- if the additional liability is directly related to the execution of a customer contract in progress, the estimated gross margin at completion of the contract is reassessed; the cumulated margin recognised to date based on the percentage of completion and the accrual for future contract loss, if any, are adjusted accordingly,
- if the additional liability is not directly related to a contract in progress, a liability is immediately recognised on the balance sheet.

The contractual obligations of subcontractors towards the Group are of the same nature as those of the Group towards its customers. They may be secured by the same type of guarantees as those provided to the Group's customers.
No contingent asset is disclosed when the likelihood of the obligation of the third party remains remote or possible. A contingent asset is disclosed only when the obligation becomes probable.

Any additional income resulting from a third party obligation is taken into account only when it becomes virtually certain.

- **Commitments arising from execution of operations not wholly within the control of the Group**

Obligations towards third parties may arise from ongoing legal proceedings, credit guarantees covering the financial obligations of third parties in cases where the Group is the vendor, and indemnification guarantees issued in connection with disposals of business entities.

In case of legal proceedings, a contingent liability is disclosed when the liability is considered as only possible but not probable, or, when probable, cannot be reliably measured. In case of commitments arising from guarantees issued, contingent liabilities are disclosed as soon as guarantees have been delivered and as long as they have not matured.

A provision is recorded if the obligation is considered as probable and can be reliably measured.

Contingent assets arising from legal proceedings or guarantees delivered by third parties are only disclosed when they become probable.

2.3.22. Earnings per share

Basic earnings per share are computed by dividing the period net profit (loss) before the financial cost (net of tax) of bonds reimbursable with shares, by the weighted average number of outstanding shares during the period increased by the weighted average number of shares to be issued on reimbursement of bonds reimbursable with shares (“ORA”).

Diluted earnings per share are computed by dividing the period net profit (loss) before the financial cost (net of tax) of bonds reimbursable with shares, by the weighted average number of outstanding shares during the period adjusted in order to take into consideration all dilutive instruments (ORA, stock options, free shares).

2.3.23. Segment information

Operating segments used to present segment information are identified on the basis of internal reports used by the Chief Executive Officer (CEO) to allocate resources to the segments and assess their performance.

The Chief Executive Officer is the Group’s “chief operating decisions maker” within the meaning of IFRS 8.

The methods used to measure the key performance indicators of the segments for internal reporting purposes are the same as those used to prepare the consolidated financial statements.

NOTE 3. SCOPE OF CONSOLIDATION

3.1. Change in scope of consolidation

On 20 January 2010, Alstom and Schneider Electric, acting under a consortium agreement, signed an agreement with Areva with the purpose of acquiring its transmission and distribution activities ("Areva T&D"). Following the approvals from competition authorities, the closing of the acquisition took place on 7 June 2010 and the consortium acquired the entire capital of Areva T&D for an equity value of € 2,290 million and both partners of the consortium took over from Areva the financial debt refinancing of this company.

Alstom funded the equity value of the Transmission activities (€ 1,589 million) and refinanced the related debt of € 762 million.

The consortium agreement establishes that, at the closing date of the transaction, Transmission activities and Distribution activities are owned respectively by Alstom and Schneider Electric.
As a result, the Transmission activities have been fully consolidated since 7 June 2010 in the Group's financial statements, while the Distribution activities are totally excluded from the consolidation scope.

With this acquisition, the Group formed its third Sector, named Alstom Grid.

In accordance with IFRS 3 (revised), the Group has recognised the assets acquired and liabilities assumed, these being measured at fair value at the acquisition date.

Accordingly, a preliminary valuation has been determined as at 7 June 2010. Recognised assets and liabilities may be subsequently adjusted during a maximum of 12 months from the acquisition date, depending on new information obtained about the facts and circumstances existing at the acquisition date.

Preliminary fair values of the assets acquired and liabilities assumed of the Transmission activities at the date of acquisition:

(in € million)	Fair values
Intangible assets	512
Property plant & equipment	634
Associates & other investments	1
Other non current assets, net	16
Deferred tax	176
Total non-current assets	**1,339**
Inventories	725
Construction contracts in progress, assets	-
Trade receivables	1,920
Other current operating assets	564
Marketable securities and other current financial assets	-
Cash and cash Equivalents	328
Total current assets	**3,537**
Total assets	**4,876**
Non-current provisions	238
Accrued pensions and other employee benefits	181
Non-current borrowings	17
Non-current obligations under finance leases	7
Deferred tax	17
Total non-current liabilities	**459**
Current provisions	435
Current borrowings	1,058
Current obligations under finance leases	1
Construction contract in progress, liabilities	742
Trade payables	766
Other current operating liabilities	1,225
Total current liabilities	**4,227**
Total Liabilities	**4,687**
Net assets acquired	**189**
Fair value of assets and liabilities attributable to non controlling interests	75
Fair value of assets and liabilities attributable to the shareholders of the Group	**114**
Purchase price	1,589
Provisional goodwill	**1,475**

The valuation of assets acquired and liabilities assumed at their fair value has resulted in the recognition of new intangible assets (technology, order backlog margin and customer relationships) and the re-measurement of tangible assets, inventories and liabilities. Assets were valued by external independent experts.

The Group decided to measure the non-controlling interests at the non-controlling interests' proportionate share of the identifiable net assets of the Transmission activities.

The resulting and preliminary goodwill amounts to € 1,475 million and is mainly supported by the leadership position of Alstom Group in growing markets and by expected synergies between Grid and other Alstom activities in terms of portfolio strategy, in particular the unique positioning of the acquired businesses on the Smart Grid key markets and the international presence of the Transmission businesses.

Specific synergies with Power and Transport Sectors in the fields of cost reductions, comprehensive commercial offering and combined workforce and know-how resulted in an allocation of goodwill of € 293 million to Power and € 46 million to Transport. Therefore the goodwill allocated to Grid amounts to € 1,136 million.

For the period between the acquisition date (7 June 2010) and 31 March 2011, Alstom Grid contributed € 3,653 million to sales and € 218 million to income from operations. The contribution to EBIT includes acquisition costs for a total of € 44 million and amortisation of margin acquired, such as order backlog margin, inventory step-up and customer relationships, for a total of € 159 million. These impacts are recorded as other expense in the consolidated income statement.

Considering the complexity to properly allocate the past performance of the Transmission and Distribution activities to either Alstom or Schneider Electric, the Group is not in a position to trace such allocations prior to the acquisition date (as the two activities were not split) and thus to disclose the amounts of sales, income from operations and net income, had the acquisition taken place on 1 April 2010.

3.2. Acquisition in progress

On 1 March 2010, Alstom and Russian Transmasholding (TMH) firmed up the strategic partnership agreement that they had agreed on in March 2009. Alstom also signed a Share Purchase Agreement under the terms and conditions of which it acquires a 25% stake + 1 share in Transmashholding's parent company, Breakers Investment BV. Alstom's acquisition of a stake in Breakers Investment BV is on-going subject to the fulfilment of certain conditions.

NOTE 4. SEGMENT INFORMATION

4.1. KEY INDICATORS BY OPERATING SEGMENT

At 31 March 2011

(in € million)	Power	Transport	Grid	Corporate & others	Elimina-tions	Total
Sales	11,671	5,606	3,653	-	(7)	20,923

(3) This amount mainly includes goodwill of Power Sector located in Switzerland.

4.3 INFORMATION ABOUT MAJOR CUSTOMERS

No external customer represents individually 10% or more of the Group's consolidated sales.

NOTE 5. RESEARCH AND DEVELOPMENT EXPENDITURE

(in € million)	Year ended 31 March 2011	31 March 2010	31 March 2009
Research and development expenses	**(703)**	**(558)**	**(586)**
Developments costs capitalised during the period (see Note 10.2)	(286)	(209)	(172)
Amortisation expense of capitalised development costs (see Note 10.2)	98	87	77
Amortisation of acquired technology (see Note 10.2)	67	67	60
Total research and development expenditure	**(824)**	**(613)**	**(621)**

Capitalisation of development costs relates mainly to the new generation of very high speed train (AGV^{TM}) for the Transport Sector and to carbon capture & storage technology for the Power Sector.

NOTE 6. OTHER INCOME AND OTHER EXPENSES

	Year ended		
(in € million)	31 March 2011	31 March 2010	31 March 2009
Capital gains on disposal of businesses (1)	-	7	35
Other (4)	46	1	9
Other income	**46**	**8**	**44**
Capital losses on disposal of businesses (1)	(33)	(36)	(80)
Restructuring costs (2)	(520)	(96)	(46)
Expenses exclusively incurred in the context of business combinations (3)	(203)	(7)	-
Other (4)	(96)	(19)	(11)
Other expense	**(852)**	**(158)**	**(137)**
Other income (expenses)	**(806)**	**(150)**	**(93)**

(1) Capital gains reported for the year ended 31 March 2009 originated from the disposal of non-consolidated investments in South Africa.
Capital losses mainly arose:

- *for the financial years ended 31 March 2011 and 31 March 2009, from adjustments on the disposal of the former Marine Sector; and*
- *for the year ended 31 March 2010, from a fine from competition authorities related to a business disposed of in a previous year.*

(2) In the last six months of the financial year ended 31 March 2011, the Group has started to adapt its footprint in order to address the lower demand in developed countries (Europe and USA) and the fast growth of its markets in emerging countries. Power and Transport plans respectively announced in October 2010 and March 2011 account for the largest part of the amount of restructuring costs recorded for the year ended 31 March 2011.

(3) This item comprises the costs incurred to effect the acquisition of Grid (€ 44 million for the year ended 31 March 2011, €7 million for the year ended 31 March 2010) and the amortisation of acquired margin related to Grid's acquisition during the year ended 31 March .

(4) Other income and other expense for the year ended 31 March 2011 mainly derive from components of the post-employment and other long term defined benefit expense (see Note 23), costs of legal proceedings that have arisen outside the ordinary course of business and non-recurring impairment losses on assets.

ALSTOM

NOTE 7. FINANCIAL INCOME (EXPENSE)

	Year ended		
(in € million)	31 March 2011	31 March 2010	31 March 2009
Interest income	49	51	107
Net financial income from employee defined benefit plans	-	-	5
Net exchange gain	-	-	4
Other financial income	8	8	6
Financial income	**57**	**59**	**122**
Interest expense	(135)	(58)	(78)
Net financial expense from employee defined benefit plans	(16)	(24)	-
Net exchange loss	(7)	(6)	-
Other financial expenses	(35)	(13)	(23)
Financial expense	**(193)**	**(101)**	**(101)**
Financial income (expense)	**(136)**	**(42)**	**21**
Out of which			
-financial income (expense) arising from financial instruments (see Note 25)	(120)	(18)	16

Interest income of €49 million represents the remuneration of the Group's cash positions over the period.

Interest expense of €(135) million represents the cost of the gross financial debt. The increase compared to last year is due to the issuance of new bonds mainly related to the acquisition of the Grid business (see Note 24).

Other financial expense of €(35) million incorporates fees and commitment fees paid on guaranteed facilities, syndicated loans and other financing facilities for € (25) million (€(13) million for the year ended 31 March 2010 and €(13) million for the year ended 31 March 2009).

ALSTOM

NOTE 8. TAXATION

8.1. ANALYSIS OF INCOME TAX CHARGE

The following table summarises the components of income tax charge for the years ended 31 March 2011, 2010, 2009:

	Year ended		
(in € million)	31 March 2011	31 March 2010	31 March 2009
Current income tax charge	(248)	(199)	(173)
Deferred income tax charge	107	(186)	(200)
Income tax charge	**(141)**	**(385)**	**(373)**
Effective tax rate	22%	24%	25%

The favourable geographical mix of income before taxes of the period ended 31 March 2011 has enabled the Group to decrease the effective tax rate to 22% for the period ended 31 March 2011 compared to 24% for the previous fiscal year.

8.2. EFFECTIVE INCOME TAX RATE

The following table provides a reconciliation from the income tax charge valued at the French statutory rate to the actual income tax charge for the years ended 31 March 2011, 2010 and 2009:

	Year ended		
(in € million)	31 March 2011	31 March 2010	31 March 2009
Pre-tax income	**628**	**1,587**	**1,464**
Statutory income tax rate of the parent company	34.43%	34.43%	34.43%
Expected tax charge	**(216)**	**(546)**	**(504)**
Impact of:			
- Difference between normal tax rate applicable in France and normal tax rate in force in jurisdictions outside France	41	130	124
- Transactions liable for reduced tax rate	104	(3)	-
- Changes in unrecognised deferred tax assets	(52)	71	96
- Changes in tax rates	10	(2)	(29)
- Additional tax expense (withholding tax, CVAE in France and IRAP in Italy)	(47)	(35)	(31)
- Permanent differences and other	19	-	(29)
Income tax charge	**(141)**	**(385)**	**(373)**

8.3. ANALYSIS OF DEFERRED TAX ASSETS AND LIABILITIES

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The following table summarises the significant components of the Group's deferred tax assets and liabilities as of 31 March 2011 and 2010:

	At 31 March 2010		Change in P&L	Change in equity *(1)*	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2011	
(in € million)	Deferred tax assets	Deferred tax liabilities					Deferred tax assets	Deferred tax liabilities
Differences between carrying amount and tax basis of tangible and intangible assets	178	(64)	(53)	-	13	(12)	166	(104)
Accruals for employee benefit costs not yet deductible	241	(3)	(17)	34	7	(2)	262	(2)
Provisions and other accruals not yet deductible	504	-	17	-	86	(4)	603	-
Differences in recognition of margin on construction contracts	100	(397)	(49)	-	(4)	2	47	(395)
Tax loss carry forwards	1,266	-	223	-	63	(22)	1,530	-
Other	76	(204)	38	-	40	7	141	(184)
Gross deferred tax assets/(liabilities)	**2,365**	**(668)**	**159**	**34**	**205**	**(31)**	**2,749**	**(685)**
Unrecognised deferred tax assets	(828)	-	(52)	59	(45)	1	(865)	-
Netting	(555)	555	-	-	-	-	(597)	597
Recognised deferred tax assets/(liabilities)	**982**	**(113)**	**107**	**93**	**160**	**(30)**	**1,287**	**(88)**
Net deferred tax assets/(liabilities)	**869**						**1,199**	

(1) Mainly related to actuarial gains and losses directly recognised in equity (see consolidated statement of comprehensive income).

The Group is satisfied as to the recoverability of its recognised deferred tax assets at 31 March 2011 (€1,199 million) on the basis of an extrapolation of the last three-year business plan, as approved by the Board of Directors.

Deferred tax assets still unrecognised amount to €865 million at 31 March 2011 (€828 million at 31 March 2010). Most of these unrecognised deferred taxes are originated from tax loss carry forward, out of which €452 million are not subject to expiry at 31 March 2011 (€360 million at 31 March 2010).

- Basic earnings per share	1.57	4.21	3.87
- Diluted earnings per share	1.56	4.18	3.81

ALSTOM

NOTE 10. GOODWILL AND INTANGIBLE ASSETS

Goodwill and intangible assets are reviewed for impairment at least annually and whenever events or circumstances indicate that they might be impaired. Such events or circumstances are related to significant, unfavourable changes that are of a lasting nature and affect either the economic environment or the assumptions or the targets adopted as of the acquisition date. An impairment loss is recognised when the recoverable value of the assets tested becomes durably lower than their carrying value.

10.1. GOODWILL

(in € million)	At 31 March 2010	Acquisitions	Disposals	Translation adjustments and other changes	At 31 March 2011
Power	3,381	291	-	(4)	3,668
Transport	523	46	-	(1)	568
Grid	-	1,162	-	(2)	1,160
Goodwill	**3,904**	**1,499**	**-**	**(7)**	**5,396**
of which:					
Gross value	3,904	1,499	-	(7)	5,396
Impairment	-	-	-	-	-

(in € million)	At 31 March 2009	Acquisitions	Disposals	Translation adjustments and other changes	At 31 March 2010
Power	3,368	-	-	13	3,381
Transport	518	-	-	5	523
Goodwill	**3,886**	**-**	**-**	**18**	**3,904**
of which:					
Gross value	3,886	-	-	18	3,904
Impairment	-	-	-	-	-

The movements of the period ended 31 March 2011 mainly arose from the acquisition of Grid business (see Note 3). This goodwill is calculated on a preliminary basis as at 31 March 2011.

The impairment test at 31 March 2011 supported the Group's opinion that goodwill is not impaired.

The main assumptions used to assess the recoverable amounts of goodwill are as follows:

	Power	Transport	Grid
Net carrying amount of goodwill at 31 March 2011 (in € million)	3,668	568	1,160
Value elected as representative of the recoverable value	value in use	value in use	value in use
Number of years over which cash flow estimates are available	3 years	3 years	3 years
Extrapolation period of cash flow estimates	2 years	2 years	2 years
Long term growth rate at 31 March 2011	**2.0%**	**1.5%**	**2.0%**
Long term growth rate at 31 March 2010	2.0%	1.5%	-
Long term growth rate at 31 March 2009	2.0%	2.0%	-
After tax discount rate at 31 March 2011 ***(1)***	**9.0%**	**9.0%**	**9.0%**
After tax discount rate at 31 March 2010 *(1)*	9.0%	9.0%	-
After tax discount rate at 31 March 2009 *(1)*	10.0%	10.0%	-

(1) The application of pre-tax discount rates to pre-tax cash flows leads to the same valuation of cash generating units.

Sensitivity of enterprise values to key assumptions can be presented as follows:

(in € million)	Power		Transport		Grid	
	-100 bp	*+100 bp*	*-100 bp*	*+100 bp*	*-100 bp*	*+100 bp*
After tax discount rate	2,072	(1,555)	516	(393)	575	(430)
	-50 bp	*+50 bp*	*-50 bp*	*+50 bp*	*-50 bp*	*+50 bp*
Long-term growth rate	(611)	707	(192)	168	(213)	246

At 31 March 2011, a sensitivity analysis based on such key assumptions demonstrates that there is no probable scenario according to which the recoverable amount of the CGU would become less than its carrying value.

10.2. INTANGIBLE ASSETS

(in € million)	At 31 March 2010	Additions / disposals / amortisation	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2011
Development costs	1,112	286	2	(5)	1,395
Acquired technology	1,245	1	172	4	1,422
Other intangible assets	277	35	338	28	678
Gross value	**2,634**	**322**	**512**	**27**	**3,495**
Development costs	(452)	(98)	-	1	(549)
Acquired technology	(575)	(93)	-	-	(668)
Other intangible assets	(154)	(159)	-	(31)	(344)
Accumulated amortisation and impairment	**(1,181)**	**(350)**	**-**	**(30)**	**(1,561)**
Development costs	660	188	2	(4)	846
Acquired technology	670	(92)	172	4	754
Other intangible assets	123	(124)	338	(3)	334
Net value	**1,453**	**(28)**	**512**	**(3)**	**1,934**

(in € million)	At 31 March 2009	Additions / disposals / amortisation	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2010
Development costs	907	209	-	(4)	1,112
Acquired technology	1,244	-	-	1	1,245
Other intangible assets	240	23	-	14	277
Gross value	**2,391**	**232**	**-**	**11**	**2,634**
Development costs	(363)	(87)	-	(2)	(452)
Acquired technology	(508)	(67)	-	-	(575)
Other intangible assets	(123)	(27)	-	(4)	(154)
Accumulated amortisation and impairment	**(994)**	**(181)**	**-**	**(6)**	**(1,181)**
Development costs	544	122	-	(6)	660
Acquired technology	736	(67)	-	1	670
Other intangible assets	117	(4)	-	10	123
Net value	**1,397**	**51**	**-**	**5**	**1,453**

The movements of the period ended 31 March 2011 are mainly due to the recognition of technology, order backlog margin and customer relationships as assets acquired in the Grid business combination (see Note 3).

Technology and licence agreements acquired through the combination with ABB ALSTOM POWER in 1999 and 2000 represent the bulk of the gross amount reported as acquired technology at 31 March 2010.

NOTE 16. TRADE RECEIVABLES

(in € million)	Total	No past due on the reporting date	Past due on the reporting date: Less than 60 days	Between 60 and 180 days	More than 180 days
Trade receivables at 31 March 2011	**6,053**	5,037	312	258	446
o/w gross	6,170	5,101	313	259	497
o/w impairment	(117)	(64)	(1)	(1)	(51)
Trade receivables at 31 March 2010	**3,446**	2,624	354	156	312
o/w gross	3,531	2,648	355	157	371
o/w impairment	(85)	(24)	(1)	(1)	(59)
Trade receivables at 31 March 2009	**3,873**	3,025	393	278	177
o/w gross	3,952	3,045	396	280	231
o/w impairment	(79)	(20)	(3)	(2)	(54)

Impairment losses are determined considering the risk of non recovery assessed on a case by case basis. Due to the type of business operated by the Group, past due receivables are frequently representative of outstanding amounts confirmed by customers but whose payment is subject to clearance of items raised during inspection of works. Such receivables do remain fully recoverable; costs to be incurred for the clearance of pending items are included in the determination of the margin at completion of the related contracts.

NOTE 17. OTHER CURRENT OPERATING ASSETS

NOTE 20. EQUITY

When managing capital, the objective of the Group is to safeguard its ability to continue as a going concern so that it can provide returns to shareholders, bring benefits to its other partners and optimise the structure of the capital in order to reduce its cost. To achieve this, the Group may choose to:

- adjust the amount of dividends paid to the shareholders;
- reimburse a portion of capital;
- issue new shares; or,
- sell assets in order to scale back its net debt.

20.1. MOVEMENTS IN SHARE CAPITAL

Movements in financial year ended 31 March 2011

At 31 March 2011, the share capital of Alstom amounted to € 2,060,935,128 consisting of 294,419,304 ordinary shares with a par value of €7 each. For the year ended 31 March 2011, the weighted average number of outstanding ordinary shares amounted to 294,210,753 and the weighted average number of ordinary and dilutive shares stood at 296,978,014.

During the year ended 31 March 2011, 4,380 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 275 shares at a par value of €7. The 81,682 bonds reimbursable with shares outstanding at 31 March 2011 represent 5,130 shares to be issued.

Movements in financial year ended 31 March 2010

At 31 March 2010, the share capital of Alstom amounted to € 2,056,893,972 consisting of 293,841,996 ordinary shares with a par value of €7 each. For the year ended 31 March 2010, the weighted average number of outstanding ordinary shares amounted to 289,234,516 and the weighted average number of ordinary and dilutive shares stood at 291,411,453.

During the year ended 31 March 2010, 19,209 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 1,211 shares at a par value of €7. The 86,062 bonds reimbursable with shares outstanding at 31 March 2010 represented 5,405 shares to be issued.

In March 2010, 4,400,000 shares have been issued to Bouygues, Alstom main shareholder. This issuance of shares extinguishes a financial debt that arose from a put option granted by Alstom to Bouygues in 2006 (see Note 24).

In June 2009, ALSTOM acquired 700,000 of its own shares for a total amount of €34 million. These shares have subsequently been cancelled.

In April 2009, 1,092,111 new shares have been created, following the implementation of the employee profit sharing plan " ALSTOM sharing 2009" (see Note 21) .

Movements in financial year ended 31 March 2009

At 31 March 2009, the share capital of ALSTOM amounted to €2,013,575,921 consisting of 287,653,703 ordinary shares with a par value of €7 each (on 7 July 2008, the nominal value of ALSTOM shares was split by two). For the year ended 31 March 2009, the weighted average number of outstanding ordinary shares amounted to 286,787,449 and the weighted average number of ordinary and dilutive shares stood at 291,410,049.

During the year ended 31 March 2009, 34,901,161 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 2,191,845 shares at a par value of €7. The 105,271 bonds reimbursable with shares outstanding at 31 March 2009 represented 6,611 shares to be issued.

20.2. DISTRIBUTION OF DIVIDENDS

In respect of the financial year ended 31 March 2011, it will be proposed to the Shareholders' meeting called on 28 June 2011 to distribute dividends for a total amount of €183 million corresponding to a €0,62 dividend per share.

The following dividends were distributed in respect of the previous three financial years:

- year ended 31 March 2010 (decision of Shareholders' meeting held on 22 June 2010): total amount of €364 million, corresponding to a €1,24 dividend per share;
- year ended 31 March 2009 (decision of Shareholders' meeting held on 23 June 2009): total amount of €323 million, corresponding to a €1,12 dividend per share;
- year ended 31 March 2008 (decision of Shareholders' meeting held on 24 June 2008): total amount of €226 million, corresponding to a €0,80 dividend per share (after the two-for-one stock split that took place on 7 July 2008).

Plan issued of shareholders meeting on 22 June 2010												
Plan #13												
Granted on 13 December 2010 to 1,716 beneficiaries	€33.14	13 Dec. 2013 12 Dec. 2018	€ 6.93	1,235,120		54,630	1,180,490 (245,000)	€ 28.31	740,860	-	20,980	719,880 (20,000)

(1) The exercise price corresponds to the average opening price of the shares during the twenty trading days preceding the day on which the options were granted by the Board (no discount or surcharge).
(2) The number of options and performance shares and the exercise price of options have been adjusted as a result of transactions that have impacted the number of capital shares after grant dates.
(3) The performance shares initially granted amounted to 126,000 (plan 10).

The exercise period of stock options granted by plan 6 has expired during the year ended 31 March 2011.

At 31 March 2011, stock options granted by plans 7, 8, 9 and 10 are fully vested. These options will expire seven years after the end of the vesting period of each plan.

The number of stock options, free performance shares and stock appreciation rights granted on 23 September 2008 under the long term incentive plan 11 was conditional upon the Group satisfying specified levels of operating margin for the financial year 2010/2011.
The 2010/2011 Group's operating margin is below 9.0%; as a consequence no option will be exercisable under this plan and no performance share will be delivered.

The long term incentive plans 12 and 13 set up since 2007 also combine the allocation of stock options with the free allocation of performance shares.
The grant of these instruments is conditional upon the group satisfying the following performance conditions:

LTI plan 12 granted on 21 September 2009:

In order to take into account the temporary dilutive impact of the integration of Alstom Grid, the Board of Directors has decided to adjust the thresholds of the operating margin for the financial year 2011/2012 as follows:
if the 2011/12 Group's operating margin is equal or above 8.7%, 840,800 options will be exercisable and 488,520 performance shares will be delivered;
if the 2011/12 Group's operating margin is between 8.2% (inclusive) and 8.7% (exclusive), 80% of options will be exercisable and 80% of performance shares will be delivered;
if the 2011/12 Group's operating margin is between 7.2% (inclusive) and 8.2% (exclusive), 60% of options will be exercisable and 60% of performance shares will be delivered;
if the 2011/12 Group's operating margin is between 6.5% (inclusive) and 7.2% (exclusive), 40% of options will be exercisable and 40% of performance shares will be delivered;
if the 2011/12 Group's operating margin is below 6.5%, no option will be exercisable and no performance share will be delivered.

LTI plan 13 granted on 13 December 2010:
The total number of options exercisable and performance shares to be delivered will depend on the Group's operating margin for the financial years 2010/2011, 2011/2012 and 2012/2013:

	% of conditionnal options exercisable & performance shares to be delivered		
	FY10/11	**FY11/12**	**FY12/13**
Operating margin achieved above or equal to 7.5%	40%	40%	20%
Operating margin achieved between 7% (inclusive) and 7.5% (non inclusive)	30%	30%	10%
Operating margin achieved between 6.5% (inclusive) and 7% (non inclusive)	10%	10%	0%
Operating margin achieved below 6.5%	0%	0%	0%

For financial year 2010/2011, based on consolidated financial statements, the performance condition is achieved for 40% of an allotment of LTIP13 options and performance shares.

As a reference, for financial year 2011/2012, the Group has given a 7% to 8% operating margin guidance.

- **Stock appreciation rights ("SARs") plans**

	Adjusted exercise price *(1)*	Vesting date Expiry date	Adjusted number of SARs granted *(2)*	Adjusted number of SARs exercised since the origin	Adjusted number of SARs cancelled since the origin	Adjusted number of outstanding SARs at 31 March 2011
SARs #7 Granted on 1 December 2004 for 114 beneficiaries	€8.60	17 Sept. 2007 16 Sept. 2014	478,000	407,620	69,052	1,328
SARs #8 Granted on 18 November 2005 for 120 beneficiaries	€22.45	27 Sept. 2008 18 Nov. 2015	234,000	127,750	43,100	63,150
Notional SARs (3) Granted on 16 December 2005 for 120 beneficiaries	€17.88	27 Sept. 2008 26 Sept. 2015	232,000	189,074	37,000	5,926
SARs #9 Granted on 28 September 2006 for 134 beneficiaries	€36.05	28 Sept. 2009 28 Sept. 2016	341,250	167,425	53,125	120,700
SARs #10 Granted on 25 September 2007 for 134 beneficiaries	€73.42	25 Sept. 2010 24 Sept. 2017	59,700	1,800	4,200	53,700

(1) The exercise price before adjustment corresponds to the average opening price of the shares during the twenty trading days preceding the day on which the options were granted by the board (no discount or surcharge).
(2) The number of SARS and their exercise prices have been adjusted as a result of transactions that have impacted the number of capital shares after grant dates.

(3) Notional SARs are capped at € 22.45.

- **Movements in stock option plans, performance shares and stock appreciation rights plans**

(1) On 11 May 2010, 101,560 free shares were allocated to beneficiaries of French companies.

As at 31 March 2011,

- 7,855,932 stock options are outstanding, of which 5,834,642 are exercisable,
- 1,330,400 performance shares are outstanding,
- 244,804 SARs are outstanding, of which 244,804 are exercisable.

- **Valuation of stock option plans and performance shares**

	Exercise price	End of vesting period	Share price at grant date	Volatility	Risk free interest rate	Average dividend yield
Plan #9 Granted on 28 September 2006 with an expected life of 4 years	€37.33	28 Sept. 2009	€36.05	22%	3.5%	1.0%
Plan #10 Granted on 25 September 2007 with an expected life of 4 years	€67.50	24 Sept. 2010	€73.42	23%	4.2%	1.3%
Plan #11 Granted on 23 September 2008 with an expected life of 3 years	€66.47	22 Sept. 2011	€65.10	30%	4.1%	1.3%
Plan #12 Granted on 21 September 2009 with an expected life of 3 years	€49.98	20 Sept. 2012	€50.35	30%	2.0%	1.3%
Plan #13 Granted on 13 December 2010 with an expected life of 3 years	€33.14	12 Dec. 2013	€35.40	31%	1.8%	3.1%

The option valuation method follows a binomial mathematical model for plans 9, 10 and 11 and a Black & Scholes model for plans 12 and 13, with exercise of the options anticipated and spread over the exercise period on a straight-line basis. The volatility factor applied is an average of CAC 40 comparable companies' volatility at the grant date, which represents a value consistent with market practices and is considered more relevant given the significant volatility of the Group's share price over the last few years.

The Group booked a total expense of € 11 million for the year ended 31 March 2011, and € 15 million for the year ended 31 March 2010.

- **Valuation of stock appreciation rights (SARs) plans**

	Exercise price	End of vesting period	Share price at 31 March: - 2011 - 2010	Volatility	Risk free interest rate	Average dividend yield
SARs #7 Granted on 1 December 2004 with an expected life of 4 years	€8.60	17 Sept. 2007	€ 41.73 €46.17	23%	1.8%	2.2%
SARs #8 Granted on 18 November 2005 with an expected life of 4 years	€22.45	27 Sept. 2008	€ 41.73 €46.17	23%	1.8%	2.2%
Notional SARs Granted on 27 September 2005 with an expected life of 4 years	€17.88	27 Sept. 2008	*	23%	1.8%	2.2%
SARs #9 Granted on 28 September 2006 with an expected life of 4 years	€36.05	28 Sept. 2009	€ 41.73 €46.17	23%	1.8%	2.2%
SARs #10 Granted on 25 September 2007 with an expected life of 4 years	€73.42	24 Sept. 2010	€ 41.73 €46.17	23%	1.8%	2.2%

* SARs of the Notional plan have been granted at an exercise price of €17.88 and are capped at €22.45

All SARs granted are measured using a binomial model taking into account the terms and conditions according to which the instruments were granted.

The Group books a total income of € 2 million for the year ended 31 March 2011, and € 4 million for the year ended 31 March 2010.

21.2. SHARE-BASED PAYMENTS AWARDED TO EMPLOYEES

- **Free shares**

On 17 November 2005, the Group announced the attribution of twelve free shares to all employees, or the equivalent in cash (SARs) depending on the conditions in each country.

At 31 March 2006, the cost related to the portion of the attribution to be settled in shares (€27 million) has been immediately offset in equity. The cost related to the portion of the attribution to be settled in cash is spread over the vesting period that extends until 16 May 2010 (€4 million income for the year ended 31 March 2011 and €2 million income for the year ended 31 March 2010).

ALSTOM

- **Alstom sharing 2009**

In January 2009, the Group announced a new scheme offered to Group employees in 22 countries and consisting of the following:

- the Two for One 2009 plan based on "buy one share and get one free" concept: within this plan, subscribing employees outside France will receive, instead of the company match offered to the subscribers in France, shares allocated for free by Alstom; and
- the Alstom Classic 2009 plan: this plan allowed employees to subscribe to Alstom shares at a lower price than the current market price.

The €11 million expense relating to this scheme recorded in the income statement for the year ended 31 March 2009 has been assessed on the following basis:

- Estimated number of shares to be created: 1,229,928
- 20-day share price average before grant date: €38.54 ; Subscription price: €30.84 ; Risk-free interest rate: 2.7%.

Other non-current provisions (4)	256	73	(45)	(16)	(2)	266
Non-current provisions	**444**	**172**	**(82)**	**(88)**	**14**	**460**
Total provisions	**1,670**	**690**	**(349)**	**(397)**	**27**	**1,641**

(1) Current provisions relate to warranties, litigations and claims on completed contracts.

(2) In relation to tax risks, the Group tax filings are subject to audit by tax authorities in most jurisdictions in which the Group operates. These audits may result in assessment of additional taxes that are subsequently resolved with the authorities or potentially through the courts. The Group believes that it has strong arguments against the questions being raised, that it would pursue all legal remedies to avoid an unfavourable outcome and that it has adequately provided for any risk that could result from those proceedings where it is probable that it will pay some amounts.

(3) In the last six months of the financial year ended 31 March 2011, the Group has started to implement fundamental reorganisations of its footprint in order to address the lower demand in developed countries (Europe and USA) and the fast growth of its markets in emerging countries.

(4) Other non-current provisions mainly relate to guarantees delivered in connection with disposals, employee litigations, commercial disputes and environmental obligations. Environmental provisions amount to €41 million at 31 March 2011 and €16 million at 31 March 2010.

Asset ceiling generated during the period	(7)	(3)	36
Closing balance (net loss)	**(1,546)**	**(1,363)**	**(1,370)**

- **Components of plan assets**

(in € million)	At 31 March 2011	%	At 31 March 2010	%	At 31 March 2009	%
Equities	1,417	37.7	1,214	36.4	930	34.3
Bonds	1,898	50.4	1,747	52.4	1,412	52.0
Properties	340	9.0	270	8.1	215	7.9
Others	108	2.9	103	3.1	159	5.8
Total	**3,763**	100	**3,334**	100	**2,716**	100

Plan assets for each individual plan are invested in accordance with statutory regulations, pension plan rules, and decisions of pension fund trustees. At 31 March 2011, plan assets do not include any of the Group's capital stock.

- **Assumptions (weighted average rates)**

(in %)	At 31 March 2011	At 31 March 2010	At 31 March 2009
Discount rate	4.82	5.11	5.74
Rate of compensation increase	3.03	2.99	3.10
Expected return on plan assets for the period	6.03	6.13	6.61

Actuarial assumptions used vary by country and type of plan. Compensation increase assumptions are determined at business unit level and reviewed centrally. The expected return on plan assets is based on long-term market expectations taking into account the asset allocation of each fund.

The healthcare trend rate is assumed to be 8% in the year ended 31 March 2011 and reduces thereafter to an ultimate rate of 5% from 2018 onwards.

Sensitivity analysis shows that a 50-point increase in discount rates would reduce the Group obligations by approximately €311 million. A 50-point decrease in discount rates would increase the Group obligations by approximately €329 million.

At the year ended 31 March 2011, the effective return on assets amounts to 5.37%.

(2) At the end of November 2009, Bouygues exercised the put option over its 50% equity interest in Alstom Hydro Holding in exchange for 4,400,000 Alstom shares. Due to clearance processes by competition authorities in some countries, the transaction has been finalised in March 2010. The liability cancelled for this operation amounted to €175 million at the day the put was exercised (€170 million at 31 March 2009).

(3) This debt represents liabilities related to lease obligations on trains and associated equipment (see Note 13 and 29).

NOTE 25. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

25.1. FINANCIAL INSTRUMENTS REPORTED IN THE FINANCIAL STATEMENTS

The Group's financial liabilities comprise borrowings, trade and other payables. The main purpose of these financial liabilities is to raise funds for the Group's operations.
The Group has loans, trade and other receivables, and cash and cash equivalents that are directly derived from its operations.

The Group is exposed to currency risk, interest rate risk, credit risk and liquidity risk.

The main valuation methods applied are as follows:

- borrowings, when unhedged, are stated at amortised cost, determined by the effective interest rate method,
- the fair value of cash, cash equivalents, trade receivables and trade payables is considered as being equivalent to carrying value, due to their short maturities,
- the fair value of the financial debt is estimated based on either quoted market prices for traded instruments or current rates offered to the Group for debt of the same maturity.

ALSTOM

The amount reported as "foreign currency and other" is mainly representative of forward points attached to transactions related to financing activities (See Note 2.3.7) and bank fees (see Note 7).

Income from operations arising from financial instruments for the period ended 31 March 2011

Net foreign currency gains and losses recorded within income from operations are positive by €14 million for the year ended 31 March 2011.

They are made up of two components:

- forward points attached to hedging transactions qualified for hedge accounting,
- variation of fair value of instruments hedging future cash flows and not qualifying for hedge accounting.

The amount reported as “foreign currency and other” is mainly representative of forward points attached to transactions related to financing activities (See Note 2.3.7) and bank fees (see Note 7).

Income from operations arising from financial instruments for the period ended 31 March 2009

Net foreign currency gains and losses recorded within income from operations are negative by €5 million for the year ended 31 March 2009.

25.2. CURRENCY RISK MANAGEMENT

- **Financial debt**

The nominal value of the financial debt split by currency is as follows:

(in € million)	At 31 March 2011	At 31 March 2010	At 31 March 2009
Euro	3,686	2,062	700
US Dollar	52	7	8
British Pound	422	440	443
Other currencies	320	119	209
Financial debt in nominal value	**4,480**	**2,628**	**1,360**

The debt in GBP essentially originates from a long-term lease scheme of trains, involving London Underground. The related €405 million debt denominated in GBP is counter-balanced by long-term receivables having the same maturity and also denominated in GBP that are recognised as non-current assets (see Notes 13, 24 and 28).

- **Operations**

In the course of its operations, the Group is exposed to currency risk arising from tenders submitted in foreign currency, awarded contracts and any future cash out transactions denominated in foreign currency. Main currencies triggering a significant exposure for the year ended 31 March 2011 are the Swiss Franc and the US dollar.

During the tender period, depending on the probability to obtain the project and on market conditions, the Group generally hedges a portion of its tenders using options or export insurance contracts when possible. Once the contract is signed, forward exchange contracts are used to hedge the actual exposure during the life of the contract (either as the only hedging instruments or as a complement to existing export insurance contracts).

The Group requires all of its operating units to use forward currency contracts to eliminate the currency exposure on any individual sale or purchase transaction in excess of €100,000. Forward currency contracts must be denominated in the same currency as the hedged item. It is the

Group's policy to negotiate the terms of hedge derivatives to match the terms of hedged items to maximise hedge effectiveness.

Derivative instruments hedging foreign currency risk are recognised at their fair value on the balance sheet as follows:

	At 31 March 2011		At 31 March 2010		At 31 March 2009	
(in € million)	Assets	Liabilities	Assets	Liabilities	Assets	Liabilities
Derivatives qualifying for fair value hedge	348	569	298	441	318	650
Derivatives qualifying for cash flow hedges	31	7	31	-	28	15
Derivatives qualifying for net investment hedges	-	-	-	-	-	-
Derivatives not qualifying for hedge accounting	1	2	5	3	6	3
Total	**380**	**578**	**334**	**444**	**352**	**668**

The fair value of those instruments is the estimated amount that the Group would receive or pay to settle the related contracts, valued on the basis of relevant yield curves and foreign exchange rates at closing date.

High volatility of foreign exchange rates during the periods ended 31 March 2011 and 31 March 2010 explains the significant amount of fair value of derivative instruments (either positive or negative). For instruments that qualify for fair value hedge accounting, any change in fair value is mostly offset by the re-measurement of the underlying exposure (either on balance sheet or off balance sheet).

The following table shows the sensitivity of the Group's pre-tax income to a change in the US dollar and Swiss Franc exchange rates. The effects on pre-tax income arise from derivative instruments not qualifying for hedge accounting and unhedged monetary items while the effect on income and expense directly recognised in equity is due to the measurement of the effective portion of derivative instruments qualifying for cash flow hedge accounting.

	USD rate			CHF rate		
	Variation	Effect on pre-tax income	Effect on income and expense directly recognised in equity	Variation	Effect on pre-tax income	Effect on income and expense directly recognised in equity
Year ended 31 March 2011	10%	-	-	5%	-	(15)
	-10%	-	-	-5%	-	15
Year ended 31 March 2010	10%	1	-	5%	-	(17)
	-10%	(1)	-	-5%	-	17
Year ended 31 March 2009	10%	(1)	-	5%	4	(29)
	-10%	1	-	-5%	(4)	29

The effective portion of instruments qualifying for cash flow hedge accounting reclassified from equity to profit or loss during the year ended 31 March 2011 is positive by €27 million.

25.3. INTEREST RATE RISK MANAGEMENT

The Group has not implemented an active interest rate risk management policy. However under the supervision of the Executive Committee, it may enter into transactions in order to hedge its interest rate risk on a case-by-case basis according to market opportunities.

Carrying amount (in € million)	**At 31 March 2011**	**At 31 March 2010**	**At 31 March 2009**
Financial assets at floating rate	2,793	4,372	2,965
Financial assets at fixed rate	454	480	481
Financial assets bearing interests	**3,247**	**4,852**	**3,446**
Financial debt at floating rate	40	(11)	(12)
Financial debt at fixed rate, put options and earn-out on acquired entities	4,426	(2,030)	(1,344)
Financial debt	**4,466**	**(2,041)**	**(1,356)**
Net position at floating rate before swaps	2,833	4,361	2,953
Net position at fixed rate before swaps	4,880	(1,550)	(863)
Net position before hedging	**7,713**	**2,811**	**2,090**
Net position at floating rate after swaps	2,833	4,361	2,953
Net position at fixed rate after swaps	4,880	(1,550)	(863)
Net position after hedging	**7,713**	**2,811**	**2,090**

Sensitivity is analysed based on the group's net cash position after hedging at 31 March 2011, assuming that it remains constant over one year.

In absence of instruments hedging the interest risk, the effects of increases or decreases in market rates are symmetrical: a rise of 0.9% would increase the net interest income by €24 million while a fall of 0.9% would decrease it by the same amount.

25.4. CREDIT RISK MANAGEMENT

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a loss. The Group is exposed to credit risk on its operating activities (primarily for trade receivables) and from its financing activities, including deposits, foreign currency hedging instruments and other financial instruments with banks and financial institutions.

- **Risk related to customers**

The Group believes that the risk of a counterpart failing to perform as contracted, which could have a significant impact on the Group's financial statements or results of operations, is limited because the Group seeks to ensure that customers generally have strong credit profiles or adequate financing to meet their project obligations.

In specific cases, the Group may use export credit insurance policies which may hedge up to 90% of the credit risk on certain contracts.

- **Risk related to other financial assets**

The Group's exposure to credit risk related to other financial assets arises from default of the counterpart, with a maximum exposure equal to the carrying amount of those instruments.

- **Risk related to cash and cash equivalents**

Credit risk from balances with banks and financial institutions is managed by Group treasury in accordance with the Group's policy. At 31 March 2011 and at 31 March 2010, as part of the central treasury management, cash and cash equivalents are invested entirely in deposits with bank counterparts of first rank noted "Investment Grade".

The Group's parent company has access to some cash held by wholly-owned subsidiaries through the payment of dividends or pursuant to intercompany loan arrangements. However local constraints can delay or restrict this access. Furthermore, while the Group's parent company has the power to control decisions of subsidiaries of which it is the majority owner, its subsidiaries are distinct legal entities and their payment of dividends and granting of loans, advances and other payments to the parent company may be subject to legal or contractual restrictions, be contingent upon their earnings or be subject to business or other constraints. These limitations include local financial assistance rules and corporate benefit laws.

The Group's policy is to centralise liquidity of subsidiaries at the parent company's level when possible. Restricted cash and cash equivalents available at subsidiary level were €398 million and €454 million at 31 March 2011 and 31 March 2010, respectively.

ALSTOM

25.5. LIQUIDITY RISK MANAGEMENT

- **Financial covenants**

At 31 March 2011, to increase its liquidity, the Group has in place a €1,000 million revolving credit facility fully undrawn maturing in March 2012 and extended for €942 million up to March 2013. This facility is subject to the following financial covenants, based on consolidated data:

Covenants	Minimum Interest Cover	Maximum total debt (€m)	Maximum total net debt leverage
	(a)	**(b)**	**(c)**
From March 2010 to September 2013	3	5,000	3.6

(a) Ratio of EBITDA (Earnings Before Interest and Tax plus Depreciation and Amortisation) to net interest expense (excluding interest related to obligations under finance lease).It amounts to 19.1 at year end 31 March 2011. This covenant did not apply at year end 31 March 2010 since the Group had a net interest income.
(b) Total debt corresponds to borrowings, i.e. total financial debt less finance lease obligations. This covenant ceases to apply since the Group has an "Investment grade" rating.
(c) Ratio of total net debt (Total debt less short-term investments or trading investments and cash and cash equivalents) to EBITDA. The net debt leverage as at 31 March 2011 is 0.8 ((1.1) at 31 March 2010).

- **Cash Flow**

The Group's objective is to maintain a strong liquidity. A revolving cash planning tool is used to monitor the Group's liquidity needs.

The following tables show the remaining maturities of all financial assets and liabilities held at 31 March 2011 and 31 March 2010.

Planning data for future new assets and liabilities are not reported. Amounts in foreign currency are translated at the closing rate. The variable interest payments are calculated using the last interest rates available at the reporting date. Assets and liabilities that can be repaid at any time are always assigned to the earliest possible time period.

25.6. COMMODITY RISK MANAGEMENT

Most of commodities bought by the Group has already been modified and included into spare parts. For the other commodities, the Group has included into customer contracts a customer price adjustment clause, so that the Group has a limited exposure to the variation of commodity prices.

NOTE 26. OTHER CURRENT OPERATING LIABILITIES

(in € million)	At 31 March 2011	At 31 March 2010	At 31 March 2009

(2) Headcount doesn't include any temporary people

NOTE 28. CONTINGENT LIABILITIES AND DISPUTES

28.1. CONTINGENT LIABILITIES

- **Commercial obligations**

Contractual obligations of the Group towards its customers may be guaranteed by bank bonds or insurance bonds. Bank and insurance bonds may guarantee liabilities already recorded on the balance sheet as well as contingent liabilities.

At 31 March 2011, the Group has in place both uncommitted bilateral lines in numerous countries up to €19.6 billion and a Committed Bonding Facility Agreement allowing issuance of instruments from 28 July 2010 to 27 July 2013 for an amount of €8.275 billion.

At 31 March 2011, the total outstanding bonding guarantees related to contracts, issued by banks or insurance companies, amount to €15.7 billion (€14.6 billion at 31 March 2010).

The available amount under the Committed Bonding Facility at 31 March 2011 amounts to €2.1 billion (€2.0 billion at 31 March 2010). The issuance of new bonds under this bonding facility is subject to the financial covenants disclosed in Note 25.5. The available amount under bilateral lines at 31 March 2011 amounts to €9.8 billion.

- **Vendor financing**

Until 2003, the Group provided some financial support, referred to as vendor financing, to financial institutions financing certain purchasers of Transport equipments.

At 31 March 2011, guarantees given as part of past vendor financing arrangements amount to €244 million.
Included in this amount are:

- guarantees totalling $63 million (€44 million, €47 million and €47 million at 31 March 2011, 31 March 2010 and 31 March 2009 respectively) given with respect to equipments sold to a US train operator, and
- guarantees totalling £177 million (€200 million, €199 million and €190 million at 31 March 2011, 31 March 2010 and 31 March 2009 respectively) given as part of a leasing scheme involving London Underground (Northern Line). Were London Underground Limited to decide not to extend the contract beyond 2017, and to hand the trains back, the Group has guaranteed to the lessors that the value of the trains and associated equipment, net of the £15 million non extension payment due by London Underground, should not be less than £177 million in 2017. The £177 million is included in the €405 million amount of "Other obligations under long-term rental" (see Note 24).

28.2. DISPUTES

- **Disputes in the Group's ordinary course of business**

The Group is engaged in several legal proceedings, mostly contract-related disputes that have arisen in the ordinary course of business. These disputes, often involving claims for contract delays or additional work, are common in the areas in which the Group operates, particularly for large long-term projects. In some cases, the amounts are claimed against the Group, sometimes jointly with its consortium partners. Amounts can be significant.

In some proceedings amount claimed is not specified at the beginning of the proceeding. Amounts retained in respect of litigation are taken into account in the estimate of margin at completion in case of contracts in progress or included in provisions and other current liabilities in case of completed contracts when considered as reliable estimates of probable liabilities. Actual costs incurred may exceed the amount of initial estimates because of a number of factors including the inherent uncertainties of the outcome of litigation.

Moreover during fiscal year 2010/11, the Group had to face an increase in number and amount of first demand bank guarantees calls in the context of a tougher economic environment. When the Group considers that a call is irregular or is a misuse of the right to call a bank guarantee, it initiates appropriate legal proceedings.

- **Asbestos**

In France, some of the Group's subsidiaries are subject to civil proceedings in relation to the use of asbestos. These proceedings are initiated by certain employees or former employees suffering from an occupational disease in relation to asbestos with the aim of obtaining a court decision allowing them to obtain a supplementary compensation from the French Social Security (medical) funds.
In the United States, subsidiaries of the Group are also subject to asbestos-related personal injury lawsuits. The Group considers that it has valid defences in these cases and the number of outstanding cases is decreasing.

The Group believes that the cases where it may be required to bear the financial consequences of such civil or criminal proceedings both in France and the United States do not represent a material exposure. While the outcome of the existing asbestos-related cases cannot be predicted with reasonable certainty, the Group believes that these cases will not have any material adverse effect on its financial condition. It can give no assurance, however, that present asbestos-related cases or new cases it may face in the future may not have a material adverse impact on its financial condition.

- **United States Class Action Lawsuit**

The Group has negotiated a settlement for a remaining cost for Alstom of less than € 2 million and closed the class action lawsuits filed on behalf of various purchasers of American Depositary Receipts and other Alstom securities between August 1999 and August 2003 and consolidated in one complaint filed in June 2004.

- **Alleged anti-competitive activities**

GIS equipment

In April 2006, the European Commission commenced proceedings against Alstom, along with a number of other companies, based on allegations of anti-competitive practices in the sale of gas-insulated switchgears ("GIS equipment"), a product of its former Transmission & Distribution business sold to Areva in January 2004, following investigations that began in 2004.

On 24 January 2007, the European Commission levied a fine of €65 million against Alstom which includes €53 million on a joint and several basis with Areva T&D. Alstom has requested the cancellation of this decision before the General Court of the European Union. The Court reduced the amount of fines levied against Alstom to €58.5 million on 3 March 2011. Alstom has decided to appeal this decision before the Court of Justice of the European Union. The acquisition of the Transmission activities of Areva T&D on 7 June 2010 has no impact on Alstom's exposure.

Following the aforementioned European Commission decision of 24 January 2007, on 17 November 2008 National Grid commenced a civil action before the High Court of Justice in London to obtain damages against the manufacturers of GIS equipment, including Alstom and certain of its subsidiaries. National Grid asserts that it has suffered overall alleged damages from all manufacturers concerned of GBP 249.3 million in total since it bought GIS equipment at inflated prices due to alleged anti-competitive arrangements between manufacturers. Alstom contests the facts. On 12 June 2009, the High Court of Justice in London decided a stay of proceeding until the European Commission decision of 24 January 2007 is final. During fiscal year 2010/11, two other similar civil actions have been started before national jurisdictions for a global amount of €24 million.

Power transformers

On 20 November 2008, the European Commission sent a statement of objections to a number of manufacturers of power transformers, including Alstom, concerning their alleged participation in anti-competitive arrangements. Alstom has contested the materiality of the alleged facts. On 7 October 2009, the European Commission levied a fine of €16.5 million against Alstom which includes €13.5 million on a joint and several basis with Areva T&D. Alstom has requested the cancellation of the decision before the General Court of the European Union on 21 December 2009. The date when the hearings will take place is not yet known and a Court decision should not occur before 2012.

German proceedings

The Group received a statement of objections issued by the German Federal Cartel Office ("FCO") on 22 December 2008, alleging breaches of German competition law in the field of steam generators for lignite-fired power plants. On 12 August 2010, the FCO levied a fine of €91 million against ALSTOM Power Systems GmbH and two of its former officers, as well as against two competitors now bankrupt for alleged cartel arrangements between 1990 and 2003. Alstom has requested a reconsideration of this decision and believes it has strong legal arguments to reduce this amount. In addition civil actions from large customers cannot be excluded.

- **Alleged illegal payments**

Certain companies and/or current and former employees of the Group have been or are currently being investigated in various countries with respect to alleged illegal payments. These procedures may result in fines, exclusion of Group subsidiaries from public tenders and third-party actions. In France, on 6 October 2010, a Group's subsidiary in the Hydro business was formally charged for alleged illegal payments concerning past operations in Zambia. The Group considers that there is no matter for a breach of law and has pleaded that the criminal investigation, which is now closed, should end up favourably. The World Bank has also launched an investigation for alleged illegal payments concerning past operations in Zambia. The sanctions the World Bank may impose range from penalties to disbarment from all or part of the projects financed by the World Bank, which may have a significant adverse effect on the image, results and financial situation of the Group.

- **US litigation following an accident in the Washington D.C. metro**

On 22 June 2009, a collision between two metro trains occurred in the Washington D.C. metro resulting in the death of 9 persons and the injury of 52 persons. At present, 23 lawsuits, consolidated in one single lawsuit, have already been filed against Alstom Signaling Inc. and other defendants not belonging to the Group. The claims against Alstom Signaling Inc. amount in excess of $475 million as of today. A report of the National Transportation Safety Board on the causes of the accident partially implicated equipment supplied by Alstom Signaling Inc. However it is too early to definitively determine the precise causes of the accident, resulting liabilities and the total amount of claims. These claims have been declared to the Group's insurers and Alstom believes it has adequate insurance coverage.

- **Budapest metro**

In 2006, Alstom was awarded by BKV a contract for the delivery of 22 Metropolis metros for Line 2 and 15 metros for Line 4 for the city of Budapest. During the execution of the project, Alstom experienced delays mostly related to technical change requests from BKV and the refusal by the Hungarian Authority "NKH" to deliver the final train homologation. In August 2007, NKH granted a Preliminary Type License, but, in October 2010, NKH refused to grant the final homologation ("Final Type License"). On 19 October 2010 BKV terminated the contract and called immediately thereafter all bank guarantees amounting in total to approximately €130 million. On 25 October 2010, the French Court of Nanterre served a provisional injunction and ordered the bank not to pay considering that BKV manifestly misused its right to call the bank guarantees. BKV has appealed this decision before the French Court of Versailles. In addition, Alstom commenced an arbitration procedure on 21 January 2011.

- **Lignite-fired station in Maritza**

In 2006, Alstom was awarded by AES a contract for the manufacture of a lignite-fired station in Maritza, Bulgaria. During the execution of the project, Alstom experienced delays and works disruptions mostly due to the defective nature of the lignite supplied by AES. In March 2011, AES terminated the contract. Prior to termination, AES called its performance bank guarantee up to approximately €150 million. On 10 February 2011, the French Court of Nanterre served a provisional injunction and ordered the bank not to pay, considering that AES manifestly misused its right to call the bank guarantee. AES has appealed this decision before the French Court of Versailles. In addition, Alstom commenced an arbitration procedure on 22 January 2011.

There are no other governmental, legal or arbitration procedures, including proceedings of which the Group is aware and which are pending or threatening, which might have, or have had during the last twelve months, a significant impact on the financial situation or profitability of the Group.

ALSTOM

NOTE 29. LEASE OBLIGATIONS

(in € million)	**Total**	**Maturity of lease payments**		
		Within 1 year	**1 to 5 years**	**Over 5 years**
Long term rental *(1)*	556	57	202	297

(1) Tax services related to foreign entities. These services were pre approved by the Audit Comittee and are compliant with French independance rules and Alstom's requirements.
These tax services were mainly transferred to other service providers during the fiscal year 2009-2010.

NOTE 31. RELATED PARTIES

Shareholders of the Group

To the Group's knowledge, the only shareholder holding more than 6% of the parent company's share capital is Bouygues, a French company listed on Paris stock market. At 31 March 2011, Bouygues holds a 30.8% stake in Alstom share capital.

In November 2009, Bouygues has exercised a put option over its 50% equity interest in Alstom Hydro Holding in exchange for 4,400,000 Alstom shares. The transaction has been finalised in March 2010 (see Note 24).
No material transactions have been carried out with Bouygues during the financial year ended 31 March 2011.

Associates

No material transactions have been carried out with associates during the period ended 31 March 2011.

Recorded expense in respect of compensation and related benefits attributable to key management personnel during the year

The Group considers that key management personnel as defined by IAS 24 are the members of the Executive Committee at 31 March 2011.

	Year ended		
(in € thousand)	**31 March 2011**	**31 March 2010**	**31 March 2009**
Short-term benefits	**6,700**	**5,955**	**6,025**
Fixed gross salaries (1)	*3,995*	*3,450*	*3,225*
Variable gross salaries	*2,705*	*2,505*	*2,800*

Post-employment defined contribution plans	*130*	*110*	*107*
Other post-employment benefits	-	-	-
Other benefits	**1,585**	**1,721**	**3,521**
Non monetary benefits	*25*	*24*	*24*
Share-based payments (2)	*1,560*	*1,697*	*3,497*
Total	**9,619**	**11,662**	**10,334**

(1) Fixed gross salaries do not included directors fees that amount to € 661 thousand at 31 March 2011, € 629 thousand at 31 March 2010 and € 538 thousand at 31 March 2009.

(2) Expense recorded in the income statement in respect of stock option plans and performance shares.

NOTE 32. SUBSEQUENT EVENTS

On 20 April 2011, Alstom and Shanghai Electric Group announce the signing of a letter of intent for the creation of Alstom-Shanghai Electric Boilers Co, a 50/50 joint company combining both partners'activities in the boiler market for power plants.

NOTE 33. MAJOR COMPANIES INCLUDED IN THE SCOPE OF CONSOLIDATION

The major companies of the Group are listed below and selected according to one of the following criteria: significant holding companies or sales above €100 million for the year ended 31 March 2011. The list of all consolidated companies is available upon request at the head office of the Group.

Parent company

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Presentation of the Group

Alstom ("the Group") serves the power generation and transmission markets through its Thermal Power, Renewable Power and Grid Sectors, and the rail transport market through its Transport Sector. The Group designs, supplies, and services a complete range of technologically-advanced products and systems for its customers, and possesses a unique expertise in systems integration and through-life maintenance and services.

On 15 June 2011, the Chief Executive Officer announced the reshaping of the operational activities of the Group into four Sectors. The reorganisation has been effective starting from 4 July 2011.

Alstom has undergone a period of strong growth, followed by the necessary adaptation to a tougher economic environment created by the crisis. As the company is experiencing a rebound in orders, this new organisation allows the Group to better anticipate the structural changes in its business, accelerate its development and achieve its performance objectives. It strengthens the Group's ability to address strategic moves, focus the Sectors on their operational objectives (commercial efficiency, product development, quality and project execution) and simplify the ways of working (quicker and leaner decision making processes, and empowerment).
The operational activities of the Group, which were until that date split into three Sectors (Power, Grid and Transport) are now organised in four Sectors (Thermal Power, Renewable Power, Grid and Transport). The split of the current Power Sector into two Sectors, Thermal and Renewable, simplifies the management of both entities and better addresses their specific markets.

The operational activities of the Group are organised in four Sectors:

- **Thermal Power**

Thermal Power offers a comprehensive range of power generation solutions using gas or coal from integrated power plants and all types of turbines, generators, boilers, emission control systems to a full range of services including plant modernisation, maintenance and operational support. The Sector also supplies conventional islands for nuclear power plants.

- **Renewable Power**

Renewable Power offers EPC solutions, turbines and generators, control equipment and maintenance for hydro power and wind power activities. The Sector includes geothermal and solar thermal businesses.

- **Grid**

The Grid Sector designs and manufactures equipment and engineered turnkey solutions to manage power grids and transmit electricity from the power plant to the large end-user, be it a distribution utility or an industrial process or production facility.

- **Transport**

The Transport Sector serves the urban transit, regional/intercity passenger travel markets and freight markets all over the world with rail transport products, systems and services.

Thermal Power and Renewable Power activities were aggregated in a single Power sector in the consolidated financial statements for the year ended 31 March 2011. Comparative segment information has been restated following the split of the former Power Sector implemented in the first months of the current financial year.

Grid activities have been consolidated starting from the date of their acquisition by the Group (7 June 2010). Comparative figures for financial year ended 31 March 2011 are therefore not representative of a full 12-month period.

The consolidated financial statements are presented in euro and have been authorised for issue by the Board of Directors held on 3 May 2012. In accordance with French legislation, they will be final once approved by the shareholders of Alstom at the Annual General Meeting convened for 26 June 2012.

Note 2. Accounting policies

2.1 Basis of preparation of the consolidated financial statements

Alstom consolidated financial statements for the year ended 31 March 2012 have been prepared:

- in accordance with the International Financial Reporting Standards (IFRS) and interpretations published by the International Accounting Standards Board (IASB) and endorsed by the European Union and whose application was mandatory as of 1 April 2011;
- using the same accounting policies and measurement methods as at 31 March 2011, with the exceptions of changes required by the enforcement of new standards and interpretations as described below.

The information relating to consolidated financial statements for the fiscal year ended 31 March 2010, presented in the 2010/11 registration document D.11-0522 filed with the AMF on 26 May 2011 is included by reference.
The full set of standards endorsed by the European Union can be consulted on the website of the European Commission at:
http://ec.europa.eu/internal_market/accounting/ias/index_en.htm

2.1.1.Changes in accounting policies due to new, revised or amended standards and interpretations mandatorily applicable for financial periods beginning on 1 April 2011

The Group's consolidated financial statements are not affected by the enforcement of the new, revised, or amended standards and interpretations becoming effective in the European Union starting from 1 April 2011.

2.1.2. New standards and interpretations not yet mandatorily applicable

The Group has opted for an early application of the amendment to IAS 1, Presentation of items of other comprehensive income. This amendment requests the distinction between comprehensive income elements that will be reclassified in profit or loss and elements that will not. This amendment does not have a material impact on the presentation of the Group's published consolidated statement of comprehensive income.

The Group has not opted for an early application in the consolidated financial statements at 31 March 2012 of the following forthcoming IFRS requirements already published by the IASB but not yet approved by the European Union:

- Financial instruments: classification and measurement of financial assets (IFRS 9)
- Consolidated financial statements (IFRS 10)
- Joint arrangements (IFRS 11)
- Disclosure of interests in other entities (IFRS 12)
- Investments in associates and joint ventures (IAS 28 revised)
- Fair value measurement (IFRS 13)
- Employee benefits (IAS 19 revised)
- Financial instruments disclosures (amendments to IFRS 7)

The Group is currently considering the impact of applying these new standards for the first time, in particular IFRS 10, Consolidated financial statements; IFRS 11, Joint arrangements and the amended IAS 19, Employee Benefits.

- IFRS 10 Consolidated financial statements

  This standard defines control as being exercised when an investor is exposed, or has rights, to variable returns from his involvement with the investee and has the ability to affect those returns through his power over the investee. The Group is currently assessing the potential impact of the first-time application of that standard.

- IFRS 11 Joint arrangements

  The new standard mainly prescribes two different accounting treatments:
  - Joint arrangements qualifying as joint operations will be recognised based on the proportion of assets, liabilities, revenue and expenses controlled by the Group. A joint operation may be conducted under a separate vehicle or not.
  - Joint arrangements that are qualified as joint ventures will be accounted for using the equity method, because the parties have rights to the net assets of the arrangement.

  The Group is currently analysing its jointly controlled entities in light of IFRS 11, Joint arrangements so as to determine if they shall be classified as joint operations or joint ventures. However, as the contribution of these entities to the Group's main financial indicators is currently not material, the impact of applying this new standard on the consolidated financial statements should be limited.

The consolidation standards (IFRS 10, IFRS 11 and IFRS 12), published in May 2011 are of mandatory application as of 1 January 2013, subject to EU endorsement.

- Amendment to IAS 19 Employee benefits:

  This amendment eliminates the option of applying the corridor approach. As a result, all actuarial gains and losses and past service costs will be recognized immediately in liabilities. Actuarial gains and losses for each period will be recorded systematically in "other comprehensive income" and past service costs will be recorded in the income statement. The amendment also specifies the calculation of the expected return on plan assets on the basis of the discount rate used to value the defined benefit obligation rather than on the basis of market expectations for returns.

  The Group does not apply the corridor approach and already records all actuarial gains and losses in other comprehensive income. The calculation of the expected return on plan assets

on the basis of the discount rate used to value the underlying obligation will increase the net financial expense, but the net impact on the financial statements should not be significant.

The amendment to IAS 19 is of mandatory application as of 1 January 2013, subject to EU endorsement.

2.2. Use of estimates

The preparation of the consolidated financial statements in conformity with IFRS requires management to make various estimates and to use assumptions regarded as realistic and reasonable. These estimates or assumptions could affect the value of the Group's assets, liabilities, equity, net income and contingent assets and liabilities at the closing date. Management reviews estimates on an on-going basis using information currently available. Actual results may differ from those estimates, due to changes in facts and circumstances.

The accounting policies most affected by the use of estimates are the following:

- **Revenue and margin recognition on construction and long-term service contracts and related provisions**

The Group recognises revenue and gross margin on construction and long-term service contracts using the percentage of completion method based on milestones; in addition, when a project review indicates a negative gross margin, the loss related to work not yet performed is immediately recognised.

Recognised revenue and margin are based on estimates of total expected contract revenue and cost, which are subject to revisions as the contract progresses. Total expected revenue and cost on a contract reflect management's current best estimate of the probable future benefits and obligations associated with the contract. Assumptions to calculate present and future obligations take into account current technology as well as the commercial and contractual positions, assessed on a contract-by-contract basis. The introduction of technologically-advanced products exposes the Group to risks of product failure significantly beyond the terms of standard contractual warranties applicable to suppliers of equipment only.

Obligations on contracts may result in penalties due to late completion of contractual milestones, or unanticipated costs due to project modifications, suppliers or subcontractors' failure to perform or delays caused by unexpected conditions or events. Warranty obligations are affected by product failure rates, material usage and service delivery costs incurred in correcting failures.

Although the Group makes individual assessments on contracts, there is a risk that actual costs related to those obligations may exceed initial estimates. Estimates of contract costs and revenues at completion in case of contracts in progress and estimates of provisions in case of completed contracts may then have to be re-assessed.

- **Estimate of provisions relating to litigations**

The Group identifies and analyses on a regular basis current litigations and measures, when necessary, provisions on the basis of its best estimate of the expenditure required to settle the obligation at the balance sheet date. These estimates take into account information available and different possible outcomes.

- **Valuation of deferred tax assets**

Management judgment is required to determine the extent to which deferred tax assets can be recognised. Future sources of taxable income and the effects of the Group global income tax strategies are taken into account in making this determination. This assessment is conducted through a detailed review of deferred tax assets by jurisdiction and takes into account past, current and future performance deriving from the existing contracts in the order book, the budget and the three-year plan, and the length of carry back, carry forwards and expiry periods of net operating losses.

- **Measurement of post-employment and other long-term defined employee benefits**

The measurement of obligations and assets related to defined benefit plans makes it necessary to use several statistical and other factors that attempt to anticipate future events. These factors include assumptions about the discount rate, the expected return on plan assets, the rate of future compensation increases as well as withdrawal and mortality rates. If actuarial assumptions materially differ from actual results, it could result in a significant change in the employee benefit expense recognised in the income statement, actuarial gains and losses recognised in other comprehensive income and prepaid and accrued benefits.

- **Valuation of assets**

The discounted cash flow model used to determine the recoverable value of the groups of cash generating units to which goodwill is allocated includes a number of inputs including estimates of future cash flows, discount rates and other variables, and then requires significant judgment.

Impairment tests performed on intangible and tangible assets are also based on assumptions. Future adverse changes in market conditions or poor operating results from underlying assets could result in an inability to recover their current carrying value.

- **Inventories**

Inventories, including work in progress, are measured at the lower of cost or net realisable value. Write-down of inventories are calculated based on an analysis of foreseeable changes in demand, technology or market conditions in order to determine obsolete or excess inventories. If actual market conditions are less favourable than those projected, additional inventory write-downs may be required.

2.3. Significant accounting policies

2.3.1. Consolidation methods

Subsidiaries

Entities over which the Group exercises exclusive control are fully consolidated. Exclusive control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of a company so as to obtain benefits from its activities, whether it holds shares or not.

Inter-company balances and transactions are eliminated.

Results of operations of subsidiaries acquired or disposed of during the year are recognised in the consolidated income statement as from the date of acquisition or up to the date of disposal, respectively.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the equity attributable to the equity holders of the parent. Non-controlling interests consist of the amount of those interests at the date of the original business combination and their share of changes in equity since the date of the combination. In the absence of explicit agreements to the contrary, subsidiaries' losses are systematically allocated between equity holders of the parent and minority interests based on their respective ownership interests even if this results in the minority interests having a deficit balance.

Interests in joint ventures

Entities over which the Group exercises joint control are consolidated according to the proportionate consolidation method whereby the Group's share of the joint ventures' results, assets and liabilities is recorded in the consolidated financial statements. Accounting policies of joint ventures have been changed where necessary to ensure consistency with the policies adopted by the Group.

Investments in associates

Entities in which the Group exercises significant influence but not control, are accounted for under the equity method. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Under the equity method, investments in associates are carried in the consolidated balance sheet at cost, including any goodwill arising and transaction costs. Earn-outs are initially recorded at fair value and adjustments recorded through cost of investment when their payments are probable and can be measured with sufficient reliability.

The Group's share of its associates' profits or losses is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Losses of an associate in excess of the Group's interest in that associate are not recognised, except if the Group has a legal or implicit obligation.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the associate recognised at the date of acquisition is recognised as goodwill. The goodwill is included within the carrying amount of the investment and is assessed for impairment as part of the investment.

2.3.2 Translation of financial statements denominated in currencies other than euro

Functional currency is the currency of the primary economic environment in which a reporting entity operates, which in most cases, corresponds to the local currency. However, some reporting entities may have a functional currency different from local currency when that other currency is used for the entity's main transactions and faithfully reflects its economic environment.

Assets and liabilities of entities whose functional currency is other than the euro are translated into euro at closing exchange rate at the end of each reporting period while their income and cash flow statements are translated at the average exchange rate for the period. The currency translation adjustments resulting from the use of different currency rates for opening balance sheet positions, transactions of the period and closing balance sheet positions are recorded in other comprehensive income. Translation adjustments are transferred to the consolidated income statement at the time of the disposal of the related entity.

Goodwill and fair value adjustments arising from the acquisition of entities whose functional currency is not euro are designated as assets and liabilities of those entities and therefore

denominated in their functional currencies and translated at the closing rate at the end of each reporting period.

2.3.3 Business combinations

Business combinations completed between 1 January 2004 and 31 March 2010 have been recognised applying the provisions of the previous version of IFRS 3.
Business combinations completed from 1 April 2010 onwards are recognised in accordance with IFRS 3 Revised.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the sum of fair values of the assets transferred and the liabilities incurred by the acquirer at the acquisition date and the equity-interest issued by the acquirer. The consideration transferred includes contingent consideration, measured and recognized at fair value, at the acquisition date.

Earn-outs are initially recorded at fair value and adjustments made beyond the 12-month measurement period following the acquisition are systematically recognised through profit or loss.

Acquisition-related costs are recorded as an expense in the period in which they are incurred.

Goodwill arising from a business combination is measured as the difference between:

- the fair value of the consideration transferred for an acquiree plus the amount of any non-controlling interests of the acquiree; and
- the net fair value of the identifiable assets acquired and liabilities assumed at the acquisition date.

Initial estimates of consideration transferred and fair values of assets acquired and liabilities assumed are finalised within twelve months after the date of acquisition and any adjustments are accounted for as retroactive adjustments to goodwill. Beyond this twelve-month period, any adjustment is directly recognised in the income statement.

For each business combination, any non-controlling interest in the acquiree may be measured either at the acquisition-date fair value, leading to the recognition of the non-controlling interest's share of goodwill (full goodwill method) or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets, resulting in recognition of only the share of goodwill attributable to equity holders of the parent (partial goodwill method).

Goodwill is not amortised but tested for impairment at least annually at closing date.

In case of a step-acquisition that leads to the Group acquiring control of the acquiree, the equity interest previously held by the Group is remeasured at its acquisition-date fair value and any resulting gain or loss is recognised in profit or loss.

2.3.4. Segment information

Operating segments used to present segment information are identified on the basis of internal reports used by the Chief Executive Officer (CEO) to allocate resources to the segments and assess their performance. There is no segment aggregation.
The Chief Executive Officer is the Group's "chief operating decisions maker" within the meaning of IFRS 8.
The methods used to measure the key performance indicators of the segments for internal reporting purposes are the same as those used to prepare the consolidated financial statements.

2.3.5. Sales and costs generated by operating activities

Measurement of sales and costs
The amount of revenue arising from a transaction is usually determined by the contractual agreement with the customer. In the case of construction contracts, claims are considered in the determination of contract revenue only when it is highly probable that the claim will result in additional revenue and the amount can be reliably estimated.
Penalties are taken into account in reduction of contract revenue as soon as they are probable.

Production costs include direct costs (such as material, labour and warranty costs) and indirect costs. On the basis of funding required for the execution of contracts, borrowing costs may be attributed to construction contracts whose execution period exceeds one year. Warranty costs are estimated on the basis of contractual agreement, available statistical data and weighting of all possible outcomes against their associated probabilities. Warranty periods may extend up to five years. Selling and administrative expenses are excluded from production costs.

Recognition of sales and costs
Revenue on sale of manufactured products is recognised when the significant risks and rewards of ownership are transferred to the customer, which generally occurs on delivery. Revenue on short-term service contracts is recognised on performance of the related service. All production costs incurred or to be incurred in respect of the sale are charged to cost of sales at the date of recognition of sales.

Revenue on construction contracts and long-term service agreements is recognised based on the percentage of completion method: the stage of completion is assessed by milestones which ascertain the completion of a physical proportion of the contract work or the performance of services provided for in the agreement. The revenue for the period is the excess of revenue measured according to the percentage of completion over the revenue recognised in prior periods.

Cost of sales on construction contracts and long-term service agreements is computed on the same basis. The cost of sales for the period is the excess of cost measured according to the percentage of completion over the cost of sales recognised in prior periods. As a consequence, adjustments to contract estimates resulting from work conditions and performance are recognised in cost of sales as soon as they occur, prorated to the stage of completion.

When the outcome of a contract cannot be estimated reliably but the contract overall is expected to be profitable, revenue is still recognised based on milestones, but margin at completion is adjusted to nil.

When it is probable that contract costs at completion will exceed total contract revenue, the expected loss is recognised immediately as an expense.
Bid costs are directly recorded as expenses when a contract is not secured.

With respect to construction contracts and long-term service agreements, the aggregate amount of costs incurred to date *plus* recognised margin *less* progress billings is determined on a contract-by-contract basis. If the amount is positive, it is included as an asset designated as "Construction contracts in progress, assets". If the amount is negative, it is included as a liability designated as "Construction contracts in progress, liabilities".
The caption "Construction contracts in progress, liabilities" also includes down payments received from customers.

Recognition of overhead expenses

Research expenditure is expensed as incurred. Development costs are expensed as incurred unless the project they relate to meets the criteria for capitalisation (see Note 2.3.10). Selling and administrative expenses are expensed as incurred.

2.3.6. Income from operations

Income from operations is the indicator used by the Group to present the level of operational performance that can be used as part of an approach to forecast recurring performance. This complies with the recommendation 2009-R03 of the ANC, the French standard setter, on the format of financial statements of entities applying IFRS.
Income from operations includes gross margin, research and development expenditure, selling and administrative expenses. It includes in particular the service cost of employee defined benefits, the cost of share-based payments and employee profit sharing, foreign exchange gains or losses associated with operating transactions and capital gains (losses) on disposal of intangible and tangible assets arising from ordinary activities.

2.3.7. Other income and other expenses

Other income and other expenses are representative of items which are inherently difficult to predict due to their unusual, irregular or non-recurring nature.

Other income may include capital gains on disposal of investments or activities and capital gains on disposal of tangible and intangible assets arising from activities disposed of or facing restructuring plans as well as any income associated to past disposals.

Other expenses include capital losses on disposal of investments or activities and capital losses on disposal of tangible and intangible assets arising from activities disposed of or facing restructuring plans as well as any costs associated to past disposals, restructuring costs, costs incurred to effect business combinations and amortisation expense of assets exclusively acquired in the context of business combinations (margin in backlog, customer relationship, margin on inventory), significant impairment losses on assets, litigation costs that have arisen outside the ordinary course of business and a portion of post-employment and other long-term defined benefit expense (amortisation of unrecognised prior service cost, impacts of curtailments and settlements and amortisation of actuarial gains and losses referring to long-term benefits other than post-employment benefits).

2.3.8. Financial income and expense

Financial income and expense include:

- Interest income representing the remuneration of the cash position,
- Interest expense related to the financial debt (financial debt consists of bonds, the debt component of compound instruments, other borrowings and lease-financing liabilities);
- Other expenses paid to financial institutions for financing operations;
- The financial component of the cost of employee defined benefits (interest cost and expected return on assets);
- Dividends received from non consolidated investments;
- Foreign exchange gains and losses associated to financing transactions;
- Other income or expense from cash and cash equivalents and marketable securities.

2.3.9. Foreign currency transactions

Foreign currency transactions are initially recognised by applying to the foreign currency amount the spot exchange rate between the functional currency of the reporting unit and the foreign currency at the date of the transaction. Currency units held, assets to be received and liabilities to be paid resulting from those transactions are re-measured at closing exchange rates at the end of each reporting period. Realised exchange gains or losses at date of payment as well as unrealised gains or losses deriving from re-measurement are recorded within income from operations when they relate to operating activities or within financial income or expense when they relate to financing activities.

Since the Group is exposed to foreign currency volatility, the Group puts in place a significant volume of hedges to cover this exposure. These derivatives are recognised on the balance sheet at their fair value at the closing date. Providing that the relationships between the foreign currency exposure and the related derivatives are qualifying relationships, the Group uses the specific accounting treatments designated as hedge accounting. A relationship qualifies for hedge accounting if, at the inception of the hedge, it is formally designated and documented and if it proves to be highly effective throughout the financial reporting periods for which the hedge was designated.

Hedging relationships may be of two types:
- Cash flow hedge in case of hedge of the exposure to variability of cash flows attributable to highly probable forecast transactions;
- Fair value hedge in case of hedge of the exposure attributable to recognised assets, liabilities or firm commitments.

Cash flow hedge
When cash flow hedge accounting applies, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in other comprehensive income. When the forecast transaction results in the recognition of a financial asset or liability, the amounts previously recognised directly in other comprehensive income are recycled into the income statement. When the forecast transaction results in the recognition of a non financial asset or liability (for instance, inventories or construction contracts in progress), the gain or loss that was directly recognised in other comprehensive income is included in the carrying amount of the asset or liability.

Fair value hedge
When fair value hedge accounting applies, changes in the fair value of derivatives and changes in the fair value of hedged items are both recognised in the income statement and offset each other up to the gain or loss on the effective portion on the hedging instrument.

Whatever the type of hedge, the ineffective portion on the hedging instrument is recognised in the income statement. Realised and unrealised exchange gains and losses on hedged items and hedging instruments are recorded within income from operations when they relate to operating activities or within financial income or expense when they relate to financing activities.

As the effective portion on the hedging instrument offsets the difference between the spot rate at inception of the hedge and the effective spot rate at the outcome of the hedge, sales and costs resulting from commercial contracts are recognised at the spot rate at inception of the hedge throughout the life of the related commercial contracts, provided that the corresponding hedging relationships keep on qualifying for hedge accounting.

The Group also uses export insurance policies to hedge its currency exposure on certain contracts during the open bid period as well as after the award of the contracts. During the bid period, the fair values of these insurance instruments cannot be reliably determined due to the uncertainty on the award of commercial contracts. As a consequence, at that stage, the instruments are not recognised on the balance sheet. When commercial contracts are awarded, insurance

instruments are recognised and remeasured in the same way as foreign currency exchange forward contracts.

2.3.10. Intangible assets

Intangible assets include acquired intangible assets (such as technology and licensing agreements) and internally generated intangible assets (mainly development costs).

Acquired intangible assets

Acquired intangible assets are initially measured at cost and amortised on a straight-line basis over their estimated useful lives. Useful lives can extend to twenty years due to the long-term nature of the underlying contracts and activities. The amortisation expense of assets acquired through ordinary transactions is recorded in cost of sales, research and development expenditure, selling expenses or administrative expenses, based on the function of the underlying assets. The amortisation expense of assets exclusively acquired in the context of a business combination (margin in backlog, customer relationship) is recognised as other expense.

Internally generated intangible assets

Development costs are capitalised if and only if the project they relate to meets the following criteria:

- The project is clearly defined and its related costs are separately identified and reliably measured,
- The technical feasibility of the project is demonstrated,
- The intention exists to complete the project and to use or sell it,
- Adequate technical and financial resources are available to complete the project,
- It is probable that the future economic benefits attributable to the project will flow to the Group.

Capitalised development costs are costs incurred directly attributable to the project (materials, services, fees…), including an appropriate portion of relevant overheads.

Capitalised development costs are amortised on a straight-line basis over the estimated useful life of the asset. The amortisation charge is reported in research and development expenditure.

2.3.11. Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment loss. When an item of property, plant and equipment is made up of components with different useful lives, the total cost is allocated between the various components. Components are then separately depreciated.

Depreciation is computed using the straight-line method over the estimated useful lives of each component. The useful lives most commonly used are the following:

	Estimated useful life in years
Buildings	7-40
Machinery and equipment	3-20
Tools, furniture, fixtures and others	1-10

Useful lives are reviewed on a regular basis and changes in estimates, when relevant, are accounted for on a prospective basis. The depreciation expense is recorded in cost of sales, selling expenses or administrative expenses, based on the function of the underlying assets.

Borrowing costs that are attributable to an asset whose construction period exceeds one year are capitalised as part of the costs of the asset.

Property, plant and equipment acquired through finance lease arrangements or long-term rental arrangements that transfer substantially all the risks and rewards incidental to ownership are capitalised. They are recognised at their fair value at the inception of the lease, or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a financing obligation. Lease payments are apportioned between finance charges and repayment of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or the term of the relevant lease, when shorter.

Leases that do not transfer substantially all risks and rewards incidental to ownership are classified as operating leases. Rentals payable are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised on a straight-line basis over the lease term.

2.3.12. Impairment of goodwill, tangible and intangible assets

Goodwill and intangible assets not yet available for use are tested for impairment at least annually or when there are indicators that they may be impaired. Other intangible assets and tangible assets are tested for impairment only if there are indicators of impairment.

The impairment test methodology is based on a comparison between the recoverable amount of an asset and its net carrying value. A cash-generating unit (CGU) is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other groups of assets. If an asset does not generate cash inflows that are largely independent of other assets or groups of assets, the recoverable amount is determined for a cash-generating unit.

For internal management purposes, goodwill acquired in a business combination is monitored at the level of the Sectors as defined in Note 1: therefore goodwill is tested for impairment at the level of the group of cash-generating units constituting each Sector.

The recoverable amount is the higher of fair value less costs to sell and value in use. The value in use is elected as representative of the recoverable value. The valuation performed is based upon the Group's internal three-year business plan. Cash flows beyond this period are estimated using a perpetual long-term growth rate for the subsequent years. The recoverable amount is the sum of the discounted cash flows and the discounted terminal residual value. Discount rates are determined using the weighted-average cost of capital of each Sector.

If the recoverable amount of an asset or a cash-generating unit is estimated to be less than its carrying amount, the carrying amount is reduced to its recoverable amount and the impairment loss is recognised immediately in the income statement. In the case of goodwill allocated to a group of CGUs, the impairment loss is allocated first to reduce the carrying amount of goodwill and then to the other assets on a pro-rata basis of the carrying amount of each asset.

Impairment losses recognised in respect of goodwill cannot be reversed. The impairment losses recognized in respect of assets or cash-generating units may be reversed in a later period and recognized immediately in the income statement. The carrying amount is increased to the revised estimate of recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined, had no impairment loss been recognized in prior years.

2.3.13. Financial assets

Loans and deposits

Loans are initially measured at their fair value, plus directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method. Deposits are reported as financial assets when their initial maturity is more than three months and as cash and cash equivalents in case of demand deposits or when the initial maturity is less than three months.

If there is any indication that those assets may be impaired, they are reviewed for impairment. Any difference between the carrying value and the impaired value (net realisable value) is recorded as a financial expense. The impairment loss can be reversed if the value is recovered in the future. In that case, the reversal of the impairment loss is reported as a financial income.

Investments and debt securities

Investments in non-consolidated companies are designated as available-for-sale financial assets. They are initially measured at their fair value, plus directly attributable transaction costs and subsequently re-measured at fair value.

The fair value of listed securities is the market value at the closing date.

A valuation model is used in case of unlisted securities. Changes in fair value are directly recognised in other comprehensive income until the security is disposed of or is determined to be impaired. On disposal or in case of significant or prolonged decline in the fair value, the cumulative gain or loss previously recognised in other comprehensive income is included in the profit or loss for the period. Unlike impairment losses recognised in respect of investments in a debt instrument, impairment losses recognised in respect of investments in equity instruments cannot be reversed through profit and loss.

When the fair value cannot be determined reliably, investments in non-consolidated companies are measured at cost. Any impairment loss recognised for such investment is not reversed in a subsequent period, except when disposed of.

All debt securities that the Group has the expressed intention and ability to hold to maturity are designated as held-to-maturity financial assets. They are measured at amortised cost using the effective interest rate method, less any impairment loss recognised to reflect amounts expected not to be recoverable. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired and is measured as the difference between the investment's carrying value and the present value of the estimated future cash flows discounted at the effective interest rate computed at initial recognition. Impairment losses may be reversed through profit and loss in subsequent periods.

Marketable securities are securities held for trading which cannot be considered as cash and cash equivalents. They are designated as financial asset at fair value through profit or loss. Changes in fair value are reported as financial income or expense.

Derivative financial instruments

Derivative financial instruments are recognised and re-measured at fair value (see Note 2.3.9 for foreign currency hedging instruments and Note 2.3.19 for interest rate derivatives).

Receivables

Receivables are initially recognised at fair value, which in most cases approximates the nominal value. If there is any subsequent indication that those assets may be impaired, they are reviewed for impairment. Any difference between the carrying value and the impaired value (net realisable value) is recorded within income from operations. The impairment loss can be reversed if the value is recovered in the future. In that case, the reversal of the impairment loss is reported within income from operations.

2.3.14. Inventories

Raw materials and supplies, work in progress and finished products are stated at the lower of cost, using the weighted average cost method, or net realisable value. Inventory cost includes direct material and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

2.3.15. Cash and cash equivalents

Cash and cash equivalents consist of cash and short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash, which are subject to an insignificant risk of change in value.

Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

2.3.16. Taxation

The group computes taxes in accordance with prevailing tax legislation in the countries where income is taxable.
The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Temporary differences arising between the carrying amount and the tax base of assets and liabilities, unused tax losses and unused tax credits are identified for each taxable entity (or each tax group when applicable). Corresponding deferred taxes are calculated at the enacted or substantively enacted tax rates that are expected to apply in the period when the asset is realised or the liability settled.

Deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profits will be available in the future against which the deductible differences, unused tax losses and unused tax credits can be utilised. The carrying amount of deferred tax assets is reviewed at each balance sheet date.

Deferred tax liabilities are recognised for all taxable temporary differences, with the exception of certain taxable temporary differences between the Group's share in the net assets in subsidiaries, joint ventures and associates and their tax bases. The most common situation when such exception applies relates to undistributed profits of subsidiaries where distribution to the shareholders would trigger a tax liability: when the Group has determined that profits retained by the subsidiary will not be distributed in the foreseeable future, no deferred tax liability is recognised.

Deferred tax assets and liabilities are offset when both of the following conditions are met:

- the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and
- the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority.

Deferred tax is charged or credited to net income, except when it relates to items charged or credited directly to other comprehensive income, in which case the deferred tax is classified in other comprehensive income.

2.3.17. Provisions

As long as a construction contract or a long-term service agreement is in progress, obligations attributable to such a contract are taken into account in the assessment of the margin to be recognised and are therefore reported within the accounts "Construction contracts in progress, assets" or "Construction contracts in progress, liabilities".

Upon completion of the contract, such obligations are recognised as distinct liabilities when they satisfy the following criteria:

- the Group has a present legal or constructive obligation as a result of a past event;
- it is probable that an outflow of economic resources will be required to settle the obligation; and
- such outflow can be reliably estimated.

These liabilities are presented as provisions when they are of uncertain timing or amount. When this uncertainty is dispelled, they are presented as trade payables or other current liabilities.

Obligations resulting from transactions other than construction contracts and long-term service agreements are directly recognised as provisions as soon as the above-mentioned criteria are met.
Where the effect of the time value of money is material, provisions are measured at their present value.

Restructuring provisions are made when plans to reduce or close facilities, or to reduce the workforce have been finalised and approved by the Group management and have been announced before the balance sheet date, resulting in an obligation of the Group to third parties. Restructuring costs include employees' severance and termination benefits and estimated facility closing costs. In addition to such provisions, restructuring costs may include asset write-off relating to the restructured activities.

2.3.18. Financial liabilities

Bonds and borrowings

Bonds and interest-bearing bank loans are initially recognised at fair value, less any transaction costs directly attributable to the issuance of the liability. These financial liabilities are subsequently measured at amortised cost, using the effective interest rate method.

Derivative financial instruments

Derivative financial instruments are recognised and re-measured at fair value (see Note 2.3.9 for foreign currency hedging instruments and Note 2.3.19 for interest rate hedging instruments).

Payables

Payables are initially recognised at fair value, which in most cases approximates the nominal value. They are subsequently re-measured at amortised cost.

2.3.19. Interest rate derivatives

The Group may enter into hedges for the purpose of managing its exposure to movements in interest rates. Derivatives are recognised on the balance sheet at fair value at the closing date. Providing that the relationships between the interest rate exposure and the related derivatives are qualifying relationships, the Group uses the specific accounting treatments designated as hedge accounting. Fair value hedge accounting and cash flow hedge accounting are applied to fixed and floating rate borrowings, respectively.

In the case of fair value hedge relationships, the re-measurement of the fixed rate borrowing is offset in the income statement by the movement in the fair value of the derivative up to the effective part of hedged risk. In the case of cash flow hedge relationships, the change in fair value of the derivative is recognised directly in other comprehensive income. When the forecast transaction results in the recognition of a monetary item, the amounts previously recognised directly in other comprehensive income are reclassified to the income statement.

2.3.20. Share-based payments

The Group issues equity-settled and cash-settled share-based payments to certain employees.

Equity-settled share-based payments
Equity-settled share-based payments are measured at fair value at the grant date (excluding the effect of non-market-based conditions) using the binomial pricing model. The cumulative recognised expense is based on the fair value at grant date and on the estimated number of shares that will eventually vest (including the effect of non-market-based vesting conditions). It is recorded in income from operations throughout the vesting period with a counterpart in equity.
At the end of each reporting period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting conditions. It recognises the impact of the revision to original estimates, if any, in the income statement, with a corresponding adjustment to equity.

Cash-settled share-based payments
For cash-settled share-based payments, a liability equal to the portion of the goods or services rendered is recognised at the current fair value determined at each balance sheet date.

The Group may also provide employees with the ability to purchase the Group's ordinary shares at a discounted price compared to that of the current market value. In that case, the Group records an expense based on the discount given and its estimate of the shares expected to vest.

2.3.21. Post-employment and other long-term defined employee benefits

The Group provides its employees with various types of post-employment benefits, such as pensions, retirement bonuses and medical care, and other long-term benefits, such as jubilee awards and deferred compensation schemes. The type of benefits offered to individual employees is related to local legal requirements as well as practices of the specific subsidiaries.
The Group's health care plans are generally contributory with participants' contributions adjusted annually.

Post-employment defined benefit plans
For single employer defined benefit plans, the Group uses the Projected Unit Credit Method to determine the present value of its obligations and the related current and past service costs/profits. This method considers the actuarial assumptions' best estimates (for example, the expected turnover, the expected future salary increase and the expected mortality).

Most defined benefit pension liabilities are funded through pension funds legally distinct from the entities constituting the Group. Plan assets related to funded plans are invested mainly in equity and debt securities. Other supplemental pension plans sponsored by the Group for certain employees are directly paid by the employer as they become due. Post-employment medical benefit plans are predominantly unfunded.

The Group periodically reviews plan assets and obligations. The effects of any change in actuarial assumptions together with the differences between forecast and actual experience are assessed. The Group recognises in other comprehensive income the full amount of any actuarial gains and losses as well as the effect of any asset ceiling.

The estimated cost of providing defined benefits to employees is accrued during the years in which the employees render services. In the income statement, the service cost is included in the income from operations. The amortisation of unrecognised prior service cost/profit and specific events impacts (e.g. curtailments) are recognised in other expenses. Interest cost and expected return on assets are included in financial income (expenses).

The Group also participates in multi-employer defined benefit plans, mainly in the United States and Canada. As corresponding funds are not able to provide sufficient information to use defined benefit accounting, these plans are accounted for as defined contribution plans (see below).

Post-employment defined contribution plans

For defined contribution plans, the Group pays contributions to independently administered funds at a fixed percentage of employees' pay. These contributions are recorded as operating expenses.

Other long-term employee benefits

The accounting method used when recognising obligations arising from other long-term employee benefits is similar to the method used for post-employment defined benefits, except that prior service cost and actuarial gains/losses are immediately recognised in full in "other income/expenses" in the income statement.

2.3.22. Off balance sheet commitments

Commitments arising from execution of operations controlled by the Group

In the ordinary course of business, the Group is committed to fulfil various types of obligations arising from customer contracts (among which full performance and warranty obligations). Obligations may also arise from leases and regulations in respect of tax, custom duties, environment, health and safety. These obligations may or may not be guaranteed by bonds issued by banks or insurance companies.

As the Group is in a position to control the execution of these obligations, a liability only arises if an obligating event (such as a dispute or a late completion) has occurred and makes it likely that an outflow of resources will occur.

When the liability is considered as only possible but not probable or, when probable, cannot be reliably measured, it is disclosed as a contingent liability.

When the liability is considered as probable and can be reliably measured, the impact on the financial statements is the following:

- if the additional liability is directly related to the execution of a customer contract in progress, the estimated gross margin at completion of the contract is reassessed; the cumulated margin recognised to date based on the percentage of completion and the accrual for future contract loss, if any, are adjusted accordingly,
- if the additional liability is not directly related to a contract in progress, a liability is immediately recognised on the balance sheet.

The contractual obligations of subcontractors towards the Group are of the same nature as those of the Group towards its customers. They may be secured by the same type of guarantees as those provided to the Group's customers.
No contingent asset is disclosed when the likelihood of the obligation of the third party remains remote or possible. A contingent asset is disclosed only when the obligation becomes probable.

Any additional income resulting from a third party obligation is taken into account only when it becomes virtually certain.

Commitments arising from execution of operations not wholly within the control of the Group

Obligations towards third parties may arise from on-going legal proceedings, credit guarantees covering the financial obligations of third parties in cases where the Group is the vendor, and indemnification guarantees issued in connection with disposals of business entities.

In case of legal proceedings, a contingent liability is disclosed when the liability is considered as only possible but not probable, or, when probable, cannot be reliably measured. In case of commitments arising from guarantees issued, contingent liabilities are disclosed as soon as guarantees have been delivered and as long as they have not matured.

A provision is recorded if the obligation is considered as probable and can be reliably measured.

Contingent assets arising from legal proceedings or guarantees delivered by third parties are only disclosed when they become probable.

2.3.23. Earnings per share

Basic earnings per share are computed by dividing the period net profit (loss) before the financial cost (net of tax) of bonds reimbursable with shares, by the weighted average number of outstanding shares during the period increased by the weighted average number of shares to be issued on reimbursement of bonds reimbursable with shares (“ORA”).

Diluted earnings per share are computed by dividing the period net profit (loss) before the financial cost (net of tax) of bonds reimbursable with shares, by the weighted average number of outstanding shares during the period adjusted in order to take into consideration all dilutive instruments (ORA, stock options, free shares).

Note 3. Scope of consolidation

3.1. Transmission activities (Grid)

On 20 January 2010, Alstom and Schneider Electric, acting under a consortium agreement, signed an agreement with Areva with the purpose of acquiring its transmission and distribution activities ("Areva T&D"). Following the approvals from competition authorities, the closing of the acquisition took place on 7 June 2010 and the consortium acquired the entire capital of Areva T&D for an equity value of €2,290 million and both partners of the consortium took over from Areva the financial debt refinancing of this company.

Alstom funded the equity value of the Transmission activities (€1,570 million) and refinanced the related debt of €753 million.

The consortium agreement establishes that, at the closing date of the transaction, Transmission activities and Distribution activities are owned respectively by Alstom and Schneider Electric.
As a result, the Transmission activities have been fully consolidated since 7 June 2010 in the Group's financial statements, while the Distribution activities are totally excluded from the consolidation scope.

With this acquisition, the Group formed a new Sector, named Grid.

In accordance with IFRS 3 (revised), the Group has recognised the assets acquired and liabilities assumed, these being measured at fair value at the acquisition date.

The Group has decided to measure the non-controlling interests at the non-controlling interests' proportionate share of the identifiable net assets of the Transmission activities.

The valuation of assets acquired and liabilities assumed at their fair value has resulted in the recognition of new intangible assets (technology, order backlog margin and customer relationships) and the re-measurement of tangible assets, inventories and liabilities. Assets have been valued by external independent experts. The valuation was finalised on 7 June 2011 and its effects reflected in the Consolidated Financial Statements.

The resulting goodwill amounts to €1,529 million and is mainly supported by the leadership position of Alstom Group in growing markets and by expected synergies between Grid and other Alstom activities in terms of costs and portfolio strategy, in particular the unique positioning of

the acquired businesses on the Smart Grid key markets and the international presence of the Transmission businesses.

In the fields of cost reductions, comprehensive commercial offering and combined workforce and know-how, specific synergies with Power and Transport Sectors have been identified. An in-depth analysis and valuation of these synergies, carried out by an independent expert, has resulted in a final allocation of goodwill of €293 million to Power sectors and €136 million to Transport sector. Therefore the goodwill allocated to Grid amounts to €1,100 million.

Fair values of the assets acquired and liabilities assumed of the Transmission activities at the date of acquisition:

(in € million)	Fair values
Intangible assets	509
Property plant & equipment	629
Associates & other investments	1
Other non current assets, net	16
Deferred tax	189
Total non-current assets	**1,344**
Inventories	725
Construction contracts in progress, assets	0
Trade receivables	1,916
Other current operating assets	556
Marketable securities and other current financial assets	0
Cash and cash Equivalents	328
Total current assets	**3,525**
Total assets	**4,869**
Non-current provisions	204
Accrued pensions and other employee benefits	188
Non-current borrowings	8
Non-current obligations under finance leases	7
Deferred tax	19
Total non-current liabilities	**426**
Current provisions	523
Current borrowings	1,058
Current obligations under finance leases	1
Construction contract in progress, liabilities	742
Trade payables	766
Other current operating liabilities	1,237
Total current liabilities	**4,327**
Total Liabilities	**4,753**
Net assets acquired	**116**
Fair value of assets and liabilities attributable to non controlling interests	75
Fair value of assets and liabilities attributable to equity holders of the parent	**41**
Purchase price	1,570
Final goodwill	**1,529**

3.2. Transmashholding

On 27 May 2011, Alstom has finalised its partnership agreement with Transmashholding ("TMH"), the leading Russian rail manufacturer, by acquiring a 25% stake (plus one share) of the Breakers Investments B.V., which holds 100% of Transmashholding. The deal was closed after Alstom received all approvals of the appropriate Russian authorities.

Alstom share in the Breakers Investments B.V. group is an investment in associates and is therefore accounted for according to the equity method.

Pursuant to the closing of the deal, Alstom made an initial payment of $75 million (approximately €53 million) to the selling shareholders. The remainder of the price will be calculated using a computation method based on TMH operating results over a four-year period (2008-2011), and paid by the end of 2012. This unpaid portion of the price has been recorded as financial debt at the date the partnership agreement has been finalized, and reassessed based on the latest information available at 31 March 2012.

In accordance with IAS 28, the Group has recognised its share in the net fair values of the associate's identifiable assets acquired and liabilities assumed at the acquisition date. Accordingly, a preliminary valuation has been determined as at 27 May 2011. The fair value of assets acquired and liabilities assumed may be subsequently adjusted during a maximum of 12 months from the date the investment becomes an associate, depending on new information obtained about the facts and circumstances existing at the acquisition date.

The resulting and preliminary goodwill amounts to €47 million as at 31 March 2012 and is included in the carrying amount of the investment.

3.3. Joint company in Boilers

Alstom and Shanghai Electric signed in April 2011 a letter of intent to create Alstom-Shanghai Electric Boilers Co, a 50/50 joint company that would be world leader in boilers for coal-fired power plants, with combined sales of about €2.5 billion. The joint company will benefit from Shanghai Electric's strong competitiveness and positioning in China as well as from Alstom's close relationship with the utilities worldwide and its related technologies.

Note 4. Segment information

4.1 Key indicators by operating segment

At 31 March 2012

(in € million)	Thermal Power	Renewable Power	Transport	Grid	Corporate & others	Elimina-tions	Total

4.2 Key indicators by geographic area

Sales by country of destination

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Western Europe	7,077	7,899
thereof France	*2,136*	*2,155*
Eastern Europe	1,352	1,454
North America	2,440	2,571
thereof USA	*1,630*	*1,753*
South & Central America	1,752	1,731
Asia & Pacific	4,316	3,788
Middle East & Africa	2,997	3,480
Total Group	**19,934**	**20,923**

Non-current assets by country of location

(in € million)	At 31 March 2012	At 31 March 2011
Western Europe (1)	8,704	8,278
thereof France (2)	*2,832*	*2,495*
Eastern Europe	310	295
North America	771	740
thereof USA	*670*	*640*
South & Central America	188	142
Asia & Pacific	885	804
Middle East & Africa	36	39
Total Group	**10,894**	**10,298**

(1) This amount mainly includes goodwill of Power Sectors.

(2) This amount includes goodwill of Grid Sector.

4.3 Information about major customers

No external customer represents individually 10% or more of the Group's consolidated sales.

Note 5. Research and development expenditure

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Research and development expenses	**(682)**	**(703)**
Developments costs capitalised during the period (see Note 10.2)	(293)	(286)
Amortisation expense of capitalised development costs (see Note 10.2)	113	98
Amortisation of acquired technology (see Note 10.2)	82	67
Total research and development expenditure	**(780)**	**(824)**

During the fiscal year ended 31 March 2012, the Group invested €780 million in research and development to develop new technologies and to extend its existing product offering.

These research and development programmes relate mainly to:

- the development of Alstom's range of gas turbines, including performance upgrade packages and combustion system improvements to reduce emissions and increase fuel flexibility,
- the development of offshore wind turbine with a robust, simple and efficient design which will allow to improve the competitiveness of offshore wind power,
- the improvement of the Transport sector's technological edge of the product offering (first third generation duplex TGV train set, first Coradia Polyvalent™ trainset, high speed Pendolino™, etc),
- the accelerated industrialisation of the Voltage Source Converter in the High Voltage Direct Current range and the Smart Grid developments.

Note 6. Other income and other expenses

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Capital gains on disposal of businesses	-	-
Other	3	46
Other income	**3**	**46**
Capital losses on disposal of businesses	(2)	(33)
Restructuring costs	(83)	(520)
Expenses exclusively incurred in the context of business combinations	(156)	(203)
Other	(96)	(96)
Other expense	**(337)**	**(852)**
Other income (expenses)	**(334)**	**(806)**

Capital losses mainly arose from adjustments on disposed activities.

The largest part of the amount of restructuring costs recorded for the year ended 31 March 2011 are accounted by Power and Transport sectors following their plans respectively announced in October 2010 and March 2011. In the last six months of the financial year ended 31 March 2011, the Group has started to adapt its footprint in order to address the lower demand in developed countries (Europe and USA) and the fast growth of its markets in emerging countries.

Expenses exclusively incurred in the context of business combinations comprise the amortisation of acquired margin related to Grid's acquisition and the costs incurred to effect the acquisition of Grid.

Other income and other expenses mainly derive from components of the post-employment and other long term defined benefit expense, costs of legal proceedings that have arisen outside the ordinary course of business and non-recurring impairment losses on assets.

Note 7. Financial income (expense)

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Interest income	37	49
Other financial income	18	8
Financial income	**55**	**57**
Interest expense	(179)	(135)
Net financial expense from employee defined benefit plans	(4)	(16)
Net exchange loss	(11)	(7)
Other financial expenses	(38)	(35)
Financial expense	**(232)**	**(193)**
Financial income (expense)	**(177)**	**(136)**
Out of which		
Financial income/(expense) arising from Financial instruments (see Note 25)	(173)	(120)

Interest income of €37 million represents the remuneration of the Group's cash positions over the period.

Interest expense of €(179) million represents the cost of the gross financial debt. The increase compared to last year is due to the issuance of new bonds mainly related to the acquisition of the Grid business (see Note 24).

Other financial expense of €(38) million incorporates fees and commitment fees paid on guaranteed facilities, syndicated loans and other financing facilities for €(15) million (€(25) million for the year ended 31 March 2011).

Note 8. Taxation

8.1 Analysis of income tax charge

The following table summarises the components of income tax charge for the years ended 31 March 2012 and 2011:

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Current income tax charge	(273)	(248)
Deferred income tax charge	94	107
Income tax charge	**(179)**	**(141)**
Effective tax rate	20%	22%

The favourable geographical mix of income before taxes has enabled the Group to decrease the effective tax rate to 20% for the period ended 31 March 2012 compared to 22% for the previous fiscal year. Note that, although the rate has been stable over the last years, it may change from one year to another notably based on the following events:

- the geographical mix of income before taxes,
- the Group's ability to recognise new deferred tax assets and to use its tax loss carry forwards and,
- the outcome of income tax audits.

8.2 Effective income tax rate

The following table provides a reconciliation from the income tax charge valued at the French statutory rate to the actual income tax charge for the years ended 31 March 2012 and 2011:

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Pre-tax income	**895**	**628**
Statutory income tax rate of the parent company	34.43%	34.43%
Expected tax charge	**(308)**	**(216)**
Impact of:		
- Difference between normal tax rate applicable in France and normal tax rate in force in jurisdictions outside France	105	41
- Transactions liable for reduced tax rate	11	104
- Changes in unrecognised deferred tax assets	(69)	(52)
- Changes in tax rates	(7)	10
- Additional tax expenses (withholding tax, CVAE in France and IRAP in Italy)	(73)	(47)
- Permanent differences and other (*)	162	19
Income tax charge	**(179)**	**(141)**
Effective tax rate	20%	22%

8.3 Deferred tax assets and liabilities

(in € million)	At 31 March 2012	At 31 March 2011
Deferred tax assets	1,472	1,287
Deferred tax liabilities	(176)	(88)
Deferred tax assets, net	**1,296**	**1,199**

8.4 Changes in net deferred tax assets

Net deferred tax assets reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The following table summarises the significant components of the Group's net deferred tax assets as of 31 March 2012 and 2011:

(in € million)	At 31 March 2011	Change in P&L	Change in equity (*)	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2012
Differences between carrying amount and tax basis of tangible and intangible assets	(13)	(13)	-	-	5	(21)
Accruals for employee benefit costs not yet deductible	213	(15)	31	1	12	242
Provisions and other accruals not yet deductible	500	(1)	-	-	1	500
Differences in recognition of margin on construction contracts	(299)	11	-	-	9	(279)
Tax loss carry forwards	911	177	-	(5)	(48)	1,035
Other	(113)	(65)	4	15	(22)	(181)
Net deferred tax assets/(liabilities)	**1,199**	**94**	**35**	**11**	**(43)**	**1,296**

(*) Mainly related to actuarial gains and losses directly recognised in equity (see consolidated statement of comprehensive income).

The Group is satisfied as to the recoverability of its recognised deferred tax assets at 31 March 2012 (€1,296 million) on the basis of an extrapolation of the last three-year business plan, as approved by the Board of Directors and the strategy for the long-term recovery of tax losses in each country.

Deferred tax assets still unrecognised amount to €1,225 million at 31 March 2012 (€865 million at 31 March 2011). Most of these unrecognised deferred taxes are originated from tax loss carry forward (€827 million at 31March 2012 and €645 million at 31 March 2011), out of which €500 million are not subject to expiry at 31 March 2012 (€452 million at 31 March 2011).

Note 9. Earnings per share

9.1 Earnings

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Net profit attributable to equity holders of the parent	732	462
Earnings attributable to equity holders of the parent used to calculate basic and diluted earnings per share	**732**	**462**

9.2 Number of shares

	Year ended 31 March 2012	Year ended 31 March 2011
Weighted average number of ordinary shares used to calculate basic earnings per share	**294,522,251**	**294,210,753**
Effect of dilutive instruments other than bonds reimbursables with shares:		
- Stock options and free shares (1)	2,962,692	2,537,172
- Free shares	225,727	230,089
Weighted average number of ordinary shares used to calculate diluted earnings per share	**297,710,670**	**296,978,014**

(1) Stock options taken into consideration in the calculation of the diluted earnings per share only relate to plans 7, 8 and 14, plans 9, 10, 12 and 13 being out of the money as at 31 March 2012.

9.3 Earnings per share

(in €)	Year ended 31 March 2012	Year ended 31 March 2011
- Basic earnings per share	2.49	1.57
- Diluted earnings per share	2.46	1.56

Note 10. Goodwill and intangible assets

Goodwill and intangible assets are reviewed for impairment at least annually and whenever events or circumstances indicate that they might be impaired. Such events or circumstances are related to significant, unfavourable changes that are of a lasting nature and affect either the economic environment or the assumptions or the targets adopted as of the acquisition date. An impairment loss is recognised when the recoverable value of the assets tested becomes durably lower than their carrying value.

10.1 Goodwill

(in € million)	At 31 March 2011	Acquisitions and adjustments on preliminary goodwill	Disposals	Translation adjustments and other changes	At 31 March 2012
Thermal Power	3,180	-	-	28	3,208
Renewable Power	488	-	-	1	489
Transport	568	90	-	3	661
Grid	1,160	(37)	-	2	1,125
Goodwill	**5,396**	**53**	**-**	**34**	**5,483**
of which:					
Gross value	5,396	53	-	34	5,483
Impairment	-	-	-	-	-

(in € million)	At 31 March 2010	Acquisitions and adjustments on preliminary goodwill	Disposals	Translation adjustments and other changes	At 31 March 2011
Thermal Power	2,960	224	-	(4)	3,180
Renewable Power	421	67	-	-	488
Transport	523	46	-	(1)	568
Grid	-	1,162	-	(2)	1,160
Goodwill	**3,904**	**1,499**	**-**	**(7)**	**5,396**
of which:					
Gross value	3,904	1,499	-	(7)	5,396
Impairment	-	-	-	-	-

The movement over the period ended 31 March 2012 mainly arises from the final allocation of the purchase price related to the acquisition of the Grid activity (see Note 3).

As described in Note 3, part of the goodwill arising from the acquisition of the Grid activity has been allocated to the other Sectors. Goodwill allocated to the former Power Sector has been broken down between Thermal Power and Renewable Power based on their respective fair values.

As related information was available, the allocation to Thermal Power and Renewable Power Sectors of the goodwill of the former Power Sector has been made based on historical basis.

The carrying values of Thermal Power and Renewable Power goodwill retrospectively determined at 31 March 2011 after consideration of the reorganisation of the former Power Sector remain lower than their recoverable values at that date.

The impairment test at 31 March 2012 supports the Group's opinion that goodwill is not impaired.

The main assumptions used to assess the recoverable amounts of goodwill are as follows:

	Thermal Power	Renewable Power	Transport	Grid
Net carrying amount of goodwill at 31 March 2012 (in € million)	3,208	489	661	1,125
Value elected as representative of the recoverable value	value in use	value in use	value in use	value in use
Number of years over which cash flow estimates are available	3 years	3 years	3 years	3 years
Extrapolation period of cash flow estimates	2 years	2 years	2 years	2 years
Long term growth rate at 31 March 2012	**2.0%**	**2.0%**	**1.5%**	**2.0%**
Long term growth rate at 31 March 2011	2.0%	2.0%	1.5%	2.0%
After tax discount rate at 31 March 2012 (*)	**9.0%**	**9.0%**	**9.0%**	**9.0%**
After tax discount rate at 31 March 2011 (*)	9.0%	9.0%	9.0%	9.00%

(*) The application of pre-tax discount rates to pre-tax cash flows leads to the same valuation of cash generating units.

As of 31 March 2012, the recoverable amounts of the 4 Sectors significantly exceeded their carrying value.

For all the Sectors, no impairment of the goodwill would need to be recognized when the value in use is calculated by using either:

• a discount rate that ranges from 240 to 2400 basis points above the base rate of 9%, depending on the Sector;

• a nil long-term growth rate.

Sensitivity of enterprise values to key assumptions can be presented as follows:

(in € million)	Thermal Power		Renewable Power		Transport		Grid	
	-100 bp	*+100 bp*	*-100 bp*	*+100 bp*	*-100 bp*	*+100 bp*	*-100 bp*	*+100 bp*

Other intangible assets	334	(118)	(3)	5	218
Net value	**1,934**	**(20)**	**(3)**	**10**	**1,921**

(in € million)	At 31 March 2010	Additions / disposals / amortisation	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2011
Development costs	1,112	286	2	(5)	1,395
Acquired technology	1,245	1	172	4	1,422
Other intangible assets	277	35	338	28	678
Gross value	**2,634**	**322**	**512**	**27**	**3,495**
Development costs	(452)	(98)	-	1	(549)
Acquired technology	(575)	(93)	-	-	(668)
Other intangible assets	(154)	(159)	-	(31)	(344)
Amortisation and impairment	**(1,181)**	**(350)**	**-**	**(30)**	**(1,561)**
Development costs	660	188	2	(4)	846
Acquired technology	670	(92)	172	4	754
Other intangible assets	123	(124)	338	(3)	334
Net value	**1,453**	**(28)**	**512**	**(3)**	**1,934**

Technology and licence agreements acquired through the combination with ABB ALSTOM POWER in 1999 and 2000 and through the combination with Transmission activities in 2010 represent the bulk of the gross amount reported as acquired technology.

The impairment test at 31 March 2012 supports the Group's opinion that intangible assets are not impaired.

Note 11. Property, plant and equipment

(in € million)	At 31 March 2011	Acquisitions / Depreciation/ Impairments	Disposals	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2012

Note 13. Other non-current assets

(in € million)	At 31 March 2012	At 31 March 2011
Financial non-current assets associated to financial debt (*)	426	429
Long-term loans, deposits and other	119	138
Other non-current assets	**545**	**567**

(*) These non-current assets relate to a long-term rental of trains and associated equipment to a London metro operator (see Notes 24 and 29). They are made up as follows:

- at 31 March 2012, €400 million receivables and €26 million deposit;
- at 31 March 2011, €405 million receivables and €24 million deposit.

Note 14. Inventories

(in € million)	At 31 March 2012	At 31 March 2011
Raw materials and supplies	910	944
Work in progress	2,207	2,461
Finished products	374	377
Inventories, gross	**3,491**	**3,782**
Raw materials and supplies	(154)	(166)
Work in progress	(144)	(168)
Finished products	(55)	(85)
Write-down	**(353)**	**(419)**
Inventories, net	**3,138**	**3,363**

Changes in inventory write-down recognised as income for the year ended 31 March 2012 amount to €47 million (€26 million expense for the year ended 31 March 2011).

Note 15. Construction contracts in progress

(in € million)	At 31 March 2012	At 31 March 2011	Variation
Construction contracts in progress, assets	3,752	2,479	1,273
Construction contracts in progress, liabilities	(9,508)	(9,166)	(342)
Construction contracts in progress	**(5,756)**	**(6,687)**	**931**

(in € million)	At 31 March 2012	At 31 March 2011	Variation
Contract costs incurred *plus* recognised profits *less* recognised losses to date	55,138	48,228	6,910
Less progress billings	(57,463)	(50,839)	(6,624)
Construction contracts in progress excluding down payments received from customers	**(2,325)**	**(2,611)**	**286**
Down payments received from customers	(3,431)	(4,076)	645
Construction contracts in progress	**(5,756)**	**(6,687)**	**931**

The evolution of down payments received from customers is primarily related to the classification of some customers payments received in Grid sector into progress payments. This reclassification is the consequence of implementation of Construction contracts in progress presentation in this sector during the period. Trade receivables, which decrease during the year ended 31 March 2012 (see Note 16), are also impacted by this reclassification.

Note 16. Trade receivables

			Past due on the closing date		
(in € million)	Total	No past due on the closing date	Less than 60 days	Between 60 and 180 days	More than 180 days
Trade receivables at 31 March 2012	**5,692**	**4,705**	**335**	**200**	**452**
o/w gross	5,806	4,732	337	203	534
o/w impairment	(114)	(27)	(2)	(3)	(82)
Trade receivables at 31 March 2011	**6,053**	**5,037**	**312**	**258**	**446**
o/w gross	6,170	5,101	313	259	497
o/w impairment	(117)	(64)	(1)	(1)	(51)

Impairment losses are determined considering the risk of non-recovery assessed on a case by case basis. Due to the type of business operated by the Group, past due receivables are frequently representative of outstanding amounts confirmed by customers but whose payment is subject to clearance of items raised during inspection of works. Such receivables do remain fully recoverable; costs to be incurred for the clearance of pending items are included in the determination of the margin at completion of the related contracts.

Note 17. Other current operating assets

(in € million)	At 31 March 2012	At 31 March 2011

(2) Item presented within "net cash provided by/(used in) investing activities" in the consolidated statement of cash flows

Note 20. Equity

When managing capital, the objective of the Group is to safeguard its ability to continue as a going concern so that it can provide returns to shareholders, bring benefits to its other partners and optimise the structure of the capital in order to reduce its cost. To achieve this, the Group may choose to:

- adjust the amount of dividends paid to the shareholders;
- reimburse a portion of capital to the shareholders;
- issue new shares; or,
- sell assets in order to scale back its net debt.

20.1. Movements in share capital

Movements in financial year ended 31 March 2012

At 31 March 2012, the share capital of Alstom amounted to € 2,061,735,760 consisting of 294,533,680 ordinary shares with a par value of €7 each. For the year ended 31 March 2012, the weighted average number of outstanding ordinary shares amounted to 294,522,251 after the dilutive effect of bonds reimbursable in shares "Obligations Remboursables en Actions" and to 297,710,670 after the effect of all dilutive instruments.

During the year ended 31 March 2012, 288 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 18 shares at a par value of €7. The 81,394 bonds reimbursable with shares outstanding at 31 March 2012 represent 5,112 shares to be issued.

Movements in financial year ended 31 March 2011

At 31 March 2011, the share capital of Alstom amounted to € 2,060,935,128 consisting of 294,419,304 ordinary shares with a par value of €7 each. For the year ended 31 March 2011, the weighted average number of outstanding ordinary shares amounted to 294,210,753 after the dilutive effect of bonds reimbursable in shares "Obligations Remboursables en Actions" and to 296,978,014 after the effect of all dilutive instruments.

During the year ended 31 March 2011, 4,380 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 275 shares at a par value of €7. The 81,682 bonds reimbursable with shares outstanding at 31 March 2011 represent 5,130 shares to be issued.

20.2. Distribution of dividends

In respect of the financial year ended 31 March 2012, it will be proposed to the Shareholders' meeting called on 26 June 2012 to distribute dividends for a total amount of €236 million corresponding to a €0.80 dividend per share.

The following dividends were distributed in respect of the previous three financial years:

- year ended 31 March 2011 (decision of Shareholders' meeting held on 28 June 2011): total amount of €183 million, corresponding to a €0.62 dividend per share;
- year ended 31 March 2010 (decision of Shareholders' meeting held on 22 June 2010): total amount of €364 million, corresponding to a €1.24 dividend per share;
- year ended 31 March 2009 (decision of Shareholders' meeting held on 23 June 2009): total amount of €323 million, corresponding to a €1.12 dividend per share.

(1) The number of options and free shares and the exercise price of options have been adjusted as a result of transactions that have impacted the number of capital shares after grant dates.
(2) The exercise price corresponds to the average opening price of the shares during the twenty trading days preceding the day on wich the options were granted by the Board (no discount or surcharge)

At 31 March 2012, stock options granted by plans 7, 8, 9 10 and 11 are fully vested. These options will expire seven years after the end of the vesting period of each plan.

The number of stock options and free shares granted on 21 September 2009 under the long term incentive plan 12 was conditional upon the Group satisfying specified levels of operating margin for the financial year 2011/2012.
The 2011/2012 Group's operating margin is below 7.2% and above 6.6%; as a consequence 40% of options will be exercisable under this plan and 40% of free share will be delivered.

The long term incentive plans set up since 2007 (plan 13 and plan 14) also combine the allocation of stock options with the allocation of free shares.
The grant of these instruments is conditional upon the group satisfying the following performance conditions:

LTI plan 13 granted on 13 December 2010:
The total number of options exercisable and free shares to be delivered will depend on the Group's operating margin for the financial years 2010/2011, 2011/2012 and 2012/2013:

	% of options exercisable & free shares to be delivered		
	Year ended 31 March 2011	**Year ended 31 March 2012**	**Year ended 31 March 2013**
Operating margin achieved above or equal to 7.5%	40%	40%	20%
Operating margin achieved between 7% (inclusive) and 7.5% (non inclusive)	30%	30%	10%
Operating margin achieved between 6.5% (inclusive) and 7% (non inclusive)	10%	10%	0%
Operating margin achieved below 6.5%	0%	0%	0%

Based on consolidated financial statements for financial years 2010/2011 and 2011/2012, the performance condition is achieved for 70% of an allotment of LTIP13 options and free shares. 10% of options and free shares are cancelled.

<u>LTI plan 14 granted on 4 October 2011:</u>

The total number of options exercisable and free shares to be delivered will depend on the Group's operating margin for the financial years 2011/2012, 2012/2013 and 2013/2014:

	% of options exercisable & free shares to be delivered		
	Year ended 31 March 2012	Year ended 31 March 2013	Year ended 31 March 2014
Operating margin achieved above or equal to 7.5%	40%	40%	20%
Operating margin achieved between 7% (inclusive) and 7.5% (non inclusive)	30%	30%	10%
Operating margin achieved between 6.5% (inclusive) and 7% (non inclusive)	10%	10%	0%
Operating margin achieved below 6.5%	0%	0%	0%

For financial year 2011/2012, based on consolidated financial statements, the performance condition is achieved for 30% of an allotment of LTIP14 options and free shares. 10% of options and free shares are cancelled.

Dividend yield	1.3%	1.3%	1.3%	1.3%	3.1%	3.1%	5.0%	5.0%

(*) The exercise price corresponds to the average opening price of the shares during the twenty trading days preceding the day on wich the options were granted by the Board (no discount or surcharge).

The option valuation method follows a binomial mathematical model for plan 11 and a Black & Scholes model for plans 12, 13 and 14, with exercise of the options anticipated and spread over the exercise period on a straight-line basis. The volatility factor applied is an average of CAC40 comparable companies' volatility at the grant date.

The Group booked a total expense of €11 million for the year ended 31 March 2012, and €11 million for the year ended 31 March 2011.

(1) SARs of the Notional plan have been granted at an exercise price of €17.88 and are capped at €22.45.
(2) The number of SARs and their exercise prices have been adjusted as a result of transactions that have impacted the number of capital shares after grant dates.

All SARs granted are measured using a binomial model taking into account the terms and conditions according to which the instruments were granted.

The Group books a total income of € 2 million for the year ended 31 March 2012, and €2 million for the year ended 31 March 2011.

21.3 Share-based payments awarded to employees

Free shares

On 17 November 2005, the Group announced the attribution of twelve free shares to all employees, or the equivalent in cash (SARs) depending on the conditions in each country.

The cost related to the portion of the attribution to be settled in shares (€27 million) has been immediately offset in equity. The cost related to the portion of the attribution to be settled in cash is spread over the vesting period that extends until 16 May 2010 (€4 million income for the year ended 31 March 2011).

Note 22. Provisions

Other non-current provisions (4)	266	300	(78)	(47)	157	(3)	595
Non-current provisions	**460**	**677**	**(108)**	**(169)**	**238**	**(3)**	**1,095**
Total provisions	**1,641**	**1,450**	**(661)**	**(621)**	**673**	**0**	**2,482**

(1) Current provisions relate to warranties, litigations and claims on completed contracts.

(2) In relation to tax risks, the Group tax filings are subject to audit by tax authorities in most jurisdictions in which the Group operates. These audits may result in assessment of additional taxes that are subsequently resolved with the authorities or potentially through the courts. The Group believes that it has strong arguments against the questions being raised, that it would pursue all legal remedies to avoid an unfavourable outcome and that it has adequately provided for any risk that could result from those proceedings where it is probable that it will pay some amounts.

(3) In the last six months of the financial year ended 31 March 2011, the Group has started to implement fundamental reorganisations of its footprint in order to address the lower demand in developed countries (Europe and USA) and the fast growth of its markets in emerging countries.

(4) Other non-current provisions mainly relate to guarantees delivered in connection with disposals, employee litigations, commercial disputes and environmental obligations. Environmental provisions amount to €38 million at 31 March 2012 and €41 million at 31 March 2011.

Note 23. Post-employment and other long-term defined employee benefits

23.1 Change in defined benefit obligations

23.3 Reconciliation of funded status of the plans with assets and liabilities recognised in the balance sheet

(in € million)	At 31 March 2012	At 31 March 2011
Funded status of the plans	**(1,424)**	**(1,129)**
Unrecognised past service costs (gains)	24	25
Impact of asset ceiling	(5)	(13)
Net of accrued and prepaid benefit costs after asset ceiling	**(1,405)**	**(1,117)**
Of which:		
Accrued pension and other employee benefit costs	***(1,417)***	***(1,145)***
Prepaid pension and other employee benefit costs	***12***	***28***

23.4 Details of funded status by geographical area

(in € million)	At 31 March 2012	At 31 March 2011
Euro Zone	(642)	(616)
Rest of Europe	(518)	(292)
North America	(215)	(185)
South & Central America	(16)	(10)
Asia/ Pacific	(28)	(21)
Middle East/ Africa	(5)	(5)
Total Group	**(1,424)**	**(1,129)**

23.5 Changes of accrued pensions and other employee benefits recognised in comprehensive income

Actuarial gains and losses and asset ceiling arising from post-employment defined benefit plans have been recognised in other comprehensive income as follows:

(in € million)	At 31 March 2012	At 31 March 2011
Opening balance (net loss)	**(1,546)**	**(1,363)**
Actuarial gains /(losses) generated during the period	(324)	(176)
Asset ceiling generated during the period	7	(7)
Closing balance (net loss)	**(1,863)**	**(1,546)**

23.6 Components of plan assets

(in € million)	At 31 March 2012	%	At 31 March 2011	%
Equities	1,431	34.9	1,417	37.7
Bonds	2,166	52.9	1,898	50.4
Properties	361	8.8	340	9.0
Others	139	3.4	108	2.9
Total	**4,097**	100	**3,763**	100

Plan assets for each individual plan are invested in accordance with statutory regulations, pension plan rules, and decisions of pension fund trustees. At 31 March 2012, plan assets do not include any of the Group's capital stock.

23.7 Assumptions (weighted average rates)

(in %)	At 31 March 2012	At 31 March 2011
Discount rate	4.29	4.82
Rate of compensation increase	2.92	3.03
Expected return on plan assets	5.10	6.03

Actuarial assumptions used vary by country and type of plan. Compensation increase assumptions are determined at business unit level and reviewed centrally. The expected return on plan assets is based on long-term market expectations taking into account the asset allocation of each fund.

The healthcare trend rate is assumed to be 8% in the year ended 31 March 2012 and reduces thereafter to an ultimate rate of 5% from 2019 onwards.

Sensitivity analysis shows that a 50-point increase in discount rates would reduce the Group obligations by approximately €347 million. A 50-point decrease in discount rates would increase the Group obligations by approximately €361 million.

For the year ended 31 March 2012, the effective return on assets was 5.57%.

23.8 Analysis of post-employment and other long-term defined benefit expense

(in € million)	Year ended 31 March 2012	Year ended 31 March 2011
Service cost	(83)	(74)
Defined contributions *plans(*)*	(181)	(155)
Income from operations	**(264)**	**(229)**
Actuarial gains/(losses) on other long-term benefits	1	(1)
Amortisation of unrecognised past service gain (cost)	(5)	28
Curtailments/settlements	(1)	19
Other income (expenses)	**(5)**	**46**
Interest cost	(237)	(233)
Expected return on plan assets	233	217
Financial income (expenses)	**(4)**	**(16)**
Total benefit expense	**(273)**	**(199)**

(*) Excluding Grid's contribution for year ended 31 March 2011.
Including an expense of € 15 million related to multi-employer contributions accounted for as defined contribution plans for the year ended 31 March 2012 (€10 million for the year ended 31 March 2011).

Total cash spent in the year ended 31 March 2012 amounted respectively to €168 million and €181 million for defined benefit and defined contribution plans (€211 million and €155 (*)million for the year ended 31 March 2011).
The company's best estimate of contributions to defined benefit and defined contribution plans expected to be paid in the year ended 31 March 2013 is approximately €380 million, of which €202 million of employer contributions to defined benefits plans.

(*) *excluding Grid's amount*

Note 24. Financial debt

Carrying amount (in € million)	**At 31 March 2012**	**At 31 March 2011**

The following table summarises the significant components of the Group's bonds:

	Nominal value (in € million)	**Maturity date**	**Nominal interest rate**	**Effective interest rate**
Alstom September 2014	750	23/09/2014	4.00%	3.89%
Alstom March 2015	60	09/03/2015	4.25%	4.47%
Alstom October 2015	500	05/10/2015	2.88%	2.98%
Alstom March 2016	500	02/03/2016	3.87%	4.05%
Alstom February 2017	750	01/02/2017	4.13%	4.25%
Alstom October 2018	500	05/10/2018	3.63%	3.71%
Alstom March 2020	750	18/03/2020	4.50%	4.58%

The other obligations under long-term rental debt represent liabilities related to lease obligations on trains and associated equipment (see Note 13 and 29).

Note 25. Financial instruments and financial risk management

25.1 Financial instruments reported in the financial statements

The Group's financial liabilities comprise borrowings, trade and other payables. The main purpose of these financial liabilities is to raise funds for the Group's operations.
The Group has loans, trade and other receivables, and cash and cash equivalents that are directly derived from its operations.

The Group is exposed to currency risk, interest rate risk, credit risk and liquidity risk.

The main valuation methods applied are as follows:
- borrowings, when unhedged, are stated at amortised cost, determined by the effective interest rate method,
- the fair value of cash, cash equivalents, trade receivables and trade payables is considered as being equivalent to carrying value, due to their short maturities,
- the fair value of the financial debt is estimated based on either quoted market prices for traded instruments or current rates offered to the Group for debt of the same maturity.

The fair value of derivative instruments is the estimated amount that the Group would receive or pay to settle the related contracts, valued on the basis of relevant yield curves and foreign exchange rates at closing date.

Year ended 31 March 2012

Net income/expense for the year ended 31 March 2012	**1**	**4**	**(178)**	**(173)**

The amount reported as “foreign currency and other” is mainly representative of forward points attached to transactions related to financing activities (See Note 2.3.9) and bank fees (see Note 7).

Income from operations arising from financial instruments for the period ended 31 March 2012

Net foreign currency gains and losses recorded within income from operations are positive by €47 million for the year ended 31 March 2012. They are comprised essentially of forward points at mark to market of the hedging instruments.

Year ended 31 March 2011

Foreign currency and other	-	-	(39)	**(39)**
Net income/expense for the year ended 31 March 2011	**3**	**5**	**(128)**	**(120)**

The amount reported as “foreign currency and other” is mainly representative of forward points attached to transactions related to financing activities (See Note 2.3.9) and bank fees (see Note 7).

Income from operations arising from financial instruments for the period ended 31 March 2011

Net foreign currency gains and losses recorded within income from operations are positive by €14 million for the year ended 31 March 2011.

They are made up of two components:

- forward points attached to hedging transactions qualified for hedge accounting,
- variation of fair value of instruments hedging future cash flows and not qualifying for hedge accounting.

25.2 Currency risk management

Financial debt

The nominal value of the financial debt split by currency is as follows:

(in € million)	At 31 March 2012	At 31 March 2011
Euro	4,284	3,686
US Dollar	12	52
British Pound	425	422
Other currencies	316	320
Financial debt in nominal value	**5,037**	**4,480**

The debt in GBP essentially originates from a long-term lease scheme of trains, involving London Underground. The related €400 million debt denominated in GBP is counter-balanced by long-term receivables having the same maturity and also denominated in GBP that are recognised as non-current assets (see Notes 13, 24 and 29).

Operations

In the course of its operations, the Group is exposed to currency risk arising from tenders submitted in foreign currency, awarded contracts and any future cash out transactions denominated in foreign currency. Main currencies triggering a significant exposure for the year ended 31 March 2012 are the Swiss Franc and the US dollar.

During the tender period, depending on the probability to obtain the project and on market conditions, the Group can hedge a portion of its tenders using options or export insurance contracts when possible. Once the contract is signed, forward exchange contracts are used to hedge the actual exposure during the life of the contract (either as the only hedging instruments or as a complement to existing export insurance contracts).

The Group requires all of its operating units to use forward currency contracts to eliminate the currency exposure on any individual sale or purchase transaction in excess of €100,000. Forward currency contracts must be denominated in the same currency as the hedged item. It is the Group’s policy to negotiate the terms of hedge derivatives to match the terms of hedged items to maximise hedge effectiveness.

Derivative instruments hedging foreign currency risk are recognised at their fair value on the balance sheet as follows:

(in € million)	At 31 March 2012 Assets	At 31 March 2012 Liabilities	At 31 March 2011 Assets	At 31 March 2011 Liabilities
Derivatives qualifying for fair value hedge	290	637	348	569
Derivatives qualifying for cash flow hedge	1	24	31	7
Derivatives qualifying for net investment hedge	-	-	-	-
Derivatives not qualifying for hedge accounting	2	1	1	2
Total	**293**	**662**	**380**	**578**

The fair value of those instruments is the estimated amount that the Group would receive or pay to settle the related contracts, valued on the basis of relevant yield curves and foreign exchange rates at closing date.

High volatility of foreign exchange rates during the periods ended 31 March 2012 and 31 March 2011 explains the significant amount of fair value of derivative instruments (either positive or negative). For instruments that qualify for fair value hedge accounting, any change in fair value is mostly offset by the re-measurement of the underlying exposure (either on balance sheet or off-balance sheet).

The following table shows the sensitivity of the Group's pre-tax income to a change in the US dollar and Swiss Franc exchange rates. The effects on pre-tax income arise from derivative instruments not qualifying for hedge accounting while the effect on income and expense directly recognised in equity is due to the measurement of the effective portion of derivative instruments qualifying for cash flow hedge accounting.

	USD rate			**CHF rate**		
	Variation	Effect on pre-tax income	Effect on income and expense directly recognised in equity	Variation	Effect on pre-tax income	Effect on income and expense directly recognised in equity
Year ended 31 March 2012	10%	3	-	5%	-	8
	-10%	(3)	-	-5%	-	(8)
Year ended 31 March 2011	10%	-	-	5%	-	(15)
	-10%	-	-	-5%	-	15

The effective portion of instruments qualifying for cash flow hedge accounting reclassified from equity to profit or loss during the year ended 31 March 2012 is positive by €36 million.

25.3. Interest rate risk management

The Group has not implemented an active interest rate risk management policy. However under the supervision of the Executive Committee, it may enter into transactions in order to hedge its interest rate risk on a case-by-case basis according to market opportunities.

Carrying amount (in € million)	**At 31 March 2012**	**At 31 March 2011**
Financial assets at floating rate	2,140	2,793
Financial assets at fixed rate	465	454
Financial assets bearing interests	**2,605**	**3,247**
Financial debt at floating rate	102	40
Financial debt at fixed rate, put options and earn-out on acquired entities	4,920	4,426
Financial debt	**5,022**	**4,466**
Total position at floating rate before swaps	2,242	2,833
Total position at fixed rate before swaps	5,385	4,880
Total position before hedging	**7,627**	**7,713**
Total position at floating rate after swaps	2,242	2,833
Total position at fixed rate after swaps	5,385	4,880
Total position after hedging	**7,627**	**7,713**

Sensitivity is analysed based on the group's net cash position after hedging at 31 March 2012, assuming that it remains constant over one year.

In absence of instruments hedging the interest risk, the effects of increases or decreases in market rates are symmetrical: a rise of 0.4% would increase the net interest income by €8 million while a fall of 0.4% would decrease it by the same amount.

25.4. Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a loss. The Group is exposed to credit risk on its operating activities (primarily for trade receivables) and from its financing activities, including deposits, foreign currency hedging instruments and other financial instruments with banks and financial institutions.

Risk related to customers

The Group believes that the risk of a counterpart failing to perform as contracted, which could have a significant impact on the Group's financial statements or results of operations, is limited because the Group seeks to ensure that customers generally have strong credit profiles or adequate financing to meet their project obligations.

In specific cases, the Group may use export credit insurance policies which may hedge up to 90% of the credit risk on certain contracts.

Risk related to other financial assets

The Group's exposure to credit risk related to other financial assets arises from default of the counterpart, with a maximum exposure equal to the carrying amount of those instruments. The financial instruments are taken out with over 30 different counterparties and the risk is therefore highly diluted.

Risk related to cash and cash equivalents

Credit risk from balances with banks and financial institutions is managed by Group treasury in accordance with the Group's policy. At 31 March 2012 and at 31 March 2011, as part of the central treasury management, cash and cash equivalents are invested entirely in deposits with bank counterparts of first rank noted "Investment Grade".

The Group's parent company has access to some cash held by wholly-owned subsidiaries through the payment of dividends or pursuant to intercompany loan arrangements. However local constraints can delay or restrict this access. Furthermore, while the Group's parent company has the power to control decisions of subsidiaries of which it is the majority owner, its subsidiaries are distinct legal entities and their payment of dividends and granting of loans, advances and other payments to the parent company may be subject to legal or contractual restrictions, be contingent upon their earnings or be subject to business or other constraints. These limitations include local financial assistance rules and corporate benefit laws.

The Group's policy is to centralise liquidity of subsidiaries at the parent company's level when possible. Restricted cash and cash equivalents available at subsidiary level were €350 million and €398 million at 31 March 2012 and 31 March 2011, respectively.

25.5. Liquidity risk management

Financial covenants

At 31 March 2012, to increase its liquidity, the Group has in place a €1,350 million revolving credit facility fully undrawn maturing in December 2016, this replaces the previous facility of €1,000 million. This facility is subject to the following financial covenants, based on consolidated data:

Covenants	Minimum Interest Cover	Maximum total debt (€m)	Maximum total net debt leverage
	(a)	(b)	(c)
	3	5,000	3.6

(a) Ratio of EBITDA (Earnings Before Interest and Tax plus Depreciation and Amortisation) to net interest expense (excluding interest related to obligations under finance lease). It amounts to 12.5 at year end 31 March 2012 (19.1 at year end 31 March 2011).
(b) Total debt corresponds to borrowings, i.e. total financial debt less finance lease obligations. This covenant ceases to apply since the Group has an "Investment grade" rating.
(c) Ratio of total net debt (Total debt less short-term investments or trading investments and cash and cash equivalents) to EBITDA. The net debt leverage as at 31 March 2012 is 1.4 (0.8 at 31 March 2011).

Cash Flow

The Group's objective is to maintain a strong liquidity. A revolving cash planning tool is used to monitor the Group's liquidity needs.

The following tables show the remaining maturities of all financial assets and liabilities held at 31 March 2012 and 31 March 2011.

Planning data for future new assets and liabilities are not reported. Amounts in foreign currency are translated at the closing rate. The variable interest payments are calculated using the last interest rates available at the closing date. Assets and liabilities that can be repaid at any time are always assigned to the earliest possible time period.

25.6 Commodity risk management

Most of commodities bought by the Group has already been modified and included into spare parts. For the other commodities, the Group has included into customer contracts a customer price adjustment clause, so that the Group has a limited exposure to the variation of commodity prices.

Note 26. Other current operating liabilities

(in € million)	At 31 March 2012	At 31 March 2011
Staff and associated costs	1,069	1,050

Note 28. Contingent liabilities and disputes

28.1 Contingent liabilities

Commercial obligations

Contractual obligations of the Group towards its customers may be guaranteed by bank bonds or insurance bonds. Bank and insurance bonds may guarantee liabilities already recorded on the balance sheet as well as contingent liabilities.

At 31 March 2012, the Group has in place both uncommitted bilateral lines in numerous countries up to €19.6 billion and a Committed Bonding Facility Agreement allowing issuance of instruments until 27 July 2013 for an amount of €8.275 billion.

At 31 March 2012, the total outstanding bonding guarantees related to contracts, issued by banks or insurance companies, amount to €15.9 billion (€15.7 billion at 31 March 2011).

The available amount under the Committed Bonding Facility at 31 March 2012 amounts to €1.4 billion (€2.1 billion at 31 March 2011). The issuance of new bonds under this bonding facility is subject to the financial covenants disclosed in Note 25.5. The available amount under bilateral lines at 31 March 2012 amounts to €10.1 billion.

Vendor financing

Until 2003, the Group provided some financial support, referred to as vendor financing, to financial institutions financing certain purchasers of Transport equipment.

At 31 March 2012, guarantees given as part of past vendor financing arrangements amount to €259 million.

Included in this amount are:

- guarantees totalling $63 million (€47 million and €44 million at 31 March 2012 and 31 March 2011 respectively) given with respect to equipment sold to a US train operator; and
- guarantees totalling £177 million (€212 million and €200 million at 31 March 2012 and 31 March 2011 respectively) given as part of a leasing scheme involving London Underground (Northern Line). Were London Underground Limited to decide not to extend the contract beyond 2017, and to hand the trains back, the Group has guaranteed to the lessors that the value of the trains and associated equipment, net of the £15 million non-extension payment due by London Underground, should not be less than £177 million in 2017. The £177 million is included in the €400 million amount of "Other obligations under long-term rental" (see Note 24).

28.2 Disputes

Disputes in the Group's ordinary course of business

The Group is engaged in several legal proceedings, mostly contract-related disputes that have arisen in the ordinary course of business. These disputes, often involving claims for contract delays or additional work, are common in the areas in which the Group operates, particularly for large long-term projects. In some cases, the amounts, which may be significant, are claimed against the Group, sometimes jointly with its consortium partners.

In some proceedings the amount claimed is not specified at the beginning of the proceedings. Amounts retained in respect of litigation are taken into account in the estimate of margin at completion in case of contracts in progress or included in provisions and other current liabilities in case of completed contracts when considered as reliable estimates of probable liabilities. Actual costs incurred may exceed the amount of initial estimates because of a number of factors including the inherent uncertainties of the outcome of litigation.

Asbestos

In France, some of the Group's subsidiaries are subject to civil proceedings in relation to the use of asbestos. These proceedings are initiated by certain employees or former employees suffering from an occupational disease in relation to asbestos with the aim of obtaining a court decision allowing them to obtain a supplementary compensation from the French Social Security (medical) funds.

In the United States, subsidiaries of the Group are also subject to asbestos-related personal injury lawsuits. The Group considers that it has valid defences in these cases and the number of outstanding cases is decreasing.

The Group believes that the cases where it may be required to bear the financial consequences of such civil or criminal proceedings both in France and the United States do not represent a material exposure. While the outcome of the existing asbestos-related cases cannot be predicted with reasonable certainty, the Group believes that these cases will not have any material adverse effect on its financial condition. It can give no assurance, however, that present asbestos-related cases or new cases it may face in the future may not have a material adverse impact on its financial condition.

United States Class Action Lawsuit

The Group has concluded a settlement, for a remaining cost for Alstom of less than €2 million relating to the class action lawsuits filed on behalf of various purchasers of American Depositary Receipts and other Alstom securities between August 1999 and August 2003 and consolidated in one complaint filed in June 2004. On 21 October 2011, the settlement was approved by the New York District Court. This decision which became final on 21 November 2011 closed the class action.

Alleged anti-competitive activities

GIS equipment

In April 2006, the European Commission commenced proceedings against Alstom, along with a number of other companies, based on allegations of anti-competitive practices in the sale of gas-insulated switchgears ("GIS equipment"), a product of its former Transmission & Distribution business sold to Areva in January 2004, following investigations that began in 2004.

On 24 January 2007, the European Commission levied a fine of €65 million against Alstom which includes €53 million on a joint and several basis with Areva T&D (Alstom Grid). Alstom has requested the cancellation of this decision before the General Court of the European Union. On 3 March 2011 the Court reduced the amount of fines levied against Alstom to €58.5 million out of which €48.1 million on a joint and several basis with Areva T&D (Alstom Grid). On 20 May 2011, Alstom requested the cancellation of this decision before the Court of Justice of the European Union. The latter's final decision is not expected to occur before beginning 2013.

Following the aforementioned European Commission decision of 24 January 2007, on 17 November 2008 National Grid commenced a civil action before the High Court of Justice in London to obtain damages against the manufacturers of GIS equipment, including Alstom and certain of its subsidiaries. National Grid asserts that it has suffered overall alleged damages from all manufacturers concerned of £ 249.3 million in total since it bought GIS equipment at inflated prices due to alleged anti-competitive arrangements between manufacturers. Alstom contests the facts. On 12 June 2009, the High Court of Justice in London decided a stay of proceeding until the European Commission decision of 24 January 2007 is final. During fiscal year 2010/11, two other similar civil actions have been started before national jurisdictions for a global amount of €24 million.

Power transformers

On 20 November 2008, the European Commission sent a statement of objections to a number of manufacturers of power transformers, including Alstom, concerning their alleged participation in anti-competitive arrangements. Alstom has contested the materiality of the alleged facts. On 7 October 2009, the European Commission levied a fine of €16.5 million against Alstom which includes €13.5 million on a joint and several basis with Areva T&D (Alstom Grid). Alstom has requested the cancellation of the decision before the General Court of the European Union on 21 December 2009. The hearings report is still awaited and the hearings which are not yet scheduled should not occur before end of 2012.

Boilers

The Group received a statement of objections issued by the German Federal Cartel Office ("FCO") on 22 December 2008, alleging breaches of German competition law in the field of steam generators for lignite-fired power plants. On 20 October 2011, the FCO levied a fine of €42 million against ALSTOM Power Systems GmbH and two of its former officers, as well as against two competitors now bankrupt for alleged cartel arrangements between 1990 and 2003. This decision is final and the fine has been paid by Alstom. In addition the Group has reached agreements with regard to three out of four potential customer claims for civil actions. On 29 December 2011 the fourth customer filed a civil action against a German Alstom affiliate before the Dortmund Regional Court for an amount of €33 million, plus interests. Alstom contests.

Alleged illegal payments

Certain companies and/or current and former employees of the Group have been or are currently being investigated in various countries, by judicial authorities and development banks with respect to alleged illegal payments. These procedures may result in fines, exclusion of Group subsidiaries from public tenders and third-party actions.

In France, on 6 October 2010, a Group's subsidiary in the Hydro business was formally charged for alleged illegal payments concerning past operations in Zambia. Consistent with the French prosecutor final request, the French investigation judge issued an order for dismissal on 7 June 2011, which closed the criminal procedure in France. In addition the World Bank sanctioned Alstom for improper payment of €110,000 made in 2002 in relation to a World Bank–financed Zambian power rehabilitation project. On 22 February 2012, as part of a negotiated resolution agreement, the World Bank announced its decision to debar ALSTOM Hydro France and ALSTOM Network Schweiz AG (Switzerland) and their affiliates from public tenders financed

by the World Bank for a period of 3 years, which can be reduced to 21 months subject to certain conditions Alstom intends to respect. The Group will also pay a restitution amount of $9.5 million. This debarment qualifies for cross-debarment by the other multilateral development banks pursuant to the Agreement of Mutual Recognition of Debarments signed on 9 April 2010.

In addition on 22 November 2011, the Swiss Office of Attorney General closed the investigations opened in 2007 to determine whether the Alstom Group and some of its entities had violated rules prohibiting the payment of foreign civil servants to unlawfully win commercial contracts. After thorough investigations, the Office of Attorney General has concluded the absence of any bribery system or so called slush funds used for bribery of civil servants to illegally obtain contracts and only sanctioned the company for corporate negligence in three isolated cases in Latvia, Tunisia and Malaysia, imposing a fine of CHF 2.5 million, to which is added the payment of an amount corresponding to the estimated alleged profits of the orders of CHF 36.4 million. Alstom has also paid reparation in the amount of CHF 1 million to the International Committee of the Red Cross for use in projects in Latvia, Tunisia and Malaysia. The Office of Attorney General has issued a dismissal order acquitting the Alstom Group and its entities of any additional wrongdoing, fully closing its investigations.

US litigation following an accident in the Washington D.C. metro

On 22 June 2009, a collision between two metro trains occurred in the Washington D.C. metro resulting in the death of 9 persons and the injury of 52 persons. The claims against Alstom Signaling Inc. initially amounted to approximately $475 million. A report of the National Transportation Safety Board on the causes of the accident partially implicated equipment supplied by Alstom Signaling Inc. As of today, 120 claims have been made. The 20 most serious claims were asserted through lawsuits. Of these 20 claims, 16 have been settled for a remaining cost for Alstom of about $6 million. The hearings of the remaining 4 lawsuits have been postponed to October-November 2012. The total amount claimed in relation to these 4 cases is approximately $140 million. The remaining cases are being asserted through an alternative claims process, of which 69 have been settled. These claims have been declared to the Group’s insurers and Alstom believes it has adequate insurance coverage.

Budapest metro

In 2006, Alstom was awarded by BKV a contract for the delivery of 22 Metropolis metros for Line 2 and 15 metros for Line 4 for the city of Budapest. During the execution of the project, Alstom experienced delays mostly related to technical change requests from BKV and the refusal by the Hungarian Authority "NKH" to deliver the final train homologation. In August 2007, NKH granted a Preliminary Type License, but, in October 2010, NKH refused to grant the final homologation ("Final Type License"). On 19 October 2010 BKV terminated the contract and called immediately thereafter all bank guarantees amounting in total to approximately €130 million. On 25 October 2010, the French Court of Nanterre served a provisional injunction and ordered the bank not to pay considering that BKV manifestly misused its right to call the bank guarantees. BKV has appealed this decision before the French Court of Versailles. On 8 June 2011 this Court has invalidated the decision of the Court of Nanterre and ordered payment. In July 2011 the parties agreed the re-entry into force of the contract and the suspension of the arbitration procedure. The homologation process for the Final Type License is on-going.

Lignite-fired station in Maritza

In 2006, Alstom was awarded by AES a contract for the manufacture of a lignite-fired station in Maritza, Bulgaria. During the execution of the project, Alstom experienced delays and works disruptions mostly due to the defective nature of the lignite supplied by AES. In March 2011, AES terminated the contract. Prior to termination, AES called its performance bank guarantee. On 10 February 2011, the French Court of Nanterre served a provisional injunction and ordered the bank not to pay, considering that AES manifestly misused its right to call the bank guarantee. AES has appealed this decision before the French Court of Versailles. On 6 July 2011, this Court has invalidated the decision of the Court of Nanterre and ordered payment of approximately €150 million. An arbitration procedure initiated by Alstom on 22 January 2011, for wrongful termination notably, is on-going. According to the latest arbitral timetable, the hearings before the Arbitral Tribunal are postponed until March 2013.

There are no other governmental, legal or arbitration procedures, including proceedings of which the Group is aware and which are pending or threatening, which might have, or have had during the last twelve months, a significant impact on the financial situation or profitability of the Group.

Note 29. Lease obligations

(in € million)	Total	Maturity of lease payments Within 1 year	1 to 5 years	Over 5 years

Note 31. Related parties

The Group has identified the following related parties:

- Shareholders of the Group
- Associates & joint ventures
- Key management personnel

31.1 Shareholders of the Group

Bouygues, a French company listed on Paris stock market, is the main shareholder holding more than 5% of the parent company's share. At 31 March 2012, Bouygues holds a 30.7% stake in Alstom share capital.

31.2 Related-party disclosures

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Presentation of the Group

Alstom ("the Group") serves the power generation and transmission markets through its Thermal Power, Renewable Power and Grid Sectors, and the rail transport market through its Transport Sector. The Group designs, supplies, and services a complete range of technologically-advanced products and systems for its customers, and possesses a unique expertise in systems integration and through life maintenance and services.

The operational activities of the Group are organised in four Sectors:

- **Thermal Power**

Thermal Power offers a comprehensive range of power generation solutions using gas or coal from integrated power plants and all types of turbines, generators, boilers, emission control systems to a full range of services including plant modernisation, maintenance and operational support. The Sector also supplies conventional islands for nuclear power plants.

- **Renewable Power**

Renewable Power offers EPC solutions, turbines and generators, control equipment and maintenance for Hydro power and Wind power activities. The Sector includes geothermal and solar thermal businesses.

- **Grid**

The Grid Sector designs and manufactures equipment and engineered turnkey solutions to manage power grids and transmit electricity from the power plant to the large end-user, be it a distribution utility or an industrial process or production facility.

- **Transport**

The Transport Sector serves the urban transit, regional/intercity passenger travel markets and freight markets all over the world with rail transport products, systems and services.

The consolidated financial statements are presented in euro and have been authorised for issue by the Board of Directors held on 6 May 2013. In accordance with French legislation, they will be final once approved by the shareholders of Alstom at the Annual General Meeting convened for 2 July 2013.

Note 2. Accounting policies

2.1 Basis of preparation of the consolidated financial statements

Alstom consolidated financial statements for the year ended 31 March 2013 have been prepared:

- in accordance with the International Financial Reporting Standards (IFRS) and interpretations published by the International Accounting Standards Board (IASB) and endorsed by the European Union and whose application was mandatory as of 1 April 2012;
- using the same accounting policies and measurement methods as at 31 March 2012, with the exceptions of changes required by the enforcement of new standards and interpretations as described below.

The information relating to consolidated financial statements for the fiscal year ended 31 March 2011, presented in the 2011/12 registration document D.12-0548 filed with the AMF on 25 May 2012 is included by reference.

The full set of standards endorsed by the European Union can be consulted on the website of the European Commission at:

http://ec.europa.eu/internal_market/accounting/ias/index_en.htm

2.1.1. Changes in accounting policies due to new, revised or amended standards and interpretations mandatorily applicable for financial periods beginning on 1 April 2012

The Group's consolidated financial statements are not significantly affected by the enforcement of the new, revised, or amended standards and interpretations becoming effective in the European Union starting from 1 April 2012:

- Amendments to IFRS 7, Disclosures - Transfers of financial assets: the amendments introduce new disclosure requirements about transfers of financial assets such as transactions involving securitisation of financial assets or factoring of trade receivables.

2.1.2. New standards and interpretations not yet mandatorily applicable

2.1.2.1 New standards and interpretations endorsed by the European Union not yet mandatorily applicable

- **Amendment to IAS 1, Presentation of items of other comprehensive income**

Since 1 April 2011, the Group applies the amendment to IAS 1, Presentation of items of other comprehensive income by anticipation. This amendment requests the distinction between comprehensive income elements that will be reclassified in profit or loss and elements that will not. This amendment does not have a material impact on the presentation of the Group's published consolidated statement of comprehensive income.

- **Amendment to IAS 19, Employee benefits**

The Group has not opted for an early application of the amendment to IAS 19, Employee benefits, which effective date is 1 April 2013 for Alstom.
This amendment eliminates the option of applying the corridor approach for post-employment benefits, as a result, all actuarial gains and losses will be recognized immediately in liabilities and will be recorded for each period systematically in "other comprehensive income". Furthermore, past service costs will be also recognized immediately in liabilities but will be recorded in the income statement. The amendment also specifies the calculation of the expected return on plan assets on the basis of the discount rate used to value the defined benefit obligation rather than on the basis of market expectations for returns.

The Group does not apply the corridor approach and already records all actuarial gains and losses in other comprehensive income. The retrospective application of this amendment will have an impact in equity estimated to (25) million euros in order to take into account any change of plans.

The calculation of the expected return on plan assets on the basis of the discount rate used to value the underlying obligation will increase the net financial expense. The Group is currently considering the impact of applying this amendment which is estimated to around (40) million euros on financial expenses and (30) million euros on net profit for the year 2012/13.

- **Standards on consolidation (IFRS 10, Consolidated Financial statements; IFRS 11, Joint arrangements; IFRS 12, Disclosure of interests in other entities; IAS 28 revised, Investments in associates and joint ventures)**

The Group has not opted for an early application of the consolidation standards (IFRS 10, IFRS 11, IFRS 12 and IAS 28 revised) endorsed by the European Union and which effective date is 1 April 2014 for Alstom.

The Group is carrying on the assessment of the impact of applying these new standards for the first time, in particular IFRS 10, Consolidated financial statements and IFRS 11, Joint arrangements.

- **IFRS 10, Consolidated financial statements**

This standard defines control as being exercised when an investor is exposed, or has rights, to variable returns from his involvement with the investee and has the ability to affect those returns through his power over the investee. The impact of applying this new standard on the consolidated financial statements is not expected to be significant.

- **IFRS 11, Joint arrangements**

The new standard mainly prescribes two different accounting treatments:

- Joint arrangements qualifying as joint operations will be recognised based on the proportion of assets, liabilities, revenue and expenses controlled by the Group. A joint operation may be conducted under a separate vehicle or not.
- Joint arrangements that are qualified as joint ventures will be accounted for using the equity method, because the parties have rights to the net assets of the arrangement.

The Group is currently analysing its jointly controlled entities in light of IFRS 11, Joint arrangements so as to determine if they shall be classified as joint operations or joint ventures.
Entities over which the Group exercises joint control consolidated until now according to the proportionate consolidation method and which should be classified as joint ventures according to the new rules should mainly concern Transport sector.

The Group is assessing the impact of applying this new standard. However, as the contribution of the jointly controlled entities to the Group's main financial indicators is currently not material, the impact on the consolidated financial statements is not expected to be significant.

- **IFRS 13, Fair value**

The Group has not opted for an early application of IFRS 13, Fair value which effective date is 1 April 2013 for Alstom.
IFRS 13 applies to IFRSs that require or permit fair value measurements or disclosures and provides a single IFRS framework for measuring fair value and requires disclosures about fair value measurement. The standard defines fair value on the basis of an 'exit price' notion and uses a 'fair value hierarchy' which results in a market based, rather than entity specific, measurement.
The impact of applying this new standard on the consolidated statement is not expected to be significant.

- **Amendments to IAS 32 and IFRS 7, Offsetting financial assets and financial liabilities**

The Group has not opted for an early application of these amendments endorsed by the European Union and which effective date is 1 April 2014 for Alstom.
These amendments provide clarification on the application of the offsetting rules and on the relative disclosures.

- **Improvements to IFRS s 2009-2011**

2.1.2.2 New standards and interpretations not yet approved by the European Union and not yet mandatorily applicable

- Financial instruments:
  - classification and measurement of financial assets (IFRS 9)
  - Mandatory effective date and transition guidance (amendments to IFRS 9 and IFRS 7)
- Transition guidance (amendments to IFRS 10, IFRS 11 and IFRS 12)
- Investments entities (amendments to IFRS 10, IFRS 12 and IAS 27)

The Group is currently considering the impact of applying these new standards for the first time.

2.2. Use of estimates

The preparation of the consolidated financial statements in conformity with IFRS requires management to make various estimates and to use assumptions regarded as realistic and reasonable. These estimates or assumptions could affect the value of the Group's assets, liabilities, equity, net income and contingent assets and liabilities at the closing date. Management reviews estimates on an on-going basis using information currently available. Actual results may differ from those estimates, due to changes in facts and circumstances.

The accounting policies most affected by the use of estimates are the following:

- **Revenue and margin recognition on construction and long-term service contracts and related provisions**

The Group recognises revenue and gross margin on construction and long-term service contracts using the percentage of completion method based on milestones; in addition, when a project review indicates a negative gross margin, the estimated loss at completion is immediately recognised.

Recognised revenue and margin are based on estimates of total expected contract revenue and cost, which are subject to revisions as the contract progresses. Total expected revenue and cost on a contract reflect management's current best estimate of the probable future benefits and obligations associated with the contract. Assumptions to calculate present and future obligations take into account current technology as well as the commercial and contractual positions,

assessed on a contract-by-contract basis. The introduction of technologically-advanced products exposes the Group to risks of product failure significantly beyond the terms of standard contractual warranties applicable to suppliers of equipment only.

Obligations on contracts may result in penalties due to late completion of contractual milestones, or unanticipated costs due to project modifications, suppliers or subcontractors' failure to perform or delays caused by unexpected conditions or events. Warranty obligations are affected by product failure rates, material usage and service delivery costs incurred in correcting failures.

Although the Group makes individual assessments on contracts on a regular basis, there is a risk that actual costs related to those obligations may exceed initial estimates. Estimates of contract costs and revenues at completion in case of contracts in progress and estimates of provisions in case of completed contracts may then have to be re-assessed.

- **Estimate of provisions relating to litigations**

The Group identifies and analyses on a regular basis current litigations and measures, when necessary, provisions on the basis of its best estimate of the expenditure required to settle the obligation at the balance sheet date. These estimates take into account information available and different possible outcomes.

- **Valuation of deferred tax assets**

Management judgment is required to determine the extent to which deferred tax assets can be recognised. Future sources of taxable income and the effects of the Group global income tax strategies are taken into account in making this determination. This assessment is conducted through a detailed review of deferred tax assets by jurisdiction and takes into account past, current and future performance deriving from the existing contracts in the order book, the budget and the three-year plan, and the length of carry back, carry forwards and expiry periods of net operating losses.

- **Measurement of post-employment and other long-term defined employee benefits**

The measurement of obligations and assets related to defined benefit plans makes it necessary to use several statistical and other factors that attempt to anticipate future events. These factors include assumptions about the discount rate, the expected return on plan assets, the rate of future compensation increases as well as withdrawal and mortality rates. If actuarial assumptions materially differ from actual results, it could result in a significant change in the employee benefit expense recognised in the income statement, actuarial gains and losses recognised in other comprehensive income and prepaid and accrued benefits.

- **Valuation of assets**

The discounted cash flow model used to determine the recoverable value of the groups of cash generating units to which goodwill is allocated includes a number of inputs including estimates of future cash flows, discount rates and other variables, and then requires significant judgment.

Impairment tests performed on intangible and tangible assets are also based on assumptions. Future adverse changes in market conditions or poor operating results from underlying assets could result in an inability to recover their current carrying value.

- **Inventories**

Inventories, including work in progress, are measured at the lower of cost and net realisable value. Write-down of inventories are calculated based on an analysis of foreseeable changes in demand, technology or market conditions in order to determine obsolete or excess inventories. If actual market conditions are less favourable than those projected, additional inventory write-downs may be required.

2.3. Significant accounting policies

2.3.1. Consolidation methods

Subsidiaries

Entities over which the Group exercises exclusive control are fully consolidated. Exclusive control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of a company so as to obtain benefits from its activities, whether it holds shares or not.

Inter-company balances and transactions are eliminated.

Results of operations of subsidiaries acquired or disposed of during the year are recognised in the consolidated income statement as from the date of acquisition or up to the date of disposal, respectively.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the equity attributable to the equity holders of the parent. Non-controlling interests consist of the amount of those interests at the date of the original business combination and their share of changes in equity since the date of the combination. In the absence of explicit agreements to the contrary, subsidiaries' losses are systematically allocated between equity holders of the parent and non-controlling interests based on their respective ownership interests even if this results in the non-controlling interests having a deficit balance.

Interests in joint ventures

Entities over which the Group exercises joint control are consolidated according to the proportionate consolidation method whereby the Group's share of the joint ventures' results, assets and liabilities is recorded in the consolidated financial statements. Accounting policies of joint ventures have been changed where necessary to ensure consistency with the policies adopted by the Group.

Investments in associates

Entities in which the Group exercises significant influence but not control, are accounted for under the equity method. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Under the equity method, investments in associates are carried in the consolidated balance sheet at cost, including any goodwill arising and transaction costs. Earn-outs are initially recorded at fair value and adjustments recorded through cost of investment when their payments are probable and can be measured with sufficient reliability.

The Group's share of its associates' profits or losses is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. The impairment expense of investments in associates is recorded in the line "Share in net income of equity investments" of the income statement. Losses of an associate in excess of the Group's interest in that associate are not recognised, except if the Group has a legal or implicit obligation. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of the associate recognised at the date of acquisition is recognised as goodwill. The goodwill is included within the carrying amount of the investment and is assessed for impairment as part of the investment.

In case of associates purchased by stage, the Group uses the cost method to account for changes from available for sales (AFS) category to associates.

2.3.2 Translation of financial statements denominated in currencies other than euro

Functional currency is the currency of the primary economic environment in which a reporting entity operates, which in most cases, corresponds to the local currency. However, some reporting entities may have a functional currency different from local currency when that other currency is used for the entity's main transactions and faithfully reflects its economic environment.

Assets and liabilities of entities whose functional currency is other than the euro are translated into euro at closing exchange rate at the end of each reporting period while their income and cash flow statements are translated at the average exchange rate for the period. The currency translation adjustments resulting from the use of different currency rates for opening balance sheet positions, transactions of the period and closing balance sheet positions are recorded in other comprehensive income. Translation adjustments are transferred to the consolidated income statement at the time of the disposal of the related entity.

Goodwill and fair value adjustments arising from the acquisition of entities whose functional currency is not euro are designated as assets and liabilities of those entities and therefore denominated in their functional currencies and translated at the closing rate at the end of each reporting period.

2.3.3 Business combinations

Business combinations completed between 1 January 2004 and 31 March 2010 have been recognised applying the provisions of the previous version of IFRS 3.
Business combinations completed from 1 April 2010 onwards are recognised in accordance with IFRS 3 Revised.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the sum of fair values of the assets transferred and the liabilities incurred by the acquirer at the acquisition date and the equity-interest issued by the acquirer. The consideration transferred includes contingent consideration, measured and recognized at fair value, at the acquisition date.

For each business combination, any non-controlling interest in the acquiree may be measured either at the acquisition-date fair value, leading to the recognition of the non-controlling interest's share of goodwill (full goodwill method) or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets, resulting in recognition of only the share of goodwill attributable to equity holders of the parent (partial goodwill method).

Acquisition-related costs are recorded as an expense as incurred.

Goodwill arising from a business combination is measured as the difference between:

- the fair value of the consideration transferred for an acquiree plus the amount of any non-controlling interests of the acquiree; and
- the net fair value of the identifiable assets acquired and liabilities assumed at the acquisition date.

Initial estimates of consideration transferred and fair values of assets acquired and liabilities assumed are finalised within twelve months after the date of acquisition and any adjustments are accounted for as retroactive adjustments to goodwill. Beyond this twelve-month period, any adjustment is directly recognised in the income statement.

Earn-outs are initially recorded at fair value and adjustments made beyond the 12-month measurement period following the acquisition are systematically recognised through profit or loss.

Goodwill is not amortised but tested for impairment annually at closing date or more frequently if events or changes in circumstances indicate a potential impairment.

In case of a step-acquisition that leads to the Group acquiring control of the acquiree, the equity interest previously held by the Group is remeasured at its acquisition-date fair value and any resulting gain or loss is recognised in profit or loss.

2.3.4. Segment information

Operating segments used to present segment information are identified on the basis of internal reports used by the Chief Executive Officer (CEO) to allocate resources to the segments and assess their performance. There is no segment aggregation.
The Chief Executive Officer is the Group's "chief operating decisions maker" within the meaning of IFRS 8.
The methods used to measure the key performance indicators of the segments for internal reporting purposes are the same as those used to prepare the consolidated financial statements.

2.3.5. Sales and costs generated by operating activities

Measurement of sales and costs

The amount of revenue arising from a transaction is usually determined by the contractual agreement with the customer. In the case of construction contracts, claims are considered in the determination of contract revenue only when it is highly probable that the claim will result in additional revenue and the amount can be reliably estimated.

Penalties are taken into account in reduction of contract revenue as soon as they are probable.

Production costs include direct costs (such as material, labour and warranty costs) and indirect costs. On the basis of funding required for the execution of contracts, borrowing costs may be attributed to construction contracts whose execution period exceeds one year. Warranty costs are estimated on the basis of contractual agreement, available statistical data and weighting of all possible outcomes against their associated probabilities. Warranty periods may extend up to five years. Selling and administrative expenses are excluded from production costs.

Recognition of sales and costs

Revenue on sale of manufactured products is recognised according IAS 18, i.e. essentially when the significant risks and rewards of ownership are transferred to the customer, which generally occurs on delivery. Revenue on short-term service contracts is recognised on performance of the related service. All production costs incurred or to be incurred in respect of the sale are charged to cost of sales at the date of recognition of sales.

Revenue on construction contracts and long-term service agreements is recognised based on the percentage of completion method: the stage of completion is assessed by milestones which ascertain the completion of a physical proportion of the contract work or the performance of services provided for in the agreement. The revenue for the period is the excess of revenue measured according to the percentage of completion over the revenue recognised in prior periods.

Cost of sales on construction contracts and long-term service agreements is computed on the same basis. The cost of sales for the period is the excess of cost measured according to the percentage of completion over the cost of sales recognised in prior periods. As a consequence, adjustments to contract estimates resulting from work conditions and performance are recognised in cost of sales as soon as they occur, prorated to the stage of completion.

When the outcome of a contract cannot be estimated reliably but the contract overall is expected to be profitable, revenue is still recognised based on milestones, but margin at completion is adjusted to nil.

When it is probable that contract costs at completion will exceed total contract revenue, the expected loss at completion is recognised immediately as an expense.
Bid costs are directly recorded as expenses when a contract is not secured.

With respect to construction contracts and long-term service agreements, the aggregate amount of costs incurred to date *plus* recognised margin *less* progress billings is determined on a contract-by-contract basis. If the amount is positive, it is included as an asset designated as "Construction contracts in progress, assets". If the amount is negative, it is included as a liability designated as "Construction contracts in progress, liabilities".
The caption "Construction contracts in progress, liabilities" also includes down payments received from customers.

Recognition of overhead expenses
Research expenditure is expensed as incurred. Development costs are expensed as incurred unless the project they relate to meets the criteria for capitalisation (see Note 2.3.10). Selling and administrative expenses are expensed as incurred.

2.3.6. Income from operations

Income from operations is the indicator used by the Group to present the level of operational performance that can be used as part of an approach to forecast recurring performance. This complies with the recommendation 2009-R03 of the ANC, the French standard setter, on the format of financial statements of entities applying IFRS.
Income from operations includes gross margin, research and development expenditure, selling and administrative expenses. It includes in particular the service cost of employee defined benefits, the cost of share-based payments and employee profit sharing, foreign exchange gains or losses associated with operating transactions and capital gains (losses) on disposal of intangible and tangible assets arising from ordinary activities.

2.3.7. Other income and other expense

Other income and other expense are representative of items which are inherently difficult to predict due to their unusual, irregular or non-recurring nature.

Other income may include capital gains on disposal of investments or activities and capital gains on disposal of tangible and intangible assets arising from activities disposed of or facing restructuring plans as well as any income associated to past disposals.

Other expense include capital losses on disposal of investments or activities and capital losses on disposal of tangible and intangible assets arising from activities disposed of or facing restructuring plans as well as any costs associated to past disposals, restructuring costs, costs incurred to effect business combinations and amortisation expense of assets exclusively acquired in the context of business combinations (margin in backlog, customer relationship, margin on inventory), significant impairment losses on assets, litigation costs that have arisen outside the ordinary course of business and a portion of post-employment and other long-term defined benefit expense (amortisation of unrecognised prior service cost, impacts of curtailments and settlements and amortisation of actuarial gains and losses referring to long-term benefits other than post-employment benefits).

2.3.8. Financial income and expense

Financial income and expense include:
- Interest income representing the remuneration of the cash position,
- Interest expense related to the financial debt (financial debt consists of bonds, the debt component of compound instruments, other borrowings and lease-financing liabilities);
- Other expenses paid to financial institutions for financing operations;
- The financial component of the cost of employee defined benefits (interest cost and expected return on assets);
- Foreign exchange gains and losses associated to financing transactions;
- Other income or expense from cash and cash equivalents and marketable securities.

2.3.9. Foreign currency transactions

Foreign currency transactions are initially recognised by applying to the foreign currency amount the spot exchange rate between the functional currency of the reporting unit and the foreign currency at the date of the transaction. Currency units held, assets to be received and liabilities to be paid resulting from those transactions are re-measured at closing exchange rates at the end of each reporting period. Realised exchange gains or losses at date of payment as well as unrealised gains or losses deriving from re-measurement are recorded within income from operations when they relate to operating activities or within financial income or expense when they relate to financing activities.

Since the Group is exposed to foreign currency volatility, the Group puts in place a significant volume of hedges to cover this exposure. These derivatives are recognised on the balance sheet at their fair value at the closing date. Providing that the relationships between the foreign currency exposure and the related derivatives are qualifying relationships, the Group uses the specific accounting treatments designated as hedge accounting. A relationship qualifies for hedge

accounting if, at the inception of the hedge, it is formally designated and documented and if it proves to be highly effective throughout the financial reporting periods for which the hedge was designated.

Hedging relationships may be of two types:

- Cash flow hedge in case of hedge of the exposure to variability of cash flows attributable to highly probable forecast transactions;
- Fair value hedge in case of hedge of the exposure attributable to recognised assets, liabilities or firm commitments.

Cash flow hedge

When cash flow hedge accounting applies, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in other comprehensive income. When the forecast transaction results in the recognition of a financial asset or liability, the amounts previously recognised directly in other comprehensive income are recycled into the income statement. When the forecast transaction results in the recognition of a non financial asset or liability (for instance, inventories or construction contracts in progress), the gain or loss that was directly recognised in other comprehensive income is included in the carrying amount of the asset or liability.

Fair value hedge

When fair value hedge accounting applies, changes in the fair value of derivatives and changes in the fair value of hedged items are both recognised in the income statement and offset each other up to the gain or loss on the effective portion on the hedging instrument.

Whatever the type of hedge, the ineffective portion on the hedging instrument is recognised in the income statement. Realised and unrealised exchange gains and losses on hedged items and hedging instruments are recorded within income from operations when they relate to operating activities or within financial income or expense when they relate to financing activities.

As the effective portion on the hedging instrument offsets the difference between the spot rate at inception of the hedge and the effective spot rate at the outcome of the hedge, sales and costs resulting from commercial contracts are recognised at the spot rate at inception of the hedge throughout the life of the related commercial contracts, provided that the corresponding hedging relationships keep on qualifying for hedge accounting.

The Group uses export insurance policies to hedge its currency exposure on certain contracts during the open bid period. When commercial contracts are awarded, insurance instruments are settled and forward contracts are put in place and recorded according the fair value hedge accounting as described above.

2.3.10. Intangible assets

Intangible assets include acquired intangible assets (such as technology and licensing agreements) and internally generated intangible assets (mainly development costs).

Acquired intangible assets

Acquired intangible assets are initially measured at cost and amortised on a straight-line basis over their estimated useful lives. Useful lives can extend to twenty years due to the long-term nature of the underlying contracts and activities. The amortisation expense of assets acquired through ordinary transactions is recorded in cost of sales, research and development expenditure, selling expenses or administrative expenses, based on the function of the underlying assets. The amortisation expense of assets exclusively acquired in the context of a business combination (margin in backlog, customer relationship) is recognised as other expense.

Internally generated intangible assets

Development costs are capitalised if and only if the project they relate to meets the following criteria:

- The project is clearly defined and its related costs are separately identified and reliably measured,
- The technical feasibility of the project is demonstrated,
- The intention exists to complete the project and to use or sell it,
- Adequate technical and financial resources are available to complete the project,
- It is probable that the future economic benefits attributable to the project will flow to the Group.

Capitalised development costs are costs incurred directly attributable to the project (materials, services, fees…), including an appropriate portion of relevant overheads.

Capitalised development costs are amortised on a straight-line basis over the estimated useful life of the asset. The amortisation charge is reported in research and development expenses.

2.3.11. Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment loss. When an item of property, plant and equipment is made up of components with different useful lives, the total cost is allocated between the various components. Components are then separately depreciated.

Depreciation is computed using the straight-line method over the estimated useful lives of each component. The useful lives most commonly used are the following:

	Estimated useful life in years
Buildings	7-40
Machinery and equipment	3-25
Tools, furniture, fixtures and others	1-10

Useful lives are reviewed on a regular basis and changes in estimates, when relevant, are accounted for on a prospective basis. The depreciation expense is recorded in cost of sales, selling expenses or administrative expenses, based on the function of the underlying assets.

Borrowing costs that are attributable to an asset whose construction period exceeds one year are capitalised as part of the costs of the asset until the asset is substantially ready for use or sale.

Property, plant and equipment acquired through finance lease arrangements or long-term rental arrangements that transfer substantially all the risks and rewards incidental to ownership are capitalised. They are recognised at their fair value at the inception of the lease, or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a financing obligation. Lease payments are apportioned between finance charges and repayment of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or the term of the relevant lease, when shorter.

Leases that do not transfer substantially all risks and rewards incidental to ownership are classified as operating leases. Rentals payable are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised on a straight-line basis over the lease term.

2.3.12. Impairment of goodwill, tangible and intangible assets

Assets that have an indefinite useful life – mainly goodwill and intangible assets not yet ready to use - are not amortized but tested for impairment at least annually or when there are indicators that they may be impaired. Other intangible and tangible assets subject to amortization are tested for impairment only if there are indicators of impairment.

The impairment test methodology is based on a comparison between the recoverable amount of an asset and its net carrying value. If the recoverable amount of an asset or a cash-generating unit is estimated to be less than its carrying amount, the carrying amount is reduced to its recoverable amount and the impairment loss is recognised immediately in the income statement. In the case of goodwill allocated to a group of CGUs, the impairment loss is allocated first to reduce the carrying amount of goodwill and then to the other assets on a pro-rata basis of the carrying amount of each asset.
A cash-generating unit (CGU) is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other groups of assets. If an asset does not generate cash inflows that are largely independent of other assets or groups of assets, the recoverable amount is determined for a cash-generating unit.

For internal management purposes, goodwill acquired in a business combination is monitored at the level of the Sectors as defined in Note 1: therefore goodwill is tested for impairment at the level of the group of cash-generating units constituting each Sector.

The recoverable amount is the higher of fair value less costs to sell and value in use. The value in use is elected as representative of the recoverable value. The valuation performed is based upon the Group’s internal three-year business plan. Cash flows beyond this period are estimated using a perpetual long-term growth rate for the subsequent years. The recoverable amount is the sum of the discounted cash flows and the discounted terminal residual value. Discount rates are determined using the weighted-average cost of capital of each Sector.

Impairment losses recognised in respect of goodwill cannot be reversed. The impairment losses recognized in respect of other assets than goodwill may be reversed in a later period and recognized immediately in the income statement. The carrying amount is increased to the revised estimate of recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined, had no impairment loss been recognized in prior years.

2.3.13. Financial assets

Loans and deposits

Loans are initially measured at their fair value, plus directly attributable transaction costs and are subsequently measured at amortised cost using the effective interest rate method. Deposits are reported as financial assets when their initial maturity is more than three months and as cash and cash equivalents in case of demand deposits or when the initial maturity is less than three months.

If there is any indication that those assets may be impaired, they are reviewed for impairment. Any difference between the carrying value and the impaired value (net realisable value) is recorded as a financial expense. The impairment loss can be reversed if the value is recovered in the future. In that case, the reversal of the impairment loss is reported as a financial income.

Investments and debt securities

Investments in non-consolidated companies are designated as available-for-sale financial assets. They are initially measured at their fair value, plus directly attributable transaction costs and subsequently re-measured at fair value.

The fair value of listed securities is the market value at the closing date. A valuation model is used in case of unlisted securities. Changes in fair value are directly recognised in other comprehensive income until the security is disposed of or is determined to be impaired. On disposal or in case of significant or prolonged decline in the fair value, the cumulative gain or loss previously recognised in other comprehensive income is included in the profit or loss for the period. Unlike impairment losses recognised in respect of investments in a debt instrument, impairment losses recognised in respect of investments in equity instruments cannot be reversed through profit and loss.

When the fair value cannot be determined reliably, investments in non-consolidated companies are measured at cost. Any impairment loss recognised for such investment is not reversed in a subsequent period, except when disposed of.

All debt securities that the Group has the expressed intention and ability to hold to maturity are designated as held-to-maturity financial assets. They are measured at amortised cost using the effective interest rate method, less any impairment loss recognised to reflect amounts expected not to be recoverable. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired and is measured as the difference between the investment's carrying value and the present value of the estimated future cash flows discounted at the effective interest rate computed at initial recognition. Impairment losses may be reversed through profit and loss in subsequent periods.

Marketable securities are securities held for trading which cannot be considered as cash and cash equivalents. They are designated as financial asset at fair value through profit or loss. Changes in fair value are reported as financial income or expense.

Derivative financial instruments

Derivative financial instruments are recognised and re-measured at fair value (see Note 2.3.9 for foreign currency hedging instruments and Note 2.3.19 for interest rate derivatives).

Receivables

Receivables are initially recognised at fair value, which in most cases approximates the nominal value. If there is any subsequent indication that those assets may be impaired, they are reviewed for impairment. Any difference between the carrying value and the impaired value (net realisable value) is recorded within income from operations. The impairment loss can be reversed if the value is recovered in the future. In that case, the reversal of the impairment loss is reported within income from operations.

2.3.14. Inventories

Raw materials and supplies, work in progress and finished products are stated at the lower of cost, using the weighted average cost method, or net realisable value. Inventory cost includes direct material and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

2.3.15. Cash and cash equivalents

Cash and cash equivalents consist of cash and short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash, which are subject to an insignificant risk of change in value.

Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

2.3.16. Taxation

The group computes taxes in accordance with prevailing tax legislation in the countries where income is taxable.
The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Temporary differences arising between the carrying amount and the tax base of assets and liabilities, unused tax losses and unused tax credits are identified for each taxable entity (or each tax group when applicable). Corresponding deferred taxes are calculated at the enacted or substantively enacted tax rates that are expected to apply in the period when the asset is realised or the liability settled.

Deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profits will be available in the future against which the deductible differences, unused tax losses and unused tax credits can be utilised. The carrying amount of deferred tax assets is reviewed at each balance sheet date.

Deferred tax liabilities are recognised for all taxable temporary differences, with the exception of certain taxable temporary differences between the Group's share in the net assets in subsidiaries, joint ventures and associates and their tax bases. The most common situation when such exception applies relates to undistributed profits of subsidiaries where distribution to the shareholders would trigger a tax liability: when the Group has determined that profits retained by the subsidiary will not be distributed in the foreseeable future, no deferred tax liability is recognised.

Deferred tax assets and liabilities are offset when both of the following conditions are met:
- the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and
- the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority.

Deferred tax is charged or credited to net income, except when it relates to items charged or credited directly to other comprehensive income, in which case the deferred tax is classified in other comprehensive income.

2.3.17. Provisions

As long as a construction contract or a long-term service agreement is in progress, obligations attributable to such a contract are taken into account in the assessment of the margin to be recognised and are therefore reported within the accounts "Construction contracts in progress, assets" or "Construction contracts in progress, liabilities".

Upon completion of the contract, such obligations are recognised as distinct liabilities when they satisfy the following criteria:

- the Group has a present legal or constructive obligation as a result of a past event;
- it is probable that an outflow of economic resources will be required to settle the obligation; and
- such outflow can be reliably estimated.

These liabilities are presented as provisions when they are of uncertain timing or amount. When this uncertainty is dispelled, they are presented as trade payables or other current liabilities.

Obligations resulting from transactions other than construction contracts and long-term service agreements are directly recognised as provisions as soon as the above-mentioned criteria are met.

Where the effect of the time value of money is material, provisions are measured at their present value.

Restructuring provisions are made when plans to reduce or close facilities, or to reduce the workforce have been finalised and approved by the Group management and have been announced before the balance sheet date, resulting in an obligation of the Group to third parties. Restructuring costs include employees' severance and termination benefits and estimated facility closing costs. In addition to such provisions, restructuring costs may include asset write-off relating to the restructured activities.

2.3.18. Financial liabilities

Bonds and borrowings

Bonds and interest-bearing bank loans are initially recognised at fair value, less any transaction costs directly attributable to the issuance of the liability. These financial liabilities are subsequently measured at amortised cost, using the effective interest rate method.

Derivative financial instruments

Derivative financial instruments are recognised and re-measured at fair value (see Note 2.3.9 for foreign currency hedging instruments and Note 2.3.19 for interest rate hedging instruments).

Payables

Payables are initially recognised at fair value, which in most cases approximates the nominal value. They are subsequently re-measured at amortised cost.

2.3.19. Interest rate derivatives

The Group may enter into hedges for the purpose of managing its exposure to movements in interest rates. Derivatives are recognised on the balance sheet at fair value at the closing date. Providing that the relationships between the interest rate exposure and the related derivatives are qualifying relationships, the Group uses the specific accounting treatments designated as hedge accounting. Fair value hedge accounting and cash flow hedge accounting are applied to fixed and floating rate borrowings, respectively.

In the case of fair value hedge relationships, the re-measurement of the fixed rate borrowing is offset in the income statement by the movement in the fair value of the derivative up to the effective part of hedged risk. In the case of cash flow hedge relationships, the change in fair value of the derivative is recognised directly in other comprehensive income. When the forecast transaction results in the recognition of a monetary item, the amounts previously recognised directly in other comprehensive income are reclassified to the income statement.

2.3.20. Share-based payments

The Group issues equity-settled and cash-settled share-based payments to certain employees.

Equity-settled share-based payments

Equity-settled share-based payments are measured at fair value at the grant date (excluding the effect of non-market-based conditions) using the binomial pricing model or the Black-Scholes model for plans issued from 2009. The cumulative recognised expense is based on the fair value at grant date and on the estimated number of shares that will eventually vest (including the effect of non-market-based vesting conditions). It is recorded in income from operations throughout the vesting period with a counterpart in equity.

At the end of each reporting period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting conditions. It recognises the impact of the revision to original estimates, if any, in the income statement, with a corresponding adjustment to equity.

Cash-settled share-based payments

For cash-settled share-based payments, a liability equal to the portion of the goods or services rendered is recognised at the current fair value. The fair value is remeasured at each balance-sheet date and at the date of settlement, with any changes recognised in the income statement.

The Group may also provide employees with the ability to purchase the Group's ordinary shares at a discounted price compared to that of the current market value. In that case, the Group records an expense based on the discount given and its estimate of the shares expected to vest.

2.3.21. Post-employment and other long-term defined employee benefits

The Group provides its employees with various types of post-employment benefits, such as pensions, retirement bonuses and medical care, and other long-term benefits, such as jubilee awards and deferred compensation schemes. The type of benefits offered to individual employees is related to local legal requirements as well as practices of the specific subsidiaries.

The Group's health care plans are generally contributory with participants' contributions adjusted annually.

Post-employment defined benefit plans

For single employer defined benefit plans, the Group uses the Projected Unit Credit Method to determine the present value of its obligations and the related current and past service costs/profits. This method considers the actuarial assumptions' best estimates (for example, the expected turnover, the expected future salary increase and the expected mortality).

Most defined benefit pension liabilities are funded through pension funds legally distinct from the entities constituting the Group. Plan assets related to funded plans are invested mainly in equity and debt securities. Other supplemental pension plans sponsored by the Group for certain employees are directly paid by the employer as they become due. Post-employment medical benefit plans are predominantly unfunded.

The Group periodically reviews plan assets and obligations. The effects of any change in actuarial assumptions together with the differences between forecast and actual experience are assessed. The Group recognises in other comprehensive income the full amount of any actuarial gains and losses as well as the effect of any asset ceiling.

The estimated cost of providing defined benefits to employees is accrued during the years in which the employees render services. In the income statement, the service cost is included in the income from operations. The amortisation of unrecognised prior service cost/profit and specific events impacts (e.g. curtailments) are recognised in other expense. Interest cost and expected return on assets are included in financial income (expenses).

The Group also participates in multi-employer defined benefit plans, mainly in the United States and Canada. As corresponding funds are not able to provide sufficient information to use defined benefit accounting, these plans are accounted for as defined contribution plans (see below).

Post-employment defined contribution plans

For defined contribution plans, the Group pays contributions to independently administered funds at a fixed percentage of employees' pay. These contributions are recorded as operating expenses.

Other long-term employee benefits

The accounting method used when recognising obligations arising from other long-term employee benefits is similar to the method used for post-employment defined benefits, except that prior service cost and actuarial gains/losses are immediately recognised in full in "other income/expense" in the income statement.

2.3.22. Off balance sheet commitments

Commitments arising from execution of operations controlled by the Group

In the ordinary course of business, the Group is committed to fulfil various types of obligations arising from customer contracts (among which full performance and warranty obligations). Obligations may also arise from leases and regulations in respect of tax, custom duties, environment, health and safety. These obligations may or may not be guaranteed by bonds issued by banks or insurance companies.

As the Group is in a position to control the execution of these obligations, a liability only arises if an obligating event (such as a dispute or a late completion) has occurred and makes it likely that an outflow of resources will occur.

When the liability is considered as only possible but not probable or, when probable, cannot be reliably measured, it is disclosed as a contingent liability.

When the liability is considered as probable and can be reliably measured, the impact on the financial statements is the following:

- if the additional liability is directly related to the execution of a customer contract in progress, the estimated gross margin at completion of the contract is reassessed; the cumulated margin recognised to date based on the percentage of completion and the accrual for future contract loss, if any, are adjusted accordingly,
- if the additional liability is not directly related to a contract in progress, a liability is immediately recognised on the balance sheet.

The contractual obligations of subcontractors towards the Group are of the same nature as those of the Group towards its customers. They may be secured by the same type of guarantees as those provided to the Group's customers.
No contingent asset is disclosed when the likelihood of the obligation of the third party remains remote or possible. A contingent asset is disclosed only when the obligation becomes probable.

Any additional income resulting from a third party obligation is taken into account only when it becomes virtually certain.

Commitments arising from execution of operations not wholly within the control of the Group

Obligations towards third parties may arise from on-going legal proceedings, credit guarantees covering the financial obligations of third parties in cases where the Group is the vendor, and indemnification guarantees issued in connection with disposals of business entities.

In case of legal proceedings, a contingent liability is disclosed when the liability is considered as only possible but not probable, or, when probable, cannot be reliably measured. In case of commitments arising from guarantees issued, contingent liabilities are disclosed as soon as guarantees have been delivered and as long as they have not matured.

A provision is recorded if the obligation is considered as probable and can be reliably measured.

Contingent assets arising from legal proceedings or guarantees delivered by third parties are only disclosed when they become probable.

2.3.23. Earnings per share

Basic earnings per share are computed by dividing the period net profit (loss) before the financial cost (net of tax) of bonds reimbursable with shares, by the weighted average number of outstanding shares during the period increased by the weighted average number of shares to be issued on reimbursement of bonds reimbursable with shares ("ORA").

Diluted earnings per share are computed by dividing the period net profit (loss) before the financial cost (net of tax) of bonds reimbursable with shares, by the weighted average number of outstanding shares during the period adjusted in order to take into consideration all dilutive instruments (ORA, stock options, free shares).

Note 3. Scope of consolidation

Transmashholding

On 27 May 2011, Alstom finalised its partnership agreement with Transmashholding ("TMH"), the leading Russian rail manufacturer, by acquiring a 25% stake (plus one share) of the Breakers Investments B.V., which holds 100% of Transmashholding. The deal was closed after Alstom received all approvals of the appropriate Russian authorities.
Alstom share in the Breakers Investments B.V. group is an investment in associates and is therefore accounted in accordance with the equity method.
Pursuant to the closing of the deal, Alstom made, during the fiscal year ended 31 March 2012, an initial payment of $75 million (€54 million) to the selling shareholders. The remainder of the price was calculated using a computation method based on TMH operating results over a four-year period (2008-2011) and net debt. It was paid in October 2012 for an amount of $347 million (€253 million).
In accordance with IAS 28, the Group has recognised its share in the net fair values of the associate's identifiable assets acquired and liabilities assumed at the acquisition date. The valuation of assets acquired and liabilities assumed at their fair value has resulted in the recognition of new intangible assets (order backlog margin and customer relationships) and the re-measurement of tangible assets, inventories and liabilities. This valuation was finalised on 27 May 2012. The resulting goodwill amounts to €117 million and is included in the carrying amount of the investment.

BrightSource Energy

On 25 October 2012, Alstom has invested $40 million in the American company BrightSource Energy, Inc to reinforce its partnership with the solar power pioneering company. Since its initial investment in 2010, Alstom has progressively increased its investment and now holds more than 20% of the capital.
Since that date, BrightSource Energy Inc has been consolidated under the equity method. Accordingly, a preliminary valuation has been determined as at 25 October 2012. The fair value of assets acquired and liabilities assumed may be subsequently adjusted during a maximum of 12 months from the date the investment becomes an associate, depending on new information obtained about the facts and circumstances existing at the acquisition date.

Note 4. Segment information

4.1 Key indicators by operating segment

At 31 March 2013

(in € million)	Thermal Power	Renewable Power	Grid	Transport	Corporate & others	Elimina-tions	Total
Sales	9,252	1,808	3,922	5,461	-	(174)	20,269

(2) Segment liabilities are defined as the sum of non-current and current provisions, construction contracts in progress liabilities, trade payables and other operating liabilities.

(3) Capital employed corresponds to segment assets *minus* segment liabilities.

4.2 Key indicators by geographic area

Sales by country of destination

(in € million)	Year ended 31 March 2013	31 March 2012
Western Europe	6,571	7,077
thereof France	*2,168*	*2,136*
Eastern Europe	1,953	1,352
North America	2,583	2,440
thereof USA	*1,689*	*1,630*
South & Central America	1,561	1,752
Asia & Pacific	4,478	4,316
Middle East & Africa	3,123	2,997
Total Group	**20,269**	**19,934**

Non-current assets by country of origin

(in € million)	At 31 March 2013	At 31 March 2012
Western Europe (1)	9,280	8,704
thereof France (2)	*2,957*	*2,832*
Eastern Europe	245	310
North America	707	771
thereof USA	*588*	*670*
South & Central America	201	188
Asia & Pacific	885	885
Middle East & Africa	46	36
Total Group	**11,364**	**10,894**

(1) This amount includes goodwill of Thermal Power & Renewable Power Sectors.

(2) This amount includes goodwill of Grid Sector.

Non-current assets by country of origin are defined as non-current assets other than those related to financial debt, to employee defined benefit plans and deferred tax assets.

4.3 Information about major customers

No external customer represents individually 10% or more of the Group's consolidated sales.

Note 5. Research and development expenditure

(in € million)	Year ended 31 March 2013	Year ended 31 March 2012
Research and development expenses	**(737)**	**(682)**
Developments costs capitalised during the period (see Note 10.2)	(233)	(293)
Amortisation expense of capitalised development costs (see Note 10.2)	82	113
Amortisation of acquired technology (see Note 10.2)	94	82
Total research and development expenditure	**(794)**	**(780)**

During the fiscal year ended 31 March 2013, the Group invested €794 million in research and development to develop new technologies and to extend its existing product offering. These research and development programmes relate mainly to:

- the ongoing upgrade of the range of gas turbines and the incremental performance improvements of nuclear steam turbines,
- the adaptation of Transport sector product offering to the clients' needs,
- the development of Haliade offshore wind turbines,
- the development of Super Grid and Smart Grid technologies.

Note 6. Other income and other expense

(in € million)	Year ended 31 March 2013	31 March 2012
Capital gains on disposal of businesses	6	-
Other	-	3
Other income	**6**	**3**
Capital losses on disposal of businesses	(50)	(2)
Restructuring costs	(137)	(83)
Expenses exclusively incurred in the context of business combinations	(45)	(156)
Other	(50)	(96)
Other expense	**(282)**	**(337)**
Other income (expense)	**(276)**	**(334)**

Restructuring costs derive from the adaptation of the Group's footprint in order to take into account the lower demand in developed countries (Europe and USA) and the situation of global overcapacity faced in some segments.

Expenses exclusively incurred in the context of business combinations comprise the amortisation of acquired margin related to Grid's acquisition and the costs incurred to effect the acquisition of Grid.

Other income and other expense mainly derive from components of the post-employment and other long term defined benefit expense, costs of legal proceedings that have arisen outside the ordinary course of business and non-recurring impairment losses on assets.

Note 7. Financial income (expense)

(in € million)	Year ended 31 March 2013	31 March 2012
Interest income	29	37
Other financial income	7	18
Financial income	**36**	**55**
Interest expense	(194)	(179)
Net financial expense from employee defined benefit plans	(27)	(4)
Net exchange loss	(5)	(11)
Other financial expenses	(33)	(38)
Financial expense	**(259)**	**(232)**
Financial income (expense)	**(223)**	**(177)**
Out of which		
Financial income/(expense) arising from Financial instruments (see Note 25)	(195)	(173)

Interest income of €29 million represents the remuneration of the Group's cash positions over the period.

Interest expense of €(194) million represents the cost of the gross financial debt.

Other financial expense of €(33) million incorporates fees and commitment fees paid on guaranteed facilities, syndicated loans and other financing facilities for €(19) million versus €(15) million for the fiscal year ended 31 March 2012.

Note 8. Taxation

8.1 Analysis of income tax charge

The following table summarises the components of income tax charge for the years ended 31 March 2013 and 2012:

	Year ended	
(in € million)	**31 March 2013**	**31 March 2012**
Current income tax charge	(266)	(273)
Deferred income tax charge	73	94
Income tax charge	**(193)**	**(179)**
Effective tax rate	20%	20%

The geographical mix of income before taxes has enabled the Group to maintain the effective tax rate to 20% for the period ended 31 March 2013. Note that, although the rate has been stable over the last years, it may change from one year to another notably based on the following events:

- the geographical mix of income before taxes,
- the Group's ability to recognise new deferred tax assets and to use its tax loss carry forwards and,
- the outcome of income tax audits.

8.2 Effective income tax rate

The following table provides a reconciliation from the income tax charge valued at the French statutory rate to the actual income tax charge for the years ended 31 March 2013 and 2012:

	Year ended	
(in € million)	31 March 2013	31 March 2012
Pre-tax income	**964**	**895**
Statutory income tax rate of the parent company	34.43%	34.43%
Expected tax charge	**(332)**	**(308)**
Impact of:		
- Difference between normal tax rate applicable in France and normal tax rate in force in jurisdictions outside France	144	105
- Transactions liable for reduced tax rate	(20)	11
- Changes in unrecognised deferred tax assets	2	(69)
- Changes in tax rates	(10)	(7)
- Additional tax expenses (withholding tax, CVAE in France and IRAP in Italy)	(68)	(73)
- Permanent differences and other (*)	91	162
Income tax charge	**(193)**	**(179)**
Effective tax rate	20%	20%

(*) including operations of internal reorganisation

8.3 Deferred tax assets and liabilities

(in € million)	At 31 March 2013	At 31 March 2012
Deferred tax assets	1,711	1,472
Deferred tax liabilities	(284)	(176)
Deferred tax assets, net	**1,427**	**1,296**

8.4 Changes in net deferred tax assets

Net deferred tax assets reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The following table summarises the significant components of the Group's net deferred tax assets as of 31 March 2013 and 2012:

(in € million)	At 31 March 2012	Change in P&L	Change in equity (*)	Changes in consolidation scope	Translation adjustments and other changes	At 31 March 2013
Differences between carrying amount and tax basis of tangible and intangible assets	(21)	(24)	-	11	(37)	(71)
Accruals for employee benefit costs not yet deductible	242	(16)	55	-	(3)	278
Provisions and other accruals not yet deductible	500	53	-	-	(37)	516
Differences in recognition of margin on construction contracts	(279)	48	-	-	98	(133)
Tax loss carry forwards	1,035	(106)	-	-	(51)	878
Other	(181)	118	(2)	(4)	28	(41)
Net deferred tax assets/(liabilities)	**1,296**	**73**	**53**	**7**	**(2)**	**1,427**

(*) Mainly related to actuarial gains and losses directly recognised in equity (see consolidated statement of comprehensive income).

(in € million)	At 31 March 2011	Change in P&L	Change in equity (*)	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2012
Differences between carrying amount and tax basis of tangible and intangible assets	(13)	(13)	-	-	5	(21)
Accruals for employee benefit costs not yet deductible	213	(15)	31	1	12	242
Provisions and other accruals not yet deductible	500	(1)	-	-	1	500
Differences in recognition of margin on construction contracts	(299)	11	-	-	9	(279)
Tax loss carry forwards	911	177	-	(5)	(48)	1,035
Other	(113)	(65)	4	15	(22)	(181)
Net deferred tax assets/(liabilities)	**1,199**	**94**	**35**	**11**	**(43)**	**1,296**

(*) Mainly related to actuarial gains and losses directly recognised in equity (see consolidated statement of comprehensive income).

The Group is satisfied as to the recoverability of its recognised net deferred tax assets at 31 March 2013 (€1,427 million) on the basis of an extrapolation of the last three-year business plan and the strategy for the long-term recovery of tax losses in each country.

Deferred tax assets still unrecognised amount to €1,255 million at 31 March 2013 (€1,225 million at 31 March 2012). Most of these unrecognised deferred taxes are originated from tax loss carry forward (€1,052 million at 31 March 2013 and €827 million at 31 March 2012), out of which €491 million are not subject to expiry at 31 March 2013 (€500 million at 31 March 2012).

Note 9. Earnings per share

9.1 Earnings

(in € million)	Year ended 31 March 2013	Year ended 31 March 2012
Net profit attributable to equity holders of the parent	802	732
Earnings attributable to equity holders of the parent used to calculate basic and diluted earnings per share	**802**	**732**

9.2 Number of shares

	Year ended 31 March 2013	Year ended 31 March 2012
Weighted average number of ordinary shares used to calculate basic earnings per share	**301,376,784**	**294,522,251**
Effect of dilutive instruments other than bonds reimbursables with shares:		
- Stock options and free shares (*) (LTI plan)	2,724,963	2,962,692
- Free shares (Alstom Sharing plans)	226,044	225,727
Weighted average number of ordinary shares used to calculate diluted earnings per share	**304,327,791**	**297,710,670**

(*) Stock options taken into consideration in the calculation of the diluted earnings per share only relate to plans 7,8 and 14, plans 9, 10, 12, 13 and 15 being out of the money as at 31 March 2013.

9.3 Earnings per share

(in €)	Year ended 31 March 2013	Year ended 31 March 2012
- Basic earnings per share	2.66	2.49
- Diluted earnings per share	2.64	2.46

Note 10. Goodwill and intangible assets

Goodwill and intangible assets are reviewed for impairment at least annually and whenever events or circumstances indicate that they might be impaired. Such events or circumstances are related to significant, unfavourable changes that are of a lasting nature and affect either the economic environment or the assumptions or the targets adopted as of the acquisition date. An impairment loss is recognised when the recoverable value of the assets tested becomes durably lower than their carrying value.

10.1 Goodwill

(in € million)	At 31 March 2012	Acquisitions and adjustments on preliminary goodwill	Disposals	Translation adjustments and other changes	At 31 March 2013
Thermal Power	3,208	-	(3)	16	3,221
Renewable Power	489	-	-	-	489
Transport	661	29	-	1	691
Grid	1,125	9	-	1	1,135
Goodwill	**5,483**	**38**	**(3)**	**18**	**5,536**
of which:					
Gross value	5,483	38	(3)	18	5,536
Impairment	-	-	-	-	-

(in € million)	At 31 March 2011	Acquisitions and adjustments on preliminary goodwill	Disposals	Translation adjustments and other changes	At 31 March 2012
Thermal Power	3,180	-	-	28	3,208
Renewable Power	488	-	-	1	489
Transport	568	90	-	3	661
Grid	1,160	(37)	-	2	1,125
Goodwill	**5,396**	**53**	**-**	**34**	**5,483**
of which:					
Gross value	5,396	53	-	34	5,483
Impairment	-	-	-	-	-

Goodwill impairment test

As of 31 March 2013, Alstom tested the value of goodwill allocated to its groups of Cash Generating Units (CGU) applying valuation methods consistent with previous years. Alstom ensured that the recoverable amount of groups of CGU exceeded their carrying value (including goodwill).

Presentation of key assumptions used for the determination of recoverable amounts

The value in use of each group of CGU is determined as the discounted value of future cash flows by using cash flow projections for the next three years consistent with the Group's internal business plan, the extrapolation of the two following years and the most recent forecasts prepared by the Sectors.

The value in use is mainly driven by the terminal value which is particularly sensitive to changes in the assumptions on the discount rate after tax, the long-term growth rate and the terminal value operating margin (corresponding to the ratio Income from Operations over Sales).

The main assumptions used to assess the recoverable amounts of goodwill are as follows:

	Thermal Power	Renewable Power	Transport	Grid
Net carrying amount of goodwill at 31 March 2013 (in € million)	3,221	489	691	1,135
Value elected as representative of the recoverable value	value in use	value in use	value in use	value in use
Number of years over which cash flow estimates are available	3 years	3 years	3 years	3 years
Extrapolation period of cash flow estimates	2 years	2 years	2 years	2 years
Long-term growth rate at 31 March 2013	**2.0%**	**2.0%**	**1.5%**	**2.0%**
Long-term growth rate at 31 March 2012	2.0%	2.0%	1.5%	2.0%
After tax discount rate at 31 March 2013 (*)	**9.0%**	**9.0%**	**9.0%**	**9.0%**
After tax discount rate at 31 March 2012 (*)	9.0%	9.0%	9.0%	9.0%

(*) The application of pre-tax discount rates to pre-tax cash flows leads to the same valuation of cash generating units.

As of 31 March 2013, the recoverable amounts of the 4 Sectors exceeded their carrying value and the impairment test supports the Group's opinion that goodwill is not impaired.

For all the Sectors, no impairment of the goodwill would need to be recognized when the value in use is calculated by using either:

- A discount rate that ranges from 120 to 2 100 basis points above the base rate of 9%, depending on the Sector;
- A below 0.5% long-term growth rate.

Sensitivity of enterprise values to key assumptions can be presented as follows:

(in € million)	**Thermal Power**		**Renewable Power**		**Transport**		**Grid**	
	-100 bp	*+100 bp*	*-100 bp*	*+100 bp*	*-100 bp*	*+100 bp*	*-100 bp*	*+100 bp*
After tax discount rate	1,687	(1,263)	322	(239)	531	(405)	444	(332)
	-50 bp	*+50 bp*	*-50 bp*	*+50 bp*	*-50 bp*	*+50 bp*	*-50 bp*	*+50 bp*
Long-term growth rate	(621)	716	(105)	121	(172)	196	(142)	164

10.2 Intangible assets

(in € million)	**At 31 March 2012**	**Additions / disposals / amortisation**	**Changes in consolidation scope**	**Translation adjustments and other changes**	**At 31 March 2013**
Development costs	1,686	233	-	(19)	1,900
Acquired technology	1,422	-	-	-	1,422
Other intangible assets	697	36	13	76	822
Gross value	**3,805**	**269**	**13**	**57**	**4,144**
Development costs	(657)	(82)	-	15	(724)
Acquired technology	(748)	(94)	-	-	(842)
Other intangible assets	(479)	(70)	1	(48)	(596)
Amortisation and impairment	**(1,884)**	**(246)**	**1**	**(33)**	**(2,162)**
Development costs	1,029	151	-	(4)	1,176
Acquired technology	674	(94)	-	-	580
Other intangible assets	218	(34)	14	28	226
Net value	**1,921**	**23**	**14**	**24**	**1,982**

(in € million)	At 31 March 2011	Additions / disposals / amortisation	Acquisitions through business combinations	Translation adjustments and other changes	At 31 March 2012
Development costs	1,395	293	-	(2)	1,686
Acquired technology	1,422	-	-	-	1,422
Other intangible assets	678	6	(3)	16	697
Gross value	**3,495**	**299**	**(3)**	**14**	**3,805**
Development costs	(549)	(113)	-	5	(657)
Acquired technology	(668)	(82)	-	2	(748)
Other intangible assets	(344)	(124)	-	(11)	(479)
Amortisation and impairment	**(1,561)**	**(319)**	**-**	**(4)**	**(1,884)**
Development costs	846	180	-	3	1,029
Acquired technology	754	(82)	-	2	674
Other intangible assets	334	(118)	(3)	5	218
Net value	**1,934**	**(20)**	**(3)**	**10**	**1,921**

Technology and licence agreements acquired through the combination with ABB ALSTOM POWER in 1999 and 2000 and through the combination with Grid activities in 2010 represent the bulk of the gross amount reported as acquired technology.

The impairment test at 31 March 2013 supports the Group's opinion that intangible assets are not impaired.

Note 11. Property, plant and equipment

(in € million)	At 31 March 2012	Acquisitions/ Amortisation/ Impairments	Disposals	Changes in consolidation scope	Translation adjustments and other changes	At 31 March 2013

Transfer from non consolidated investments	118	22
Translation adjustments and other	4	9
Closing balance	**597**	**377**

12.2 Non-consolidated investments

Financial information on non-consolidated investments

(in € million)	At 31 March 2013			At 31 March 2012	At 31 March 2013
	Gross	**Impairment**	**Net**	**Net**	**% ownership**
Tidal Generation Ltd (1)	50	-	50	-	100.0%
BrightSource Energy (2)	-	-	-	97	
Other (3)	60	(9)	51	57	
Total	**110**	**(9)**	**101**	**154**	

(1) On 29 January 2013, Alstom completed the acquisition of Tidal Generation Limited. Tidal Generation Limited is at the forefront in the design, development and manufacture of tidal stream turbines which capture and convert the energy of tidal streams to generate electrical power. Alstom made an initial payment of £16 million (approximately €21 million) to the selling shareholder. The remainder of the price will be based on the achievement of technical milestones and paid by the end of June 2014. As its consolidation did not have a material impact on the consolidated financial statement at 31 March 2013, Tidal Generation Limited will be consolidated from 01 April 2013.

(2) Following an additional investment of $40 million in October 2012, BrightSource Energy is consolidated under equity method instead of being accounted as a non-consolidated investment before.

(3) No other investment's net value individually exceeds €10 million.

Movements in the period

(in € million)	Year ended 31 March 2013	31 March 2012
Opening balance	**154**	**164**
Change in fair value (*)	(1)	(13)
Acquisitions	62	16

Note 13. Other non-current assets

(in € million)	At 31 March 2013	At 31 March 2012
Financial non-current assets associated to financial debt (*)	382	426
Long-term loans, deposits and other	133	119
Other non-current assets	**515**	**545**

(*) These non-current assets relate to a long-term rental of trains and associated equipment to a London metro operator (see Notes 24 and 29). They are made up as follows:

- at 31 March 2013, €368 million receivables and €14 million deposit;
- at 31 March 2012, €400 million receivables and €26 million deposit.

Note 14. Inventories

(in € million)	At 31 March 2013	At 31 March 2012
Raw materials and supplies	989	910
Work in progress	2,145	2,207
Finished products	354	374
Inventories, gross	**3,488**	**3,491**
Raw materials and supplies	(138)	(154)
Work in progress	(157)	(144)
Finished products	(49)	(55)
Write-down	**(344)**	**(353)**
Inventories, net	**3,144**	**3,138**

Changes in inventory write-down recognised as income for the fiscal year ended 31 March 2013 amount to €9 million (€47 million income for the year ended 31 March 2012).

Note 15. Construction contracts in progress

(in € million)	At 31 March 2013	At 31 March 2012	Variation
Construction contracts in progress, assets	4,158	3,752	406
Construction contracts in progress, liabilities	(9,909)	(9,508)	(401)
Construction contracts in progress	**(5,751)**	**(5,756)**	**5**

(in € million)	At 31 March 2013	At 31 March 2012	Variation
Contract costs incurred *plus* recognised profits *less* recognised losses to date	58,511	55,138	3,373
Less progress billings	(61,084)	(57,463)	(3,621)
Construction contracts in progress excluding down payments received from customers	**(2,573)**	**(2,325)**	**(248)**
Down payments received from customers	(3,178)	(3,431)	253
Construction contracts in progress	**(5,751)**	**(5,756)**	**5**

Note 16. Trade receivables

			Past due on the closing date		
(in € million)	Total	No past due on the closing date	Less than 60 days	Between 60 and 180 days	More than 180 days
Trade receivables at 31 March 2013	**5,285**	**4,287**	**350**	**261**	**387**
o/w gross	5,394	4,307	351	265	471
o/w impairment	(109)	(20)	(1)	(4)	(84)
Trade receivables at 31 March 2012	**5,692**	**4,705**	**335**	**200**	**452**
o/w gross	5,806	4,732	337	203	534
o/w impairment	(114)	(27)	(2)	(3)	(82)

Impairment losses are determined considering the risk of non-recovery assessed on a case by case basis. Due to the type of business operated by the Group, past due receivables are frequently representative of outstanding amounts confirmed by customers but whose payment is subject to clearance of items raised during inspection of works. Such receivables do remain fully recoverable; costs to be incurred for the clearance of pending items are included in the determination of the margin at completion of the related contracts.

Note 17. Other current operating assets

(in € million)	At 31 March 2013	At 31 March 2012
Down payments made to suppliers	735	515
Corporate income tax	184	192
Other taxes	842	1,046
Prepaid expenses	236	431
Other receivables	408	443
Derivatives relating to operating activities	333	283
Remeasurement of hedged firm commitments in foreign currency	590	647
Other current operating assets	**3,328**	**3,557**

Note 20. Equity

When managing capital, the objective of the Group is to safeguard its ability to continue as a going concern so that it can provide returns to shareholders, bring benefits to its other partners and optimise the structure of the capital in order to reduce its cost. To achieve this, the Group may choose to:

- adjust the amount of dividends paid to the shareholders;
- reimburse a portion of capital to the shareholders;
- issue new shares; or,
- sell assets in order to scale back its net debt.

20.1. Movements in share capital

Movements in financial year ended 31 March 2013

At 31 March 2013, the share capital of ALSTOM amounted to € 2,157,106,882 consisting of 308,158,126 ordinary shares with a par value of €7 each. For the year ended 31 March 2013, the weighted average number of outstanding ordinary shares amounted to 301,376,784 after the dilutive effect of bonds reimbursable in shares “Obligations Remboursables en Actions” and to 304,327,791 after the effect of all dilutive instruments.

As of 4 October 2012, ALSTOM SA ("the Company") completed a €350 million share capital increase through a private placement to institutional investors. 13 133 208 new shares were issued at a subscription price of €26.65 per share.

During the year ended 31 March 2013, 128 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 8 shares at a par value of €7. The 81,266 bonds reimbursable with shares outstanding at 31 March 2013 represent 5,104 shares to be issued.

Movements in financial year ended 31 March 2012

At 31 March 2012, the share capital of ALSTOM amounted to € 2,061,735,760 consisting of 294,533,680 ordinary shares with a par value of €7 each. For the year ended 31 March 2012, the weighted average number of outstanding ordinary shares amounted to 294,522,251 after the dilutive effect of bonds reimbursable in shares "Obligations Remboursables en Actions" and to 297,710,670 after the effect of all dilutive instruments.

During the year ended 31 March 2012, 288 bonds reimbursable in shares "Obligations Remboursables en Actions" were converted into 18 shares at a par value of €7. The 81,394 bonds reimbursable with shares outstanding at 31 March 2012 represent 5,112 shares to be issued.

20.2. Distribution of dividends

In respect of the financial year ended 31 March 2013, it will be proposed to the Shareholders' meeting called on 2 July 2013 to distribute dividends for a total amount of €259 million corresponding to a €0.84 dividend per share.

The following dividends were distributed in respect of the previous three financial years:
- year ended 31 March 2012 (decision of Shareholders' meeting held on 26 June 2012): total amount of €236 million, corresponding to a €0.80 dividend per share;
- year ended 31 March 2011 (decision of Shareholders' meeting held on 28 June 2011): total amount of €183 million, corresponding to a €0.62 dividend per share;
- year ended 31 March 2010 (decision of Shareholders' meeting held on 22 June 2010): total amount of €364 million, corresponding to a €1.24 dividend per share.

Note 21. Share-based payments

21.1. Stock options and free shares

(1) The number of options and free shares and the exercise price of options have been adjusted as a result of transactions that have impacted the number of capital shares after grant dates.
(2) The exercise price corresponds to the average opening price of the shares during the twenty trading days preceding the day on wich the options were granted by the Board (no discount or surcharge).

At 31 March 2013, stock options granted by plans 7, 8, 9 10, 11 and 12 are fully vested. These options will expire seven years after the end of the vesting period of each plan. Starting plan 12, the options will expire five years after the end of the vesting period.

The long term incentive plans set up since 2007 combine the allocation of stock options with the allocation of free shares.
The grant of these instruments is conditional upon the group satisfying the following performance conditions.

LTI plan 13 granted on 13 December 2010:
The total number of options exercisable and free shares to be delivered will depend on the Group's operating margin for the fiscal years ended 31 March 2011, 31 March 2012 and 31 March 2013:

	% of options exercisable & free shares to be delivered		
	Year ended 31 March 2011	**Year ended 31 March 2012**	**Year ended 31 March 2013**
Operating margin achieved above or equal to 7.5%	40%	40%	20%
Operating margin achieved between 7% (inclusive) and 7.5% (non inclusive)	30%	30%	10%
Operating margin achieved between 6.5% (inclusive) and 7% (non inclusive)	10%	10%	0%
Operating margin achieved below 6.5%	0%	0%	0%

Based on consolidated financial statements for the fiscal years ended 31 March 2011, 31 March 2012 and 31 March 2013, the performance condition is achieved for 80% of an allotment of LTIP13 options and free shares. 20% of options and free shares are cancelled.

LTI plan 14 granted on 4 October 2011:

The total number of options exercisable and free shares to be delivered will depend on the Group's operating margin for the fiscal years ended 31 March 2012 and 31 March 2013 and 31 March 2014:

	% of options exercisable & free shares to be delivered		
	Year ended 31 March 2012	Year ended 31 March 2013	Year ended 31 March 2014
Operating margin achieved above or equal to 7.5%	40%	40%	20%
Operating margin achieved between 7% (inclusive) and 7.5% (non inclusive)	30%	30%	10%
Operating margin achieved between 6.5% (inclusive) and 7% (non inclusive)	10%	10%	0%
Operating margin achieved below 6.5%	0%	0%	0%

Based on consolidated financial statements for the fiscal years ended 31 March 2012 and 31 March 2013, the performance condition is achieved for 60% of an allotment of LTIP14 options and free shares. 20% of options and free shares are cancelled.

LTI plan 15 granted on 10 December 2012:

The total number of options exercisable and free shares to be delivered will depend on the Group's operating margin and the free cash flow for the fiscal years ended 31 March 2013, 31 March 2014 and 31 March 2015:

Year ended 31 March 2013	% of Conditional Options exercisable & free shares to be delivered	Year ended 31 March 2014	% of Conditional Options exercisable & free shares to be delivered	Year ended 31 March 2015	% of Conditional Options exercisable & free shares to be delivered
FCF(*) ≥ 0 and OM(*) ≥ 7.4%	40%	FCF ≥ 0 and OM ≥ 7.6%	40%	FCF ≥ 0 and OM ≥ 8%	20%
FCF ≥ 0 and 7.2% ≤ OM < 7.4%	30%	FCF ≥ 0 and 7.3% ≤ OM < 7.6%	30%	FCF ≥ 0 and 7.5% ≤ OM < 8%	10%
FCF ≥ 0 and 7% ≤ OM < 7.2%	10%	FCF ≥ 0 and 7% ≤ OM < 7.3%	10%	FCF < 0 or OM < 7.5%	0
FCF < 0 or OM < 7%	0	FCF < 0 or OM < 7%	0	-	-

(*) FCF means Free cash flow and OM operating margin

Based on consolidated financial statements for the fiscal year ended 31 March 2013, the performance condition is achieved for 30% of an allotment of LTIP15 options and free shares. 10% of options and free shares are cancelled.

Dividend yield	1.3%	1.3%	1.3%	1.3%	3.1%	3.1%	5.0%	5.0%	3.4%	3.4%

(*) The exercise price corresponds to the average opening price of the shares during the twenty trading days preceding the day on wich the options were granted by the Board (no discount or surcharge).

The option valuation method follows a binomial mathematical model for plan 11 and a Black & Scholes model for plans 12, 13, 14 and 15, with exercise of the options anticipated and spread over the exercise period on a straight-line basis. The volatility factor applied is an average of CAC40 comparable companies' volatility at the grant date.

The Group booked a total expense of €15 million for the year ended 31 March 2013, and €11 million for the year ended 31 March 2012.

(2) The number of SARs and their exercise prices have been adjusted as a result of transactions that have impacted the number of capital shares after grant dates.

The value of SARs plans is measured at the grant date using a Black-Scholes option valuation model taking into account the terms and conditions according to which the instruments were granted. Until the liability is settled, it is measured at each reporting date with changes in fair value recognized in profit and loss.

The Group books a nil income for the year ended 31 March 2013, and €2 million for the year ended 31 March 2012.

Total provisions	**2,482**	**840**	**(473)**	**(680)**	**54**	**(5)**	**2,218**

(1) Current provisions relate to warranties, litigations and claims on completed contracts.

(2) In relation to tax risks, the Group tax filings are subject to audit by tax authorities in most jurisdictions in which the Group operates. These audits may result in assessment of additional taxes that are subsequently resolved with the authorities or potentially through the courts. The Group believes that it has strong arguments against the questions being raised, that it would pursue all legal remedies to avoid an unfavourable outcome and that it has adequately provided for any risk that could result from those proceedings where it is probable that it will pay some amounts.

(3) Restructuring derive from the adaptation of the Group's footprint in order to take into account the lower demand in developed countries (Europe and USA) and the situation of global overcapacity faced in some segments.

(4) Other non-current provisions mainly relate to guarantees delivered in connection with disposals, employee litigations, commercial disputes and environmental obligations. Environmental provisions amount to €37 million at 31 March 2013 and €38 million at 31 March 2012.

Note 23. Post-employment and other long-term defined employee benefits

In addition to mandatory social insurance plans, the Group has introduced a number of retirement plans (€5 621 million euros as of 31 March 2013) and other defined benefit post-employment plans (€ 351 million as of 31 March 2013) which include end-of-service benefits in France and retiree healthcare plans mainly in the United States. Other long-term benefits mainly correspond to jubilees in France and Germany (€63 million as of 31 March 2013).

Post-employment and long-term defined employee benefits are mainly in the United Kingdom, Switzerland, Germany and in the United States.

23.1 Defined benefit obligations

In the United Kingdom, there are three various defined benefit pension plans covering different populations. The largest plan, which accounts for 90% of the defined benefit obligations in the country, provides a pension, in the form of an indexed annuity based on the employee's final pensionable earnings, as well as benefits payable upon death and serious ill-health. This plan was closed to new members as of April 5, 2006. The two other plans also provide a pension in the form of an indexed annuity and are scheduled to be closed to new members as of May 1, 2013. New hires are ordinarily offered the opportunity to participate in a defined contribution group pension plan ("GPP"), a group life assurance plan and an income replacement scheme. These arrangements will also be used to meet the auto-enrollment requirements which affect Alstom in the United Kingdom from 1 May 2013.

In Switzerland, the pension plans allow members to accumulate retirement funds with interests in a dedicated account during their employment life. The account value is converted into a pension, in the form of an annuity or a lump sum payment. The plans also include benefits payable upon death and disability.

In Germany, the plans provide coverage for pension, death and disability. In the past, the pension was accrued in the form of an annuity. The plans were deeply modified for future accruals as of April 1, 2003 for the employees of the Grid sector, as of April 1, 2009 for the employees of the Thermal Power and Renewable Thermal sectors and as of April 1, 2010 for the employees of the Transport sector to remove most defined benefit pension risks. The plans now continue to be accounted as defined benefit plans under IAS19 but with much lower risks for the company. With respect to employee contributions, there are remitted into defined contributions plans.

In the United States of America, Alstom sponsors five qualified defined benefit pension plans and two post-retirement medical plans. Two of the qualified pension plans, namely a cash balance plan and a final average earnings plan, which represent 63% of the defined benefit obligations in the country, were closed to new members as of September 1, 2005, and further closed to all service accruals respectively as of September 30, 2010 and December 31, 2010. Employees now participate in a defined contribution 401(k) plan. The post-retirement medical plans were closed to new hires in 2002 and 2003 with the exception of a small number of unionized employees.

23.2 Plan assets

For defined benefit plans, plan assets have been progressively built up by contributions from the employer and the employees, primarily in the United Kingdom, in Switzerland, in the United States and Germany.

The fair value of plan assets is deducted from the Group's defined benefit obligation, as estimated using the projected unit credit method, in order to calculate the unfunded obligation to be covered by a provision.

(in € million)	At 31 March 2013	European Union	Other European countries	Northern America	Others

23.3 Reconciliation of funded status of the plans with assets and liabilities recognised in the balance sheet

(in € million)	At 31 March 2013	At 31 March 2012
Funded status of the plans	**(1,653)**	**(1,424)**
Unrecognised past service costs (gains)	22	24
Impact of asset ceiling	(1)	(5)
Net of accrued and prepaid benefit costs after asset ceiling	**(1,632)**	**(1,405)**
Of which:		
Accrued pension and other employee benefit costs	***(1,642)***	***(1,417)***
Prepaid pension and other employee benefit costs	***10***	***12***

The net asset of €10 million mainly related to a pension scheme in the United Kingdom is supported by appropriate refund expectations, as requested by IFRIC 14.

The following chart displays the evolution over the current fiscal year and the previous four fiscal years of the present value of the defined benefit obligation, the fair value of the plan assets, the deficit and the experience adjustments:

(en millions d'€)	At 31 March 2013	At 31 March 2012	At 31 March 2011	At 31 March 2010	At 31 March 2009
Defined benefit obligation	(6,035)	(5,521)	(4,892)	(4,251)	(3,668)
Fair value of plan assets	4,382	4,097	3,763	3,334	2,716
Funded status of the plans	(1,653)	(1,424)	(1,129)	(917)	(952)
Unrecognised past service costs (gains)	22	24	25	(12)	(10)
Impact of asset ceiling	(1)	(5)	(13)	(6)	(4)
Net of accrued and prepaid benefit costs after asset ceiling	(1,632)	(1,405)	(1,117)	(935)	(966)
Experience adjustments to:					
- plan liabilities	(1)	(35)	(25)	(16)	15
- plan assets	215	(26)	(27)	405	(663)

23.4 Changes of accrued pensions and other employee benefits recognised in comprehensive income

Actuarial gains and losses and asset ceiling arising from post-employment defined benefit plans have been recognised in other comprehensive income as follows:

(in € million)	At 31 March 2013	At 31 March 2012
Opening balance (net loss)	**(1,863)**	**(1,546)**
Actuarial gains and losses generated during the period	(300)	(324)
Asset ceiling generated during the period	5	7
Closing balance (net loss)	**(2,158)**	**(1,863)**

23.5 Components of plan assets

(in € million)	At 31 March 2013	%	European Union	Other European countries	Northern America
Equities	1,501	34	36	31	39
Bonds	2,384	55	55	52	59
Properties	405	9	8	15	1
Others	92	2	1	2	1
Total	**4,382**	**100**	**100**	**100**	**100**

(in € million)	At 31 March 2012	%	European Union	Other European countries	Northern America
Equities	1,431	35	35	33	40
Bonds	2,166	53	55	48	59
Properties	361	9	7	14	1
Others	139	3	3	5	0
Total	**4,097**	**100**	**100**	**100**	**100**

Plan assets for each individual plan are invested in accordance with statutory regulations, pension plan rules, and decisions of pension fund trustees. At 31 March 2013, plan assets do not include any of the Group's capital stock.

23.6 Assumptions (weighted average rates)

Actuarial assumptions used vary by country and type of plan. Compensation increase assumptions are determined at business unit level and reviewed centrally.

(in %)	At 31 March 2013	European Union	Other European countries	Northern America	Others
Discount rate	3.61	4.10	2.18	3.90	5.99
Rate of compensation increase	2.88	3.42	1.46	3.01	3.82

(in %)	At 31 March 2012	European Union	Other European countries	Northern America	Others
Discount rate	4.30	4.87	2.50	4.93	5.51
Rate of compensation increase	2.92	3.46	1.54	2.97	2.98

For the year ended 31 March 2013, the effective return on assets was 10.5%.

Discount rate

In accordance with IAS 19 principles, discount rates are set each year by reference to the market yields on high quality corporate bonds denominated in the relevant currency. In countries where there is no deep market in such bonds, discount rates are set by reference to the yields on government bonds. The required information is sourced from the company's actuarial advisors and from market quotations and indices.

Assumptions related to the post-employment healthcare obligation

The healthcare trend rate is assumed to be 7.5% in the year ended 31 March 2013 and reduces thereafter to an ultimate rate of 5.4% from 2018 onwards.

Sensitivity analysis

A 25 bp increase or decrease in the main assumptions would have the following impacts on the defined benefit obligation:

(en %)	At 31 March 2013
Impact of a 25bp increase or decrease in the discount rate	-3,28% / 3.46%
Impact of a 25bp increase or decrease in the rate of compensation increase	+0,18% / -0,23%

23.7 Analysis of post-employment and other long-term defined benefit expense

(*) Including an expense of € 19 million related to multi-employer contributions accounted for as defined contribution plans for the year ended 31 March 2013 (€15 million for the year ended 31 March 2012).

23.8 Cash flows

In accordance with local practice and regulations, the company pays contributions to the funded schemes it sponsors and benefits to the members of unfunded plans.

Total cash spent for defined benefit plans in the year ended 31 March 2013 amounted to €180 million and covers both regular contributions for accruing service and recovery contributions in case of funding shortfall. Total cash spent for defined contribution plans in the year ended 31 March 2013 amounted to €191 million.

The company's best estimate of contributions in the year ending 31 March 2014 are respectively €210 million and €190 million for defined benefit and defined contribution plans.

Note 24. Financial debt

Carrying amount (in € million)	**At 31 March 2013**	**At 31 March 2012**

(*) includes, at 31 March 2012, the remaining price of TMH's acquisition paid in October 2012 (see Note 3)

The following table summarises the significant components of the Group's bonds:

	Nominal value (in € million)	**Maturity date**	**Nominal interest rate**	**Effective interest rate**
Alstom September 2014	743	23/09/2014	4.00%	3.89%
Alstom March 2015	60	09/03/2015	4.25%	4.47%
Alstom October 2015	500	05/10/2015	2.88%	2.98%
Alstom March 2016	500	02/03/2016	3.87%	4.05%
Alstom February 2017	750	01/02/2017	4.13%	4.25%
Alstom October 2017	350	11/10/2017	2.25%	2.44%
Alstom October 2018	500	05/10/2018	3.63%	3.71%
Alstom March 2020	750	18/03/2020	4.50%	4.58%

As of 4 October 2012, under its Euro Medium Term Note Programme listed in Luxembourg, the Company launched a new bond issue for an amount of €350 million. It bears an annual coupon of 2.25% and mature in October 2017.

The other obligations under long-term rental represent liabilities related to lease obligations on trains and associated equipment (see Note 13 and 29).

Note 25. Financial instruments and financial risk management

25.1 Financial instruments reported in the financial statements

The Group’s financial liabilities comprise borrowings, trade and other payables. The main purpose of these financial liabilities is to raise funds for the Group’s operations.
The Group has loans, trade and other receivables, and cash and cash equivalents that are directly derived from its operations.

The Group is exposed to currency risk, interest rate risk, credit risk and liquidity risk.

The main valuation methods applied are as follows:

- borrowings, when unhedged, are stated at amortised cost, determined by the effective interest rate method,
- the fair value of cash, cash equivalents, trade receivables and trade payables is considered as being equivalent to carrying value, due to their short maturities,
- the fair value of the financial debt is estimated based on either quoted market prices for traded instruments or current rates offered to the Group for debt of the same maturity.

The fair value of derivative instruments is the estimated amount that the Group would receive or pay to settle the related contracts, valued on the basis of relevant yield curves and foreign exchange rates at closing date.

Year ended 31 March 2013

(*) FV P/L short for fair value through profit and loss; AFS short for available-for-sale assets; LRL short for loans, receivables and liabilities and DER short for derivative instruments.

Financial income and expense arising from financial instruments for period ended 31 March 2012

(in € million)	FV P/L	AFS	LRL at amortised cost inc. related derivatives	**Total**
Interests	1	-	(143)	**(142)**
Interest income	*1*	*-*	*36*	*37*
Interest expense	*-*	*-*	*(179)*	*(179)*
Dividends	-	5	-	**5**
Impairment/loss from subsequent measurement	-	(1)	-	**(1)**
Gain on disposal	-	-	-	**-**
Foreign currency and other	-	-	(35)	**(35)**
Net income/expense for the year ended 31 March 2012	**1**	**4**	**(178)**	**(173)**

The amount reported as "foreign currency and other" is mainly representative of forward points attached to transactions related to financing activities (See Note 2.3.9) and bank fees (see Note 7).

Income from operations arising from financial instruments for the period ended 31 March 2012

Net foreign currency gains and losses recorded within income from operations are positive by €47 million for the year ended 31 March 2012. They are comprised essentially of forward points at mark to market of the hedging instruments.

25.2 Currency risk management

Financial debt

The nominal value of the financial debt split by currency is as follows:

(in € million)	At 31 March 2013	At 31 March 2012
Euro	4,325	4,224
Chinese Yuan	72	83
Brazilian Real	67	144
British Pound	413	425
US Dollar	14	12
Other currencies	79	149
Financial debt in nominal value	**4,970**	**5,037**

The debt in GBP essentially originates from a long-term lease scheme of trains, involving London Underground. The related €367 million debt denominated in GBP is counter-balanced by long-term receivables having the same maturity and also denominated in GBP that are recognised as non-current assets (see Notes 13, 24 and 29).

Operations

In the course of its operations, the Group is exposed to currency risk arising from tenders submitted in foreign currency, awarded contracts and any future cash out transactions denominated in foreign currency. Main currencies triggering a significant exposure for the year ended 31 March 2013 are the Swiss Franc and the US dollar.

During the tender period, depending on the probability to obtain the project and on market conditions, the Group can hedge a portion of its tenders using options or export insurance contracts when possible. Once the contract is signed, forward exchange contracts are used to hedge the actual exposure during the life of the contract (either as the only hedging instruments or as a complement to existing export insurance contracts).

The Group requires all of its operating units to use forward currency contracts to eliminate the currency exposure on any individual sale or purchase transaction in excess of €100,000. Forward currency contracts must be denominated in the same currency as the hedged item. It is the Group’s policy to negotiate the terms of hedge derivatives to match the terms of hedged items to maximise hedge effectiveness.

Derivative instruments hedging foreign currency risk are recognised at their fair value on the balance sheet as follows:

	At 31 March 2013		At 31 March 2012	
(in € million)	Assets	Liabilities	Assets	Liabilities
Derivatives qualifying for fair value hedge	346	367	290	637
Derivatives qualifying for cash flow hedge	20	11	1	24
Derivatives qualifying for net investment hedge	-	-	-	-
Derivatives not qualifying for hedge accounting	2	3	2	1
Total	**368**	**381**	**293**	**662**

The fair value of those instruments is the estimated amount that the Group would receive or pay to settle the related contracts, valued on the basis of relevant yield curves and foreign exchange rates at closing date.

High volatility of foreign exchange rates during the periods ended 31 March 2013 and 31 March 2012 explains the significant amount of fair value of derivative instruments (either positive or negative). For instruments that qualify for fair value hedge accounting, any change in fair value is mostly offset by the re-measurement of the underlying exposure (either on balance sheet or off-balance sheet).

The following table shows the sensitivity of the Group's pre-tax income to a change in the US dollar and Swiss Franc exchange rates. The effects on pre-tax income arise from derivative instruments not qualifying for hedge accounting while the effect on income and expense directly recognised in equity is due to the measurement of the effective portion of derivative instruments qualifying for cash flow hedge accounting.

	USD rate			CHF rate		
	Variation	Effect on pre-tax income	Effect on income and expense directly recognised in equity	Variation	Effect on pre-tax income	Effect on income and expense directly recognised in equity
Year ended 31 March 2013	10%	-	-	5%	-	(2)
	-10%	-	-	-5%	-	2
Year ended 31 March 2012	10%	3	-	5%	-	8
	-10%	(3)	-	-5%	-	(8)

The effective portion of instruments qualifying for cash flow hedge accounting reclassified from equity to profit or loss during the year ended 31 March 2013 is negative by €6 million.

25.3. Interest rate risk management

The Group has not implemented an active interest rate risk management policy. However under the supervision of the Executive Committee, it may enter into transactions in order to hedge its interest rate risk on a case-by-case basis according to market opportunities.

Carrying amount (in € million)	**At 31 March 2013**	**At 31 March 2012**
Financial assets at floating rate	2,264	2,140
Financial assets at fixed rate	409	465
Financial assets bearing interests	**2,673**	**2,605**
Financial debt at floating rate	47	102
Financial debt at fixed rate, put options and earn-out on acquired entities	4,908	4,920
Financial debt	**4,955**	**5,022**
Total position at floating rate before swaps	2,311	2,242
Total position at fixed rate before swaps	5,317	5,385
Total position before hedging	**7,628**	**7,627**
Total position at floating rate after swaps	2,311	2,242
Total position at fixed rate after swaps	5,317	5,385
Total position after hedging	**7,628**	**7,627**

Sensitivity is analysed based on the group's net cash position after hedging at 31 March 2013, assuming that it remains constant over one year.

In absence of instruments hedging the interest risk, the effects of increases or decreases in market rates are symmetrical: a rise of 0.1% would increase the net interest income by €3 million while a fall of 0.1% would decrease it by the same amount.

25.4. Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a loss. The Group is exposed to credit risk on its operating activities (primarily for trade receivables) and from its financing activities, including deposits, foreign currency hedging instruments and other financial instruments with banks and financial institutions.

Risk related to customers

The Group believes that the risk of a counterpart failing to perform as contracted, which could have a significant impact on the Group's financial statements or results of operations, is limited because the Group seeks to ensure that customers generally have strong credit profiles or adequate financing to meet their project obligations.

In specific cases, the Group may use export credit insurance policies which may hedge up to 90% of the credit risk on certain contracts.

Risk related to other financial assets

The Group's exposure to credit risk related to other financial assets arises from default of the counterpart, with a maximum exposure equal to the carrying amount of those instruments. The financial instruments are taken out with over 30 different counterparties and the risk is therefore highly diluted.

Risk related to cash and cash equivalents

Credit risk from balances with banks and financial institutions is managed by Group treasury in accordance with the Group's policy. At 31 March 2013 and at 31 March 2012, as part of the central treasury management, cash and cash equivalents are invested entirely in deposits with bank counterparts of first rank noted "Investment Grade".

The Group's parent company has access to some cash held by wholly-owned subsidiaries through the payment of dividends or pursuant to intercompany loan arrangements. However local constraints can delay or restrict this access. Furthermore, while the Group's parent company has the power to control decisions of subsidiaries of which it is the majority owner, its subsidiaries are distinct legal entities and their payment of dividends and granting of loans, advances and other payments to the parent company may be subject to legal or contractual restrictions, be contingent upon their earnings or be subject to business or other constraints. These limitations include local financial assistance rules and corporate benefit laws.

The Group's policy is to centralise liquidity of subsidiaries at the parent company's level when possible. Restricted cash and cash equivalents available at subsidiary level were €490 million and €350 million at 31 March 2013 and 31 March 2012, respectively.

25.5. Liquidity risk management

Financial covenants

At 31 March 2012, to increase its liquidity, the Group completed a €1,350 million revolving credit facility fully undrawn maturing in December 2016. This facility is subject to the following financial covenants, based on consolidated data:

Covenants	Minimum Interest Cover	Maximum total debt (€m)	Maximum total net debt leverage
	(a)	(b)	(c)
	3	5,000	3.6

(a) Ratio of EBITDA (Earnings Before Interest and Tax plus Depreciation and Amortisation) to net interest expense (excluding interest related to obligations under finance lease). It amounts to 11.2 at year end 31 March 2013 (12.5 at year end 31 March 2012).

(b) Total debt corresponds to borrowings, i.e. total financial debt less finance lease obligations. This covenant ceases to apply since the Group has an “Investment grade” rating.

(c) Ratio of total net debt (Total debt less short-term investments or trading investments and cash and cash equivalents) to EBITDA. The net debt leverage as at 31 March 2013 is 1.3 (1.4 at 31 March 2012).

Cash Flow

The Group’s objective is to maintain a strong liquidity. A revolving cash planning tool is used to monitor the Group's liquidity needs.

The following tables show the remaining maturities of all financial assets and liabilities held at 31 March 2013 and 31 March 2012.

Planning data for future new assets and liabilities are not reported. Amounts in foreign currency are translated at the closing rate. The variable interest payments are calculated using the last interest rates available at the closing date. Assets and liabilities that can be repaid at any time are always assigned to the earliest possible time period.

25.6 Commodity risk management

Most of commodities bought by the Group has already been modified and included into spare parts. For the other commodities, the Group has included into customer contracts a customer price adjustment clause, so that the Group has a limited exposure to the variation of commodity prices.

Note 26. Other current operating liabilities

(in € million)	At 31 March 2013	At 31 March 2012
Staff and associated liabilities	1,145	1,069

Other employees	41,112	42,917
Headcount (*)	**86,252**	**85,449**

(*) Headcount doesn't include any temporary people

Note 28. Contingent liabilities and disputes

28.1 Contingent liabilities

Commercial obligations

Contractual obligations of the Group towards its customers may be guaranteed by bank bonds or insurance bonds. Bank and insurance bonds may guarantee liabilities already recorded on the balance sheet as well as contingent liabilities.

At 31 March 2013, the Group has in place both uncommitted bilateral lines in numerous countries up to €20.7 billion and a Committed Bonding Facility Agreement allowing issuance of instruments until 27 July 2016 for an amount of € 9 billion

At 31 March 2013, the total outstanding bonding guarantees related to contracts, issued by banks or insurance companies, amount to €15.6 billion (€15.9 billion at 31 March 2012).

The available amount under the Committed Bonding Facility at 31 March 2013 amounts to €2.1 billion (€1.4 billion at 31 March 2012). The issuance of new bonds under this bonding facility is subject to the financial covenants disclosed in Note 25.5. The available amount under bilateral lines at 31 March 2013 amounts to €10.7 billion.

Vendor financing

Until 2003, the Group provided some financial support, referred to as vendor financing, to financial institutions financing certain purchasers of Transport equipment.

At 31 March 2013, guarantees given as part of past vendor financing arrangements amount to €258 million.
Included in this amount are:

- guarantees totalling $63 million (€49 million and €47 million at 31 March 2013 and 31 March 2012 respectively) given with respect to equipment sold to a US train operator,
- guarantees totalling £177 million (€209 million and €212 million at 31 March 2013 and 31 March 2012 respectively) given as part of a leasing scheme involving London Underground Limited (Northern Line). Were London Underground Limited to decide not to extend the contract beyond 2017, and to hand the trains back, the Group has guaranteed to the lessors that the value of the trains and associated equipment, net of the £15 million non-extension payment due by London Underground, should not be less than £177 million in 2017. The £177 million is included in the €367 million amount of "Other obligations under long-term rental" (see Note 24).

28.2 Disputes

Disputes in the Group's ordinary course of business

The Group is engaged in several legal proceedings, mostly contract-related disputes that have arisen in the ordinary course of business. These disputes, often involving claims for contract delays or additional work, are common in the areas in which the Group operates, particularly for large long-term projects. In some cases, the amounts, which may be significant, are claimed against the Group, sometimes jointly with its consortium partners.

In some proceedings the amount claimed is not specified at the beginning of the proceedings. Amounts retained in respect of litigation are taken into account in the estimate of margin at completion in case of contracts in progress or included in provisions and other current liabilities in case of completed contracts when considered as reliable estimates of probable liabilities. Actual costs incurred may exceed the amount of initial estimates because of a number of factors including the inherent uncertainties of the outcome of litigation.

Asbestos

In France, some of the Group's subsidiaries are subject to civil proceedings in relation to the use of asbestos. These proceedings are initiated by certain employees or former employees suffering from an occupational disease in relation to asbestos with the aim of obtaining a court decision allowing them to obtain a supplementary compensation from the French Social Security (medical) funds. In addition former employees not suffering from an asbestos related occupational disease have started lawsuits before the French courts with the aim of obtaining compensation for damages in relation to their alleged exposure to asbestos, including the specific "anxiety damage".

In the United States, subsidiaries of the Group are also subject to asbestos-related personal injury lawsuits. The Group considers that it has valid defences in these cases and the number of outstanding cases is decreasing.

The Group believes that the cases where it may be required to bear the financial consequences of such civil or criminal proceedings both in France and the United States do not represent a material exposure. While the outcome of the existing asbestos-related cases cannot be predicted with reasonable certainty, the Group believes that these cases will not have any material adverse effect on its financial condition. It can give no assurance, however, that present asbestos-related cases or new cases it may face in the future may not have a material adverse impact on its financial condition.

Alleged anti-competitive activities

GIS equipment

In April 2006, the European Commission commenced proceedings against Alstom, along with a number of other companies, based on allegations of anti-competitive practices in the sale of gas-insulated switchgears ("GIS equipment"), a product of its former Transmission & Distribution business sold to Areva in January 2004, following investigations that began in 2004.

On 24 January 2007, the European Commission levied a fine of €65 million against Alstom which includes €53 million on a joint and several basis with Areva T&D (Alstom Grid). Alstom has requested the cancellation of this decision before the General Court of the European Union. On 3 March 2011 the Court reduced the amount of fines levied against Alstom to €58.5 million out of which €48.1 million on a joint and several basis with Areva T&D (Alstom Grid). On 20 May 2011,

Alstom requested the cancellation of this decision before the Court of Justice of the European Union. A hearing took place on 2 May 2013 and the final decision could occur before the end of 2013.

Following the aforementioned European Commission decision of 24 January 2007, on 17 November 2008 National Grid commenced a civil action before the High Court of Justice in London to obtain damages against the manufacturers of GIS equipment, including Alstom and certain of its subsidiaries. National Grid asserts that it has suffered overall alleged damages from all manufacturers concerned of £249.3 million in total since it bought GIS equipment at inflated prices due to alleged anti-competitive arrangements between manufacturers. Alstom contests the facts. The High Court of Justice in London decided that the final hearings would occur in June 2014. Two other similar civil actions started in May and September 2010 before national jurisdictions for a global amount of approximately €32 million are ongoing.

Power transformers

On 20 November 2008, the European Commission sent a statement of objections to a number of manufacturers of power transformers, including Alstom, concerning their alleged participation in anti-competitive arrangements. Alstom has contested the materiality of the alleged facts. On 7 October 2009, the European Commission levied a fine of €16.5 million against Alstom which includes €13.5 million on a joint and several basis with Areva T&D (Alstom Grid). Alstom has requested the cancellation of the decision before the General Court of the European Union on 21 December 2009. The hearings on the merits took place on 9 July 2012 and the decision is expected to occur within one year.

Boilers

The Group received a statement of objections issued by the German Federal Cartel Office ("FCO") on 22 December 2008, alleging breaches of German competition law in the field of steam generators for lignite-fired power plants. On 20 October 2011, the FCO levied a fine of €42 million against ALSTOM Power Systems GmbH and two of its former officers, as well as against two competitors now bankrupt for alleged cartel arrangements between 1990 and 2003. This decision is final and the fine has been paid by Alstom. In addition the Group has reached agreements with regard to three out of four potential customer claims for civil actions. On 29 December 2011 the fourth customer filed a civil action against a German Alstom affiliate before the Dortmund Regional Court for an amount of €33 million, plus interests. Alstom contests.

Alleged illegal payments

Certain companies and/or current and former employees of the Group have been or are currently being investigated in various countries, by judicial authorities (including in France, in the United States of America and in the United Kingdom) and development banks with respect to alleged illegal payments. These procedures may result in fines, exclusion of Group subsidiaries from public tenders and third-party actions.

The World Bank sanctioned Alstom for improper payment of €110,000 made in 2002 in relation to a World Bank–financed Zambian power rehabilitation project. On 22 February 2012, as part of a negotiated resolution agreement, the World Bank announced its decision to debar ALSTOM Hydro France and ALSTOM Network Schweiz AG (Switzerland) and their affiliates from public tenders financed by the World Bank for a period of 3 years, which can be reduced to 21 months subject to certain conditions Alstom intends to respect. The Group paid also a restitution amount of $9.5 million. This debarment qualifies for cross-debarment by the other multilateral development banks pursuant to the Agreement of Mutual Recognition of Debarments signed on 9 April 2010.

On 22 November 2011, the Swiss Office of Attorney General closed the investigations opened in 2007 to determine whether the Alstom Group and some of its entities had violated rules prohibiting the payment of foreign civil servants to unlawfully win commercial contracts. After thorough investigations, the Office of Attorney General has concluded the absence of any bribery system or so called slush funds used for bribery of civil servants to illegally obtain contracts and sanctioned the company for corporate negligence in three isolated cases, imposing a fine of CHF 2.5 million, to which is added the payment of an amount corresponding to the estimated profits of the orders of CHF 36.4 million. Alstom has also paid reparation in the amount of CHF 1 million to the International Committee of the Red Cross. The Office of Attorney General has issued a dismissal order acquitting the Alstom Group and its entities of any additional wrongdoing, fully closing its investigations.

US litigation following an accident in the Washington D.C. metro

On 22 June 2009, a collision between two metro trains occurred in the Washington D.C. metro resulting in the death of 9 persons and the injury of 52 persons. The claims against Alstom Signaling Inc. initially amounted to approximately $475 million. A report of the National Transportation Safety Board on the causes of the accident partially implicated equipment supplied by Alstom Signaling Inc. As of today, 120 claims have been made. The 29 most serious claims were asserted through lawsuits. Of these 29 claims, 25 have been settled for a cost of about $10.2 million and efforts are currently underway to settle the remaining four cases. All other cases have been settled. All the claims have been declared to the Group's insurers and Alstom believes it has adequate insurance coverage.

Budapest metro

In 2006, Alstom was awarded by BKV a contract for the delivery of 22 Metropolis metros for Line 2 and 15 metros for Line 4 for the city of Budapest. During the execution of the project, Alstom experienced delays mostly related to technical change requests from BKV and the refusal by the Hungarian Authority "NKH" to deliver the final train homologation in 2010 (in August 2007, NKH granted a Preliminary Type License). . On 19 October 2010 BKV terminated the contract and called immediately thereafter all bank guarantees amounting in total to approximately €130 million. This amount was paid in June 2011. In July 2011 the parties agreed the re-entry into force of the contract and the suspension of the arbitration procedure initiated by Alstom in January 2011. The homologation for the Final Type License was obtained in July 2012. On 17 December 2012, the arbitration resumed to solve notably the issue of the damages resulting from the past termination of the contract. The contract execution is ongoing.

Lignite-fired station in Maritza

In 2006, Alstom was awarded by AES a contract for the manufacture of a lignite-fired station in Maritza, Bulgaria. During the execution of the project, Alstom experienced delays and works disruptions mostly due to the defective nature of the lignite supplied by AES. In February 2011, AES called the performance bank guarantee amounting to approximately €150 million. This amount was paid in July 2011. In addition, in March 2011, AES terminated the contract. An arbitration procedure initiated by Alstom, for wrongful termination notably, is on-going. According to the latest arbitral timetable, the hearings before the Arbitral Tribunal are postponed until December 2013 to January 2014.

There are no other governmental, legal or arbitration procedures, including proceedings of which the Group is aware and which are pending or threatening, which might have, or have had during the last twelve months, a significant impact on the financial situation or profitability of the Group.

Note 29. Lease obligations

		Maturity of lease payments		
(in € million)	**Total**	**Within 1 year**	**1 to 5 years**	**Over 5 years**

Our code of ethics

We are shaping the future | ALSTOM

Corporate Communications - January 2010 (revised August 2013)

Table of contents

"Ethical rules and values guarantee our future"

Our core values - Trust, Team and Action - ensure Alstom's overall cohesion, inspire trust among our partners, reinforce our image and, quite simply, guarantee our future.

Alstom's reputation and integrity can only be built by continuously strengthening ethical rules and procedures. Our growth is underpinned and guided by our fundamental principles of integrity and transparency, applied scrupulously and without exception with regard to employees, shareholders, customers in the public and private sectors, suppliers, competitors and partners. Our Code of Ethics is essential and all employees, in their day-to-day work, need to share the same clear values and observe the same rules of personal and collective conduct that define Alstom as an ethical company.

Through the Alstom Integrity Programme, I constantly strive to strengthen this approach and ensure that our values and rules are strictly applied, without exception. Since March 2009, the Group has been engaged in a certification process to assess that its rules and their implementation are in line with the highest international business standards.

All our ethical rules are important. However, three rules, covering competition, corruption and internal control, deserve special attention, as they are central to our individual and collective responsibilities. To ensure nothing is overlooked, any employee who has reason to believe that our Code of Ethics is being violated can immediately report the matter to his or her direct manager or use Alstom's Alert Procedure, in accordance with the relevant national laws and rules.

I rely on each and everyone of you, individually and collectively, to ensure that all our rules are respected on a daily basis.

Patrick Kron
Chairman & CEO

OUR GROWTH IS BUILT ON FUNDAMENTAL PRINCIPLES

The Code of Ethics and all relevant Group Instructions apply to everyone in the Group and those who conduct business on behalf of Alstom.

Employees are expected to assume personal responsibility for performing their duties with fairness and integrity, to have an understanding of the Code of Ethics and to refer to it regularly, to have a detailed knowledge of its provisions that apply specifically to their job and to consult their direct manager if in doubt.

Managers' responsibilities go beyond those of other employees. They must actively promote the Code of Ethics in the workplace, showing commitment through their actions. They must be vigilant in preventing, detecting and responding to any violation of the Code of Ethics, and protect employees who report violations.

OUR BASIC PRINCIPLES

Respect laws and regulations

“Do not involve the Group in unlawful practices”

Alstom's reputation for integrity is built on its respect for laws, regulations and other requirements that apply to the conduct of business in all countries in which it is present. It is the personal responsibility of Alstom employees to know the laws, regulations and requirements relating to their job. Any breach of these laws may lead to civil and criminal prosecution. Activities which could involve the Group in unlawful practices are prohibited.

Alstom is a multinational corporation with operations around the world. To ensure our high ethical goals, we require compliance with certain standards that exceed those required by applicable law. Among others, Alstom is attached to the spirit and the letter of laws governing human rights and labour, health and safety standards, environment protection, prevention of corruption, fair competition, taxation and the accurate communication of financial information. We comply with the guiding principles of the OECD, the United Nations Universal Declaration of Human Rights and the principles of the Global Compact and those of the International Chamber of Commerce (ICC). Alstom is also a member of the World Business Council for Sustainable Development (WBCSD).

Apply the principles of honesty and fairness

“No objective justifies a deviation from the rules”

Many of Alstom's activities are not the subject of laws, regulations or other mandatory requirements, in which case principles of fairness and honesty must govern our conduct. It is each employee's responsibility to apply these principles at all times. No performance objectives should be imposed or accepted if they can only be achieved by compromising our ethical standards.

OUR THREE FUNDAMENTAL RULES

The following three rules are fundamental because any deviation from their application exposes the Group and those concerned to considerable risks.

Agreements and understandings with competitors

Competition laws or antitrust laws are intended to ensure open and fair competition among companies. Open and fair competition is in the best interest of Alstom and benefits customers, consumers and society as a whole. Such laws must be complied with at all times. Severe civil and criminal sanctions can be imposed on the company and on individuals if such laws are broken.

“ Respect the rules of competition ”

Alstom employees must not participate in any agreement with competitors that have the intent or effect of fixing prices, distorting a bidding process, dividing a market, limiting production or boycotting a customer or supplier. Alstom employees must not exchange sensitive information with competitors in infringement of the competition laws.

Because rules are complex and differ from one country to another, employees should consult their Legal department for clarification as necessary.

Prevention of corruption and bribery

Alstom's policy is to prohibit all unlawful payments and practices. The Group is fully committed to the elimination of corruption and bribery in its business transactions and complies with the requirements of the OECD Anti-Bribery Convention, of the US Foreign Corrupt Practices Act (FCPA), of the UK Bribery Act 2010, and with all applicable laws in the countries where it is present and follows the guidance of the "Resource Guide to the US Foreign Corrupt Practices Act".

“ Always refuse corruption in business transactions ”

Alstom companies, officers, directors and employees must not offer or provide, directly or indirectly, by requesting assistance from a third party, any pecuniary or other advantage to any person in violation of any legal requirements or Alstom's ethical principles, with a view to obtaining or retaining business or securing any facility or favour that infringes regulations.

"Person" means a public official, political party, employee or agent of a customer in the public or private sectors or employee or agent of a lending agency or bank. Public officials include, but are not limited to public or government officials, agents, employees, or representatives; any political party or political party officials, agents, employees or representatives, candidates for public or political party office, members of public assemblies, officials and employees of international organisations, judges or officials of international courts, government controlled administrations' and state owned companies' employees.

Alstom companies, officers, directors and employees must not offer or provide any advantage or respond to solicitations from any party claiming real or implied influence on an agent in the public or private sector and offering to use that influence to obtain any favourable decision or market share.

Subsequently, Alstom will not take any sanction against employees for being compliant with Alstom rules by refusing any form of corruption and bribery, even if such a decision results in losing business or any other adverse consequences.

Facilitation payments are used to facilitate mandatory administrative procedures and formalities normally carried out through the proper legal channels. Such payments are petty corruption, and although they may be tolerated in some countries, they are illegal in many countries. To avoid any confusion or misunderstanding with regard to acceptable limits, Alstom prohibits any such practices.

Internal control and disclosure of information

“ Every employee has a role to play in internal control ”

Internal control is key as it is designed to provide reasonable assurance to the management at every level in regard to the quality and reliability of financial and business information along with conformity to the applicable laws and regulations, and internal rules in force.

The management of the respective entities (Corporate, Country, Sector, Business or Unit) is responsible for internal control in compliance with the Group's Internal Control Manual and must confirm that it has achieved its task. The integrity of our financial and business information is essential to run our operations legally, honestly and efficiently. As a consequence, all financial and accounting information must be correctly recorded in the Group's books and accounts.

Employees are individually responsible for the records and reports they write and the information they provide (including information entered into information systems). Records should be retained in compliance with Alstom's Records Retention Policy. Management must ensure that the data recorded in the reporting system is perfectly in line with the information due to be published, with the results of the period and with the financial position at the end of the period.

At every level of the Group, employees must ensure that any records, reports, or information they use or communicate to management of the various entities (Corporate, Country, Sector, Business or Unit) enable Alstom to make full, fair, accurate and timely disclosure in reports, documents and other public communications.

These documents include financial reports and projections, research reports, marketing information, sales reports, tax returns, expense accounts, time sheets, claims, environmental and social information and other documents, including those submitted to governmental or regulatory authorities.

In no case should any financial or business records be subject to fraudulent treatment. Fraud, or the act or intent to cheat, steal, deceive or lie, is both dishonest and, in most cases, criminal. Fraud can include, but is not limited to: submitting false expense reports, forging or altering checks, misappropriating assets or misusing the Group's assets, unauthorised handling of transactions, mishandling petty cash, making an entry on records or financial statements that is not in accordance with proper accounting standards.

THE ROLE OF EMPLOYEES AND THE ALSTOM ALERT PROCEDURE

Employees may use the Group's Alert Procedure, in accordance with the laws and rules applicable in the country where they live or work, if they have reason to suspect a violation of anti-corruption, competition and securities or accounting laws and regulations.

The Alert Procedure should only be used if the employee has reason to believe that informing his or her direct manager could cause difficulties or has reason to believe that the reported alleged irregularity will not receive the proper follow-up.

In this case, employees have the choice of reporting by:

- Contacting any one of the following:
- The Country President,
- The Country Counsel,
- The Group General Counsel: Keith Carr
3 avenue André Malraux 92309 Levallois-Perret, France
keith.carr@chq.alstom.com
+33 1 41 49 31 14

- The SVP Ethics & Compliance: Romain Marie
3 avenue André Malraux 92309 Levallois-Perret, France
romain.marie@chq.alstom.com
+33 1 41 49 21 31

- Or using the two methods of communication, reachable 24 hours a day, 7 days a week, 365 days a year:
- The secure website: www.alstom.ethicspoint.com
- The toll-free hotline (dial-in numbers available on the secure website).

Every measure will be taken to respect employee confidentiality. Alstom shall honour its commitment that no employee will suffer from retaliation, such as a change of status, harassment or any other form of discrimination as a result of using the Alert Procedure or disclosing information in good faith

Relationships with our business partners

• Customers

Alstom must treat all its customers honestly and fairly, regardless of the size of their business. The Group is committed to providing customers with high-quality products and services that meet their needs.

“ Be trustworthy ”

Alstom gives detailed information on its products and services in its advertising, public statements and offers to individual customers. Employees who negotiate contracts must ensure that any statements, communications and presentations made to customers are accurate and truthful.

Customer confidential, sensitive or private information must not be disclosed by an Alstom employee to any person except as required or permitted within a project or contract.

• Suppliers and sub-contractors

Suppliers' and sub-contractors' inputs represent a high proportion of the value of Alstom's products and services and play an important role in customer satisfaction.

Purchasing decisions are based on objective assessment of the supplier's or sub-contractor's reliability and integrity and on the overall value of the offering in view of short and long-term considerations and objectives. For the interest of Alstom, the purchase of goods and services is based on the merits of price, quality, performance, delivery and suitability. The purchaser endeavours to ensure that a situation of dependence is not established with suppliers and sub-contractors, and therefore systematically develops credible alternatives.

“ Fair selection process and observance of the Alstom Charter for Sustainable Development ”

Care must be taken to avoid conflicts of interest and any appearance of partiality. Kickbacks are prohibited.

Relations with suppliers and sub-contractors are governed by procedures set out by Sourcing and Supply Chain, which should be applied by everyone and are designed to ensure all suppliers and sub-contractors are treated equally.

Alstom requires its suppliers and sub-contractors to strictly comply with all applicable legal requirements related to their activities and business environment. The Group requires its suppliers and sub-contractors to sign its Charter for Sustainable Development, underpinned by respect for human rights, employee health and safety, ethical rules, in particular those related to anti-corruption and fair competition, environmental protection and compliance with applicable laws and regulations. Alstom takes steps to ensure that these commitments are met, both during the selection process and during the contract execution.

• Business Advisors

In order to avoid any occurrence of bribery or unlawful practices exposing the Group to liability, relations with business advisors are guided by strict internal procedures.

“ Strictly follow the procedures ”

Business Advisor means any representative, business development consultant, agent, sponsor or lobbyist involved directly or indirectly in activities pertaining to sales or project execution. It refers also to third parties acting on behalf of Alstom, including, but not limited to, lawyers, tax advisors, customs agents, engineers, financial advisors, who interact with customers or any public or private authorities.

To prevent public and private corruption, the use of business advisors is subject to approval at Sector and Corporate levels and is supervised by the Ethics & Compliance department as far as the respect of compliance principles is concerned.

• Government and other public procurement contracts

Contracts with government-owned or public entities often require compliance with very high standards. Alstom observes the laws and regulations that govern the acquisition of goods and services by governments in all its markets, including laws prohibiting efforts to influence government officials.

“ Apply the rules ”

Alstom is committed to competing fairly, to being truthful and accurate and, when awarded, to perform contracts in accordance with all contractual and legal obligations.

Where government contracts involve the possession, use of, or access to classified or otherwise restricted information, it is essential that the employees involved strictly follow the security procedures applicable to such information.

Although some of Alstom's former public customers have been partially or wholly privatised, they may still be subject to the

same or similar stringent rules. In order to prevent conflicts of interest, special care must be given to the hiring of a former or current government employee. This needs to be carefully reviewed and approved by the Human Resources department.

• Export controls and trade restrictions

Local, national or international laws, regulations or similar requirements establishing embargoes, boycotts or other trade restrictions on goods, services, software or technology are enacted from time to time.

> "Abide by international trade laws"

All Alstom companies, exporting goods and services or performing services outside their own countries (including technical assistance or training), must strictly comply with all applicable Export Control laws of the country in which they are present. Special care needs to be given for dual-use items (products, software and technical data which can have an application both in the civil and military fields). Employees involved in international trade must ensure they comply with the latest applicable regulations and seek guidance from their Legal department.

Failure to observe these laws and regulations could expose both the Company and the employees involved to severe penalties, including prohibition of future exports.

• Money laundering

Money laundering is the processing of criminal proceeds in order to disguise their illegal origin.

> "Work only with reputable business partners"

In compliance with all laws related to this matter, Alstom conducts business with reputable partners. Employees need to be cautious with the way payments are made to detect if irregularities may exist and with partners who demonstrate suspicious behaviours in their operations.

• Conflicts of interest

Conflicts of interest distort judgement. Alstom employees must avoid any situation that involves or may involve a conflict between their personal interests (or those of family members or relatives) and those of the Group.

To protect employees and Alstom from actual or apparent conflicts of interest, employees must not make or hold any investments in a supplier, customer, competitor, consulting company or any business partner if the nature of such investments might affect a business decision taken on behalf of Alstom. Employees must not deal directly with a business partner that can be a customer, a supplier, an agent, a consultant or any other third party, if they or their family members or relatives have an interest in such third parties. If such situations arise, employees must clearly inform their Unit manager of the matter and obtain written approval to proceed.

> "Raise any potential conflict of interest with your management"

Employees must refrain from accepting outside work from a supplier, customer or competitor and should not be involved in any outside work that may adversely affect their performance or judgement on the job. Employees must disclose any outside employment to their manager.

• Gifts and hospitality

Alstom aims to ensure that any business decisions taken by its employees, customers or suppliers are made solely through the proper business channels — fundamentally based on competitiveness, performance and the quality of the products and technologies it offers — and are not driven by any form of personal improper advantage or conflict of interest.

In some cultures, good business relations may sometimes involve the exchange of symbolic gifts and hospitality. Employees must not offer, accept or authorise a family member or relative to accept gifts, money, loans, invitations or any other form of special treatment from anyone involved in business dealings with the Group, if the ultimate goal is to influence business decisions.

> "Do not allow decisions to be influenced"

Employees may accept or offer, on behalf of Alstom, an occasional business meal invitation or an occasional non-pecuniary symbolic gift of low value if it can be reciprocated on another occasion. Any employee required to offer or accept a gift or invitation of value as a result of protocol, courtesy or other reasons must first inform his or her Unit manager and the Legal department.

A socially responsible company

> "Promote sustainable development"

Alstom applies its policies and standards in all countries in which it is present. The Group respects the cultures of local communities with which it interacts and takes into account the interests of its different stakeholders.

Protecting the environment

Alstom has given itself the ambition and the means to make a significant contribution to environmental protection through the systems, equipment and services it sells. The Group's core activities are focused on providing advanced technology and services to improve the management of natural resources, significantly reduce emissions and greenhouse gas effects and enhance the quality of life, while contributing to economic and social progress. Alstom also communicates to its customers information on the environmental impact of its products.

> "Be recognised as a reference in this domain"

Furthermore, Alstom designs its equipment and manufacturing processes for minimum consumption of energy, eliminates hazardous products and favours materials that can be recycled. Alstom includes the environmental impact in the criteria for major decisions. At all manufacturing sites and offices, this impact is managed in line with the rules set out in the Environment, Health and Safety (EHS) policy and covered by quarterly reports. Each Unit is responsible for setting its own targets in line with the policy pursued by the Group and the Sectors. In their day-to-day activities, all employees contribute to this collective effort.

Community relations

Alstom takes into account the social, economic and environmental interests of local communities. The Group encourages its employees to build relations with local institutions, universities and schools.

> "Be involved in communities"

Alstom encourages its employees to volunteer and play a role in the local community. Activities undertaken by employees on their own initiative are done so in their name and in their own time. Conflicts of interest are to be carefully avoided.

Political contributions and activity

> "No promotion of particular political interests"

Political contributions are often subject to national laws and vary from country to country. Even when legally permitted, such contributions can be a source of abuse or otherwise perceived as a questionable practice. Alstom's policy is not to make contributions, financial or in kind, to political parties or organisations, or to individual politicians.

Alstom respects the rights of its employees to participate as individuals in their community and civic affairs. This must be done at a personal level, in their own time and at their own expense, consistent with applicable laws. Alstom's stationery, funds and other property must not be used for personal political activities. Employees need to carefully separate their own political activities from Alstom activities and avoid any conflict of interest.

Charitable contributions

> "Enhance Alstom's reputation as a good citizen"

Charitable contributions made in the Group's name or using its financial resources are permitted as long as they comply with applicable laws and regulations. Contributions should have relevance to the community in which Alstom operates and must effectively serve the purpose of the charitable organisation concerned while enhancing Alstom's reputation as a good citizen. Charitable contributions must not be made without prior written approval and must be properly recorded.

Sponsorship

Sponsorship is part of the marketing and communication strategy. It is authorised in compliance with applicable laws and regulations and solely within the framework of the Group's communications policy.

> "Reflect Alstom's communications policy"

Decisions to engage the Group in any sponsorship is subject to prior approval from the Communications departments (Corporate or Sectors) and must be properly recorded.

Human Resources

> "Encourage individual and collective expression"

It is Alstom's policy to fully comply with the United Nations Universal Declaration of Human Rights and with the International Labour Organization's Fundamental Conventions.
In line with these principles, Alstom applies a human resources policy based on fair treatment and respect for individuals, their dignity, rights and individual liberties, and promotes their involvement in company life. The Group promotes all forms of dialogue with both individual employees and their representatives.

Health and safety

Alstom is committed to providing a safe and healthy work environment at all its sites, offering the same high standards wherever it has operations. These standards are set out in the

Environment, Health and Safety (EHS) policy and apply to employees and sub-contractors working at Alstom's sites or under Alstom's supervision at customer sites.

" Promote a safe work environment "

Measures to offset any risk related to health and safety issues are applied at all sites and throughout projects. These measures are implemented in partnership with the relevant bodies and committees.

Employees are responsible for reporting any hazardous situations they may witness, or any incidents indicating such risks, and for helping to implement preventive measures. Safety guidelines must be strictly adhered to.

• Security of employees

" Limit risks "

Alstom does its utmost to protect its employees, wherever they are working. The Group issues regular instructions to inform people of risks and to set out procedures to be followed, such as in the event of unstable political situations, criminal acts or health matters. All employees should familiarise themselves with these regularly updated instructions, particularly with regard to business travel.

• Social relations

" Collective interest "

Alstom respects the right of all employees to form and join trade unions and workers' organisations of their choice and to organise and bargain collectively. The social relations policy recognises that differences are a source of strength for the Group. Alstom respects the role and responsibilities of the social partners and commits to communicating and negotiating openly to address issues of collective interest.

• Equal opportunity and diversity

Alstom employees are required to comply with all laws and regulations forbidding any discrimination with respect to age, race, gender, ethnic origin, nationality, religion, health, disability, marital status, sexual preference, political or philosophical opinions, trade-union membership or other characteristics protected by applicable law.

" No discrimination "

Alstom does not tolerate any form of harassment, sexual, physical or psychological, coercion or bullying. If employees observe or experience any form of abuse, they can report it to their HR management. No adverse action can be undertaken against employees making such a good faith report. The recruitment process is exclusively based on the applicant's qualifications and skills. Remuneration is solely determined on the basis of the employee's contribution to the Group.

The recruitment, training and personal development of employees from different backgrounds is an important asset for Alstom. The Group seeks to recognise and value these differences by building teams that reflect the markets and communities in which it operates.

• Career management for employees

" Promote personal development "

As part of Alstom's "It's all about people!" policy, the Group aims to promote personal development through regular face-to-face interviews between employees and their managers. These interviews help focus on required skills, achievements, development plans and career paths according to individual needs and aspirations and business needs. Training programmes and collaborative ways of working also contribute to this process. Looking for solutions adapted to the skills of employees is maintained throughout their career, even in the event of reorganisation.

• Data privacy

Alstom and each of its employees must be particularly attentive to laws and regulations concerning privacy and protection of information concerning individuals, employees or third parties and comply with them.

" Respect individual rights "

Employees who have access to personal data shall be only those whose function and responsibility specifically include the handling of personal data; the right of access is restricted according to the nature and scope of the individual function and responsibility. Alstom does not communicate personal information to third parties, except to the extent necessary and permitted by applicable laws or regulations.

Protecting Alstom's assets

All Alstom employees should do their utmost to protect the Group's assets. Alstom's funds and assets must not be used for illegal purposes or for purposes not related to Alstom's activities.

Employees should not appropriate any of Alstom's assets for their own use or make them available to others for a non-

Alstom use. Employees must not use Alstom's assets for personal gain or personal business, nor may they allow any other person not employed or authorised by the Group to use them. Misappropriation or theft of these assets may give rise to sanctions and may constitute a violation of law, giving rise to civil or criminal prosecution.

Alstom's assets are not only physical or tangible items (such as funds, supplies, patented inventions, or computer and telephone networks); they also include intangibles (such as ideas, concepts or know-how) which employees develop in the course of their work for Alstom. In addition, assets cover customer/supplier lists and other market data, along with any information to which employees have access as a result of their work responsibilities.

> "Do not appropriate Alstom's assets"

• Respecting confidential information

Employees who may have access to confidential and proprietary data relating to Alstom's business activities, including information on customers and suppliers must only be those whose function and responsibility specifically include the handling, use and communication of such data. The right of access is restricted according to the nature and scope of the individual function and responsibility. Moreover, any employee who comes into possession of confidential or proprietary information must keep such information confidential and use it only for authorised purposes.

> "Share information with caution"

Examples of confidential information include, but are not limited to, results, forecasts and other financial data, human resources and personal data, information with respect to acquisitions and divestitures, new products and orders. Examples of proprietary information include, but are not limited to, business strategies, product improvements, technical information, systems, inventions, trade secrets or know-how developed or acquired by Alstom. This definition includes matters covered by secrecy agreements.

Employees who are not sure whether they may properly disclose or act on information in their possession should seek guidance from their manager. Employees' obligations with respect to such information continue beyond their term of employment.

• Intellectual property

Alstom's intellectual property rights which include patents, know-how, trade secrets, trademarks, domain names, industrial designs and copyrights, are one of its most valuable assets, and are therefore protected by law, whenever possible.

> "One of our most valuable assets"

Employees have a duty to safeguard these assets. Alstom ensures that valid intellectual property of others are respected and not infringed by its employees.

• Using Group communications resources

The Group's communications resources – email, voicemail, internet, telephone (including mobile phone) and other means of communication – are the property of Alstom and are to be used for professional purposes.

Their use for private purposes is based on the recognition that private and business lives are closely linked and that the right balance between the two is beneficial to Alstom and its employees. However, such use should be limited to what is reasonable and necessary in the circumstances. Employees are strictly forbidden from using the Alstom email system or the internet or any other means of communication for any improper purpose, and must avoid the transmission or receipt of messages or images that may be viewed as insulting, offensive or demeaning to the individual.

> "Not to be used for improper purposes"

• Insider dealing

In the normal course of business, some employees may have access to information that can affect the value of shares, options or other securities, if such information were to become public. Since Alstom is a publicly quoted company, it is subject to the securities laws and regulations of several jurisdictions which regulate disclosure of information to the public.

> "Access to privileged information imposes obligations"

Information which may affect the value of Alstom's shares, options or other securities, is considered "inside" information and must be kept confidential until publicly disclosed by the Group. Acting on this information for personal gain or disclosing it to anyone else before it has been officially released is likely to violate securities laws and is not in accordance with Alstom policy. Penalties for violations are severe and can include fines and imprisonment.

This rule also applies to securities issued by other companies, including customers, suppliers and any business partner, listed on any stock exchange, should the employee have privileged information concerning that company.

• Communication with the media and investors

Alstom develops active communications to reinforce its image among customers, opinion leaders, analysts, investors and the public. Alstom is a publicly quoted company and

any communication with the media or analysts may affect Alstom's image or reputation and must be carefully reviewed and controlled.

Media relations are the responsibility of Corporate and Sector Communications departments. All statements to the media or responses to inquiries from the media must be handled through the Communications departments or coordinated with them. The Investor Relations department is responsible for all financial communications with analysts and investors. Any communication from an analyst or investor requesting information relating to Alstom should be forwarded to the Investor Relations department, which will deal with the matter.

“Under strict control”

Unless approved in advance by the Communications departments, employees are not authorised to represent Alstom on internet social networking platforms like social forum web sites, blogs or chat rooms.

The Code of Ethics cannot cover every conceivable situation to which an employee could potentially be exposed. Each of us must use common sense and judgement in applying these principles, refer to existing rules and guidelines, and seek advice either from management or from the relevant VP Human Resources and/or the General Counsel and/or the SVP Ethics & Compliance, if in doubt.

IMPLEMENTATION

The Alstom Integrity Programme is being implemented and monitored throughout the Group under the responsibility of the SVP Ethics & Compliance. Alstom is engaged in an Ethics & Compliance certification process. Its rules, procedures and guidelines for dealing with sales consultants were successfully certified in March 2009 by Ethic Intelligence, an international independent body, after an audit performed by SGS, a Swiss company.

Awareness and training

These principles are conveyed through rules, procedures and instructions, along with relevant training to promote the widest possible distribution within the Group, via the Alstom Integrity Programme introduced by the Ethics & Compliance department. The Alstom Integrity Programme is to be applied scrupulously in all areas of the Group and in all countries where Alstom is present.

The Code of Ethics is available to all Alstom employees on the Group's intranet site and is published on the Alstom internet site for our stakeholders. A practical guide to the Code of Ethics is available to all Alstom employees through an intranet-based e-learning programme. Other ethics e-learning programmes are available for employees who need them in their daily activities.

Alstom values and ethics are included in the induction programme for new employees. In addition, employees have access to the Ethics section on the Alstom intranet site where they can find detailed guidelines and tools.

Consequences of violations of corporate policies

All employees are personally responsible for ensuring that their conduct and that of those reporting to them fully complies with this Code of Ethics and all applicable Corporate Instructions. Violations of certain instructions may have a severe and/or lasting impact on Alstom's image, business relations and financial situation. Where circumstances warrant, Alstom may seek civil or criminal prosecution and apply relevant internal measures.

The Code of Ethics serves as a guide to our standards and does not replace the Group Instructions, which outline the rules of conduct summarised in this document. All employees must refer to the operation rules relevant to their responsibilities detailed in the Group's "e-Book", compilation of the Group Instructions as well as the Sectors directives, available on the Alstom intranet site.

OUR CORE VALUES

We share three essential values - Trust, Team and Action - corresponding to the way in which the Group has defined its fundamental rules.

Trust

Alstom, with its activities, several management structures, units, production sites and countries, is by definition a complex company. Mutual trust between colleagues and management is essential for the proper conduct of our business and the efficient management of our projects.

This trust is built on the **responsibility** given to each decision-maker, the **delegation** of authority given and the **belief** of all employees in the importance of their role in the Group's well-being and development. It is also built on the **openness** of each individual to his or her professional environment, ensuring **transparency,** which is vital in the management of risks.

Team

Alstom's business is based on delivering projects which require our collective **discipline** and efforts to execute them successfully, and **networking** to ensure we take full advantage of all the competencies available. This team spirit, supported by the desire to **develop each employee,** extends to our collaboration with our partners and customers.

Action

Alstom commits to delivering products and services to its customers which meet their expectations in terms of price, quality and delivery schedules. To meet our commitments to our customers, action is a priority for all of us.

Action is built on **strategic thinking,** established at Group and Sector level, and underlined by our sense of **customer orientation,** integrated into our daily activities and into each project. Action involves adopting a **sense of urgency** in our activities, **speed of execution** to differentiate us from our competitors, and the ability to **report** ensuring the achievement of our business objectives. **Leadership** is essential to drive action.

APPENDIX A

VENDOR ADDITIONAL INFORMATION REQUESTS

1. *Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.*

   Refer to Proposal Appendix A Attachment for this document.

2. *Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.*

   Ansaldo STS S.p.A. (Parent Company), Via Paolo Mantovani, 3-5 Fiumara, 16151 Genova, Italy (Phone: 39 010 6552234)

   Finmeccanica S.p.A. (40% shareholder): Piazza Monte Grappa, 4, Rome, 00195, Italy (Phone: +39 06.324731)

   Norges Bank (2.045% Share): P.O. Box 1179 Sentrum, 0107 Oslo, Norway (Phone: + 47 22 31 60 00)

   Columbia Wanger Asset Management LLC (2.081% share): 227 West Monroe Street, Chicago Il 60606 (Phone: 888-244-5674)

   Altrinsic Global Advisors LLC (2.092 % share): Sound Shore Dr # 1, Greenwich, CT 06830-7254 (Phone: 203-661-0030)

   (All other shareholders own less than 1%.)

3. *Provide the names, title and telephone numbers of all officers.*

   Thomas P. Lawton III, President & CEO, 412-688-2400

   Joseph R. Pozza, Vice President – Administration & Finance (412-688-2400)

   Jason G. White, Vice President – Sales & Business Development (412-688-2400)

   Roberto Passalacqua, Vice President – Delivery (412-688-2400)

   Raphael Ferreira, Vice-President – Human Resources (412-688-2400)

   Michael F. O'Connell, Secretary (412-688-2400)

4. *Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.*

   Not directly. For all prior MBTA contracts, Union Switch & Signal and Ansaldo STS USA have served as a subcontractor to a Prime Contractor awarded these contracts.

5. *Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.*

   No

6. *Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.*

No

7. *Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.*

None

8. *Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.*

Willis of Pennsylvania, Inc.
Four Gateway Center
Suite 505
404 Liberty Ave.
Pittsburgh, PA 15222
Contact: Mary Gallagher
Phone: 412-586-1400
Account Number: Confidential/not available

9. *Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.*

Primary Banking Institution:

J.P. Morgan Chase
50 South Main St.
2nd Floor, OH2-5164
Akron, OH 44308
Contact: John M. Batcho
Phone: 330-972-1815

Credit Reference 1*:

ANNUAL REPORT
2012

Ansaldo STS
A Finmeccanica Company

SUSTAINABILITY REPORT
IN INSIDE BACK COVER

Welcome to Ansaldo STS

A company limited by shares, listed since 2006, leader in signalling and rail and subway transport systems, through its *Signalling* and *Transportation Solutions* Business Units, operating in over 30 countries worldwide.

Highlights 2012

(IAS *compliant* amounts in EUR million)

Orders

Order-book

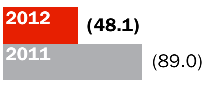
Revenues

EBIT

ROS

Net Profit

Net Working Capital



Net Cash

Analysis of the Income Statement, the Balance Sheet and the Financial Position

Consolidated profit for 2012 totalled €75,696 thousand, compared to €73,056 thousand in 2011.

Revenue came to €1,247,849 thousand, up €35,905 thousand over the previous year (€1,211,944 thousand).

The increase is largely due to the *Transportation Solutions* Business Unit for works carried out under the master agreement with Rio Tinto (RAFA).

The ***Signalling*** **Business Unit** recognised revenue of €725,588 thousand, including amounts with other business segments, substantially in line (down €2,787 thousand) with the previous year (€728,375 thousand).

The ***Transportation Solutions*** **Business Unit** recognised revenue of €564,853, up €52,586 thousand over the previous year (€512,267 thousand). This figure also includes amounts with other business segments.

Compared to 2011, eliminations between the two Business Units were up €13,894 thousand.

Operating profit (EBIT) came to €117,073 thousand, up €953 thousand over 2011 (€116,120 thousand).

ROS was 9.4%, compared to 9.6% in the previous year, including additional non-recurring expense, especially in relation to restructuring.

Specifically:
- the *Signalling* Business Unit recognised operating profit of €62,530 thousand, compared to €75,079 thousand, with a €12,549 thousand decrease due to the different mix and profitability of the projects in the two years;
- the *Transportation Solutions* Business Unit recognised operating profit of €69,130 thousand, up €14,121 thousand on the previous year (€55,009 thousand), due to greater volumes and the different mix and profitability of the contracts in the two years.

Net invested capital totalled €167,184 thousand, compared to €134,462 thousand in 2011.
The €32,722 thousand increase is due to the €8,162 thousand decrease in non-current items and the €40,884 thousand increase in net working capital.
The change in working capital is due to the joint effect of increased work in progress and trade receivables, only partly offset by the increase in trade payables and progress payments and advances from customers.

The **Group's net financial position** (loan assets and cash and cash equivalents greater than loans and borrowings) was €301,982 thousand, compared to €289,674 thousand at 31 December 2011 (up €12,308 thousand), after the €28,000 thousand dividend payment (€33,592 thousand in 2011). It includes the €70,643 thousand advance received from the Russian customer, Zarubezhstroytechnology ("ZST"), for the project for the development of signalling, automation, telecommunication, power supply, security and ticketing systems on the Sirth to Benghazi section in Libya.

Signalling Business Unit

The orders acquired at 31 December 2011 came to EUR 1,045.9 million, greater than the orders acquired in 2010 (EUR 890.2 million).
The order backlog came to EUR 2,341.4 million from EUR 2,090.6 million at 31 December 2010.

The main events of the year referring to the *Signalling* Business Unit are outlined below.

ITALY

In **Italy** the market recovered significantly, especially in the upgrade of the existing lines. This allowed the company to win the contract for the Turin-Padua line (EUR 210.5 million), which is a part of the European Corridor D (Lisbon-Kiev). The supply includes the systems for traffic operation along the line and at stations, the related integrated diagnostics systems, as well as the supply of several auxiliary equipment.

Good was the volume of acquisitions on traditional business segments: HSL completions and upgrades; construction and upgrading of several automation equipment (SCC Control Traffic Center); sale of components and assistance and maintenance services.

REST OF EUROPE

Particularly significant results were also achieved in the rest of Europe.

In **France**, contracts worth more than EUR 120 million were acquired for the new high-speed lines: one directly from SNCF for the second stage of the LGV EE, two from the General Contractors that will build the "Bretagne-Pays de Loire HSL" with Eiffage, and "LGV SEA " with Inneo using Project Financing.
Still in France it is worth remembering the umpteenth extension of the contract with RATP for the maintenance of some lines of the Paris Metro, for an amount of some EUR 18 million.

In **Germany**, the company received the second contract from Deutsche Bahn for the HSL ERTMS2 equipment plan, thus confirming the business leader in the prestigious and challenging German market as well. This new contract covers the designing, supply, installation and operation and service of ERTMS/ETCS Level 2 signalling systems along the Rostock-Berlin line, for an amount of EUR 14 million.

In **Sweden**, in the Mass Transit segment, a contract was acquired for the CBTC technology-based upgrade of the wayside and onboard equipment of the Red Line of the Stockholm Metro, for an amount of EUR 85 million.

In **Turkey** agreements were formalised with the Italian-Turkish JV Salini-GCFKolin for the supply of the signalling, automation and railway telecommunications systems for the Gebze-Kosekoy section of the Ankara-Istanbul high-speed line for an amount of EUR 31.5 million.

NORTH AMERICA

During the period there were no commercial events of particular relevance. The traditional sale of wayside and onboard equipment continued for the traditional customers in **Canada** and the **USA**, both in the Railroads and the Mass Transit segment.

ASIA - PACIFIC

The **Australian** market is on the mend, especially in the mining lines segment. This generated a significant offer. However, in the year 2011 new acquisitions were modest in the amount of EUR 30 million.

In **India**, on the other hand, a contract was acquired from Kolkata Metro Rail Corporation Limited (KMRCL) for an amount of EUR 46 million for the designing, construction, installation and testing of the control, signalling and communication systems of a new section of the Calcutta Metro.

In **China** the major acquisition for the year regards

line 1 of the ZhengZhou traditional underground for an amount of EUR 9 million.

Finally, in **South Korea**, a contract was acquired for the construction of systems for the Uhi-Shinseoul driverless metro with POSCO for EUR 20.0 million.

well as for the Trento-Malè line. Equipment at Palermo station is being installed. As regards the newly-acquired large facility for the Genoa multistation equipment, activities were slower than scheduled due to delays in civil contracts and track-laying, which are preparatory to the works of the Company.

Performance of the *Signalling* Business Unit

(EUR 000)	31.12.2011	31.12.2010	Change
New intake orders	1,045,870	890,205	155,665
Order backlog	2,341,367	2.090,584	250,783
Revenue	728,375	841,831	(113,456)
EBIT	75,079	104,232	(29,153)
R.O.S.	10.3%	12.4%	-2.1 p.p.
Operating working capital	111,449	300	111,149
Research and Development	32,475	33,053	(578)
Headcount (no.)	3,081	3,315	(234)

The figures in this table are inclusive of transactions with other segments.

Revenue at 31 December 2011 was EUR 728,375 thousand from EUR 841,831 thousand in 2010.

Below is an overview of the most relevant production events.

ITALY

As regards the High Speed programme, the activities for the existing lines were essentially completed, except for continuous but small maintenance and upgrading of control equipment.

Through the Consorzio Saturno, for the future Milan-Genoa and Brescia-Treviglio lines, designing commenced ahead of the signing of the relevant contracts, which envisage very short times for the designing stage.

In the onboard SCMT segment, the supply of equipment for the Trenitalia rolling stock continued under the applicable Master Agreement.

Good was the volume of activities generated by orders of other railway companies and builders of rolling stock intended for circulation in Italy.

In particular, for AnsaldoBreda production continued for the SCMT systems of high-frequency trains (TAFs), for regional trains (TSR), both intended to Ferrovie Nord Milano and for Vivalto double-decker carriages for Trenitalia; development activities continued for the 50 new V300 Zefiro High-Speed trains and equipment for the first two trains were tested.

In the Station equipment segment, almost all of the activities were completed for the systems of the Naples, Venezia-Mestre, Pisa, and Milano-Rogoredo junctions as

The Turin-Padua Line is worth a specific mention. Production mainly regarded detailed engineering, which was completed in due time, and the relevant documentation was delivered to the customer. Development activities continued mainly for the release of the key prototypes for the later stages of procurement and designing.

In the Mass Transit segment, in cooperation with the Transportation Solution Business Unit, the major activities regarded the supply of systems for Line B1 of the Rome Metro, De Ferrari - Brignole line of the Genoa Metro, Line 1 Dante-Garibaldi of the Naples Metro, Line 6 of the Naples Metro.
As regards the latter, development activities continued for the Metropolitan Border of the Mostra-Mergellina section.

The year saw growing volumes of assistance and maintenance activities, mostly for RFI and Trenitalia, the result of large quantities of systems and equipment supplied to these customers in the last years.

REST OF EUROPE

(This section also includes Turkey and the FSU)

In **France** activities mostly regarded onboard systems (*TG Rhin-Rhône*) and equipment (*Thalys*) for the French high speed network, as well as the usual orders for maintenance, assistance and manufacturing of spare parts.

In **Sweden** the *Ester* project is being fully developed for the construction of an ERTMS level 2 system on the Ester line in the Northern part of the country.

The project for the upgrade of the *Red Line* of the Stockholm Metro is also being developed using CBTC technology.

In the **UK**, during the year the operation stage was completed for the project for the *Cambrian line* (the first line on British soil to be equipped with the ERTMS level 2 European standard). This allowed the settlement of some contractual claims of the customer.

In **Germany** testing and operation activities commenced on the equipment installed on the Saarbrücken - Mannheim line, which is part of the interoperable European corridor (*Paris-Ostfrankreich-Südwestdeutchland*).
Preliminary designing activities started on a similar contract acquired during the year for the track laying of the Rostock-Berlin line.
As regards the onboard project for the supply of 30 multistandard equipment for 15 HS *Velaro* trains, manufacturing activities continued during the year and some additional functional implementations were defined with the customer.

In **Russia** preparations were completed for the start of the testing of the *Itarus* system, a system designed by Ansaldo STS with NIJAS (the research body of the Russian railways) for the introduction of the ERTMS standards in the physical and operating environment of the Russian territory.

In **Turkey** detailed engineering continued on the Mersin-Toprakkal line. As the Customer gave the necessary approvals, onsite assembly commenced. Activities resumed with new strength for the Ankara metro, after the title of the contract changed from the municipality to the Ministry of Transportation.

In **Kazakhstan** all the productive activities that had commenced on the Khorgos-Zhetysen line project, as part of the Joint Venture formed with the local railways, were formally interrupted by the customers and negotiations are under way for the redefinition of the scope of work of the JV.
Therefore, it was considered prudent not to include the finishing amount of the project (some EUR 45 million) in the Group backlog, given the persistent uncertainty.

NORTH AFRICA AND THE MIDDLE EAST
The performance of the activities planned for the year 2011 in Tunisia and mostly Libya was adversely affected by the political riots in the region.

In **Tunisia** activities resumed at the end of the year, and activation of the signalling and automation systems in the Tunis suburban line is nearing completion.

In **Libya**, immediately after riots started, activities were suspended for the project for the construction of the signalling, telecommunications, security and power supply system for the Ras Ajdir-Sirth and the Al Hisha-Sabha lines.
These activities have not resumed for the time being. The project for the construction of a similar system for the Sirth-Benghazi section was also suspended by the customer, the construction company of the Russian Railways Zarubezhstroytechnology (ZST), with letter dated 21 February 2011.
Contacts are under way with this organisation in order to agree upon extending the period of suspension of the contract.
At present it is difficult to assume that these contracts may be resumed, given the situation of the country.

AMERICA
Production came from both system works on projects lasting several years and from the sale of components. For the first segment, activity was extensive for the customer Union Pacific on the OTP/CADX project.
In 2005 Ansaldo STS USA won the contract for the development and implementation of the *Next Generation Computer Aided Dispatch* (CAD) and of an *Optimizing Traffic Planner* (OTP) system, as well as maintenance until 2030.
During the year the OTP was activated in all the Western regions and in most of the Southern areas. The completion in all the regions (34 overall) is expected in 2012. As regards the development of the CADX Office, 90% of the subsystem requirements were approved by Union Pacific.
In the Mass Transit market, manufacturing regarded several contracts with various public transport authorities: NYC - 5^{th} and Lexington, WMATA - Red Line, PATH PTCC - Office, Port Authority of Allegheny Co, LIRR-Harold Interlocking.

ASIA - PACIFIC
In **Australia** activities were carried out with several customers, mostly using *alliance* contracting.
In particular, works worth noting are those for the Newcastle Alliance, the Synergy Alliance, the Richmond Line Alliance, the K2RO Project, and the NCIG-Coal Export Terminal.

In **India**, manufacturing mainly focussed on these projects, all with the Indian federal railways.
Since its inception, the KFW project has been upgraded and changed with variations and this caused a delay in the performance timeline together with a number of technical problems which were finally resolved during 2011. Thanks to this, the first systems were delivered for operation. After a long series of technical and operational difficulties, solutions to be implemented

with the customer were sufficiently defined for the two projects (North and South) for equipping wayside and onboard systems with devices for the Train Protection and Warning System (TPWS).

In **South Korea** the cooperation with Rotem involved the supply of equipment for some types of engines. During the year line testing was carried out with positive results.

In **China**, the ZhengXi Line project is now ending; the major activities regarded the Transfer of Technology (ToT) to the local partner Insigma.

EBIT of the Signalling Business Unit at 31 December 2011 came to EUR 75,079 thousand (10% of the value of revenue), lower than the amount of December 2010 (EUR 104,232 thousand) due to smaller volumes and the freezing of the new contracts in Libya.

Operating Working Capital at 31 December 2011 totalled EUR 111,449 thousand, up from EUR 300 thousand at 31 December 2010 as a result of an increase in trade receivables, inventories and work in progress.

Research & Development costs at 31 December 2011 amounted to EUR 32,475 thousand, essentially in line with the figures for the prior year (EUR 33,053 thousand).

Headcount at 31 December 2011 totalled 3,081 people (3,315 at 31 December 2010); it includes the containment of resources as part of the reorganisation process.

Transportation Solutions Business Unit

The orders acquired at 31 December 2011 came to EUR 1,256.1 million compared with EUR 1,142.8 million at 31 December 2010.

The order backlog came to EUR 3,442.3 million from EUR 2,721.5 million at 31 December 2010.

The significant events of 2011 for the various geographical areas are outlined below.

ITALY

In Italy, the overall amount of orders acquired at 31 December 2011 amounted to more than EUR 120 million. The most important acquisition, for more than EUR 105 million, relates the extension of Line 5 of the Milan Metro (south-westbound extension from Garibaldi to San Siro). The line will extend for a further 7 km with 10 new stations. Ansaldo STS technology will be used on the fully driverless system.

Projects under way include the award of the tender - under Project Financing - for Line 4 of the Milan Metro (S. Cristoforo-Linate) to the Grouping of Impregilo (leading company), Astaldi, Ansaldo STS, AnsaldoBreda, Sirti and ATM Milano.

The concession agreement and the loan agreements will be effective, hopefully in a short time, after the competitors have filed their appeals.

REST OF EUROPE

Generally, the global macroeconomic scenario is still affected by the financial crisis that caused many projects to be delayed, in particular in the Eastern European area, where the development programmes driven by the European Community do not seem adequate to fully finance the major expansion projects for the transport networks of some capital cities.

In **Denmark**, as part of the contract formerly acquired for the Copenhagen Cityringen driverless metro, the customer decided to give the order for trains to Ansaldobreda through Ansaldo ATS, which is in charge of the construction and integration of all the technological works.
This allowed an order for a further EUR 120 million.

NORTH AFRICA AND MIDDLE EAST

During the period there were no new acquisitions, but several promotion and offering activities were initiated, especially in **Qatar**, which is one of the countries with the most ambitious infrastructure development plans, such as Saudi Arabia.

ASIA - PACIFIC

The amount of the orders acquired in **Australia** in this business segment was more than EUR 151 million, all deriving from the master agreement made with the mining company Rio Tinto for the technological equipment of new and existing railway lines to transport iron ores from the Pilbara region in Western Australia to the ports along the coast.

In **India** consideration is being given to possible partnerships with local contractors in order to take part in future tenders.

NORTH AMERICA

The most important event of the year is undoubtedly the signing of the contract for the construction of the Honolulu Metro.

In November 2011 Ansaldo Honolulu Joint Venture, the consortium formed by Ansaldo STS and AnsaldoBreda, signed with HART (Honolulu Authority for Rapid Transportation) a contract for the construction of the technological part and for the supply of the new driverless metro trains in the City of Honolulu (Hawaii). The contract, worth USD 1,334 million overall, covers the designing, construction, operation and maintenance of the new driverless metro line in Honolulu, which will be 32 km long entirely on flyover tracks along 21 stations. Ansaldo STS share amounted to EUR 841.8 million.

The designing and construction of the full line will have a duration of 8 years, the operation and maintenance of the line will commence in 2015 for the first functional section, and in 2019 throughout 2029 for the entire line. Performance of O&M for the years 2025 - 2029 for an amount of EUR 224.7 million will be checked by the customer.

Performance of the *Transportation Solutions* Business Unit

Revenue of the *Transportation Solutions* Business Unit at 31 December 2011 amounted to EUR 512,267 thousand from EUR 504,448 thousand at 31 December 2010.

The volumes were developed in Italy (55%) and abroad (45%), with 78% regarding the metro rail sector. Production developed on the projects for high-speed trains, the Rome Metro Line C, Copenhagen Metro, Milan Metro, Genoa Metro, Thessaloniki, Alifana, Naples Metro Line 6, Naples Metro Line 1, Brescia Metro, Riyadh Metro, Malaysia and Australia Metros. Below is an overview of the most significant production events.

(EUR 000)	31.12.2011	31.12.2010	Change
New intake orders	1,256,058	1,142,756	113,302
Order backlog	3,442,345	2,721,540	720,805
Revenue	512,267	504,448	7,819
EBIT	55,009	46,294	8,715
R.O.S.	10.7%	9.2%	+1.5 p.p.
Operating working capital	(172,411)	(105,299)	(67,112)
Research and Development	1,425	1,774	(349)
Headcount (no.)	600	449	151

The figures in this table are inclusive of transactions with other segments.

ITALY

High-Speed Railways

In the High Speed segment, marginal activities continued on existing lines for the operation of some new interconnections and for assistance works covered by warranty; activities for the designing of the new sections Treviglio - Brescia and Milan-Genoa 3° Valico del Giovi - for which contracts are to be formalised yet - started with interruptions.

Metrogenova

Regarding the functional line De Ferrari–Brignole, during the year activities were carried out for the supply of technological equipment, for equipment assembled along the line and at Brignole station.
Operation activities also started.
The flood that hit Genoa and our building site in November caused the operational programme to be postponed: opening to the public is now estimated in September 2012.
Regarding the Dinegro Depot, the customer decided to assign to the Company the construction of a part of the structures above the depot, with a variation that is currently being approved.

Alifana Regional Line

During the second quarter an Agreement was signed for the price increases in construction materials, accounted in previous years.
The Licensor Metrocampania Nordest prepared and transmitted to the Campania Region a new text for the Addendum to replace the one signed in March 2010.
In November the Submission Deed for the Scampia Underpass was signed and the works covered by the civil and technological variations were regularised.
Still in November the deed for the suspension of the works of Melito station, lot A, with a specific reserve for the refund of all the greatest resulting charges and damages.
With reference to the credit position of the Temporary Business Grouping, and of the Associates accordingly, during the year legal actions were initiated to protect former entitlements.
At the same time, contacts continued with the Campania Region for the definition of a settlement that is satisfactory for all the parties.
With regard to the Piscinola-Capodichino line, Metrocampania Nordest as Contractor has not delivered the areas and works in Lot A yet, as envisaged in the Integrated Contract.
The Temporary Business Grouping, of which the company is the agent, formalised a specific reserve for the refund of all the greatest resulting charges and damages.

Naples Metro Line 6

The year was marked by significant events in terms of techniques and construction. In particular, as regards the Line Tunnel, excavation was completed in October as the TBM/EPB arrived at the site of the Municipio station, where facilities have already been built for dismantling. The traditional 3-km long tunnel built has 1,700 lining segmental rings, has a single tube, and stretches from the Mergellina station to the Piazza Municipio areas.
With regard to the stations A.Mirelli, S.Pasquale, Chiaia and Municipio works continued at different paces because of the peculiar events of the year. Works were dramatically delayed in the last few years because the level of archaeological excavation was reached.
Finally, as regards the Municipio site, during the year archaeological surveys continued on the station shaft areas, and as a result planned activities were delayed.
With regard to the significant credit position of the contract, the Company initiated proceedings to have an injunction issued against the Municipality of Naples for the collection of the amounts due.

Rome Metro Line C

Works in the outdoor section linking Pantano-Torrenova and the Pantano Depot were essentially completed; tests, especially subsystem, interface functional tests and preventive functional tests, are under way.
As regards the works for underground stations in the tunnel section linking Giardinetti and Centocelle, rough works, floors and covers of the various levels are being completed, and platforms were enlarged. As regards the line, the construction of the large concrete slab is being completed and the assembly of emergency

platforms is nearing completion; the laying of tracks and of the primary cable paths commenced.

Milan Line 5

On the functional line linking Bignami and Zara assembling activities and the operation of most of the telecommunications systems were completed. Following the request of the municipality of Milan for temporarily opening to the public the functional line Bignami-Zara for the "Family Week" at the end of May 2012, it was determined that a shuttle service will operate on a single track, with two trains at Bignami and Zara stations not stopping at the other stations. The service will be driverless with officers on board and at stations at the end of May. To that end commissioning activities were adjusted.
The final activation of the Bignami-Zara line is scheduled at the end of October 2012.
With regard to the extension of the line to San Siro station, the detailed engineering is under way and will be completed within December 2012. Orders were issued for all the supplies, while the contract for the assembling of the signalling equipment will be completed next year. The civil partner is carrying out activities for moving subservices, the construction of the station bulk heads and the preparation of the first two TBMs.

Naples Metro Line 1

The contract relates to the construction of the works for the contact line, power supply, telecommunications, signalling and automation and the protection systems on the 5-km line entirely in the tunnel. During the year a section linking Dante and Università (March 2011) was activated in a shuttle configuration (down line track). It is expected that in 2012 Toledo station be included in the shuttle route that is now operating and that the entire section linking Dante and Garibaldi be completed with a carousel configuration which will be final (December), except for Municipio and Duomo, for which completion is expected in 2013 and 2014 respectively.

Metro Brescia

During the year the construction designing was fully developed and installations along all of the line are nearing completion, with the exceptions of details for civil finishings and minor works at the depot workshop. On-site activities are mainly related to the operation of the ATC subsystem, of vehicles, and to the system integration on the functional line and on the rest of the line, which will continue throughout September. System operation is expected at the end of December 2012. The year was marked by the settlement of the dispute between ATI and Brescia Mobilità through a settlement agreement that redefined the reference programme, allowed ATI a part of the expenses incurred for time extension and variations made after works had commenced, and determined how the company in charge of the *Operation and Maintenance* of the system will work.

REST OF EUROPE

Thessaloniki Metro

The designing phase on which the Company is working at the moment, named the General Final Design 2 (GFD2), was marked in 2011 by two key events: the substantial approval by the Customer of the Company's technical proposal on the new CBTC architecture for the signalling system and the formalisation of the reservation submitted by the JV to the Customer regarding the damages incurred by the Partners of the B Group (ASTS and AB) at designing (GFD1 and GFD2).
In terms of programmes, according to the best estimate possible at the moment, works will be completed at the end of December 2007.
On the other hand, in November the Customer made an official request to the JV for a new programme where works are estimated to be completed by the end of 2015, even though this request is not accompanied by a genuine Customer commitment to promptly settle any payments still due. At present the estimated contract amount includes an estimate of delays due in part to the unfavourable economic conditions of the country.

Copenhagen

As regards the Cityringen contract, a new programme for the construction of the work was agreed upon with the customer and the civil works contractor.
The new programme brings the start of operations of the system forward to December 2017.
All the designing and interface definition milestones were reached during the year with the Civil contractor. The construction of the site was completed and pre-excavation activities started in the Depot area.

In 2011 the Operation&Maintenance contract performed greatly with Service Availability of 98.8% following improvements in operating procedures and system changes, in addition to the renewal of obsolete components.
The number of passengers reached its all-time high with some 54 million journeys/passengers.

NORTH AFRICA AND THE MIDDLE EAST

Riyadh Automated People Mover System (Apm)

During the year the construction designing activities and interfacing with civil works were completed. *Commissioning* activities are nearing completion.
During the first three months of the year, an agreement was signed with the Customer for the formalisation of a new timeline and new interim milestones.
In particular, the first one, the *Ceremonial Opening*, was

a full manual service on line 2 in May at the presence of the King.

ASIA - PACIFIC

Circular Line Taipei Metro
The Customer contracted only two of the three major contracts with civil enterprises, with a delay over the initial plan. Negotiations are under way for the formalisation of a time extension that covers these delays. It is to be reported that at the end of the year the CBS (*Contract Baseline Schedule*) was processed and submitted. Its approval caused the receipt of a huge amount as advance payment in December.

Australia
Production mainly developed on the projects related to the Framework Agreement of Rio Tinto (RAFA). In particular, activities on the Rail Capacity Enhancement and Hope Down 4 account for most of the revenue for the year and of the employment of Engineering and Construction entities' in-house resources. Activities continued for the preparation of operations for the ECP and the ATO projects and for the study phase for the remaining part of the programme.

Malaysia
Production mainly regarded the Malaysia North Double Tracking project. The most relevant event of the period was the settlement of the dispute with the Customer, at all levels, for the definition of the signalling technological solution to be adopted for the project. Negotiations are still being held for the work programme and for the request for a time extension to make up for the months spent identifying the reference technological solution.

EBIT for the Transportation Solutions Business Unit at 30 December 2011 came to EUR 55,009 thousand (10.7% of the value of revenue) compared with EUR 46,294 thousand at 31 December 2010 (9.2% of the value of revenue); this increase is a result of the different mix of orders worked in the two comparison periods.

Operating Working Capital came to a negative EUR 172,411 thousand, as compared with a negative EUR 105,299 thousand at 31 December 2010; this change is mainly attributable to the increase in advances from customers during the year.

Research & Development costs charged to the income statement amounted to EUR 1,425 thousand, mainly in line with the figure at 31 December 2010 (EUR 1,774 thousand).

Headcount at 31 December 2011 was equal to 600 units, up 151 units compared with 31 December 2010 (449 units). This change is attributable to the reallocation of resources, especially in Australia, made in the scope of the group reorganisation.

Link

"Ansaldo STS puts customer satisfaction at the centre of its strategy: the ability to understand the client's needs and expectations and to meet them is the central value on which the corporate culture is based."

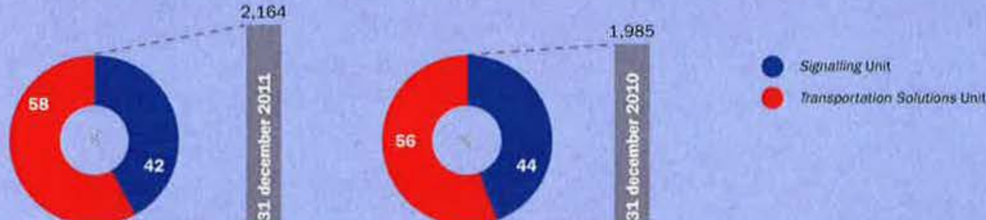
Orders by Business Unit at 31 December 2011 - 2010 (EUR millions)



Analysis of the Income Statement, the Balance Sheet and the Financial Position

Consolidated net profit for 2011 was €73,056 thousand as against €94,908 thousand in 2010. Revenues contracted from €1,283,710 thousand in 2010 to €1,211,944 thousand in 2011 - a reduction of €71,766 thousand.

This change was mostly attributable to the *Signalling* Business Unit, in which the gradual run-off of AV (high-speed) projects in Italy and the PRC, as well as of the projects to equip rolling stock with the SCMT system, was not offset by the development of new orders.

This circumstance was largely due to the stoppage, at the beginning of the year, of work on two important orders that the company had won in Libya.

In 2011 the *Signalling* Business Unit's revenues were €728,375 thousand, gross of transactions with other sectors - a reduction of €113,456 thousand from 2010, when they were €841,831 thousand.
The *Transportation Solutions* Business Unit's 2011 revenues were €512,267 thousand, gross of transactions with other sectors - a slight increase of €7,819 thousand over 2010, when they were €504,448 thousand.

2011 EBIT was €116,120 thousand - a reduction of €20,945 thousand from 2010 (€137,065 thousand).

The EBIT margin was 9.6% as against 10.7% in 2010.

In detail:
- the *Signalling* Business Unit's operating profit for 2011 was €75,079 thousand, a reduction of €29,153 thousand from the 2010 figure of €104,232 thousand, due essentially to lower production volumes and a different product mix.
- the *Transportation Solutions* Business Unit's operating profit was €55,009 thousand, an increase of €8,715 thousand over the 2010 figure of €46,294 thousand, due to the different product mix and higher profitability in the projects executed in both years.

Net Invested Capital was €134,462 thousand as against €63,311 thousand for 2010.
The change of €71,151 thousand was due to an increase in non-current assets of €5,929 thousand and growth in Net Working Capital of €65,222 thousand. The change in working capital was due to an increase in work-in-progress inventories and debtors, which was not offset by any increase in suppliers and principals' down-payments. Debtors increased due to the continuation of certain credit positions with the Parent, ASTS, in respect of some large Italian projects for the realisation of mass transit systems.

The positive Net Financial Position (i.e. the excess of financial assets and cash over financial indebtedness) was €289,674 thousand as against €318,150 thousand in 2010, a reduction of €28,476 thousand following the distribution of dividends in the amount of €33,592 thousand, (€30,982 thousand in 2010).
It should be noted that the 31 December 2011 financial position (€289,674 thousand) included a €70,643 thousand advance payment received from the Russian client Zarubezhstroytechnology in respect of the project to realise signalling, automation, telecommunication, power supply, security and ticketing equipment for the Sirth-Benghazi line in Libya.

Risks and Uncertainties

The risks described below stem from the consideration of the features of the market and business of the Ansaldo STS Group, together with the main results of the update of the Risk Assessment of processes. The Risk Assessment aims at identifying the main risks, with respect to the processes identified as relevant, and the relevant mitigating actions, as well as defining the additional actions to be taken to further reduce the risk or improve process performance.

The Risk Assessment process adopted by Ansaldo STS makes reference to the internationally recognised framework of the "Enterprise Risk Management" of the "Committee of Sponsoring Organizations of the Treadway Commission" (COSO report) and purports to add the Risk Assessment to the processes for the planning and implementation of corporate goals, to create value based on appropriate risk management also by giving value to opportunities.

The main risks and uncertainties of Ansaldo STS and of the Group are presented below according to the classification adopted by the Group (strategic, operating, financial and disclosure risks). There may be risks that are unidentified or that have not been considered as being significantly material at the moment but which should however have an impact on the Group's business.

For the management of financial risks, reference should be made to the related explanatory notes.

> Please see page 45 of the 2011 Sustainability Report for further information

Strategic risks

Competition in the market and efficiency programmes

The Ansaldo STS Group operates in a global market, which grows in the emerging countries and in the areas with a higher development rate and which increasingly tends to the standardization of products and technological solutions and to the globalization of markets (specifically in the signalling business sector). This entails an increase in trade competition and a tendency to price reduction, notwithstanding the growth in market volumes. The Group is therefore exposed to the risk of weakening its competitive ability, in the absence of an adequate standardisation of the solutions and the products offered and of a greater efficiency/optimisation in the use of resources during the performance of contracts and more generally in the operating management of the entire company. In response to this risk, it should be specified that the Group has adopted a new integrated organisation and operational structure in order to achieve a greater standardisation of solutions and products and, in general, to improve operational efficiency and efficacy. This change occurred since 1 January 2010 and ended up with the inclusion since 1 April 2011 in the new organization of the subsidiary in the USA.

The present market phase in a difficult economic trend requires increasingly determined actions to maintain margins and preserve the company value. In response to this risk, the Company started specific efficiency programmes in 2010 directed to reduce both external and internal costs, through the optimization of several operating processes.

Actions continued in the course of 2011 to implement the efficiency programmes together with the start-up of new initiatives.
The risk that these programmes may be carried out with results lower than expected or over a period of time longer than that fixed could adversely affect margins and company value. In response to this risk, the implementation of efficiency programmes is monitored through strict measures of Program Management.

These programmes also require an accurate process to plan in the medium/long-term the needs of internal and external resources; the lack of such a process may increase the risks connected with the effectiveness and prompt implementation of these programmes.

Changes in the macroeconomic scenario and efficiency objectives

The Ansaldo STS Group, as said above, operates in an international market and is therefore exposed to risks resulting from changes in the global macroeconomic scenario and in the reference markets. Various macroeconomic factors may have an impact on Group activities, such as growth rates in reference markets and public programmes of infrastructure investments.

The present economic recession period, the risk of a decline in the growth rate of the world economy and the programmes, either commenced or announced in several countries, for reducing public deficit might cause the annulment or postponement of contracts, delays in payments, less favourable financial conditions in new contracts, with a negative impact on Group performance.
In response to this risk, control structures have been created for the selection and assessment of commercial opportunities with a systematic and factual approach for the related definition of the contractual conditions in the scope of offer processes.
Specifically, the risk of delay in payments is emerging because of delays in government grants for the projects in progress both in Italy and in some foreign markets. These situations are being monitored constantly and supported by specific initiatives to mitigate the impact thereof. It should be pointed out that, the Group holds a positive financial position and generally has a solid capital and financial structure and a significant order portfolio (about four years of work) to tackle the present difficult economic trend.

Innovation as competitive factor

The businesses where the Group operates - transportation solutions and signalling - are marked by high levels of technological innovation representing an important competitive factor.
It is therefore paramount that the Ansaldo STS Group has the ability to support the present investment policy and to evaluate in a systematic and factual appropriate manner the return on investments in R&D directed to generate innovative solutions.
The Group may not assess in an appropriate manner the innovation needs, the contents of innovation and development projects, the benefits thereof and the resulting priorities, with the risk of not being in line with market needs, of a low economic return on the investment in innovation and on the project and the loss of commercial opportunities.
To mitigate these risks, there are corporate processes for the definition of the product portfolio and for the periodic verification of the technical competitiveness of products.
The characteristics and the already mentioned level of technological innovation pertaining to the products and the technical solutions of the Group determine a risk of obsolescence. Specific processes are being carried out to mitigate that risk effectively.

Link

"Ansaldo STS believes that innovation is an unvarying principle: to improve what is known and develop new solutions that increase transport systems' safety, energy efficiency and eco-compatibility."
> Please see pages 89 and 150 of the 2011 Sustainability Report for further information

Operating risks

Country risk with respect to new markets

The new market penetration policy, especially for higher developed markets, exposes the Group to these risks: the risk of political, social and economic instability, of an incorrect evaluation of local regulations (business, tax, signalling system validation regulations), the difficulty of protecting intellectual property, the fluctuation of exchange rates and the credit standing of the counterparties, with a negative impact on the Group's financial condition. The country risk is assessed during the process for the selection of offers and tenders to take part in. The opportunity to mitigate this risk and the definition of any related actions are taken into consideration when preparing the proposals.
Please refer to the relevant section of this report for the explanation of the status of the job-orders in Libya, suspended because of the riots occurred in the country and the delays recorded by the job-order in Greece exacerbated by the unfavourable economic trend of the country.

Public administration companies and contracts lasting several years

The Group's business mostly depend on public administration companies and, in particular in the transportation solution business, on significant contract lasting several years.

Any delays, changes, reviews or cancellation of one or more acquired relevant contracts lasting several years may adversely affect business and the economic and financial condition of the Group.

Moreover, the evaluation of the contracts lasting several years is based on the state-of-completion method and therefore uses estimates of the costs to be incurred for the completion of activities, of the project risks (technical, legal, tax and commercial) and of the state of completion of the activities.
These estimates are based on assumptions relating to the effects of future events which, given the type and complexity of the projects to be performed, might occur in forms different from those estimated, with a negative effect on the economic and financial performance of the project.
To mitigate these risks, the following should be noted:

- market diversification and monitoring of country and regulation risk;
- structured process of project review with the involvement of the senior management;
- the review and periodic updating of order estimates;
- adoption of Risk Management processes at the offer stage and during the project implementation, and adoption of Lifecycle Management processes based on the constant comparison of physical and accounting progress and phase review processes.

Budget processes and Risk Management project planning

The project team may not be able to perform the project within budget and time constraints, in particular for projects in new markets and complex projects, due to non-efficient project controlling processes; risk management might not be efficient if it is based on incomplete or incorrect information or if it is not adequately defined and monitored.
This risk might cause delays in the identification of the problems for project performance and inaccurate reporting and planning, with a negative impact on the Group's financial condition.
To mitigate this risk, processes have been defined and monitored for controlling the physical and accounting and risk management progress, the clear-cut responsibilities of the Project Manager and the Order Controller, managerial reviews of project performance, processes for the review of estimates of offers and the independent review of the Risk Management function.
Specific initiatives are being carried out in order to structure the Group controlling processes.

Third parties (sub-contractors, sub-suppliers and partners)

In both the business in which the Group operates sub-contractors are widely used to supply sub-systems or assembling and installation services and sub-suppliers of goods or services. The Group's ability to meet its obligations to the customers is then subject to the good performance of the contractual obligations on part of both sub-contractors and sub-suppliers. Their non-performance may cause Ansaldo STS non-performance, with negative impacts on reputation and, unless compensation is possibly sought through remedy actions against sub-contractors and sub-suppliers, on the Group's financial condition.

The Group also completes some orders in partnership with other operators, especially in the transportation solution business. In these forms of partnership, generally each partner is jointly liable to the customer for the construction of the entire work. In case of breach or of damage caused to the customer by one associated operator, Ansaldo STS may have to replace the breaching or damaging party and to fully repay the damage caused to the customer, without prejudice to the right of recourse against the defaulting partner. Any inefficiency or continuation of actions of recourse against the defaulting partners liable for any damages might adversely affect the Group's business and financial condition.

Moreover, as part of the Group's internationalisation strategy, the preliminary assessment and the related selection of partners, sub-contractors and sub-suppliers in new markets might be inadequate, with negative impacts on orders, reputation, financial condition and efficacy of partnership governance (such as difference of partners' opinions, misalignments of risks and costs/benefits for partners individually).
To mitigate this risk, there are processes for selecting and qualifying sub-contractors and sub-suppliers, collaboration with known partners of proven standing, the definition, execution and management of adequate contractual and grouping clauses, risk management processes and the demand, where applicable, of specific guarantees.
In selecting sub-contractors and partners in new markets, these processes are followed through specific scouting activities.
Further actions are being carried out to make more efficient the evaluation of sub-contractors and partners during the offer.

Link

"Ansaldo STS believes that managing the entire supply chain is a critical success factor: it therefore adopts qualification criteria that include respect for the environment, health and safety, and constant monitoring."
> Please see page 142 of the 2011 Sustainability Report for further information

Adequacy and efficiency in developments and technical references

Development projects may not be carried out within budget and time constraints and requirements may not be understood and identified clearly, with a negative impact on margins, delivery times and customer satisfaction. Under certain circumstances, the Group could not be able to have adequate market and operation references for some products, with the risk of losing commercial opportunities or incur in non-compliance in performing the project, with negative effects on the Group competiveness and financial position.

The planning and control of the development activities have been defined in order to ensure that priorities are evaluated properly and time and costs are controlled. The risk of not having adequate references for some new products is carefully assessed during the offer and managed with recovery plans during the construction phase.

Customer or third party liability for defects in the products sold or delays in delivery

The technological complexity and the close times for the delivery of Group products and systems might expose the Group to liability for delayed or lack of supply of products or services in the contract, for their non-compliance with customer requests (for example due to defects in the designing and construction), to defaults and/or delays in marketing, after-sale services and product maintenance and review.
Moreover, many products and systems supplied by the Group are subject to certifications or validations, also released by third parties.
These liabilities may depend on causes that are directly attributable to the Group or third parties, such as sub-suppliers or sub-contractors. In the event that these risks may occur, there could be negative effects on the business and the economic and financial condition and reputation of the Group.
These negative effects may include the incurring of costs for repairing faulty products or in extreme cases the withdrawal of the products from the market.
With regard to these effects, even in the case where specific insurance coverage is applicable, the limit of liability might be exceeded or, when claim occurs, insurance premiums might be increased, with a negative impact on the Group's financial condition.
To mitigate these risks, the Group takes out specific insurance coverage, carefully oversees the engineering, validation and monitoring of returns and, in concert with the Risk Management process, identifies mitigation actions for each project and includes appropriate contingencies in the order estimate.

Legal disputes

The complexity of the relations with third parties (customers, sub-contractors/sub-suppliers and partners), of the content of the systems and products made, and the risks inherent in the business expose the Group to a significant risk of legal disputes. The legal dispute may also concern the tender awards.
The definition of disputes might be complex and be completed in the long-term, causing delays in the implementation of projects with negative effects on the business and the economic and financial condition of the Group.

To mitigate this risk, there risk management processes during the offer and during the management phase, contractual clauses are carefully checked with the support of the legal function and a prudential approach is taken when recognising specific items as a cost of orders and a provision for risks.

Human resources management

The Group provides products and systems with high technological content.
To build them, it is necessary to use human resources with specific preparation that is hard to gather from the market.

The success of the business development plans, in particular in new markets, also depends on the ability to attract, retain and develop the expertise of human resources, especially in order to operate in an international scenario.
To mitigate this risk, human resources management policies are defined that are strictly related with the business needs, in particular at the present stage of business integrated management and expansion in new markets.
An integrated system of management and development of human resources was defined and implemented in the course of 2011. In this context, periodic controls have been made on skills and performances and steps have been taken for the development of skills and the best allocation of resources.

A few existing critical points refer to the adequacy of some organizational roles of the working groups, redefined in the scope of the recent organizational change, that may compromise the achievement of some benefits resulting from the change of corporate processes. Specific initiatives have been taken to strengthen these roles.

Link

"Ansaldo STS seeks to continually improve its training programmes as the basic means of growing its human resources and increasing their skills."
> Please see page 112 of the 2011 Sustainability Report for further information

Development, safety and environment compliance

The Group is subject to health, safety and environment regulations in the various countries in which it operates.

The non-compliance with these rules as a result of operating processes that are not adequately monitored or, in particular in new markets, of a non-adequate evaluation of these compliance requirements might expose the Group to risks with significant impacts on the business, the economic and financial condition and the reputation of the Group.

To mitigate this risk, the Group adopts health, safety and environment management systems aiming at ensuring the stringent compliance with rules in accordance with best practices and subject to internal and external monitoring. These management systems are certified - in compliance with the OHSAS 18001 standard on work safety and the ISO14001 standard on environment - in some of the main companies of the Group. A programme is being implemented to extend these certifications to the main Group companies.

The requirements of new markets are evaluated during the offer and support is guaranteed also through external consultants. Common policies and procedures have been defined in order to guarantee consistent conducts across the various companies of the group, also taking account of the specific local requirements.

"Ansaldo STS works constantly to provide and maintain a healthy and safe workplace, and prevent accidents, illness or health problems in its staff, suppliers, clients and visitors."
> Please see page 179 of the 2011 Sustainability Report for further information

Financial risks

Ability to finance a high level of current assets and to obtain guarantee

To perform contracts the Group requires:
- the financing of an adequate level of current assets;
- the issue of bank and/or insurance guarantees in favour of the customer during the various stages of the projects (bid bond, advance payment bond, performance bond, retention money bond, warranty bond) and/or guarantees issued by the Parent Company (parent company guarantee).

Current assets are normally financed using the sums paid by the customer as advance and payment related with the state of progress of works.

The ability to obtain guarantees in cheap conditions depends on the economic and financial assessment of the Group. This is generally linked to various assessment indices including the analysis of the balance sheet, the income statement and the cash flow statement of the Group, the analysis of the risk of the order, the expertise and competitive positioning in the business. Ansaldo STS believes it can comply with the relevant assessment indices. At 31 December 2011 the Group's exposure for guarantees stood at EUR 2,857,361 thousand (EUR 2,314,756 thousand at 31 December 2010).

In the case of difficulties in negotiating adequate financial conditions, delays and/or interruptions in payments and the worsening of the terms of payment agreed, or if the ability of the company to obtain guarantees should cease to obtain or be reduced in cheap conditions, the Group's business and economic and financial condition would be adversely affected.

To mitigate these risks, there are order commercial and management policies dealing with financial aspects, treasury centralised management allowing the optimisation of the financial flows of the various companies of the Group, the economic and financial standing of the Group and the monitoring of the indices assessing the order. These policies are applied from the offer stage.

In the current economic and market phase, the working capital is increasing (though always negative) and the cash flow is decreasing. This was caused by the suspension of the job-order in Libya because of delays in the collections and a corresponding increase in overdue, determined by the delays in government grants for projects in progress both in Italy and in some foreign markets. These situations are being monitored constantly and supported by specific initiatives to mitigate the impact thereof.

Project Financing transactions and PPP (public and private partnership)

The market is increasingly outsourcing the definition and management of a financing scheme to the transport system providers, by means of Project Financing transactions, also with the involvement of private lenders.

These transactions have various risk profiles, such as the inaccurate preparation and review of the tender documentation and the inappropriate evaluation of partners, which might lead the Group to take improper risks. Non-performance during construction, in particular regarding construction times, and during the operation and maintenance stage might trigger the enforcement of escape clauses and the non-remuneration or the loss of the capital invested. Moreover, the market wants the supplier to be more involved in the management of the plant, with a consequent increase in the risk profile of the operation. These risks might adversely affect the Group's financial condition.

To mitigate this risk, there are the offering process, where all the company functions concerned are involved for an accurate evaluation of the operation, and the above said risk assessment processes upon the offer, which can be also applied to potential partners.

Disclosure risks

Management of information systems

Information systems represent an essential component of the company operating structure and are required to be managed in line with the Group's strategic objectives. IT solutions that do not meet the business needs, or upgrades of these IT solutions not in line with the users' needs, as well as a non-efficient system management might impair the efficient performance of the Group's business.

Moreover, the non-availability or interruption of IT services, the loss or damage of data, also due to external attacks, might adversely affect the Group's business.

To mitigate this risk, IT policies are defined in correlation with organizational and process change initiatives and the group has a governance system that is based on best practices and follows structured and monitored processes for the management of the infrastructure and the applications.

AnsaldoSTS
A Finmeccanica Company

CONSOLIDATED ANNUAL REPORT AT 31 DECEMBER 2010

2 Economic performance and Group financial situation

2.1 Introduction

At 31 December 2010 the Ansaldo STS Group posted net profit EUR 94,908 thousand compared with EUR 87,800 thousand for the same period last year. Revenues at 31 December 2010 were EUR 1,283,710 thousand compared with EUR 1,175,640 thousand at 31 December 2009. The Group operating revenues stood at 10.7%, as in 2009.

Orders at 31 December 2010 amounted to EUR 1,985,012 thousand from EUR 1,786,071 thousand at 31 December 2009, up EUR 198,941 thousand.
It is thus noted that:

- Acquisitions of EUR 1,142,756 thousand are recorded for the Transportation Solutions Business Unit, mainly related to the award of the tender for the construction of the new “Ring” Copenhagen Metro (EUR 344,400 thousand), the contract for operation and maintenance (EUR 232,400 thousand) and the acquisition of the contract for the operation and maintenance of the existing lines of Copenhagen (EUR 221,500 thousand).
- Acquisitions of EUR 890,205 thousand are recorded for the Signalling Business Unit, mainly related to the contract for the Libyan Sirth-Bengazi railway line (EUR 201,800 thousand), to contracts acquired in Italy for EUR 199,500 thousand and to the contracts acquired in the US, Brazil, China and Australia for the remaining amount.

The value of backlog at 31 December 2010, equal to EUR 4,551,127 thousand, reflects the performance of acquisitions and rose by 21% from that for the end of 2009, which amounted to EUR 3,759,671 thousand.

The data outlined above are evidence of a fiscal year that can be considered satisfactory overall from the standpoint of the company’s growth, profitability, and capital and financial solidity.
The actions undertaken and results achieved during the year paved the way for the continuation of a positive trend for the Group also for the near future.
More specifically, as regards the Transportation Solutions Business Unit, due to the exceptionally large orders acquired in the previous years, together with an excellent level of acquisitions for the period at issue, the backlog exceeded the already significant amount of the end of 2009 standing at EUR 2,721,540 thousand. This paves the way for significant development of this business over the next three years. As far as the Signalling Business Unit is concerned, the year 2010 was marked by a sizeable geographic expansion of the potential market, which has already yielded important results in terms of the acquisition of new orders in particularly important business segments and countries. The backlog of the Signalling Business Unit at 31 December 2010 stood at EUR 2,090,584 thousand (EUR 1,980,191 thousand at 31 December 2009).
The solid knowledge already acquired (ERTMS and ATC driverless) and the expertise being consolidated (CBTC) in the strategic technologies of the sector, the peculiar geographic distribution of the Group business at global level, and the additional efforts of commercial penetration in the new areas characterised by high growth rates (Central and Eastern Europe, and Middle and Far East) confirm the Group’s favourable competitive positioning and make it possible to look to the future with reasonable serenity, unless the political or macroeconomic scenario is upset by events that cannot be determined with certainty at the moment.

The last strategic plan prepared by the company and made known to the financial community in December 2010 is based on the assumption that orders and revenues will further develop during the next three years. This is credible, first of all because estimates for the reference market are growth estimates (made by the most credited analysts at an annual average rate of 4.5%), and secondly because the organisation has a factual possibility of increasing its market share, due to its particular business model and competitive, technological and presence advantages on the above said international markets.
With these positive prospects, some possible threats are also to be considered. First of all, competition is rising, due to market globalisation and product standardisation. To address the effects of the resulting contraction of selling prices, the company launched a programme for the reduction of both external and internal costs, in order to protect unit margins for the coming years.
Potentially more serious, because it is difficult to control, is the threat of the deterioration of the political and macroeconomic scenario, especially in the emerging markets, whose penetration has been recently the focus of the most significant efforts of the company, such as in the Middle East, in particular in Libya.
The development of destabilisation events occurring as we are preparing these financial statements and the consequences on the business prospects of Ansaldo STS are difficult to estimate, at least at present.

As regards the company structure and Group governance, the following should be noted:

- During December 2009 a new company was incorporated in Brazil under the name “Ansaldo STS Sistemas de Transporte e Sinalização Ltda.”, whose share capital was subscribed during 2010. The company was consolidated using the equity method.
- The Chinese subsidiary “Ansaldo Railway System Technical Service (Beijing) Ltd.” changed its company name into “Ansaldo System Trading (Beijing) Ltd.”.
- Starting December 2010 Kazakhstan TZ-Ansaldo STS LLP (a joint venture subject to common control, as envisaged in the shareholders’ agreement) incorporated with JSC Remlokomotiv, was consolidated using the proportionate method. The ownership percentage was 49%.
- During the year, Ansaldo STS through its subsidiary Ansaldo STS Australia acquired from Corridor Infrastructure Development Holdings (Pty) Ltd 49.3% of the shares held by the latter in Ansaldo STS-Infradev South Africa (Pty) Ltd., therefore holding 100% of the shares in the South African company. On 21 June 2010 the company changed its company name into “Ansaldo STS South Africa (Pty) Ltd”.

From the organisational point of view, the year 2010 was marked by the full implementation of the Fast Forward Driven by Business (FFDB) project, determined in 2008 and detailed throughout 2009, a project that transformed Ansaldo STS S.p.A. from the original financial and strategic holding company into an operating company, which encompasses all the business responsibilities. This process commenced in 2009 with the merger of the former Italian subsidiaries Ansaldo Segnalamento Ferroviario S.p.A. and Ansaldo Trasporti Sistemi Ferroviari S.p.A., and in 2010 was extended to all the Group world transactions, previously managed by the foreign affiliates with broad levels of independence. Under the new organisation structure, Ansaldo STS S.p.A. hinges on the two divisions in charge of the Signalling and the Transportation Solutions Business Units, the Standard Platforms and Products Business Unit and all the staff functions. As a result, all the decision-making and operating processes have been concentrated in Ansaldo STS S.p.A. globally. The role of the foreign affiliates is to ensure compliance with local rules and assist in the implementation of the global strategy. The main objective is to ensure the maximum Group efficiency and efficacy in a competitive scenario marked by increasingly evident globalisation events.

Group key figures (EUR thousand)	**31.12.2010**	31.12.2009	Change

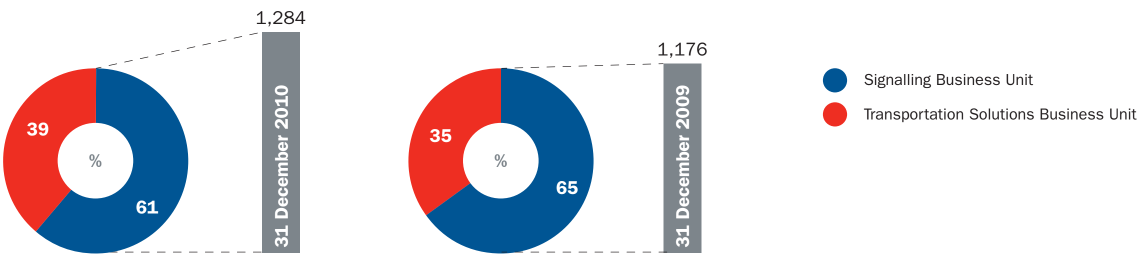
Research and Development	**34,827**	31,178	3,649
Workforce (no.)	**4,217**	4,339	(122)

The year 2010 ended with net consolidated profit of EUR 94,908 thousand, as compared with EUR 87,800 thousand the prior year. The increase of EUR 7,108 thousand stems from the rise in EBIT of EUR 12,013 thousand, the increase in net financial charges of EUR 3,595 thousand and greater taxes of EUR 1,310 thousand.
In line with objectives, production revenues rose by 9.2% from EUR 1,175,640 thousand in 2009 to EUR 1,283,710 thousand in 2010, with an increase, in absolute value, of EUR 108,070 thousand.

For the Signalling Business Unit, production revenues rose by EUR 36,853 thousand from EUR 804,978 thousand in 2009 to EUR 841,831 thousand in 2010.

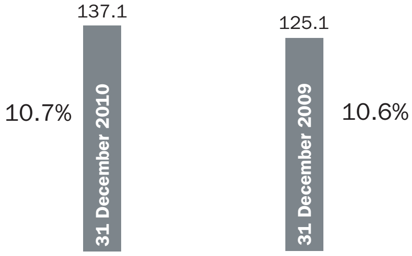
For the Transportation Solutions Business Unit, production revenues rose by EUR 87,318 thousand from EUR 417,130 thousand in 2009 to EUR 504,448 thousand in 2010.
A greater number of items than in 2009 were eliminated between the two Business Units by EUR 16,101 thousand (reference should be made to section 14 for more details).

Production Revenues by Business Unit at 31 December 2010 – 2009 (EUR thousand)



EBIT amounted to EUR 137,065 thousand from EUR 125,052 thousand from the previous year. The profit margin was 10.7% from 10.6% in 2009.
In particular:
- Signalling ended 2010 with operating profit of EUR 104,232 thousand, compared with EUR 98,992 thousand for the prior year, an increase of EUR 5,240 thousand;
- The Transportation Solutions Business Unit at 31 December 2010 posted operating profit of EUR 46,294 thousand compared with EUR 43,111 thousand of the prior year, an increase of EUR 3,183 thousand.

EBIT and ROS at 31 December 2010 – 2009 (EUR thousand)



In order to provide additional information on the Group's operating results, financial condition and cash flow, the restated income statement, balance sheet, net financial debt, and statement of cash flows are provided below.

Income Statement (EUR thousand)	**31.12.2010**	31.12.2009

Basic and Diluted	*0.79*	*0.73*[1]

1. Redetermined following the free share capital increase of 5 July 2010.

Notes for reconciling the reclassified Income Statement and the Income Statement:
(*) Includes "Revenue" and "Revenue from related parties".
(**) Includes "Costs from related parties", "Raw materials and consumables used", "Purchase of services" and "Personnel costs", less "Work performed by the Group and capitalised".
(***) Includes the net amount of "Other operating income", "Other operating income from related parties", "Other operating expenses" and "Other operating expenses from related parties".

Balance Sheet (EUR thousand)	31.12.2010	31.12.2009
Non-current assets	263,747	252,010
Non-current liabilities	(46,183)	(42,217)
	217,564	**209,793**
Inventories	127,632	99,178
Contract work in progress	216,928	151,146
Trade receivables	624,808	526,500
Trade payables	(403,133)	(248,168)
Advances from customers	(657,150)	(651,950)
Working capital	**(90,915)**	**(123,294)**
Provisions for short-term risks and charges	(22,417)	(27,726)
Other net assets (liabilities) (*)	(40,921)	(36,098)
Net working capital	**(154,253)**	**(187,118)**
Net invested capital	**63,311**	**22,675**
Capital and reserves attributable to equity holders of the Company	380,411	300,897
Minority interests in equity	1,050	639
Shareholders' equity	**381,461**	**301,536**
Net financial debt (liquidity)	**(318,150)**	**(278,861)**

Notes for reconciling the reclassified Balance Sheet and the Balance Sheet:
(*) Includes "Income tax receivables", other current receivables from related parties (carried under "Current receivables from related parties") and "Other current assets", less "Income tax payables", other current payables from related parties (carried under "Current payables to related parties"), "Other current liabilities", except for financial receivables from related parties (carried under "Current receivables from related parties").

Net invested capital amounted to EUR 63,311 thousand compared with EUR 22,675 thousand in the previous year. The change of EUR 40,636 thousand is due to the increase in non-current items of EUR 7,771 thousand and in net working capital of EUR 32,865 thousand. The change in net working capital is due to the increase in inventories of work in progress and trade receivables and the rise in trade payables.
The net financial position (mainly financial receivables and cash and cash equivalents on borrowings) was EUR 318,150 thousand as compared with EUR 278,861 thousand in 2009, an increase of EUR 39,289 thousand after the payment of dividends of EUR 30,982 thousand (EUR 26,971 thousand in 2009). The financial position at 31 December 2010 (EUR 318,510 thousand) includes EUR 70,643 thousand for the advance payment collected by the Russian customer Zarubezhstroytechnology for the project, recently signed, for the construction of signalling, automation, telecommunications, power supply, security and ticketing systems on the line linking Sirth to Benghazi in Libya.

2.2 Financial Situation

(EUR thousand)	31.12.2010	31.12.2009
Short-term borrowings	3,089	12,187
Medium and long-term borrowings	1,115	2,881
Cash and cash equivalents	(153,320)	(128,541)
BANK DEBT (LIQUIDITY)	**(149,116)**	**(113,473)**
Financial receivables from related parties	(149,150)	(152,792)
Other financial receivables	(21,212)	(14,100)
FINANCIAL RECEIVABLES	**(170,362)**	**(166,892)**
Borrowings from related parties	-	-
Other short-term borrowings	822	353
Other medium- and long-term borrowings	506	1,151
OTHER BORROWINGS	**1,328**	**1,504**
NET FINANCIAL DEBT (LIQUIDITY)	**(318,150)**	**(278,861)**

Cash and cash equivalents at 31 December 2010 came to EUR 153,320 thousand.

Cash Flow Statement at 31 December 2010 was broken down as follows:

Statement of Cash Flows (EUR thousand)	31.12.2010	31.12.2009
Cash and cash equivalents - opening balance	**128,541**	**71,536**
Gross cash flow from operating activities	164,994	145,798
Changes in other operating assets and liabilities	(50,311)	(35,044)
Funds From Operations	**114,683**	**110,754**
Change in working capital	(41,717)	12,203
Cash flow from (used in) operating activities	**72,966**	**122,957**
Cash flow from ordinary investing activities	(6,983)	(8,529)
Free Operating Cash Flow	**65,983**	**114,428**
Strategic investments	-	(3,210)
Other changes in investing activities	-	-
Cash flow from (used in) investing activities	**(6,983)**	**(11,739)**
Dividends paid	(30,982)	(26,971)
Cash flow from financing activities	(12,795)	(26,894)
Cash flow from (used in) financing activities	**(43,777)**	**(53,865)**
Translation differences	**2,573**	**(348)**
Cash and cash equivalents - closing balance	**153,320**	**128,541**

The year 2010 ended with net increase of EUR 24,779 thousand in cash and cash equivalents over the same period of the prior year.

The following are the main changes in the Statement of Cash Flows:
- cash flow from operations of EUR 72,966 thousand, a decrease on the same period the preceding year by EUR 49,991 thousand, mainly due to the change in working capital, which is affected by the rise in trade receivables (EUR 98,308 thousand), work in progress (EUR 65,782 thousand) and inventories (EUR 28,454 thousand) partly offset nu the increase in trade payables (EUR 154,965 thousand);
- cash flow used in investing activities was EUR 6,983 thousand, down EUR 4,756 thousand from the same period of the prior year (EUR 11,739 thousand at 31 December 2009);
- cash flow used in financing activities was EUR 43,777 thousand as compared with EUR 53,865 thousand generated at 31 December 2009; the change is mainly due to the decrease in Group receivables in the December 2010 - December 2009 period as compared with the decrease in the December 2009 – December 2008 period. The decrease was also due to greater dividends paid: EUR 30,982 thousand in 2010, EUR 26,971 thousand in 2009.

The Free Operating Cash Flow (FOCF) before strategic investments for the period at issue amounted to EUR 65,983 thousand from EUR 114,428 thousand at 31 December 2009; the change amounted to EUR 48,445 thousand, as analysed above.

2.3 Alternative non-GAAP performance indicators

The management of Ansaldo STS (hereinafter also ASTS) assesses the Group's earnings and financial performance and that of its business segments based on a number of indicators that are not envisaged by the IFRSs.
As required by Communication CESR/05-178 b, below is a description of the components of each of these indicators:
- ***EBIT:*** the aggregate signifies earnings before taxes and finance income and costs, with no adjustments. Ebit also does not include costs and income resulting from the management of unconsolidated equity investments and other securities, nor the results of any sales of consolidated shareholdings, which are classified on the financial statements either as "finance income (costs)" or, for the results of equity investments accounted for with the equity method, under "share of profit (loss) of equity accounted investments".
- ***Adjusted (Adj) EBIT:*** It is arrived at by eliminating from EBIT (as defined above) the following items:
  - any impairment in goodwill;
  - amortisation of the portion of the purchase price allocated to intangible assets in relation to business combinations, as required by IFRS 3;
  - restructuring costs that are a part of significant, defined plans;
  - other exceptional costs or income, i.e. connected to particularly significant events that are not related to the ordinary performance of the business.

The reconciliation between EBIT and Adjusted EBITA for the periods compared is presented hereunder:

(EUR thousand)	**2010**	2009
Earnings before income taxes, net finance income and costs and share of results of equity accounted investments (EBIT)	137,065	125,052
Impairment of goodwill	-	-
Amortisation of intangible assets acquired through a business combination	-	-
Restructuring costs	2,346	1,495
Total exceptional costs (income)	-	-
Adjusted EBIT	**139,411**	**126,547**

- ***Free Operating Cash-Flow (FOCF):*** This is the sum of the cash flow generated by (used in) operating activities and the cash flow generated by (used in) investment and divestment of intangible assets, tangible assets, and equity investments, net of cash flows from the purchase or sale of equity investments that, due to their nature or significance, are considered “strategic investments”. The calculation of FOCF for the periods concerned is presented in the reclassified statement of cash flows shown in section 2.2.
- ***Funds From Operations (FFO):*** This is cash flow generated by (used in) operating activities, net of changes in working capital. The calculation of FFO for the periods concerned is presented in the reclassified statement of cash flows shown in section 2.2.
- ***Economic Value Added (EVA):*** This is calculated as EBIT net of taxes and the cost of the average value of invested capital for the two periods concerned and measured on a weighted-average cost of capital (WACC) basis.
- ***Operating Working Capital:*** includes trade receivables and payables, work in progress, advances from customers and provisions for risks and charges.
- ***Net Working Capital:*** this is represented by operating working capital less other current assets and liabilities.
- ***Net Invested Capital:*** this is the algebraic sum of non-current assets, non-current liabilities and Net Working Capital.
- ***Net financial debt (liquidity) or Net financial position:*** the template for calculation is consistent with the one in section 127 of the CESR/05-054b recommendations implementing EC Regulation 809/2004.
- ***Orders:*** This is the sum of the contracts executed with contractors during the year which have the contractual characteristics for being booked to the order book.
- ***Order backlog:*** This is the difference between the orders acquired and production revenues for the period of reference, net of the change in contract work in progress. This difference is added to the portfolio of the prior period.
- ***Workforce:*** This is the number of employees reported on the last day of the period concerned.
- ***Return on Sales (ROS):*** This is the ratio between EBIT and revenues.
- ***Return on Equity (ROE):*** this is calculated as the ratio between the net profit and the average value of shareholders’ equity for the two periods concerned.
- ***Research and Development costs:*** this is the sum of costs sustained for R&D expensed and sold. The costs for research expenses are normally referable to the so-called “basic technology”, i.e. rights to the attainment of new scientific knowledge and/or techniques applicable to different new products and/or services. The costs of research sold are those commissioned by the customer against which a specific sale order exists and which have accounting and operational treatment identical to ordinary supply (sale contract, profitability, invoicing, advances, etc.).

2.4 Transactions with related parties

Transactions with related parties concern activities in the ordinary course of business and are carried out at arm’s length (where they are not governed by specific contractual conditions), as is the settlement of interest-bearing payables and receivables.
These transactions mainly relate to the exchange of goods, the performance of services and the generation and use of net cash from and to associated companies, held under common control (joint ventures), consortia, and unconsolidated subsidiaries.
There are no transactions qualifying as atypical and/or unusual[1].

1. as defined in CONSOB communication no. DEM/6064293 of 28 July 2006.

Below are the amounts of transactions with related parties (a breakdown is shown in Notes 15 and 16) at 31 December 2010 and 2009.

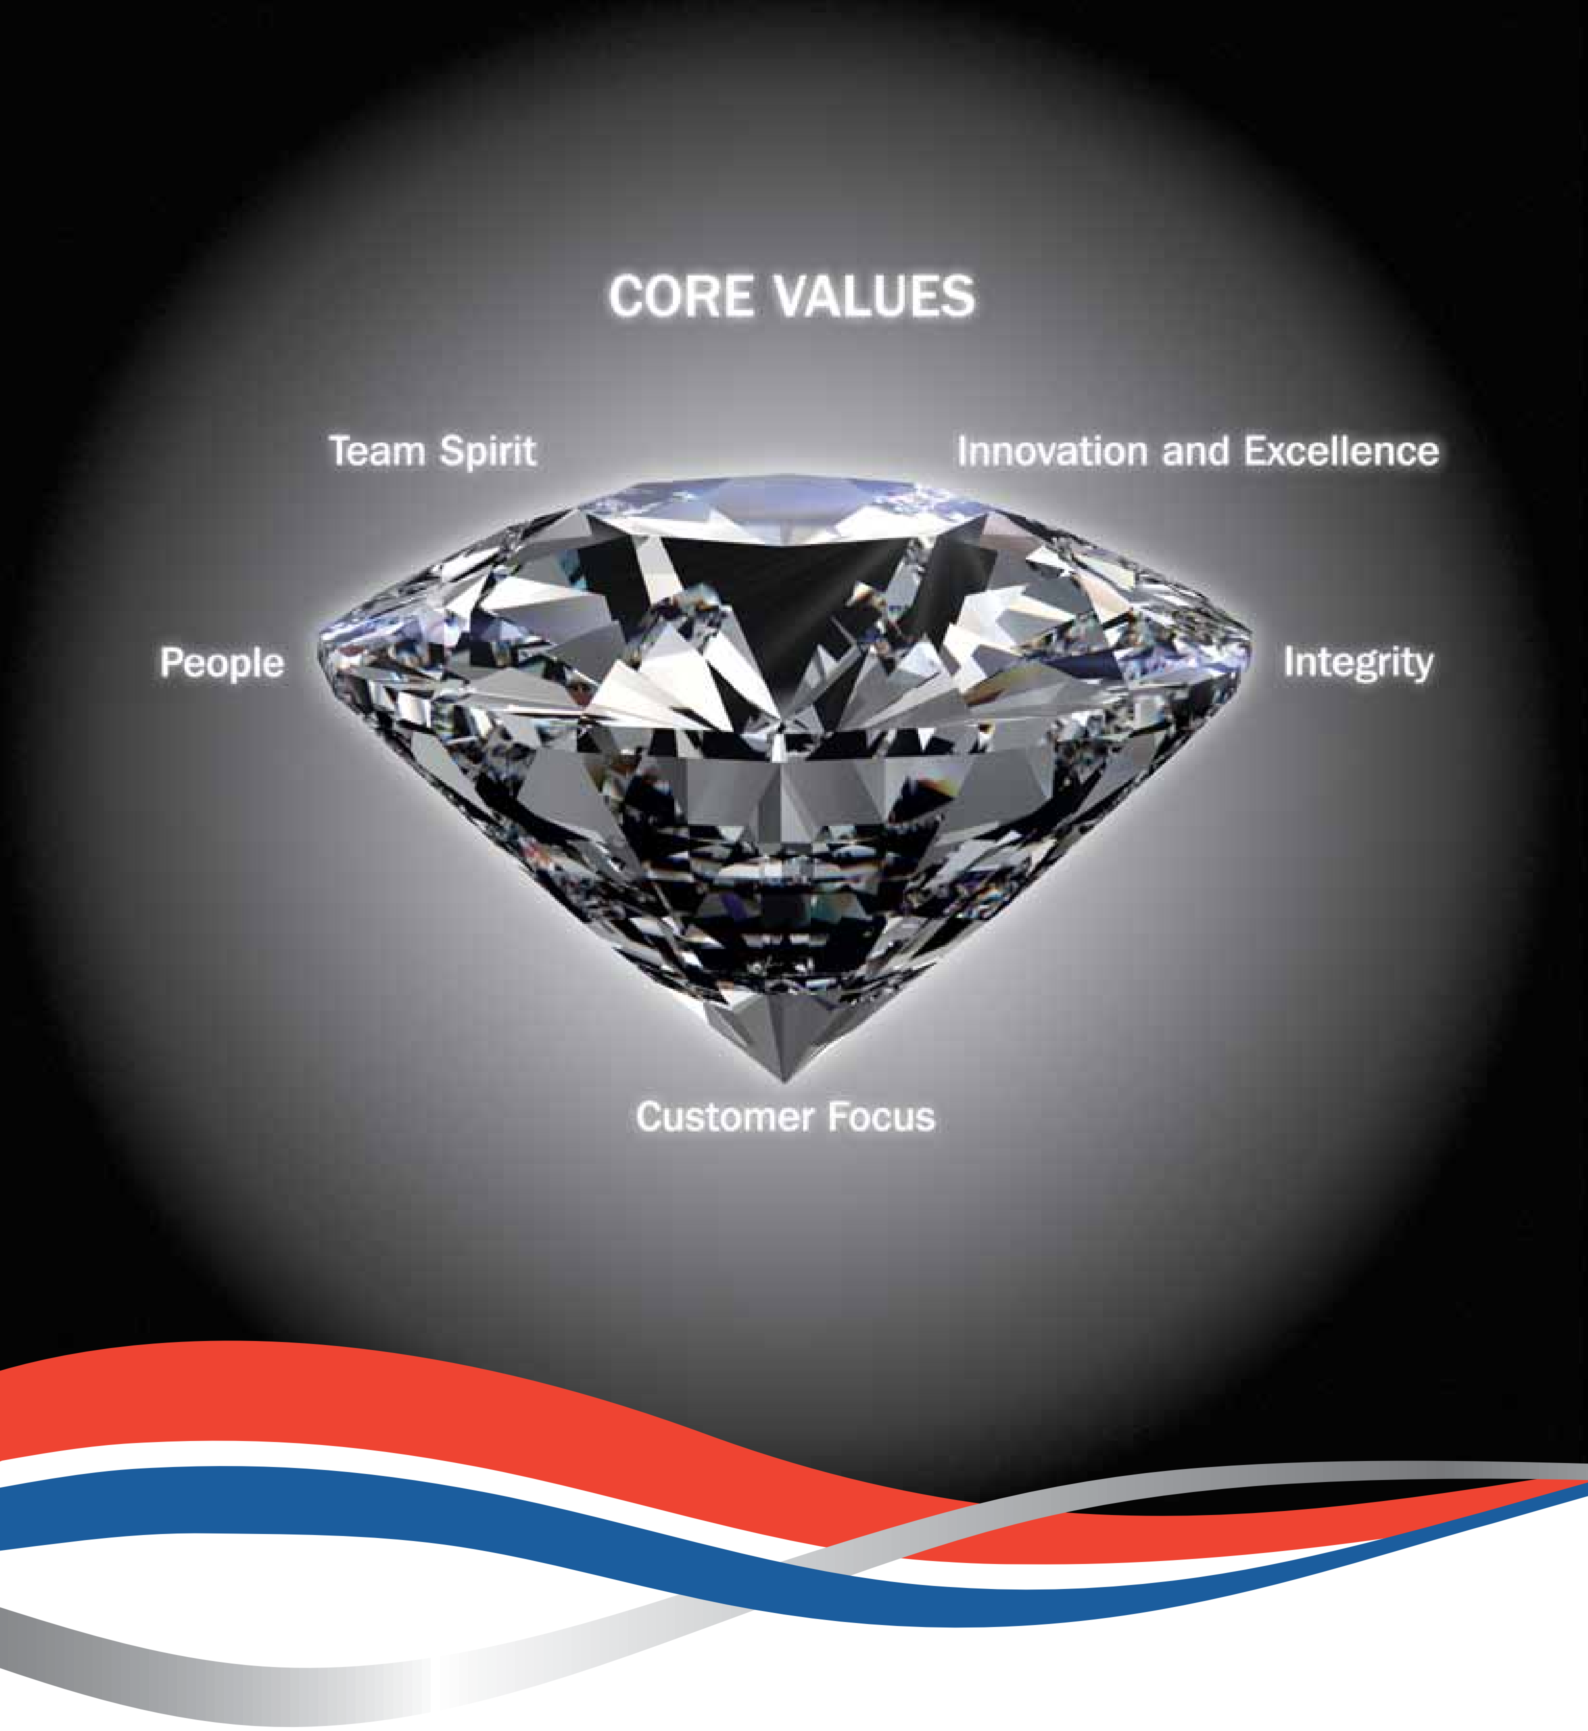
Within the Group rules of corporate governance, specific conduct guidelines were identified to ensure that transactions with related parties are carried out in compliance with methods of procedural and substantial fairness.
All the transactions made with the Parent Company and the related parties were at arm's length.



CODE OF ETHICS

AnsaldoSTS
A Finmeccanica Company

Introduction

The Ansaldo STS Group requires the members of its governance and control bodies, its executives, employees, including those of directly or indirectly owned group companies, and all those who entertain contractual relationships that permit Ansaldo STS to require compliance (the "Recipients") to act with integrity and with respect for the laws and regulations in their respective jurisdictions.

Ansaldo STS adopts and disseminates this Code of Ethics, requiring all Recipients to comply.

The Code of Ethics is a fundamental component of the internal control system, the compliance of which allows Ansaldo STS and companies of the Group to prevent the commission of certain acts or offences proscribed by the laws and regulations of the various jurisdictions in which the Ansaldo STS Group operates.

Ansaldo STS is a multinational industrial group, is listed on the Italian stock exchange, and operating world-wide in a leadership position in the railway and underground transportation sector, to provide innovative solutions whichoffer the best possible combination of safety, efficiency and return on investments.

The Ansaldo STS Group bases its activity on ethical values, compliance with which is critical to the achievement of corporate goals and success in the market and influences the relationships with any parties with an interest in Ansaldo STS (the so called "stakeholders").

This Code of Ethics, therefore, shall be observed by the members of the governance and control bodies, executives, employees, the corporate representatives of directly or indirectly controlled companies, as well as by workers with which Ansaldo STS maintains contractual relationships of any kind, including occasional and/or temporary ones, and by those with whom the Ansaldo STS Group entertains contractual relationships that permit Ansaldo STS to require compliance.

These "Recipients" of the Code of Ethics, in pursuit of their objectives, are expected to act with integrity and with respect for applicable laws and regulations. They take responsibility for any violation of the Code of Ethics, both towards Ansaldo STS and outside, even if such violation does not result in any third party liability for Ansaldo STS.

The Recipients are required to know and are expected to observe the Code of Ethics in the interest of transparency and reputation of the Group. Recipients are also required to enforce these ethical principles within the scope of their responsibilities and functions. Ansaldo STS, through its directors, executives and employees, undertakes to adopt and update the Code of Ethics and to make it known to all those with whom it has business relationships.

The Code of Ethics is a fundamental component of the internal control system. It therefore affirms the principles and rules of conduct, respect for which allows Ansaldo STS and companies of the Group to prevent the commission of certain acts or offences by corporate representatives proscribed by the laws and regulations of the various jurisdictions in which the Ansaldo STS Group operates. As an example, in Italy reference is made to the set of rules of Legislative Decree 231/2001 and to the Organizational, Management and Control Model adopted by the holding company Ansaldo STS S.p.A.

Ansaldo STS promotes the dissemination of the Code of Ethics among the Group's companies. All Ansaldo STS Group companies shall adopt the Code of Ethics after adaptation in accordance with prevailing laws and regulations.

The "CORE VALUES" of Ansaldo STS

Ansaldo STS bases its activity on the following values shared by all those who work within the global organization:

- Customer focus
- Innovation and excellence
- People
- Team spirit
- Integrity

Ansaldo STS bases its corporate operation on a solid ethical foundation consisting of fundamental values and principles.

All persons within the company organization are expected to share such culture and the same moral commitment in pursuing it, embracing entirely the principles expressed herein.

The values in which Ansaldo STS believes and which inspire its business are the following:

Customer Focus:
Ansaldo STS exists thanks to its customers and the extent to which the Company is able to understand and satisfy their needs and expectations and help them solve related problems.

Innovation and Excellence:
Ansaldo STS is a group which is oriented to the continuous technological progress and to the creation and implementation of cutting edge solutions. This is the essential basis of Ansaldo STS's competitiveness in an international market open to global competition.

People:
Customer satisfaction and new product development come from the ability of dedicated professionals. For this reason, Ansaldo STS is a company founded on people, supporting their professional growth and rewarding those who seek and foster the success of the Company. Ansaldo STS operates worldwide and respects the culture of every country. All people within the Company's organization shall endeavour to make Ansaldo STS a place where one is proud to work, where one can learn, and where one can achieve and celebrate success.

Team Spirit:
The Company's operational objectives cannot be achieved by individuals acting alone; thus the Company's employees are able and willing to work together with colleagues within an integrated global organization.

Integrity:
To work together effectively, people must foster mutual trust, which is possible only if all work and behave in a honest, loyal and reliable manner, in complete abidance with the rules. Likewise, customers must be absolutely certain that integrity is a fundamental value for Ansaldo STS, which is reflected in product offerings characterized by the utmost care and attention to safety issues.

General Principles

Integrity and respect for law are fundamental ethical principles with which the Recipients must comply in the performance of their activities and their behaviour.

The Group's directors and executives with their behaviour shall be an example for all employees and co-workers of Ansaldo STS.

Ansaldo STS operates in accordance with applicable regulations, implementing procedures to counteract all forms of illegal activity and demanding complete abidance with the rules of conduct by the Recipients as a requirement for their work.

Ansaldo STS promotes the continuous innovation and excellence, investing in research and development and supporting a corporate culture aimed towards constant innovation.

Ansaldo STS regards the environment as a primary asset to be protected and conducts its activities to this end. The Recipients are bound within the scope of their respective competencies to comply with the relevant laws and regulations and the company procedures in relation to the environment.

Ansaldo STS adopts a system of Corporate Governance inspired by the highest standards of transparency and propriety in business management, in accordance with the laws of the Italian financial markets supervisory authority - Consob – and the Italian Stock Exchange and the laws and regulations of the jurisdictions in which the Company operates.

Ansaldo STS actions and communication are inspired by the principle of transparency, being accountable for its choices and guaranteeing the truthfulness, accuracy and completeness of business information both within and outside the company, in abidance with adequate levels of protection of confidential or inside information.

Ansaldo STS ensures the efficient management of company risks.

The Recipients of the Code of Ethics are required to act with integrity and in compliance with applicable laws and regulations.

Ansaldo STS promotes and implements a corporate culture inspired by responsibility, fairness and ethics in carrying out daily activities and the utmost attention is paid to the Recipients' conduct. Ansaldo STS's directors and executives with their behaviour shall be an example for all employees and co-workers of Ansaldo STS, respecting the Code of Ethics, corporate procedures and rules, promoting the dissemination thereof among the employees and urging them to submit requests for clarification or proposals for updating them where necessary. The directors shall actively propose and implement projects, investments and industrial and managerial actions useful for maintaining and increasing the economic, technological and professional assets of the Company.

Ansaldo STS operates in accordance with local, national and international regulations, implementing procedures to prevent all forms of illegal activity and demanding complete abidance with the rules of conduct, as also provided by the company procedure, by the Recipients as a requirement for their work. The Recipients are therefore required to be familiar with and observe the laws and regulations in force in every country in which Ansaldo STS operates. This obligation also includes attention towards and observance of the regulations on competition, both in the national and international market. All Recipients' transactions with Public Institutions and Authorities must be marked by the highest degree of fairness, transparency and cooperation, in full observance of applicable laws and regulations and of their institutional roles.

The Recipients, within the scope of their respective competencies and functions, are bound to strict compliance with corporate procedures. These regulate the conduct of operations and corporate transactions in such a way so as to make it possible to identify the persons responsible for corporate decision-making, authorization and conduct of operations. Through compliance with corporate procedures, the traceability of each process related to corporate activity must be ensured, so that it is possible to reconstruct the motives behind the decisions made, the persons responsible and any relevant factors for the purpose of assessing the propriety of the choices made.

AnsaldoSTS promotes continuous innovation and excellence, investing in research and development and supporting a corporate culture aimed towards constant innovation, both through the enhancement of our technological assets and the participation of our people in the creation of new ideas and the testing of new applications.

Ansaldo STS regards the environment as a primary asset to be protected for the benefit of future generations and manages its activities to this end, seeking a balance between economic initiatives and environmental protection requirements as well as compliance with relevant laws and regulations. Ansaldo STS operates in full compliance with environmental laws and regulations and requires the same compliance to the Recipients. Therefore they are bound within the scope of their respective competencies to comply with the relevant laws and regulations and the company procedures in relation to the environment.

Ansaldo STS adopts a Corporate Governance system inspired by the highest standards of transparency and fairness in business management. This corporate governance system complies with the provisions of the law and with the regulations of the Italian financial markets supervisory authority - Consob – and the Italian Stock Exchange, and is also in line with the content of the Italian Stock Exchange's Self-regulatory Code for listed companies - voluntarily adopted by Ansaldo STS - and with international best practice. Such a corporate governance system aims at maximising value to the benefit of shareholders, controlling enterprise risks, maintaining transparency towards the market and balancing the interests of all shareholders, particularly the small ones.

Ansaldo STS actions and communication are inspired by the principle of transparency, being accountable for its choices and guaranteeing the truthfulness, accuracy and completeness of business information both within and outside the company, in abidance with adequate levels of protection of confidentiality or inside information.

Ansaldo STS provides, within the limits established by applicable laws and in a timely, complete and accurate manner, the information requested by shareholders, customers, suppliers, authorities, institutions, and entities and other stakeholders in the performance of their functions.

The information distributed on the occasion of extraordinary transactions undertaken by the Company is prepared following procedures that ensure adequate controls for the protection of reliability of communications to the market.

Ansaldo STS ensures the efficient management of company risks by implementing the highest standards established for companies operating in regulated markets and in strategic sectors, by means of organizational structures and operating procedures which are constantly and continuously monitored and improved.

Rules of conduct

Human resources

Professionalism, responsibility, honesty, loyalty, and the commitment of human resources are the determining factors for the Company's success.

The Company is committed to protecting the moral integrity of all employees and co-workers in the workplace and promoting a multicultural working environment that respects and enhances the characteristics and unique nature of every individual. The selection of each employee and co-worker in any capacity whatsoever is conducted solely on the grounds of professional expertise and competence. Ansaldo STS supports its employees by means of a training and career development system aimed at focusing on key skills and facilitating the sharing of knowledge and best practices.

Ansaldo STS is also committed to ensuring the health of workers, in compliance with applicable laws, by taking all necessary and appropriate protective measures on the basis of the best scientific and technical know-how and by promoting a culture focused on safety. Respect for workers' dignity is ensured also through respect for privacy in correspondence and professional relationships.

Directors, employees and co-workers in various capacities are required to act in the interest of Ansaldo STS, avoiding any situation that might cause a personal interest to interfere with the Company's interest. Any conflicts of interest must be promptly reported in the manner prescribed in the Code of Ethics. Also consultants and business partners must make specific commitments to avoid conflicts of interest.

Ansaldo STS encourages people to do their best, rewarding professionalism and responsibility and promoting cooperation and team spirit at all organizational levels. Professionalism and responsibility together with honesty, loyalty, and the commitment of human resources are the determining factors for the Company's success in achieving its objectives in global competition.

Ansaldo STS works to overcome any kind of discrimination, corruption, exploitation of child or forced labour and, more generally, to promote the dignity, health, freedom and equality of workers, in line with the United Nation's Universal Declaration of Human Rights, the fundamental Conventions of the International Labour Organization (ILO) and the OECD's Guidelines.

Ansaldo STS is committed to comply with laws and regulations of the jurisdictions in which the Group operates in regard to all human resources.

The Company makes the following commitments with respect to its human resources, in the areas described below.

Work environment

Ansaldo STS is committed to ensuring the moral integrity of all its employees and co-workers and to providing dignified working conditions. Harassment of any kind in any work relationship is absolutely forbidden and, in general, to behave in any way that might compromise the peaceful performance of the functions assigned and otherwise cause prejudice to the dignity of all workers.

Ansaldo STS promotes a multicultural working environment that respects and enhances the characteristics and unique nature of every individual, providing its employees in various countries in which the company operate with the ability to use their talents effectively also helping to achieve Ansaldo STS's objectives.

Selection

The selection of each employee and co-worker in any capacity is conducted solely on the grounds of professional expertise and competence according to the Company's needs, avoiding favouritism and partiality of any kind. Ansaldo STS's selection policy offers equal work opportunities, promoting fair treatment on the basis of individual expertise and skill.

The staff of Ansaldo STS is employed in accordance with the laws and regulations applicable in the various countries in which it operates. In particular, Ansaldo STS shall not allow or tolerate any employment relationships involving a violation of applicable labour regulations concerning child, women and immigrant labour.

Employee Development

Ansaldo STS supports its employees by means of a training and career development system aimed at focusing on key skills and facilitating the sharing of knowledge and best practices, using communication as a tool to support constant improvement.

Ansaldo STS follows a policy based on recognition of merit and equal opportunity and provides specific programs for professional training and acquisition of improved skills.

Employees are required to cultivate and encourage the acquisition of new competencies, abilities and knowledge, while executives and heads of functions shall take greatest care to enhance and improve the professional expertise of their co-workers by creating the conditions for developing their skills and realising their potential.

Safety and health of workers

Ansaldo STS, complying with applicable legislation in individual countries, is committed to safeguarding workers' health, adopting all necessary and appropriate measures, based on the best technical and scientific know-how, to create a work place that meets the highest standards in matters of health and safety.

Ansaldo STS also fosters a culture focused on safety, for the protection of workers' health in the workplace, developing risk awareness and promoting responsible behaviour by all its employees and co-workers.

Protection of privacy

Ansaldo STS is committed to the protection of privacy of all the Recipients and, in general, of anyone having contacts with the Company for any reason in compliance with applicable laws in individual countries for the protection of the privacy.

The dignity of each worker shall be fostered through the respect of privacy in correspondence and professional relationships between employees where there is an expectation of privacy and by prohibiting interferences in meetings or dialogues and any intrusion or forms of control that could be personally or professionally damaging.

Conflict of interest

Between the directors, employees and co-workers of Ansaldo STS, at any level, there is a relationship of trust which is based on the assumption that all will act in the interest of Ansaldo STS in compliance with the principles set forth in the Code of Ethics. Therefore, each of these persons must avoid any situation and abstain from any action that could cause a personal or family related interest, either direct or indirect, to interfere with and hamper his/her capacity to take impartial and objective decisions in the interest of the Company.
Any situation of conflict or potential conflict, must be promptly communicated in detail to one's supervisor and, if appropriate, to the Supervisory Body of the Code of Ethics. The individual in potential conflict shall refrain from being involved or participating in any act that might prejudice the

Company or any third parties, or damage their image. Similarly, consultants and business partners must also undertake specific commitments intended to avoid any situation of conflict of interests, refraining from using, in any way and for any reason whatsoever, the activity carried out on behalf of the Company with a view to achieving illicit advantages for themselves or for others.

Ansaldo STS also requires that anyone who becomes aware of a situation of conflict of interest must promptly report it to the Supervisory Body of the Code of Ethics in the manner established by the Code of Ethics.

External Relations

Relations with authorities and public administrations shall be conducted and managed fairly, transparently and in compliance with the laws and with the principles set forth in the Code of Ethics and the internal policies and procedures.

In business relationships with clients, consultants, suppliers, partners and any other commercial counterpart, Ansaldo STS is guided by principles of integrity and respect for law and the values expressed in the Code of Ethics. The selection of the commercial counterparts shall be made based on objective, transparent and documented evaluation criteria. Ansaldo STS refrains from any relationship with persons connected to criminal or terrorist organizations or organizations which operate in violation of applicable laws and regulations. In order to prevent the risk of undertaking operations of any nature involving proceeds from committed crimes, Ansaldo STS shall abstain from accepting for whatever reason any payments in currency or equivalent.

Ansaldo STS prohibits all Recipients from accepting or offering money, gifts or undue favours. Recipients who receive money, gifts or undue favours that conflict with Ansaldo STS's policy shall immediately notify his/her supervisor for proper handing. Any irregularities in the presence of requests for or offers of money, gifts or favours shall also be reported to the Supervisory Body of the Code of Ethics.

Ansaldo STS does not encourage or discriminate against, directly or indirectly, any political organisation. The Company does not make contributions to political parties, movements, committees or organisations.

Authorities and public administrations

Relations with authorities and public administrations shall be conducted and managed in compliance with law and with the principles set forth in the Code of Ethics and AnsaldoSTS's specific policies and procedures.

Such relations, as with the management of financial resources, shall be executed by authorised corporate functions. In particular, relations with persons, authorities and international public administrations are entertained at appropriate levels, by authorized and properly identified persons.

Authorities and public administrations may include customers, public officials or persons in charge of a public service, international institutions, the judiciary, public authorities as well as private partners who are public service licensees. The operations performed with such persons may include tenders, management of contracts, authorizations, licenses, concessions, requests for and/or management of public financing, checks or communications with public authorities.

With respect to requests of any kind from a Judicial Authority and in connection with any contact with the same, Ansaldo STS is committed to providing the utmost cooperation and will refrain from behaviour that may cause obstruction. Ansaldo STS and its employees will act in full compliance with the laws and in conformity with the principles of loyalty, fairness and transparency.

In relationships with authorities and public administrations, Ansaldo STS undertakes to represent its interests and needs according to fairness and transparency, respecting the independence and impartiality of the public administration's choices.

Customers, consultants, suppliers, partners and any other commercial counterparty

In conducting its business, Ansaldo STS is guided by the principles of integrity and respect for law and the values expressed in the Code of Ethics as well as by openness to the market. Ansaldo STS requires similar behaviour from all those with whom it entertains commercial and/or financial relationships that permits Ansaldo STS to require compliance. Ansaldo STS is committed to act ethically with respect to all its customers.

Ansaldo STS refrains from any relationship whatsoever with:

- persons that are known to be, or are reasonably suspected of being part of or performing activities either in Italy or abroad in support of any criminal organization of any nature whatsoever, including mafia-like organizations, those involved in the trafficking of human beings or in the exploitation of child labour;
- persons or groups acting for the purposes of terrorism; regarding as such any conduct that may cause serious damage to a Country or an international organization, carried out in order to cause a person to perform or abstain from performing any act or to destabilize or destroy basic political, constitutional, economic and social structures of a Country or an international organization;
- persons that are known to use or are reasonably suspected of using child labour or staff hired in an irregular manner or who otherwise operate in violation of the laws and regulations regarding the protection of workers' rights.

In order to prevent the risk of undertaking, even unknowingly, operations of any nature involving money, assets or other utilities that are the proceeds of crime, Ansaldo STS shall abstain from accepting for any reason any payments in currency, bearer securities or payments through unauthorised intermediaries or through any third parties in such a manner as to make it impossible to identify the payer, or from any relations with persons having their headquarters or operating in countries where the transparency of corporate business is not guaranteed and, in general, from performing operations that might obscure the transparency of cash flows.

The selection of other parties in transactions, business partners, consultants, suppliers shall be made based on objective, transparent and documented evaluation criteria, such as quality, convenience, price and competence in accordance with the principles of this Code of Ethics and corporate procedures, as required by the specific internal policies and procedures, in writing and in observance of the hierarchical structures.

Any commercial relationships that exist between the companies of the Group must be duly formalized and conducted in accordance with the principles of fairness, effectiveness and protection of the respective interests, paying particular attention to aspects relating to the circulation of economic resources.

Ansaldo STS entertains relationships with third parties, including agents, consultants and partners for the development of commercial initiatives (such as consortia and the like), who base their conduct on ethical principles and professionalism. Specific contractual clauses are established with agents, consultants, partners and/or intermediaries in order to ensure the traceability of activities performed by them through periodic reports in relation to their abidance to assigned tasks and responsibility.

Gifts, benefits and promises of favours

In conducting business dealings with consultants, clients, suppliers, other parties in transactions, business and/or financial partners, no acts of giving or benefits (both direct and indirect), gifts, acts of courtesy or hospitality of any kind shall be made, unless they are of such a kind and value that do not compromise the image of the Company, and that may not be interpreted as aiming at obtaining preferential treatment. In all cases, any gifts, acts of courtesy or form of hospitality shall be reported to and submitted to the approval by the persons charged to such effect.

Recipients who receive, gifts or benefits that are in conflict with Company policy shall immediately notify his/her supervisor for proper handling. The person who offered the gift or giveaways shall be informed of the Company policy on this issue.

Any irregularities in the presence of requests for or offers of money, gifts or favours shall also be reported to the Supervisory Body of the Code of Ethics.

Political organizations

Ansaldo STS does not encourage or discriminate against, directly or indirectly, any political organisation.

The Company does not make contributions of any kind or in any form, whether direct or indirect, to political parties, movements, committees and political organisations, to their representatives and candidates, except as required by specific laws.

The above does not apply, however, to charitable initiatives that Ansaldo STS regards as being appropriate and supporting the Ansaldo STS values.

Rights and Sustainability

Ansaldo STS does business in a sustainable manner, with a continued commitment to economic and social development and the protection of human health and the environment.

Ansaldo STS upholds and promotes human rights in every context in which it operates, by creating equal opportunities for its people and fair treatment for all - regardless of any protected characteristics such as race, nationality, political creed, religion, gender, age, minority status, diverse ability, sexual orientation, personal or social condition – and always respecting the dignity of each individual and each employee. Amongst other things Ansaldo STS ensures freedom of assembly and prohibits use of illegal labour.

Ansaldo STS ensures safe and healthy work environments and manages its production processes with the least possible environmental impact, striving to apply a precautionary approach to the protection of human health and the environment.

Ansaldo STS contributes to the social and economic development of the communities and regions in which it operates, also by transferring its technologies and expertise and disseminating its know-how.

Ansaldo STS strives to promote and consolidate a culture of sustainability by developing the awareness of risks and encouraging responsible behaviour from all its stakeholders.

Protection of company assets

The use of corporate assets must comply with the law, applicable regulations and with corporate procedures.

Ansaldo STS adopts appropriate measures and initiatives to protect its intellectual property and not to infringe that of others.

The use of IT and electronic tools must be characterized by the respect for principles of fairness and must ensure the integrity and authenticity of the processed data. Ansaldo STS adopts measures capable of ensuring that access to and the use of electronic and IT data is done in compliance with current regulation and with the privacy of individuals who may be involved.

Relationships with the press and the media are founded upon the respect of the right of information and protection of the market and the interests of stakeholders and conducted in compliance with the Code of Ethics and corporate procedures. It is strictly prohibited that any form of investment be made, originating from the knowledge of inside information.

To safeguard the entirety of the Company assets, it is specifically forbidden, except as expressly permitted by law, to perform extraordinary operations on shares and on other items of the net assets in violation of the regulations for the protection of creditors.

Recipients are required to keep documents, know-how, corporate operations and, in general, all information acquired in the performance of their duties strictly confidential.

Ansaldo STS endeavours to work so that the use of available resources, carried out in compliance with applicable law and the corporate by-laws, and in line with the values of the Code of Ethics, is directed towards increasing and strengthening the Company's assets, in protection of the Company itself, its shareholders, creditors and the market. Therefore, the use of corporate assets must comply with the law and the applicable regulations as well as with operating procedures.

Intellectual Property

Ansaldo STS adopts appropriate measures and initiatives to protect its intellectual property and not to infringe upon that of others. In particular, Ansaldo STS is committed to:

- not performing any act of disposition and/or use, in any form or manner, of trademarks and names and other distinctive signs, even combined ones, of which it does not hold exclusive ownership and/or legitimate title to use;

- ensuring the security, integrity, proper use and operation of systems, programmes or IT and electronic data of the Company or third parties, protecting the related intellectual property rights and the integrity of information made available to the public through the internet.

Moreover, in its relations with suppliers, when the formulas and/or compositions of goods or trademarks to be used for supplies are not indicated or supplied by Ansaldo STS, the Company implements adequate procedures so that the supplier ensures and guarantees that the goods and their intended use do not infringe upon third parties' rights relating to intellectual property (trademarks and patents).

In such relations, the Company adopts appropriate indemnity measures for any claim, legal action and requests for compensation made by third parties due to acts of unfair competition, infringement of patents or patent applications, of trademarks or registered designs and of industrial and intellectual property rights related to raw materials, semi finished goods, finished products, services purchased from third parties.

Finally, Ansaldo STS only uses ideas or creative works (such as, but not limited to, text, sketches, illustrations, designs, trademarks, etc.) of which it has exclusive ownership by virtue of their creation by Ansaldo STS employees or contract rights agreed with third parties by means of contractual documents.

Use of IT tools

The use of IT and electronic communication tools must be characterized by respect for the principle of fairness and must be such to ensure the integrity and authenticity of the processed data, for the protection of the interests of the Company and third parties, with particular reference to authorities and public administrations.

Ansaldo STS adopts measures capable of ensuring that access to electronic and IT data is done in compliance with current regulation and respect for the privacy of individuals to protect the confidentiality of information and to prevent improper interference by unauthorized individuals.

Management of information

Ansaldo STS ensures full transparency of choices made offering the market all necessary information so that the investors' decisions can be based on complete and correct information. The Group's communications are characterized not only by strict compliance with statutory and regulatory provisions but also by comprehensible language, exhaustiveness of information, promptness and informational symmetry in respect of all investors.

Relationships with the press and the media are founded upon the respect of the right of information and protection of the market and the interests of stakeholders and conducted in compliance with the Code of Ethics and corporate procedures.

External communications shall follow the principles of truthfulness, fairness, transparency, congruity and shall aim at disseminating the policies, programmes and plans of the Company.

Any request for information from the press or the media received by personnel of Ansaldo STS shall be reported in advance to the officers in charge of external relations for proper communication.

It is strictly prohibited that any form of investment be made, whether direct or through intermediaries, originating from knowledge of inside information (i.e. information which is not in the public domain and which, if made public, would be likely to affect the price of financial instruments) acquired in the course of the activity carried out within the Group. The communication or dissemination of such information shall not be carried out in any form whatsoever, outside the normal performance of the functions assigned. In compliance with applicable rules and regulations, Ansaldo STS shall adopt appropriate measures to protect price sensitive information, so as to prevent access by any unauthorized person or handling of such information in an inappropriate manner.

Transactions in shares and corporate capital

To safeguard the entirety of the Company assets, it is specifically forbidden, except as expressly permitted by law, to perform extraordinary operations on shares and on other items of the net assets in violation of the regulations for the protection of creditors.

Furthermore, it is forbidden to fictitiously form or increase share capital and to pay off, in case of winding-up, shareholders' claims to the detriment of creditors.

Confidentiality obligations

Due to the peculiarity and importance of the sectors of activity of the Company (such as technologies, protected technologies for railway transportation in safety conditions, scientific research), all Recipients are required to maintain the utmost confidentiality of any proprietary information, and shall not disclose or inappropriately handle information about documents, know-how, research projects, company business activities, and in general about any information acquired in the performance of their duties.

In particular, confidential or secret proprietary information means all information subject to specific laws or regulations as they pertain, for instance, to security in the transportation system, inventions, scientific discoveries, protected technologies or new industrial applications, as well as information declared secret by contract. Confidential information is also all information acquired in the performance of working activities or through such activities, whose circulation and use could jeopardise or harm the Company and/or create unjust enrichment of the employee.

Any breaches of their confidentiality obligations and/or violation of the Code of Ethics by the Recipients would harm the relationship of trust with the Company and may lead to disciplinary action or the application of contractual sanctions.

Implementation of the Code of Ethics

This Code of Ethics applies to all entities of the Ansaldo STS Group. The responsibility for the implementation of the Code of Ethics, its application and updating is a duty of the directors and employees of Ansaldo STS.

Any violations of or failure to apply the Code of Ethics can be reported to a special-purpose Supervisory Body of the Code of Ethics. Persons who make such reports in good faith shall be protected from any form of retaliation.

Ansaldo STS promotes knowledge of and compliance with the Code of Ethics, the specific procedures and their updates among all Recipients. In case of any non-observance, appropriate disciplinary action or contractual sanctions will take place.

Application, dissemination, training

This Code of Ethics applies to all entities of the Ansaldo STS Group. Ansaldo STS promotes the dissemination of the Code of Ethics among the Group's companies so that they implement it as an effective management tool, after adaptation in accordance with prevailing laws and regulation. The responsibility for the implementation of the Code of Ethics and its application is a duty of the directors and employees of Ansaldo STS.
Any violations of or failure to apply the Code of Ethics may be reported to a special-purpose Supervisory Body of the Code of Ethics, identified in the various companies of the Ansaldo STS Group, in accordance with the rules applicable to the specific company. Such body may recommend supplements and amendments to the Code of Ethics. The Company ensures that no-one in the workplace is subject to any retaliation, illegal conditioning and discriminating treatment of any kind, for having made a good faith report of a violation or non-application of the Code of Ethics to the Supervisory Body of the Code of Ethics. As a consequence of the said report, the

Company shall promptly arrange the necessary investigation and take adequate disciplinary measures, in accordance with the rules applicable to the specific company of the Group.

Ansaldo STS promotes the knowledge and obedience of the Code of Ethics, the specific procedures and their updates among all Recipients. In case of any non-observance, appropriate disciplinary action or contractual sanctions will take place. The Recipients are required to be familiar with the contents of the Code of Ethics - asking and receiving any necessary explanations on its interpretation from the company's leadership - to observe the Code and to contribute to its implementation. Employees can report not only to the Supervisory Body of the Code of Ethics, but also to their superiors any deficiency, violations or attempted violations that they are aware of.

Ansaldo STS also promotes and encourages cooperation among the Recipients to develop compliance with, knowledge and implementation of the Code of Ethics and of specific policies and procedures, within the scope of each Recipient's competence and functions.

To this end, the Company provides specific training/informative courses for the Recipients, elaborated in accordance with the different needs and responsibilities of the various participants.

Sanctions system

Violations of the principles set forth in the Code of Ethics and in the specific procedures shall be followed up by Ansaldo STS in accordance with the policies, procedures and regulations applicable to the specific company of the Group.

Annex - Implementation of the Code of Ethics in Ansaldo STS S.p.A.

With regard to the implementation of the Code of Ethics in the holding company Ansaldo STS S.p.A. the following is noted:

- the Supervisory Body of the Code of Ethics coincides with the Supervisory Body of the Organizational, Management and Control Model pursuant to Legislative Decree 231/2001;
- in order to facilitate the flow of notifications and information to the Supervisory Body a dedicated information channel has been set up (OdV@ansaldo-sts.com) through which all who become aware of any unlawful conduct can report, freely, directly and in a confidential manner to the Supervisory Body;
- for a description of the Sanctions System see paragraph 6 of the Organizational, Management and Control Model.

Approved by the Board of Directors
of Ansaldo STS in the meeting
of June 28th 2012.

MR BRIAN W HODGES

MANAGING DIRECTOR AND CHIEF EXECUTIVE OFFICER (AGE 60)

Brian has been Chief Executive of the Bradken business since 1997. He has guided Bradken and its culture through periods of considerable change and corporate activity with four different owners during his tenure as Chief Executive. Over the course of his career, Brian has gained considerable management and leadership experience in raw material production and processing, supply and logistics and steel manufacturing. Brian holds a Bachelor of Chemical Engineering with Honours from the University of Newcastle.

MR STEVEN PERRY

CHIEF FINANCIAL OFFICER (AGE 47)

Steven has been with Bradken since 1990. Having progressed through various other finance-based roles he was appointed Chief Financial Officer in 2011 after nine years as Commercial Manager Mining Products. He is responsible for finance, treasury, taxation, investor relations, investments, and audit and insurance. Steven holds a Bachelor of Commerce (Accounting) from the University of Newcastle, a Master of Business Administration (Advanced) from the University of Western Australia and is a member of CPA Australia.

MR WAYNE G HERBERTSON

GENERAL MANAGER HUMAN RESOURCES (AGE 52)

Wayne was appointed General Manager Human Resources in December 2004. He is responsible for all aspects of human resources, occupational health and safety and management systems. Prior to joining the Bradken business, Wayne held senior positions with Siemens and BHP Steel. Wayne holds a Master of Applied Science Metallurgy, Bachelor of Applied Science Metallurgy, Bachelor of

Applied Science Multidiscipline, Associate Diploma of Theology and a Diploma in Occupational Health and Safety.

MR JOHN SAAD
CHIEF TECHNICAL OFFICER (AGE 50)
John has been with Bradken for 24 years and was appointed Chief Technical Officer in March 2005. He is responsible for Bradken's technological direction, process and product innovation and advancement. John has had considerable experience in all divisions of Bradken previously occupying positions as a multi-site manufacturing manager, Technical and Product Development Manager for Mineral Processing and Head of Rail Engineering. He assumed responsibility for the CMS Industrial Services business in June 2009. John holds a Bachelor Degree in Metallurgical Engineering from the University of New South Wales.

MR ENDA SHERIDAN
EXECUTIVE GENERAL MANAGER MINING PRODUCTS (AGE 49)
Enda has been with the Bradken business for 21 years and was appointed General Manager Mining in 2004 following five years as General Manager Industrial. His responsibilities include the management of the Mining business and Bradken’s manufacturing facilities at Runcorn and Mackay in Queensland, Welshpool, Wundowie and Bassendean in Western Australia, Mount Thorley and Muswellbrook in New South Wales and Wodonga in Victoria. Enda has held a number of production, technical and marketing positions with Bradken. Enda holds a Bachelor of Materials Engineering from the University of Limerick, Ireland and a Master of Business Administration from the University of Newcastle.

MR ANDREW J ALLEN
GENERAL MANAGER BUSINESS DEVELOPMENT (AGE 51)

Andrew has a 30 year career history with Bradken and was appointed General Manager Business Development in May 2011. Prior to this Andrew was General Manager of the Rail Division from June 2009, General Manager of Bradken's Industrial Division from 2004, following his appointment as General Manager Mineral Processing in 1998. In his new role as head of the Corporate Strategy Group, he will focus on expediting Bradken's global expansion of manufacturing and new business opportunities. He has gained extensive manufacturing and technical expertise over his long operational and management history within the Bradken business. Andrew holds an Associate Diploma in Metallurgy Engineering from The Sydney Technical College.

MR STEPHEN P CANTWELL
GENERAL MANAGER RAIL (AGE 53)

Stephen joined Bradken in July 2011 with more than 30 years' experience in a broad range of strategic, functional and customer-facing roles within multi-billion dollar national and international business environments. As a leading Australasian transport and logistics executive with a combination of extensive functional, operational and commercial experience, Stephen brings his executive management experience in business development, corporate strategy and planning to Bradken's Rail Division as it progresses from a freight car manufacturer to a full service provider. Stephen holds a Business Degree majoring in Operations Research and Information Systems from The University of Southern Queensland, a Graduate Diploma in Transport Management and a Master of Business Degree from The Royal Melbourne Institute of Technology.

He is also a fellow of the Chartered Institute of Transport and Logistics and the Centre for Integrated Engineering Management.

KEVIN T MCDERMED

CHIEF OPERATING OFFICER ENGINEERED PRODUCTS (AGE 54)

Kevin was named the Chief Operating Officer of the Engineered Products Division in October 2013. He joined Bradken as part of the AmeriCast Technologies acquisition in August 2008, serving as President of the Industrial Products business unit from that time. Kevin previously served as the Chief Financial Officer of AmeriCast, and its predecessor Atchison Casting Corporation, for 17 years. Kevin holds a Bachelor of Science in Business Administration degree from Kansas State University and an MBA from Washburn University.

MR BRADLEY J WARD

EXECUTIVE GENERAL MANAGER - MINERAL PROCESSING (AGE 47)

Brad has been with the Bradken business for 27 years and was appointed Executive General Manager – Mineral Processing in June 2012. Prior to this appointment Brad held the position of President – Resource Products in the United States from July 2009, having previously held the positions of President – Bradken Products and Integration in the United States following the 2008 acquisition of Americast, and General Manager of the Mineral Processing Division in Australia. Brad has gained extensive management, sales, marketing and manufacturing experience over his extensive operational and management career with the Bradken Group and in his current role manages Bradken's Mineral Processing consumable products global business.

Directors' report

Your directors present their report on the consolidated entity (referred to hereafter as the Group) consisting of Bradken Limited (referred to hereafter as the Company) and the entities it controlled at the end of, or during, the year ended 30 June 2011.

The report has been divided into five sections as follows:

A. General information
B. Corporate governance
C. Review of operations
D. Remuneration report
E. Other information

A. General information

Principal activities

During the year the principal activities of the Group consisted of:

- supply and service of wear components for mining and earthmoving equipment
- supply of equipment and consumables to the mineral processing, quarrying and power markets
- supply of cast, machined and fabricated components and highly engineered steel castings to the energy, industrial and rail transport industries
- manufacture and maintenance of freight rollingstock products
- supply of foundry consumables to the foundry and steelmaking industries

There were no major changes in the nature of the activities of the Group during the period.

Directors

The following persons were directors of Bradken Limited during the whole of the financial year and up to the date of this report unless otherwise noted:

Nick Greiner	Greg Laurie	Eileen Doyle - from 1 July 2011
Brian Hodges	Vince O'Rourke

Former directorships in the last three years

Dyno Nobel Limited.

Special responsibilities

Member of Audit and Risk Committee.

Interest in shares

22,148 ordinary shares in Bradken Limited.

Company Secretary

The Company Secretary is Mr Bruce Arnott, B.Com, CPA. Mr Arnott joined the Group in 2005 as Chief Financial Officer (CFO) and is also responsible for accounting, finance, treasury, taxation, supply, investor relations, investments, audit, risk and insurance. Prior to joining Bradken Mr Arnott held various senior finance positions within OneSteel, BHP and Tubemakers.

Meetings of directors

The number of meetings of the Company's board of directors and of each board committee held during the year ended 30 June 2011, and the number of meetings attended by each director were:

Director	Full meetings of directors *		Audit and Risk Committee meetings		Human Resource Committee meetings	
	A	B	A	B	A	B
Nick Greiner	12	12	**	**	3	3
Brian Hodges	12	12	**	**	**	**
Phil Arnall	11	12	5	5	3	3
Greg Laurie	11	12	5	5	**	**
Vince O'Rourke	11	12	3	5	3	3
Peter Richards	12	12	5	5	**	**

A Number of meetings attended

B Number of meetings held during the time the director held office during the period

* Bradken Limited does not have a fully constituted Nominations Committee, however, as and when required the full Board participates as the Nominations Committee in order to fulfill its corporate governance responsibilities

** = Not a member of the relevant committee

B. Corporate governance

The Company and the Board are committed to achieving and demonstrating the highest standards of corporate governance. This statement outlines the main corporate governance practices in place throughout the financial year, which comply with the best practice recommendations released by the Australian Stock Exchange Corporate Governance Council in 2010 unless otherwise stated.

The relationship between the Board and senior management is critical to the Group's long-term success. The directors are responsible to the shareholders for the performance of the Group in both the short and the longer term and seek to balance sometimes competing objectives in the best interests of the Group as a whole. Their focus is to enhance the interests of shareholders and other key stakeholders and to ensure the Group is properly managed.

Day to day management of the Group's affairs and the implementation of the corporate strategy and policy initiatives are formally delegated by the Board to the Managing Director and senior executives.

A description of the Group's main corporate governance practices is set out below and on the Company's web site. All these practices, unless otherwise stated, were in place for the entire year.

The board of directors

The Board operates in accordance with broad principles set out in its charter which is available from the corporate governance information section of the Company's website at www.bradken.com. The charter details the Board's composition and responsibilities.

Board composition

The charter states:

- the Board comprise both executive and non-executive directors with a majority of non-executive directors, and one executive director being the Managing Director / Chief Executive Officer
- in recognition of the importance of independent views and the Board's role in supervising the activities of management, the Chairman must be an independent non-executive director, the majority of the Board must be independent of management and all directors are required to bring independent judgement to bear in their Board decision making
- the Chairman is elected by the full Board and is required to meet regularly with the Managing Director
- the Company is to maintain a mix of directors from different backgrounds with complementary skills and experience both nationally and internationally with a majority of directors having knowledge of the Group or related industries and/or financial expertise
- the Board is required to undertake an annual board performance review and consider the appropriate mix of skills required by the Board to maximise its effectiveness and its contribution to the Group.

Responsibilities

The responsibilities of the Board include:

- providing strategic guidance to the Group including contributing to the development of and approving the corporate strategy
- reviewing and approving the business plans, the annual budget and financial plans including available resources and capital expenditure initiatives
- overseeing and monitoring:
  - organisational performance and the achievement of the Group's strategic goals and objectives
  - compliance with the Company's Code of Conduct (see page 9)
  - progress of major capital expenditures and other significant corporate projects including any acquisitions or divestments
- monitoring financial performance including approval of the annual and half-year financial reports and liaison with the Group's auditors
- appointment, performance assessment and, if necessary, removal of the Managing Director
- ratifying the appointment and/or removal and contributing to the performance assessment of the members of the senior management team including the CFO / Company Secretary
- ensuring there are effective management processes in place and approving major corporate initiatives
- enhancing and protecting the reputation of the Group
- overseeing the operation of the Group's system for compliance and risk management.

Board members

Details of the members of the Board, their experience, expertise, qualifications, term of office and independent status are set out in the directors' report under the heading "Information on directors". As at the date of this report the Board of the Company comprises six non-executive directors, all of whom are considered independent under the principles set out below, and the Managing Director.

The Board seeks to ensure that:

- at any point in time, its membership represents an appropriate balance between directors with experience and knowledge of the Group and directors with an external or fresh perspective
- the size of the Board is conducive to effective discussion and efficient decision-making.

B. Corporate governance (continued)

Directors' independence

An independent director is a director who is not a member of management (a non-executive director) and who:

- holds less than 5% of the voting shares of the Company and is not an officer of, or otherwise associated, directly or indirectly, with a shareholder of more than 5% of the voting shares of the Company
- has not within the last three years been employed in an executive capacity by the Company or another Group member
- within the last three years has not been a principal or employee of a material professional adviser or a material consultant to the Company or another Group member
- is not a material supplier to or customer of the Company or another Group member, or an officer of or otherwise associated, directly or indirectly, with a material supplier or customer
- has no material contractual relationship with the Company or another Group member other than as a director of the Company
- has not served on the Board of the Group for a period which could materially interfere with the Director's ability to act in the best interests of the Group
- is free from any interest and any business or other relationship which could, or could reasonably be perceived to, materially interfere with the director's ability to act in the best interests of the Group.

The Board reviews the independence of each Director in light of interests disclosed to the Board from time to time.

Term of office

The Board Charter recommends a maximum period of 12 years service as a director, subject to re-elections every year by rotation such that 1/3 of the directors are subject to re-election each year

The Company's Constitution specifies the tenure of the Managing Director is limited to that of his Executive Office.

Commitment

The Board has established a framework for the management of the Group including a system of internal control, a business risk management process and the establishment of appropriate ethical standards.

The full Board currently holds nine scheduled meetings each year, plus strategy meetings and any extraordinary meetings at such other times as may be necessary to address any specific matters that may arise.

The agenda for meetings is prepared in conjunction with the Chairman, Managing Director and Company Secretary. Standing items include the Managing Director's report, financial reports, strategic matters, governance and compliance. Submissions are circulated in advance. Executives are regularly involved in Board discussions and directors have other opportunities, including visits to business operations, for contact with a wider group of employees.

To assist in the execution of its responsibilities, the Board has established a Human Resource Committee and an Audit and Risk Committee. These Committees have written mandates and operating procedures, which are reviewed on a regular basis.

The commitments of non-executive directors are considered by the Board prior to the directors' appointment to the Board of the Company and are reviewed each year as part of the annual performance assessment.

Prior to appointment or being submitted for re-election, each non-executive director is required to specifically acknowledge that they have and will continue to have the time to discharge their responsibilities to the Company.

Conflict of interest

Directors must keep the Board advised, on an ongoing basis, of any interest that could potentially conflict with those of the Group.

Where the Board believes that a significant conflict exists for a director on a board matter, the director concerned does not receive the relevant board papers and is not present at the meeting whilst the item is considered.

There were no director related entity transactions with companies of the Group.

Independent professional advice

Directors and board committees have the right, in connection with their duties and responsibilities, to seek independent professional advice from a suitably qualified adviser at the Group's expense. Prior written approval from the Chairman is required, but this will not be unreasonably withheld.

Performance assessment

The Board undertakes an annual self assessment of its collective performance, the performance of the Chairman and of its committees. Management are invited to contribute to this appraisal process. The results and any action plans are documented. The most recent assessment was undertaken in August 2010.

The Chairman meets privately with each director to discuss this assessment and their individual situation.

Corporate reporting

The Managing Director and the CFO have made the following certifications to the Board:

- that the Group's financial reports are complete and present a true and fair view, in all material respects, of the financial condition and operational results of the Company and Group and are in accordance with relevant accounting standards

B. Corporate governance (continued)

- that the above statement is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board and that the Group's risk management and internal compliance and control is operating efficiently and effectively in all material respects.

Board committees

The Board has established a number of committees to assist in the execution of its duties and to allow detailed consideration of complex issues. Current committees of the Board are the Human Resource Committee and the Audit and Risk Committee. Each is comprised entirely of non-executive directors. The committee structure and membership is reviewed on an annual basis.

Each committee has its own written charter setting out its role and responsibilities, composition, structure, membership requirements and the manner in which the committee is to operate. All of these charters are reviewed on an annual basis and are available on the Company website. All matters determined by the committees are submitted to the full board as recommendations for board decisions.

Additional requirements for specific reporting by the committees to the Board are addressed in the charter of the individual committees.

Bradken Limited does not have a fully constituted Nominations Committee, however, as and when required the full Board participates as the Nominations Committee in order to fulfill its corporate governance responsibilities in regard to:

- Board appointments and performance;
- Directors’ induction program;
- Committee membership;
- Other relevant matters.

The full Board undertakes the functions of a Nominations Committee as described in the ASX Corporate Governance Council’s Principles of Good Corporate Governance and Best Practice Recommendations.

Human Resource Committee

The Human Resource Committee consists of the following non-executive directors:

Vince O'Rourke (Chairman)

Eileen Doyle

Nick Greiner

Phil Arnall

Details of these directors attendance at Committee meetings are set out in the directors' report on page 4.

The Human Resource Committee operates in accordance with its charter which is available on the Company website. The Human Resource Committee advises the Board on remuneration and incentive policies and practices generally, and makes specific recommendations on remuneration packages and other terms of employment for the executive directors, other senior executives and non-executive directors.

The Human Resource Committee's terms of reference include:

- reviewing and approving remuneration policies including proposed short and long term incentives, superannuation, recruitment, redundancy/termination and other major personnel practices that will attract, motivate and retain high quality employees
- recommending to the Board the total employment cost of the Managing Director and approving the total employment cost of senior executives reporting to that position. The total cost being base pay, short and long term incentives (including shares and options), superannuation and other benefits
- recommending to the Board the entitlements under incentive plans for the Managing Director, including linkages to specific goals and objectives. Approve entitlements for senior executives reporting to that position
- recommending to the Board any service contracts for the Managing Director and approve service contracts for senior executives reporting to that position
- reviewing the personal development plans for senior executives to maintain a pool of capable senior management
- reviewing the development of management succession planning to ensure ongoing professional management of the Group and the development of the individuals
- reviewing the Group’s development of human resource plans, training, workplace safety and environment systems designed to enhance corporate and individual performance
- overseeing the planning and development of business continuity, crisis management and quality and safety management systems
- undertaking any special projects delegated by the Board or deemed necessary by the Committee

Further information on directors' and executive remuneration is set out in the directors' report under the heading "Remuneration Report".

B. Corporate governance (continued)

Audit and Risk Committee

The Audit and Risk Committee consists of the following non-executive directors:

Greg Laurie (Chairman)

Phil Arnall

Eileen Doyle - appointed 20 July 2011

Vince O'Rourke - retired 20 July 2011

Peter Richards

Details of these directors attendance at Committee meetings are set out in the directors' report on page 4.

The Audit and Risk Committee has appropriate financial expertise and all members are financially literate and have an appropriate understanding of the businesses and markets in which the Group operates.

The Audit and Risk Committee operates in accordance with a charter which is available on the Company website. The main responsibilities of the Audit and Risk Committee are to:

- review and assess the integrity of the financial statements of the Group
- assess the suitability of the Group's accounting policies and processes
- ensure a process is in place to assess the adequacy and effectiveness of the Group's internal control processes
- act as an interface between the Board and the external auditors
- liaise with the external auditors on the conduct of the external audit
- review reports on the Group's financial statements and other matters, prepared by the external auditors
- review any proposed provision of non-audit services by the external auditors
- ensure the independence of the external auditors
- consider the competence and assess the performance of the external auditors
- overview the effectiveness of the internal audit function
- ensure there is an appropriate process for the identification and management of business risks
- ensure a process is in place to monitor the Group's compliance with relevant laws and regulations
- review and monitor related party transactions and assess their propriety
- report to the Board on matters relevant to the Committee's role and responsibilities
- make recommendations to the Board in relation to the appointment, removal and remuneration of the external auditor.

The Audit and Risk Committee meets with the external and internal auditors on a regular basis. It reviews its performance and effectiveness periodically and reviews its charter and makes recommendations to the Board on its charter annually.

In fulfilling its responsibilities, the Audit and Risk Committee:

- receives regular reports from management, the external auditors and the internal auditors
- assesses the suitability of the Group's financial accounting policies, practices and procedures and the compliance with regulatory requirements
- reviews the processes the CEO and the CFO have in place to support their certifications to the Board
- reviews any significant disagreements between the auditors and management, irrespective of whether they have been resolved
- meets separately with the external and internal auditors at least twice a year without the presence of management
- provides the external and internal auditors with a clear line of direct communication at any time to either the Chairman of the Audit and Risk Committee or the Chairman of the Board.

The Audit and Risk Committee has authority, within the scope of its responsibilities, to seek any information it requires from any employee or external party.

External auditors

The Group policy is to appoint external auditors who clearly demonstrate quality and independence. The performance of the external auditor is reviewed annually. PricewaterhouseCoopers was appointed as the external auditor in 2005. It is PricewaterhouseCoopers policy to rotate audit engagement partners on listed companies at least every five years.

An analysis of fees paid to the external auditors, including a break-down of fees for non-audit services, is provided in the directors' report and in note 25 to the financial statements. It is the policy of the external auditors to provide an annual declaration of their independence to the Audit Committee.

The external auditor is required to attend the annual general meeting and be available to answer shareholder questions about the conduct of the audit and the preparation and content of the audit report.

B. Corporate governance (continued)

Risk assessment and management

Bradken is committed to managing risk to protect it's people, the environment, Group assets, the community and it's reputation. Bradken operates an Enterprise Risk Management process consistent with international standards to manage it's business risk. This risk-based system helps the Group operate effectively and efficiently, achieve business objectives, ensure reliable reporting and comply with applicable laws and regulations.

The Board implements this policy by overseeing the establishment and implementation of the risk management system through the Audit and Risk Committee, reviewing the effectiveness of the Group's implementation of that system.

Not all aspects of risk management can be formalised and Bradken places considerable reliance on the skill, experience and judgement of its people to make risk based decisions within the policy framework, and to communicate openly on all risk related matters.

The environment, health and safety management system (EHSMS)

The Group recognises the importance of environmental and occupational health and safety (OH&S) issues and is committed to the highest levels of performance. To help meet this objective the EHSMS was established to facilitate the systematic identification of environmental and OH&S issues and to ensure they are managed in a structured way. This system has been operating for a number of years and allows the Group to:

- progressively implement a corporate environmental management system that is independently certified to international standards ISO 14001 at all major sites.
- implement the Bradken 21 Step Safety plan at all sites
- monitor its systems compliance with all relevant OH&S and environmental legislation
- continually assess and improve the impact of its operations on the environment
- encourage employees to actively participate in the management of environmental and OH&S issues
- work with trade associations representing the Group's businesses to raise standards
- use energy and other resources as efficiently as practicable, and
- encourage the adoption of similar standards by the Group's principal suppliers and contractors.

Recently acquired operations are currently implementing environmental management systems. The Group continues to implement projects that improve the Group's environmental performance and to address any community concerns in the vicinity of manufacturing sites. Information on compliance with significant environmental regulations is set out in section E of this report on page 21.

Code of conduct

All directors, managers and employees are expected to act with the utmost integrity, objectivity and in compliance with the letter and spirit of the law and Group policies, striving at all times to enhance the reputation and performance of the Group. Every employee has a nominated supervisor to whom they may refer any issues arising from their employment.

The Group has advised each director, manager and employee that they must comply with the Group's Whistleblower Policy. The Policy may be viewed on the Company's website, and it covers the following:

- encouraging employees to report any behaviour that may be dishonest, fraudulent, corrupt, illegal, in breach of Commonwealth or State Legislation, unethical, improper, unsafe or any other behaviour that may cause financial or non-financial loss to the Group or would be otherwise detrimental to the interests of the Group
- ensuring that the Group complies with its obligations to protect the reporter of any such behaviour.

The Company also has a Securities Trading Policy (available on the Company's website) which details the insider trading provisions of the Corporations Act 2001. In summary, trading of the Company's shares is restricted to a period of six weeks after the release of the Group's half-year and annual results to the Australian Stock Exchange (ASX), the Annual General Meeting of the Company, at any time a prospectus or similar disclosure document has been lodged with ASIC and is open for acceptances and at such other times as the Board of Directors declare trading permissible. These windows are not available to individuals that posess inside information.

Continuous disclosure and shareholder communication

The Board provides shareholders with information using a comprehensive Continuous Disclosure Policy which includes identifying matters that, a reasonable person would expect, may have a material effect on the price of the Company's securities, notifying each matter to the ASX, posting them on the Company's website, and issuing media releases. Full details of the policy are available on the Company's website.

In summary, the Continuous Disclosure Policy operates as follows:

- the Chairman, the Managing Director and the Company Secretary comprise the Disclosure Committee. The responsibilities of the Disclosure Committee include:
  - ensuring the Company complies with its disclosure obligations
  - determining and authorising what information can or should be disclosed to the market
  - liaising with the Board where necessary

B. Corporate governance (continued)

- the Company Secretary is responsible for all communications with the ASX. Such continuous disclosure matters are advised to the ASX by the required time, and all senior executives must follow a 'Continuous Disclosure Discovery' process, which involves monitoring all areas of the Group's internal and external environment
- all announcements made to the market, and related information including information provided to analysts or the media during briefings, are placed on the Company's website after they are released to the ASX
- the full text of notices of meetings and associated explanatory material are placed on the Company's website.

All shareholders can elect to receive a copy of the Group's annual report. In addition the Company seeks to provide opportunities for shareholders to participate through electronic means. All Company announcements, media briefings, details of Company meetings and press releases are available on the Company's website. All of the above information is made available on the Company's website within one day of public release, and is emailed to all shareholders who lodge their email contact details with the Company. Information on lodging email addresses with the Company is available on the Company's website.

C. Review of operations

Financial Overview

	2011	2010	Change
NPAT	$67.6m	$70.4m	Down 4%
EBITDA	$189.4m	$167.0m	Up 13%
EBITDA margin	16.5%	16.6%	
Sales revenue	$1147.5m	$1003.7m	Up 14%
Operating cash flow	$32.4m	$147.4m	Down 78%
Earnings per share	47.6 cents	54.1 cents	Down 6.5 cents
Dividends per share	39.5 cents	34.0 cents	Up 16 %

A review of the operations of the Bradken Group during the year and the results of those operations is attached in the ASX Release.

Dividends

Dividends paid to members during the financial year were as follows:

	2011 $'000	2010 $'000
Final dividend for the year ended 30 June 2010 of 21.0 cents (2009: 13.0 cents) per fully paid share paid on 13 September 2010 (2009: 7 September 2009)	**29,138**	16,499
Interim dividend for the year ended 30 June 2011 of 18.5 cents (2010: 13.0 cents) per fully paid share paid 21 March 2011 (2010: 15 March 2010)	**25,833**	16,872
	54,971	33,371

In addition to the above dividends, since the end of the financial year the directors have declared the payment of a fully franked final dividend of $33,988,000 (21.0 cents per fully paid ordinary share) to be paid on 19 September 2011 out of retained profits at 30 June 2011.

Significant changes in the state of affairs

Significant changes in the state of affairs of the Group during the financial year were the:

	2011 $'000
(a) increase in contributed equity of $186,405,000 (from $302,838,000 to $489,243,000) as a result of:	
■ Dividend reinvestment plan issues 586,645 shares @ $7.46 each	4,377
■ Shares pursuant to an underwritten dividend reinvestment plan issue 1,839,309 shares @ $8.19 each	15,072
■ Dividend reinvestment plan issues 1,346,906 shares @ $7.99 each	10,761
■ Equity raisings in the period	153,883
■ Exercise of rights - transfer from reserve	2,388
■ Almac acquision costs adjustment	(76)
	186,405

Matters subsequent to the end of the financial year

Bradken acquired Australian and Overseas Alloys Pty Ltd based in Wollongong NSW for a total purchase price of $20m on 7 July 2011. Bradken finalised the acquisition of Norcast based in Canada from Castle Harlan on 12 July 2011 for a total cost of $202m AUD. Both of these acquisition were funded from existing cash and debt facilities.

Other than that noted above there has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial years.

Likely developments and expected results of operations

Further disclosure on likely developments in the operations of the Group and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the Group.

D. Remuneration report

The remuneration report is set out under the following main headings:

(a) Principles used to determine the nature and amount of remuneration
(b) Details of remuneration
(c) Service agreements
(d) Share-based compensation
(e) Additional information

The information provided under headings (a) to (d) includes the remuneration disclosures that are required under the Accounting Standard AASB 124 *Related Party Disclosures* . These disclosures have been transferred from the financial report and have been audited. The information provided in this remuneration report has been audited as required by section 308(3C) of the *Corporations Act 2001* .

(a) *Principles used to determine the nature and amount of remuneration*

The objective of the Group's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with achievement of strategic objectives and the creation of value for shareholders, and conforms with market best practice for delivery of reward. The Board ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency
- capital management.

External consultants AON Hewitt were contracted on 2 February 2011 to provide Executive Remuneration Benchmarking advice to the HR Committee.

Alignment to shareholders' interests:

- has economic profit as a core component of plan design
- focuses on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant return on assets as well as focusing the executive on key non-financial drivers of value
- attracts and retains high calibre executives.

Alignment to program participants' interests:

- rewards capability and experience
- reflects competitive reward for contribution to growth in shareholder wealth
- provides a clear structure for earning rewards
- provides recognition for contribution.

Performance linked remuneration includes both short-term and long-term incentives and is designed to reward executive directors and senior executives for meeting or exceeding their financial and personal objectives. The short-term incentive (STI) is an “at risk” bonus provided in the form of cash, while the long-term incentive (LTI) is provided as rights over ordinary shares of Bradken Limited under the rules of the Performance Rights Plan (PRP).

No key management personal has entered into any arrangement to limit the exposure or risk related to their remuneration.

Non executive directors

Fees and payments to non-executive directors reflect the demands which are made on, and the responsibilities of, the directors. Non-executive directors' fees and payments are reviewed annually by the Board. The Board also uses the advice of independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market.

(i) Directors' fees

The current base remuneration was last reviewed with effect from 1 October 2010. Total aggregate remuneration for all non-executive directors, last voted upon by shareholders in October 2007, is not to exceed $800,000 per annum and actual amounts payable to individual directors are determined after considering advice from external advisors and with reference to fees paid to other non-executive directors of comparable companies.

Directors’ base fees are presently $125,000 (2010: $120,000) per annum. The Chairman' fee is currently $270,000 (2010: $240,000) per annum. Non-executive directors do not receive performance related remuneration. Directors’ fees cover all main board activities and membership of any board committee.

D. Remuneration report (continued)

(a) *Principles used to determine the nature and amount of remuneration (continued)*

(ii) Non-Executive Director Share Acquisition Plan

Non-executive directors may elect to have a percentage of their annual fixed directors' fees provided in shares under the Non-Executive Director Share Acquisition Plan (NED plan). Participation in the plan is voluntary.

Executive pay

The executive pay and reward framework has three components:

- base pay and benefits including superannuation
- short-term performance incentives
- long-term incentives through participation in the Performance Rights Plan.

The combination of these comprises the executive's total remuneration.

(i) Base pay and benefits

Structured as a total employment cost package which may be delivered as a combination of cash and prescribed non-financial benefits at the executives' discretion and includes contributions to employee superannuation funds.

Executives are offered a competitive base pay that comprises the fixed component of pay and rewards. External remuneration consultants provide analysis and advice to ensure base pay is set to reflect the market for a comparable role. Base pay for senior executives is reviewed annually to ensure the executive's pay is competitive with the market. An executive's pay is also reviewed on promotion.

(ii) Short-term incentives

Each year the Board sets the job goals for the Managing Director. The senior executives job goals are set and managed by the Managing Director. The job goals are focused on the growth of the business and generally include measures relating to the Group, the relevant business unit, and the individual, and include financial, people, customer, strategy and risk measures. The measures are chosen to directly align the individual's reward to the goals of the Group and to its strategy and performance.

The financial performance objectives relate to “Net profit after tax” and "EBITDA" compared to previous years results. The non-financial objectives vary with position and responsibility and include measures such as achieving strategic outcomes, safety and environmental performance, customer satisfaction and staff development.

At the end of the financial year an assessment is made of the actual performance of the Group, the relevant business unit and the individual targets set at the beginning of the financial year. A percentage of bonus is awarded depending on performance. No bonus is awarded where performance falls below the minimum growth target set for the financial year. The Managing Director and Human Resources Committee can exercise discretion when awarding bonuses.

The Human Resource Committee recommends the bonus incentive to be paid to the Managing Director for approval by the Board. For other senior executives the Managing Director recommends the bonus incentive to be paid, and seeks approval from the Human Resource Committee.

(iii) Long-term incentives - Performance Rights Plan

The Group's long-term incentive, the Performance Rights Plan, focuses on rewarding for long term growth and the retention of key people. Information on the Performance Rights Plan is set out on page 16.

(b) *Details of remuneration*

Details of the remuneration of the directors and the key management personnel (as defined in AASB 124 Related Party Disclosures) of Bradken Limited and the Bradken Limited Group are set out in the following tables.

The key management personnel of Bradken Limited and the Group are the directors of Bradken Limited (see page 2), the Chief Financial Officer and the General Managers and Chief Operating Officer of the Bradken business units who report directly to the Managing Director. The executives are:

- Andrew Allen - *General Manager Rail*
- Tom Armstrong - *Chief Operating Officer Engineered Products*
- Bruce Arnott - *CFO and Company Secretary*
- Enda Sheridan - Executive *General Manager Mining and Industrial Products*

In addition, the following person must be disclosed under the *Corporations Act 2001* as he is among the 5 highest remunerated Group executives.

- Brad Ward - *President Resources*

The cash bonuses are dependent on the satisfaction of performance conditions as set out in the section headed Short-term incentives above. The Performance Rights (long term incentives) are not granted unless the conditions set out in Note 35 are satisfied. All other elements of remuneration are not directly related to performance.

D. Remuneration report (continued)

D. Remuneration report (continued)

(c) *Service agreements*

Remuneration and other terms of employment for the Managing Director, key management personnel and other executives required to be disclosed under the *Corporations Act 2001* are formalised in service agreements. Each of these agreements provide for the provision of performance-related cash bonuses, other benefits including, but not limited to, motor vehicles and participation, when eligible, in the Bradken Performance Rights Plan. Other major provisions of the agreements relating to remuneration are set out below.

Brian Hodges, *Managing Director*

- Contract of employment with Bradken Resources Pty Ltd dated 2nd July 2004 with no prescribed duration.
- The contract can be terminated either by either party providing six months written notice, or immediately in the case of gross misconduct. If Bradken Resources Pty Ltd terminates employment, other than for misconduct, then a severance payment will be made in accordance with Bradken's redundancy policy in place immediately before termination.

Andrew Allen, *General Manager Rail*

- Contract of employment with Bradken Resources Pty Ltd dated 17 June 2009 with no prescribed duration.
- The contract can be terminated on three months notice by either party, or immediately in the case of gross misconduct.

Bruce Arnott, *Chief Financial Officer and Company Secretary*

- Contract of employment with Bradken Resources Pty Ltd dated 3rd July 2006 with no prescribed duration.
- The contract can be terminated by either party providing three months written notice, or immediately in the case of gross misconduct.

Tom Armstrong, *Chief Operating Officer Engineered Products*

- Contract of employment with Bradken Holdings USA Inc. dated 25th October 2006 for a three year term renewable for successive twelve monthly periods unless either party gives ninety days written notice of their intent not to extend the term
- The contract can be terminated by the Company at any time for any reason without prior notice, the executive can terminate on thirty days notice for any reason.

Enda Sheridan, Executive *General Manager Mining and Industrial Products*

- Contract of employment with Bradken Resources Pty Ltd dated 17th June 2009 with no prescribed duration.
- The contract can be terminated on three months notice by either party, or immediately in the case of gross misconduct.

Brad Ward, *President Resources*

- Contract of employment with Bradken Resources Pty Ltd dated 3rd September 2008 with no prescribed duration.
- The contract can be terminated on three months notice by either party, or immediately in the case of gross misconduct.

D. Remuneration report (continued)

(d) ***Share-based compensation***

Non-Executive Director Share Acquisition Plan

Non-executive directors may elect to have a proportion of their quarterly directors' fees provided as shares under the NED Plan. Participation in the plan is voluntary.

Non-executive directors are not able to sell or otherwise dispose of the shares until the earliest of 10 years after acquisition or when the non-executive director ceases to be a director of the Company (except in very limited circumstances). During this period the shares are subject to a holding lock.

No shares were issued under the plan in the financial period.

Rights

The Performance Rights Plan (PRP) is the Company's long-term incentive (LTI) scheme for selected key executives. The Managing Director recommends the list of executives who are entitled to participate in this scheme and seeks approval of the list from the Human Resources Committee which is then ratified by the Board. Under the PRP, eligible executives may be granted Performance Rights (each being a right to acquire a share, subject to the satisfaction of exercise conditions) on terms and conditions determined by the Board and as documented in the PRP Plan rules and Trust Deed. If the exercise conditions are satisfied, the Performance Rights may be exercised and the shares issued and delivered to the executive. The Board may impose restrictions on the disposal of the shares and implement procedures to enforce the restrictions.

The rules of the PRP provide that the Board may determine a price that is payable to exercise a Performance Right, or that no amount is payable by the executive upon exercise of the Right.

If any additional persons become entitled to participate in the PRP and their participation requires approval under Chapter 10 of the Listing Rules, they will not participate in the PRP until shareholder approval is received pursuant to Listing Rule 10.14.

Mr Brian Hodges, being the only Executive Director of the Company, is the only Director entitled to participate in the PRP. If any other Director is to participate in the PRP, the Company will seek shareholder approval required by the Listing Rules.

The performance conditions are based on the relative total shareholder return ("TSR") of the Company measured against other companies in the ASX Small Industrials Index during the performance period. TSR measures the total return on investment of a share taking into account capital appreciation, capital return and dividend income.

The TSR performance conditions in relation to the grants issued are:

Target	Percentage of Rights available in given year to vest
The Company's TSR does not meet performance of the median Company in ASX Small Cap	0
The Company's TSR equals or exceeds performance of the median Company in ASX Small Cap	50
The Company's TSR ranked in third quartile of companies in ASX Small Cap	Pro rata between 50 and 100
The Company's TSR ranked in fourth quartile of companies in ASX Small Cap	100

In assessing whether the performance hurdles have been met, the Human Resource Committee receives independent data from an investment bank which provides both the Company's TSR from previous financial years and that of the ASX Small Industrials Index. The Company's performance against the hurdle is then determined with each Company in the ASX Small Industrials Index and Bradken being ranked in order of TSR in results from previous financial years. The Company's percentile ranking is determined by aggregating the weighting within the ASX Small Industrials Index (based on market capitalisation) of each company ranked below Bradken. The method of assessment was chosen as it provides the Committee with an objective means of measuring the Company's performance against its peer group. Once vested the performance rights remain exercisable for a period of ten years.

D. Remuneration report (continued)

(d) *Share-based compensation (continued)*

Dividends, changes in share price, and return of capital are included in the TSR calculation which is the only performance criteria assessed for the PRP scheme.

The terms and conditions of each grant of Rights affecting remuneration in the previous, this or future reporting periods are as follows:

Grant Date	Expiry Date	Exercise price	Fair value per Right	Performance Period	Test Date (date vested and exercisable)
31 October 2007 *	10 years from Test Date	$0.00	$8.45	1 Jul 07 to 30 Jun 10	Result announcement y/e 10
17 October 2008 *	10 years from Test Date	$0.00	$4.11	1 Jul 08 to 30 Jun 10	Result announcement y/e 10
17 October 2008 *	10 years from Test Date	$0.00	$4.82	1 Jul 08 to 30 Jun 11	Result announcement y/e 11
29 October 2009 *	10 years from Test Date	$0.00	$2.50	1 Jul 09 to 30 Jun 10	Result announcement y/e 10
29 October 2009 *	10 years from Test Date	$0.00	$3.71	1 Jul 09 to 30 Jun 11	Result announcement y/e 11
29 October 2009 *	10 years from Test Date	$0.00	$4.41	1 Jul 09 to 30 Jun 12	Result announcement y/e 12
5 November 2010 *	10 years from Test Date	$0.00	$5.13	1 Jul 10 to 30 Jun 11	Result announcement y/e 11
5 November 2010 *	10 years from Test Date	$0.00	$5.13	1 Jul 10 to 30 Jun 12	Result announcement y/e 12
5 November 2010 *	10 years from Test Date	$0.00	$6.12	1 Jul 10 to 30 Jun 13	Result announcement y/e 13

** Changes to the Performance Rights Plan*

New entrants to the scheme are provided with a transition to the 3 year plan.

Rights granted under the PRP carry no dividend or voting rights.

Details of Rights over ordinary shares in the Company provided as remuneration to each director of Bradken Limited and each of the key management personnel are set out below. When exercisable, each Right is convertible into one ordinary share of Bradken Limited. Further information on the Rights is set out in note 35 to the financial statements.

Number of Rights granted and vested and Shares provided during the year on exercise of Performance Rights

Details of Rights granted and vested and ordinary shares in the Company provided as a result of the exercise of Performance Rights to the Managing Director of Bradken Limited and each of the key management personnel and other executives of the Group required to be disclosed under the *Corporations Act 2001* are set out below.

Name	**Number of Rights granted during the year**	**Number of Rights vested during the year**	**Number of ordinary shares issued on exercise of Rights during the year**
Directors of Bradken Limited			
Brian Hodges	**79,890**	**37,310**	**37,310**
Other key management personnel of the Group			
Andrew Allen	**20,278**	**7,909**	**7,909**
Tom Armstrong	**25,793**	**7,653**	**7,653**

Other Group executives			
Brad Ward	**18,087**	**9,628**	**9,628**

No amounts were payable on the exercise of Rights during the period.

D. Remuneration report (continued)

(d) *Share-based compensation (continued)*

The assessed fair value at grant date of Rights granted to the individuals is allocated equally over the financial periods in which the Rights may vest, and the amount is included in the remuneration tables above. Fair values at grant date are determined using a Black Scholes option pricing model that takes into account the exercise price, the term of the Right, the vesting and performance criteria, the impact of dilution, the non-tradeable nature of the Right, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the Right.

The following factors and assumptions have been used in determining the fair value of Rights for the issues granted:

Grant Date	Expiry Date	Exercise price	Price of shares on grant date	Estimated volatility	Risk free interest rate	Dividend yield
31 October 2007	30/06/2010	$0.00	$14.68	90%	6.18%	0.00%
17 October 2008	30/06/2010	$0.00	$6.30	139.5%	5.19%	0.00%
17 October 2008	30/06/2011	$0.00	$6.30	139.5%	5.19%	0.00%
29 October 2009	30/06/2010	$0.00	$6.05	129.0%	5.52%	0.00%
29 October 2009	30/06/2011	$0.00	$6.05	129.0%	5.52%	0.00%
29 October 2009	30/06/2012	$0.00	$6.05	129.0%	5.52%	0.00%
5 November 2010	30/06/2012	$0.00	$8.60	125.0%	5.25%	0.00%
5 November 2010	30/06/2012	$0.00	$8.60	125.0%	5.25%	0.00%
5 November 2010	30/06/2013	$0.00	$8.60	125.0%	5.25%	0.00%

(e) *Additional information*

Principles used to determine the nature and amount of remuneration: relationship between remuneration and Company performance

The overall level of executive reward takes into account the performance of the Group over a number of years, with greater emphasis given to the current and prior year.

Details of cash remuneration: cash bonuses and Rights

For each cash bonus and grant of Rights included in the tables on page 14, pages 17 to 18 and page 20, the percentage of the available bonus or Right that was paid, or that vested, in the financial year, and the percentage that was forfeited because the person did not meet the performance criteria is set out below. The Rights vest over a period up to three years, provided the vesting conditions are met (see page 16). No part of cash bonuses forfeited are payable in future years.

		2008	25	61	14	30/06/2009	-	-

A= The % of rights that failed to vest in the period as the performance criteria were not met.

B= The minimum value of Rights yet to vest is nil as the performance criteria may not be met and consequently the Right may not vest.

C= The maximum value of rights yet to vest is not determinable as it depends on the market price of shares of Bradken Limited on the Australian Stock Exchange at the date the right is exercised. The maximum values presented above are based on the closing share price at 30 June 2011 of $7.96.

D. Remuneration report (continued)

(e) *Additional information (continued)*

Details of cash remuneration: cash bonuses and Rights (continued)

Share based compensation: Rights
Further details relating to rights are set out below.

Name	A Remuneration consisting of Rights	B Value at grant date $	C Value at exercise date $	D Value at lapse date $
Andrew Allen	16.1%	124,101	64,854	13,531
Tom Armstrong	13.8%	151,469	62,755	-
Bruce Arnott	13.2%	178,269	87,191	18,190
Brian Hodges	17.5%	488,927	305,942	63,808
Enda Sheridan	18.8%	222,346	140,220	29,244
Brad Ward	14.8%	110,692	78,950	16,468

A= The percentage of the value of remuneration consisting of Rights, based on the value at grant date set out in column B.
B= The value at grant date calculated in accordance with AASB 2 *Share-based Payment* of Rights granted during the year as part of remuneration.
C= The value at exercise date of Rights that were granted as part of remuneration and were exercised during the year.
D= The value at lapse date of Rights that were granted as part of remuneration and that lapsed during the year.

Shares under Performance Rights
Unissued shares of Bradken Limited under Performance Right at the date of this report are as follows:

Date Rights granted	Expiry date	Exercise price	Number of shares under right
18 November 2005	Ten years from Test Date	Nil	10,344
30 October 2006	Ten years from Test Date	Nil	13,008
30 October 2006	Ten years from Test Date	Nil	14,993
31 October 2007	Ten years from Test Date	Nil	5,715
31 October 2007	Ten years from Test Date	Nil	2,481
31 October 2007	Ten years from Test Date	Nil	7,443
17 October 2008	Ten years from Test Date	Nil	6,492
17 October 2008	Ten years from Test Date	Nil	3,910
17 October 2008	Ten years from Test Date	Nil	321,001
29 October 2009	Ten years from Test Date	Nil	34,697
29 October 2009	Ten years from Test Date	Nil	660,817
5 November 2010	Ten years from Test Date	Nil	34,537
5 November 2010	Ten years from Test Date	Nil	26,832
5 November 2010	Ten years from Test Date	Nil	550,078

All Rights expire on the earlier of their expiry date, their exercise, their failure to meet exercise conditions or termination of the employee’s employment. In addition, the ability to exercise the Rights is conditional on the Group achieving certain performance hurdles related to relative total shareholder return to the ASX Small Cap Industrial index.
Further details are included in the Remuneration Report above.

Shares issued on exercise of Rights
The following ordinary shares of Bradken Limited were issued during the year ended 30 June 2011 on exercise of Rights granted under the Performance Rights Plan. No further shares have been issued since that date.

Date Rights granted	Exercise price of right	Number of shares issued
30 October 2006	0.00	43,788
31 October 2007	0.00	178,774
17 October 2008	0.00	27,892
29 October 2009	0.00	63,416

E. Other information

Environmental regulation

The Group's operations are subject to significant environmental regulation under both Commonwealth and State legislation governing, amongst other things, noise, air emissions, the use, handling, and disposal of hazardous substances and waste. The Group has devoted and will continue to devote resources to environmental compliance and management in each of the jurisdictions in which it operates.

An environmental management system is in place which complies with the international standard ISO14001 in major sites in Australia the UK and New Zealand, while the US and China operate under local legal compliance requirements equivalent to ISO14001. It is Group policy to be environmentally proactive and to adopt practices that minimise adverse environmental impacts and to communicate and provide appropriate feedback on the Group's environmental performance. In accordance with the Group's environmental policy, procedures and goals have been established aimed at ensuring:

- all manufacturing and engineering sites have developed, implemented, and maintain environmental management systems meeting the requirements of ISO14001
- the environmental management systems are integrated with the existing business systems
- zero notifiable incidents and zero justified neighbourhood complaints
- continuing reduction of industrial waste disposal costs by continual improvement of working practices, such as cleaner production and improved recycling

Based upon the results of inquiries made, the Board is not aware of any significant breaches during the period covered by this report nor does it consider the Group is subject to any presently known material environmental liabilities. Under agreements with local authorities capital expenditure is required at some Australian sites to reduce dust and odour emissions.

Greenhouse gas and energy data reporting requirements

In Australia, the energy related requirements have corporate thresholds and Bradken group companies are subject to the reporting requirements of the Energy Efficiency Opportunities Act 2006 and the National Greenhouse and Energy Reporting Act 2007 and site thresholds for the National Pollutant Inventory NEPM.

The Energy Efficiency Opportunities Act 2006 requires the group to assess its energy usage, including the identification, investigation and evaluation of energy saving opportunities, and to report publicly on the assessments undertaken, including what action the group intends to take as a result. The group continues to meet its obligations under this Act.

The National Greenhouse and Energy Reporting Act 2007 requires the group to report its annual greenhouse gas emissions and energy use. The group has implemented systems and processes for the collection and calculation of the data required and submitted its 2009/10 report to the Greenhouse and Energy Data Officer on 27th October 2010.

Internationally energy related reporting requirements have facility thresholds. In the US, the Atchison facility will be reporting on energy as its emissions exceed the US reporting threshold. The USEPA has extended the deadline for reporting 2010 data to 30th Sept 2011. In the UK, the Bradken facilities complied with their respective Climate Change Agreements which finished in September 2010. There are no current energy reporting requirements applicable in Canada, China or New Zealand.

Certain Bradken facilities in Australia (NPI), Canada (NPRI) and USA (TRI) report energy use in the National Pollutant Inventory(NPI or NPRI) Reports or Toxic Release Inventory Reports (TRI) along with the associated emissions.

Insurance of officers

During the year, the Company paid a premium to insure the directors and secretaries of the Company and its Australian-based controlled entities, the general managers of each of the businesses, all executive officers of the Group and of any related body corporate against a liability incurred by such a director, secretary or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The Company has not otherwise, during or since the end of the financial year, indemnified or agreed to indemnify any officer of the Group or of any related body corporate against a liability incurred by any such officer.

Proceedings on behalf of the Company

No person has applied to the court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of these proceedings.

No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the Corporations Act 2001.

Non-audit services

The Company may decide to employ the auditor on assignments additional to their statutory audit duties where the auditor's expertise and experience with the Company and/or Group are important.

Details of the amounts paid to auditors for audit and non-audit services provided during the year are set out on the following page.

E. Other information (continued)

The Board of directors has considered the position and, in accordance with advice received from the Audit and Risk Committee, is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed by the Audit and Risk Committee to ensure they do not impact the impartiality and objectivity of the auditor
- none of the services undermine the general principles relating to auditor independence as set out in Professional Statement F1, including reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the Company, acting as advocate for the Company or jointly sharing economic risks and rewards.

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms:

Auditors Independence Declaration

As lead auditor for the audit of Bradken Limited for the year ended 30 June 2011, I declare that, to the best of my knowledge and belief, there have been:

(a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and

(b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Bradken Limited and the entities it controlled during the period.

Bradken Limited

ABN 33 108 693 009

Annual financial report - 30 June 2011

Contents

This financial report covers the consolidated entity consisting of Bradken Limited and its subsidiaries. The financial report is presented in the Australian currency.

Bradken Limited is a company limited by shares, incorporated and domiciled in Australia. Its registered office and principal place of business is:

2 Maud Street
Mayfield West NSW 2304

A description of the nature of the consolidated entity's principal activities and a review of operations is included on page 2 and pages 10 to 11 of the directors' report, both of which are not part of this financial report.

The financial report was authorised for issue by the directors on 8 August 2011. The company has the power to amend and reissue the financial report.

Through the use of the internet, we have ensured that our corporate reporting is timely, complete, and available globally at minimum cost to the company. All press releases, financial reports and other information are available at our Shareholders' Centre on our website: www.bradken.com.au.

The above consolidated statement of cash flows should be read in conjunction with the accompanying notes.

Contents to the notes to the consolidated financial statements

1 Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistency applied to all years presented, unless otherwise stated. The financial statements are for the consolidated entity consisting of Bradken Limited and its subsidiaries.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board, Urgent Issues Group Interpretations and the *Corporations Act 2001.*

Compliance with IFRSs

The consolidated financial statements of the Bradken Limited group also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Historical cost convention

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and liabilities (including derivative instruments) at fair value through profit or loss.

Critical accounting estimates

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 3.

(b) Principles of consolidation

(i) Subsidiaries

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Bradken Limited (''company'' or ''parent entity'') as at 30 June 2011 and the results of all subsidiaries for the year then ended. Bradken Limited and its subsidiaries together are referred to in this financial report as the Group or the consolidated entity.

Subsidiaries are all those entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries by the Group (refer to note 1(h)).

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated income statement, statement of comprehensive income, statement of changes in equity and balance sheet respectively.

(ii) Changes in ownership interests

The group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of Bradken Limited.

1 Summary of significant accounting policies (continued)

When the group ceases to have control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, jointly controlled entity or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a jointly-controlled entity or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

(c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director.

(d) Foreign currency translation

(i) Functional currency and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Australian dollars, which is Bradken Limited's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

Translation differences on non-monetary financial assets and liabilities are reported as part of the fair value gain or loss. Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available-for-sale financial assets are included in the fair value reserve in equity.

(iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each income statement and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investments are repaid, a proportionate share of such exchange differences is reclassified to profit and loss, as part of the gain or loss on sale where applicable.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

1 Summary of significant accounting policies (continued)

(e) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of returns, trade allowances and amounts collected on behalf of third parties. Revenue is recognised for the major business activities as follows:

(i) Sale of goods

Revenue from the sale of goods and disposal of other assets is recognised when the consolidated entity has passed the significant risks and rewards to the buyer.

(ii) Contract revenue

Contract revenue and expenses are recognised on an individual contract basis using the percentage of completion method when the stage of contract completion can be reliably determined, costs to date can be clearly identified, and total contract revenue and costs to complete can be reliably estimated.

The stage of completion is measured by reference to an assessment of total labour hours and other costs incurred to date as a percentage of costs for each contract.

Where the outcome of a contract cannot be reliably estimated, contract costs are expensed as incurred. Where it is probable that the cost will be recovered, revenue is recognised to the extent of costs incurred. Where it is probable that a loss will arise on a contract, the excess of total costs over revenue is recognised immediately as an expense.

(iii) Interest income

Interest income is recognised as it accrues, taking into account the effective yield on the financial asset.

(iv) Sale of non-current assets

The gain or loss on disposal of non-current assets is included as other income or expense at the date control passes to the buyer, usually when an unconditional contract of sale is signed. The gain or loss on disposal is calculated as the difference between the carrying amount of the asset at the time of disposal and the net proceeds on disposal.

(v) Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement.

(vi) Dividends

Dividends are recognised as revenue when the right to receive payment is established. This applies even if they are paid out of pre-acquisition profits. However, the investment may need to be tested for impairment as a consequence, refer note 1(m).

(f) Income tax

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

1 Summary of significant accounting policies (continued)

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in controlled entities where the parent entity is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation. As a consequence, these entities are taxed as a single entity and the deferred tax assets and liabilities of these entities are set off in the consolidated financial statements.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(i) Investment allowances

Companies within the group may be entitled to claim special tax deductions for investments in qualifying assets (investment allowances). The group accounts for such allowances as tax credits, which means that the allowance reduces income tax payable and current tax expense. A deferred tax asset is recognised for unclaimed tax credits that are carried forward as deferred tax assets.

(g) Leases

Leases of property, plant and equipment where the Group, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases (note 12). Finance leases are capitalised at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases (note 27). Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight line basis over the period of the lease.

Lease income from finance leases where the group is a lessor is recognised in income on a discounted basis over the lease term (note 9). The respective lease reveivable is included in the balance sheet.

(h) Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement and the fair value of any pre-existing equity interest in the subsidiary. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired and the measurement of all amounts has been reviewed, the difference is recognised directly in profit or loss as a bargain purchase.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss.

1 Summary of significant accounting policies (continued)

(i) Impairment of assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(j) Cash and cash equivalents

For cash flow statement presentation purposes, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

(k) Receivables

Trade receivables are recognised initially at fair value and subsequently, less provision for doubtful debts. Trade receivables are normally due for settlement no more than 30 days from the date of recognition. They are presented as current assets unless collection is not expected for more than 12 months after the reporting date.

Collectibility of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off. A provision for doubtful receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the value of estimated future cash flows. The amount of the provision is recognised in the income statement.

(l) Inventories

(i) Raw materials and stores, work in progress and finished goods

Raw materials and stores, work in progress and finished goods are stated at the lower of cost and net realisable value. Cost comprises direct materials, direct labour and an appropriate portion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Costs are assigned to inventory on hand by the method most appropriate to each particular class of inventory, with the majority being valued on either standard or weighted average basis. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale such as expenses of marketing, selling and distribution to customers.

(ii) Construction and service contract work in progress

Construction and service contract work in progress is carried at cost plus profit recognised to date based on the value of work completed, less progress billings and less provision for foreseeable losses. If there are contracts where progress billings exceed the aggregate costs incurred plus profits less losses, the net amounts are presented under other liabilities.

Cost includes variable and fixed costs directly related to specific contracts, those costs related to contract activity in general which can be allocated to specific contracts on a reasonable basis and other costs specifically chargeable under the contract. Costs expected to be incurred under penalty clauses and rectification provisions are also included.

(iii) Stock Obsolescence

All inventory items are reviewed on a regular basis during the year and a provision raised for products which have not been sold for one year unless the review indicates that a sale is likely.

(m) Investments and other financial assets

Classification

The Group classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and, in the case of assets classified as held-to-maturity, re-evaluates this designation at each reporting date.

(i) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are expected to be settled within 12 months; otherwise they are classified as non-current.

1 Summary of significant accounting policies (continued)

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of selling the receivable. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date which are classified as non-current assets. Loans and receivables are included in receivables in the balance sheet (note 8).

(iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity.

(iv) Available-for-sale financial assets

Available-for-sale financial assets, comprising principally marketable equity securities, are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date – the date on which the group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

When securities classified as available-for-sale are sold, the accumulated fair value adjustments recognised in other comprehensive income are reclassified to profit or loss as gains and losses from investment securities.

Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Loans and receivables and held-to-maturity investments are subsequently carried at amortised cost using the effective interest method.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are presented in profit or loss within other income or other expenses in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in profit or loss as part of revenue from continuing operations when the group's right to receive payments is established. Interest income from these financial assets is included in the net gains/(losses).

Fair value

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

Impairment

The group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the assets are impaired.

(n) Derivatives and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either; (1) hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge); or (2) hedges of the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedge).

1 Summary of significant accounting policies (continued)

The Group documents at the inception of the hedging transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been and will continue to be highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair values of various derivative financial instruments used for hedging purposes are disclosed in note 11. Movements in the hedging reserve in shareholders' equity are shown in note 22.

The full fair value of a hedging derivative is classified as a non current asset or liability when the remaining maturity of the hedged item is more than 12 months; it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

(i) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The gain or loss relating to the effective portion of interest rate swaps hedging fixed rate borrowings is recognised in the income statement within other income or other expense together with the gain or loss relating to the ineffective portion and changes in the fair value of the hedge fixed rate borrowings attributable to the interest rate risk. The gain or loss relating to the ineffective portion is recognised in the income statement within other income or other expenses.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedge item for which the effective interest method is used is amortised to profit or loss over the period to maturity using a recalculated effective interest rate.

(ii) Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in equity in the hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in the income statement within other income or other expense.

Amounts accumulated in equity are recycled in the income statement in the periods when the hedged item will affect profit or loss (for instance when the forecast sale that is hedged takes place). The gain or loss relating to the effective portion of interest rate swaps hedging variable rate borrowings is recognised in the income statement within "finance costs". The gain or loss relating to the effective portion of forward foreign exchange contracts hedging export sales is recognised in the income statement within "sales". However, when the forecast transaction that is hedged results in the recognition of a non-financial asset (for example, inventory or a non-financial liability), the gains and losses previously deferred in equity are transferred from equity and included in the measurement of the initial cost or carrying amount of the asset or liability.

When a hedging instrument expires or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

(iii) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement and are included in other income or other expenses.

1 Summary of significant accounting policies (continued)

(o) Property, plant and equipment

All property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains/losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation is provided on property, plant and equipment, including freehold buildings but excluding land. Depreciation is calculated on a straight line basis so as to write off the net cost of each asset over its expected useful life. Assets are depreciated or amortised from the date of acquisition, or in respect of internally constructed assets, from the time an asset is completed and held ready for use. Depreciation is calculated using the straight line method to allocate their cost, net of their residual values, over their estimated useful lives, as follows:

Buildings	35 to 66 years
Plant and equipment	1 to 20 years
Patterns	1 to 40 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 1(i)).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the income statement.

(p) Intangible assets

(i) Goodwill

Goodwill is measured as described in note 1(h). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill on acquisitions of associates is included in investments in associates. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to operating segments (note 4).

(ii) Patents, trademarks and licences

Patents are carried at fairvalue at acquisition and amortised on a straight line basis over the life of the patent. Trademarks are carried at their fair value at acquisition less impairment losses and amortised over 5 years with amortisation calculated on a straight line basis. The ESCO licence has been fully amortised at 30 June 2011 and has not been renewed.

(iii) Customer relationships

Customer relationships acquired as part of a business acquisition are recognised separately from goodwill. The customer relationships are carried at their fair value at the date of acquisition less accumulated amortisation and impairment losses. Amortisation is calculated based on their estimated useful lives, which currently vary from 10 to 20 years.

(iv) Research and development

Research expenditure is recognised as an expense as incurred. Costs incurred on development projects (relating to the design and testing of new or improved products) are recognised as intangible assets when it is probable that the project will be a success considering its commercial and technical feasibility and its costs can be measured reliably. The expenditure capitalised comprises all directly attributable costs, including costs of materials, services, direct labour and an appropriate proportion of overheads. Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use on a straight-line basis over its useful life, which varies from 3 to 10 years.

(q) Payables

These amounts represent liabilities for goods and services provided to the group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 60 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months from the reporting date. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

1 Summary of significant accounting policies (continued)

(r) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(s) Borrowing costs

Borrowing costs are expensed as incurred. Borrowing costs include interest, amortisation of discounts or premiums relating to borrowings, amortisation of ancillary costs in connection with arrangement of borrowings, foreign exchange differences net of hedged amounts on borrowings, including trade creditors and lease finance charges.

(t) Provisions

A provision is recognised in the accounts when there is a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

(i) Warranties

Products are warranted against faulty workmanship and in some cases these are specifically extended to periods up to seven years or hours used depending on the type of product and contract in place. Rectification claims are settled in cash or by repair of the item, at the discretion of the Group. Provision for warranty claims are made for claims received and claims expected to be received in relation to sales made prior to reporting date adjusted for specific information arising from internal quality assurance processes.

(u) Employee Benefits

(i) Wages, salaries, annual leave, sick leave, rostered days off and non-monetary benefits

Liabilities for annual leave, accumulating sick leave and rostered days off, including non monetary benefits, expected to be settled within 12 months of the reporting date are recognised in current provisions in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non accumulating sick leave are recognised when the leave is taken and measured at the rates paid or payable. Liabilities for unpaid wages and salaries up to the reporting date are recognised in current payables.

(ii) Long service leave

The provision for long service leave represents the present value of the expected future cash outflows to be made resulting from employees' services provided to reporting date.

Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(iii) Bonus plans

A liability for employee benefits in the form of bonus plans is recognised in current provisions when there is no realistic alternative but to settle the liability and at least one of the following conditions is met:

- there are formal terms in the plan for determining the amount of the benefit
- the amounts to be paid are determined before the time of completion of the financial report
- past practice gives clear evidence of the amount of the obligation.

Liabilities for bonus plans are expected to be settled within 12 months and are measured at the amounts expected to be paid when they are settled.

(iv) Employee share and rights plans

Share based compensation benefits are provided to employees and directors via the Performance Rights Plan ('PRP') and the Non-Executive Director Share Acquisition Plan ('NEDSAP') respectively.

The fair value of Rights granted under the PRP are recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date taking into account market performance conditions only, and spread over the vesting period during which the employees become unconditionally entitled to the Rights. The fair value of Rights granted are measured using the Black & Scholes Pricing Model, taking into account the terms and conditions attached to the Rights. The amount recognised as an expense is adjusted to reflect the actual number of Rights that vest except where forfeiture is due to market related conditions.

The fair value of shares issued under the NEDSAP are recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date.

1 Summary of significant accounting policies (continued)

(v) Retirement benefit obligations

All employees of the Group are entitled to benefit from various superannuation or pension plans on retirement, disability or death. The Group operates one defined benefit retirement plan in the United States that covers hourly employees hired before May 10, 1993 in one of our US subsidiaries. Benefits for the defined benefit plan are determined on years of credited service. The Group also operates a number of defined contribution plans which receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

A liability or asset in respect of defined benefit superannuation plans is recognised in the balance sheet, and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the funds assets at that date and any unrecognised past service cost. The present value of the defined benefit obligation is based on future payments which may arise from membership of the fund to the reporting date, calculated annually by independent actuaries. Consideration is given to the, experience of employee departures and periods of service.

(vi) Healthcare reserves

The Group's U.S. operations primarily self-insure employee healthcare expenses. Reserves are based on historical claims experience.

(v) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or rights are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or rights for the acquisition of a business are not included in the cost of the acquisition as part of the purchase consideration.

If the entity reacquires its own equity instruments, eg as the result of a share buy-back, those instruments are deducted from equity and the associated shares are cancelled. No gain or loss is recognised in the profit or loss and the consideration paid including any directly attributable incremental costs (net of income taxes) is recognised directly in equity.

(w) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the financial year but not distributed at balance date.

(x) Earnings per share

(i) Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

(y) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the taxation authority are presented as operating cash flows.

(z) Rounding of amounts

The Company is of a kind referred to in Class order 98/0100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the financial report. Amounts in the financial report have been rounded off in accordance with that Class Order to the nearest thousand dollars, or in certain cases, the nearest dollar.

1 Summary of significant accounting policies (continued)

(aa) Amended accounting standards and UIG interpretations

Certain amended accounting standards and interpretations have been published that are not mandatory for 30 June 2011 reporting periods. The Group's and the parent entity's assessment of the impact of these amended standards and interpretations is set out below.

AASB 9 Financial Instruments, AASB 2009-11 Amendments to Australian Accounting Standards arising from AASB 9 and AASB 2010-7 Amendments to Australian Accounting Standards arising from AASB 9 (December 2010) (effective from 1 January 2013)

AASB 9 Financial Instruments addresses the classification, measurement and derecognition of financial assets and financial liabilities. The standard is not applicable until 1 January 2013 but is available for early adoption. When adopted, the standard will affect in particular the group's accounting for its available-for-sale financial assets, since AASB 9 only permits the recognition of fair value gains and losses in other comprehensive income if they relate to equity investments that are not held for trading. There will be no impact on the group's accounting for its available-for-sale financial assets as the Group's investments are not held for trading.

Fair value gains and losses on available-for-sale debt investments, for example, will therefore have to be recognised directly in profit or loss. There will be no impact on the group's accounting for available-for-sale debt investments, as the new requirements only affect the accounting for available-for-sale debt investments that are designated at fair value through profit or loss and the group does not have any such investments. There will be no impact on the group's accounting for financial liabilities, as the new requirements only affect the accounting for financial liabilities that are designated at fair value through profit or loss and the group does not have any such liabilities. The derecognition rules have been transferred from AASB 139 Financial Instruments: Recognition and Measurement and have not been changed. The group has not yet decided when to adopt AASB 9.

Revised AASB 124 Related Party Disclosures and AASB 2009-12 Amendments to Australian Accounting Standards (effective from 1 January 2011)

In December 2009 the AASB issued a revised AASB 124 Related Party Disclosures. It is effective for accounting periods beginning on or after 1 January 2011 and must be applied retrospectively. The amendment clarifies and simplifies the definition of a related party and removes the requirement for government-related entities to disclose details of all transactions with the government and other government-related entities. The group will apply the amended standard from 1 July 2011. When the amendments are applied, the group will need to disclose any transactions between its subsidiaries and its associates. However, there will be no impact on any of the amounts recognised in the financial statements.

The following new standards and amendments to standards are not expected to have a material impact on the Group's financial statements.

Standard	Title	Operative date
AASB 2009-14	Amendments to Australian Interpretation – Prepayments of a Minimum Funding Requirement	1 January 2011
AASB 1053	Application of Tiers of Australian Accounting Standards	1 July 2013
AASB 2010-2	Amendments to Australian Accounting Standards arising from Reduced Disclosure Requirements	1 July 2013
AASB 2010-6	Amendments to Australian Accounting Standards – Disclosures on Transfers of Financial Assets	1 July 2011
AASB 2010-8	Amendments to Australian Accounting Standards – Deferred Tax: Recovery of Underlying Assets	1 January 2012

1 Summary of significant accounting policies (continued)

(ab) Parent entity financial information

The financial information for the parent entity, Bradken Limited, disclosed in note 36 has been prepared on the same basis as the consolidated financial statements, except as set out below.

(i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the financial statements of Bradken Limited.

(ii) Tax consolidation legislation

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation.

The head entity, Bradken Limited, and the controlled entities in the tax consolidated group account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, Bradken Limited also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

The amounts receivable/payable are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of each financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as current amounts receivable from or payable to other entities in the group.

Any difference between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

(iii) Financial guarantees

The parent entity is a guarantor under the Bradken Group - Common Terms Deed Poll and unconditionally and irrevocably guarantees payments due in connection with any financing facilities owed by any Group company.

2 Financial risk management

The Group's activities expose it to a variety of financial risks; market risk (including currency risk, cash flow and fair value interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group uses derivative financial instruments such as foreign exchange contracts and interest rate swaps to hedge certain risk exposures. Derivatives are exclusively used as hedging instruments, ie not as trading or other speculative instruments. The Group uses different methods to measure different types of risk to which is it exposed. These methods include sensitivity analysis in the case of interest rate and foreign exchange risk and ageing analysis for credit risk.

Risk management is carried out centrally by the CFO and finance function under policies approved by the Board of Directors.

(a) Credit risk

The Group has no significant concentrations of credit risk. The Group has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history.

Derivative counterparties and cash transactions are limited to high credit quality financial institutions.

(b) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group aims at maintaining flexibility in funding by keeping committed credit lines available.

Management monitors forecasts of the Group's liquidity on the basis of expected cash flow. See note 18(e) for details of available facilities.

The tables below analyse the Group's financial liabilities and net settled derivative financial instruments into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the tables are the contractual undiscounted cash flows. There is no liquidity risk at the Parent entity level.

Group - 2011	Less than 1 year $'000	Between 1 and 5 year(s) $'000	Over 5 years $'000
Non-derivatives			
Payables	127,394	-	-
Borrowings (excluding finance leases and hire purchases)	32,290	423,158	-
Finance leases and hire purchase liabilities	4,043	6,326	20
Derivatives			
Net settled interest rate swaps and caps	7,337	-	-

Group - 2010	Less than 1 year $'000	Between 1 and 5 year(s) $'000	Over 5 years $'000
Non-derivatives			
Payables	118,543	-	-
Borrowings (excluding finance leases and hire purchases)	44,176	329,548	-
Finance leases and hire purchase liabilities	5,646	7,657	251
Derivatives			
Net settled interest rate swaps and caps	532	-	-

The Group enters into forward exchange contracts to hedge foreign currency denominated receivables and also to manage foreign currency denominated inventory and capital items.

Refer to note 11(a)(ii) for the maturity profiles of the Group's existing foreign exchange hedge contracts.

Refer to note 8(f) for receivables denominated in foreign currencies.

(c) Market risk

(i) Cash flow and fair value interest rate risk

The Group has no significant interest-bearing assets other than a short term cash balance following the institutional equity raising in May 2011, the Group's income and operating cash flows are not materially exposed to changes in market interest rates.

The Group's interest-rate-risk arises from long term borrowings. Borrowings issued at variable rates expose the Group to cash flow interest-rate-risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate-risk. Group policy is to fix the rates for between 30% and 70% of its borrowings.

The Group manages its cash flow interest-rate-risk by using floating-to-fixed interest rate swaps and interest rate caps. Such instruments have the economic effect of converting borrowings from floating rates to fixed rates. Generally, the Group raises long-term borrowings at floating rates and swaps them into fixed rates. Under the interest-rate swaps, the Group agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed contract rates and floating-rate interest amounts calculated by reference to the agreed notional principal amounts.

2 Financial risk management (continued)

(c) Market risk (continued)

Refer to note 18 for further details generally of the Group's borrowings.

A sensitivity analysis of interest rate risk on the Group's financial assets and liabilities is provided in the table at note 2(c)(iv).

(ii) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the entity's functional currency. It is the policy of the Group to enter into forward foreign exchange contracts to cover all foreign currency exposure other than those effectively covered within the natural hedging pool.

Refer to note 8 and 16 for receivables and payables denominated in foreign currencies.

Unrealised gains or losses on outstanding foreign exchange contracts are taken to the Group's income statement on a monthly basis.

A sensitivity analysis of foreign exchange risk on the Group's financial assets and liabilities is provided in the table at note 2(c)(iv).

(iii) Price risk

The Group is exposed to commodity price risk through the purchase of steel and various alloys.

(iv) Summarised sensitivity analysis

The following table summarises the pre-tax sensitivity of the Group's financial assets and financial liabilities to interest rate risk, foreign exchange risk and price risk. These sensitivities are prior to the offsetting impact of hedging instruments.

2011		Interest rate risk				Foreign exchange risk			
	Carrying	-100 bps		+100 bps		-10%		+10%	
	amount	Profit	Equity	Profit	Equity	Profit	Equity	Profit	Equity
	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000
Financial assets									
Cash and cash equivalents	152,476	(1,520)	(1,520)	1,520	1,520	14,756	14,756	(14,756)	(14,756)
Accounts receivable	196,546	-	-	-	-	6,860	6,860	(6,860)	(6,860)
Receivables under finance leases	5,899	-	-	-	-	-	-	-	-
AFS investments	70,054	-	-	-	-	-	-	-	-

Financial risk exposure of the parent entity is limited to the exposure of the Group.

2 Financial risk management (continued)

(d) Fair value measurements

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

Bradken Limited has adopted the amendment to AASB 7 *Financial Instruments: Disclosures* which requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

(a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)

(b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and

(c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following table presents the group's assets and liabilities measured and recognised at fair value at 30 June 2011 and 30 June 2010.

2011	Level 1 $'000	Level 2 $'000	Level 3 $'000	Total $'000
Assets				
Available-for-sale financial assets				
Equity Securities	70,054	-	-	70,054
Derivatives used for hedging	-	-	-	-
Total assets	70,054	-	-	70,054
Liabilities				
Derivatives used for hedging	-	7,337	-	7,337
Total liabilities	-	7,337	-	7,337

2010	Level 1 $'000	Level 2 $'000	Level 3 $'000	Total $'000
Assets				
Available-for-sale financial assets				
Equity Securities	46,938	-	-	46,938
Derivatives used for hedging	-	238	-	238
Total assets	46,938	238	-	47,176
Liabilities				
Derivatives used for hedging	-	532	-	532
Total liabilities	-	532	-	532

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in level 1.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques. The group uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used to estimate fair value for long-term debt for disclosure purposes. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward exchange contracts is determined using forward exchange market rates at the end of the reporting period. These instruments are included in level 2 and comprise debt investments and derivative financial instruments. In the circumstances where a valuation technique for these instruments is based on significant unobservable inputs, such instruments are included in level 3.

3 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

(a) Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in note 1(q). The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions. Refer to note 14 for details of these assumptions and the potential impact of changes to the assumptions.

(ii) Estimated percentage completion for major contracts

The Group reviews the percentage of completion for it's major contracts monthly including assessing costs to be incurred to complete the project in accordance with the accounting policy stated in note 1(e) and note 1(l). These assessments require an estimate of the remaining labour and material costs for the projects.

4 Segment information

Operating segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Managing Director.

Segment revenues, expenses, assets and liabilities are those that are directly attributable to a segment. Segment assets include all assets used by a segment and consist primarily of receivables, inventories and property, plant and equipment, net of related provisions. Segment liabilities consist primarily of trade and other creditors, employee benefits and provision for service warranties.

Segment revenues, expenses and results include transfers between segments. Sales of scrap between controlled entities are made on an "arm's-length" basis and are eliminated on consolidation. All other transfers are made at variable cost and are eliminated on consolidation.

(a) Description of segments

Industrial is a supplier of cast, machined and fabricated components manufactured to customer specifications or purpose designed to suit customer needs into industries such as Smelters and Refineries, Steel Manufacturers and Sugar Production. Mining Products consists of design, supply and service of wear components for all types of fixed and mobile plant in the Mining, Mineral Processing and Quarry industries. Rail is a package provider of Freight Rollingstock products and services including freight wagons, bogies, drawgear, inventory management, spare and renewed parts and the maintenance and refurbishment of rollingstock. Engineered Products based in the US is a supplier of cast parts to the Energy, Mining, Industrial and Rail Transport industries specialising in large (greater than 4,500 kg) highly engineered steel castings.

The "all other" segment represents the other smaller businesses including Cast Metal Services and Power & Cement.

4 Segment information (continued)

(b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the year ending 30 June 2011 and for the year ending 30 June 2010 are as follows:

2011	**Notes**	**Industrial** $'000	**Mining Products** $'000	**Rail** $'000	**Engineered Products** $'000	**All other segments** $'000	**Total** $'000

Total segment liabilities		**12,638**	**47,611**	**31,530**	**51,699**	**12,589**	**156,067**

4 Segment information (continued)

(c) Other segment information

The Group's divisions are managed on a global basis and operate in four main geographical areas, Australia, the home country of the parent entity, the UK, the US, China and Other countries. The majority of revenue classified as "Other" relates to various European, Asian and North and South American countries.

(i) Segment revenue

Sales between segments under the same tax jurisdiction are made at variable cost and are eliminated on consolidation. Sales between segments under different tax jurisdictions are carried out at arms length and are eliminated on consolidation.

The revenue from external parties reported to the Managing Director is measured in a manner consistent with that in the income statement. Segment revenue reconciles to total revenue from continuing operations as follows:

	2011 $'000	2010 $'000
Total segment revenue	**1,276,364**	1,094,755
Intersegment eliminations	**(128,891)**	(91,063)
Interest revenue	**684**	163
Other revenue	**1,450**	691
Bond repurchase gains	**-**	35
Rental income	**359**	346
Royalty income	**388**	1,060
Sale of scrap	**756**	1,572
Commission income	**371**	-
Other	**2,367**	874
Total revenue from continuing operations (note 5)	**1,153,848**	1,008,433

Segment revenues are allocated based on the country in which the customer is located.

	2011 $'000	2010 $'000
Australia	**648,764**	663,489
US	**287,592**	216,772
Other countries	**211,117**	123,431
Revenue from external customers	**1,147,473**	1,003,692

(ii) Gross margin

The Managing Director assesses the performance of each operating segment based on a measure of gross margin. Gross margin is considered the most relevant measure of individual segment results as manufacturing plants all make product for the various segments and transfer product at cost. This measurement basis excludes the allocation of manufacturing variances and overheads from individual manufacturing plants as any allocation would be arbitrarily based.

A reconciliation of standard gross margin to operating profit before income tax is provided as follows:

	2011 $'000	2010 $'000
Gross margin	**380,577**	323,741
Fixed manufacturing overheads and other cost of sale adjustments	**(112,370)**	(94,711)
Other reveune	**-**	1,158
Other income	**6,375**	4,741
Selling and technical expenses	**(50,573)**	(40,896)
Administration expenses	**(88,154)**	(67,027)
Finance costs	**(37,549)**	(30,484)
Profit before income tax	**98,306**	96,522

4 Segment information (continued)

(c) Other segment information (continued)

(iii) Segment assets

The amounts provided to the Managing Director with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset. Reportable segments' assets are reconciled to total assets as follows:

	2011 $'000	2010 $'000
Segment assets	**900,244**	771,286
Unallocated:		
Inventories	**(2,675)**	(2,097)
Current receivables	**(650)**	(29,742)
Intangibles	**118,308**	113,604
Property, plant and equipment	**14,907**	11,638
Available for sale financial assets	**70,056**	46,941
Deferred tax assets	**11,864**	8,547
Cash and cash equivalents	**152,437**	63,532
Derivative financial instruments	**47**	120
Total assets as per the balance sheet	**1,264,538**	983,829

Segment assets are allocated based on where the assets are located.

	2011	2010
Australia	**515,122**	422,965
US	**294,282**	259,081
China	**62,305**	55,586
UK	**25,371**	30,575
Other countries	**3,164**	3,079
Total segment assets	**900,244**	771,286

(iv) Segment liabilities

The amounts provided to the Managing Director with respect to total liabilities are measured in a manner consistent with that of the financial statements. These liabilities are allocated based on the operations of the segment and the physical location of the liabilities. Reportable segments' liabilities are reconciled to total liabilities as follows:

	2011 $'000	2010 $'000
Segment liabilities	**171,223**	156,067
Unallocated:		
Payables	**13,106**	12,146
Derivative financial instruments	**7,309**	414
Current provisions	**4,285**	3,237
Non-current provisions	**3,399**	2,390
Current borrowings	**13,392**	16,007
Non-current borrowings	**360,905**	285,987
Current tax liabilities	**17,878**	10,137
Deferred tax liabilities	**21,978**	25,736
Total liabilities as per the balance sheet	**613,475**	512,121

5 Profit from ordinary activities

	2011 $'000	2010 $'000

Impairment charges		
Goodwill	**8,759**	-
Customer lists	**1,452**	-
Total impairment	**10,211**	-
Finance costs - net		
Interest and finance charges paid/payable	**37,044**	30,482
Borrowing costs amortisation	**6,655**	4,013
	43,699	34,495
Amount capitalised (note (a))	**(6,150)**	(4,011)
Finance costs expensed	**37,549**	30,484
Net loss on disposal of property, plant and equipment	**197**	599
Rental expense relating to operating leases		
Minimum lease payments	**6,143**	4,102
Total rental expense relating to operating leases	**6,143**	4,102
Foreign exchange gains and losses		
Net foreign exchange losses	**8,474**	-
Net foreign exchange losses recognised in profit before income tax for the year (as either other income or expense)	**8,474**	-
Research and development	**1,740**	2,843
ESCO arbitration award	**-**	9,200
Bond repurchase premium	**3,372**	-
Warranty	**4,225**	3,955
Stock Obsolescence	**1,407**	2,225
Net bad and doubtful debts expense (revenue) including movements in doubtful debts provision	**420**	164
Employee benefits expense	**342,766**	290,675

(a) Capitalised borrowing costs

The borrowing costs capitalised represent amounts incurred upfront to renew finance facilities.

6 Income tax expense

	2011 $'000	2010 $'000
(a) Income tax expense		
Current tax	**40,197**	26,672
Deferred tax	**(9,022)**	(2,119)
Adjustment for current tax of prior periods	**(481)**	1,199
	30,694	25,752
Income tax expense is attributable to:		
Profit from continuing operations	**30,694**	25,752
Aggregate income tax expense	**30,694**	25,752
Deferred income tax (revenue) expense included in income tax expense comprises:		
Decrease (increase) in deferred tax assets (note 13)	**(5,669)**	(3,226)
(Decrease) increase in deferred tax liabilities (note 20)	**(3,353)**	1,107
	(9,022)	(2,119)
(b) Numerical reconciliation of income tax expense to prima facie tax payable		
Profit from continuing operations before income tax expense	**98,306**	96,522
	98,306	96,522
Tax at the Australian tax rate of 30% (2010: 30%)	**29,492**	28,957
Tax effect of amounts which are not deductible (taxable) in calculating taxable income:		
Goodwill impairment	**3,084**	-
Entertainment	**71**	45
Research and development	**(213)**	(213)
Share based payments	**155**	708
Tax offset for franked dividends	**(523)**	(207)
Sundry items	**(3,044)**	(1,380)
	29,022	27,910
Difference in overseas tax rates	**(274)**	(2,185)
Adjustment for current tax of prior periods	**377**	458
Deferred tax assets restated for reduction in overseas tax rate	**87**	(6)
Prior year tax losses not recognised now recouped	**-**	(425)
Prior year tax losses de-recognised as not probable of recovery	**1,482**	-
Income tax expense	**30,694**	25,752
(c) Amounts recognised directly in equity		
Aggregate current and deferred tax arising in the reporting period and not recognised in net profit or loss or other comprehensive income but directly debited or credited to equity		
Net deferred tax - debited (credited) directly to equity (notes 13 and 20)	**(3,843)**	(2,180)
	(3,843)	(2,180)
(d) Tax expense (income) relating to items of other comprehensive income		
Available-for-sale financial assets (note 22(a))	**5,962**	4,986
Cash flow hedges (note 22(a))	**13**	(188)
	5,975	4,798

6 Income tax expense (continued)

(e) Tax consolidation legislation

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation as of 1 July 2003. The accounting policy in relation to this legislation is set out in note 1(f).

On adoption of the tax consolidation legislation, the entities in the tax consolidated group entered into a tax sharing agreement which, in the opinion of the directors, limits the joint and several liability of the wholly-owned entities in the case of a default by the head entity, Bradken Limited.

The Australian entities have also entered into an agreement under which the wholly-owned entities fully compensate Bradken Limited for any current tax payable assumed and are compensated by Bradken Limited for any current tax receivable and deferred tax assets relating to the unused tax losses or unused tax credits that are transferred to Bradken Limited under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

The amounts receivable/payable are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of the financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

7 Cash and cash equivalents

	2011 $'000	2010 $'000
Cash at bank and in hand	**152,476**	63,565
	152,476	63,565

(a) Reconciliation to cash at the end of the year

The above figures are reconciled to cash at the end of the financial year as shown in the statement of cash flows as follows:

	2011 $'000	2010 $'000
Balances as above	**152,476**	63,565
Bank overdrafts (note 18)	**(9,420)**	(198)
Balances per statement of cash flows	**143,056**	63,367

(b) Interest rate risk exposure

The Group's and parent entity's exposure to interest rate risk is discussed in note 2.

8 Receivables

	2011 $'000	2010 $'000
Current		
Trade receivables	**196,546**	102,594
Provision for impairment of receivables	**(476)**	(358)
	196,070	102,236
Other receivables	**57,722**	31,077
Prepayments	**4,696**	9,035
	258,488	142,348
Non-current		
Other receivables	**1,622**	1,485
	1,622	1,485

8 Receivables (continued)

(a) Impaired trade receivables

As at 30 June 2011 current trade receivables of the Group with a nominal value of $476,000 (2010: $358,000) were impaired. The amount of the provision was $476,000 (2010: $358,000).

Movements in the provision for impairment of receivables are as follows:

	2011 $'000	2010 $'000
Balance at 1 July	**358**	991
Charge for the year	**420**	164
Receivables written off during the year as uncollectable	**(151)**	(267)
Unused amounts reversed	**(61)**	(472)
Foreign currency exchange differences	**(90)**	(58)
Balance at 30 June	**476**	358

The creation and release of the provision for impaired receivables has been included in administration expenses in the income statement. Amounts charged to the provision are generally written off when there is no expectation of recovering additional cash.

(b) Past due but not impaired

At 30 June, the ageing analysis of trade receivables is as follows:

	2011 $'000	2010 $'000
Current	**136,818**	61,340
0-30 days	**44,186**	31,031
31-60 days	**10,018**	3,819
61-90 days	**466**	2,191
91 + days	**5,058**	4,213
Total	**196,546**	102,594

As at 30 June 2011 trade receivables of $476,000 (2010:$358,000) were past due and considered impaired and trade receivables of $59,252,000 (2010:$40,896,000) were past due but not impaired.

The other classes within trade and other receivables do not contain impaired assets and are not past due. Based on the credit history of these other classes, it is expected that these amounts will be received when due.

In relation to the receivables recognised as past due but not impaired and impaired, collateral is held in the form of a retention of title over the goods until payment is received. Given the consumable nature of these goods the ability to determine an accurate value for this collateral has been unable to be performed.

(c) Other receivables

These amounts generally arise from transactions outside the usual operating activities of the Group and also include amounts receivable based on the revenue recognised for contracts on a percentage of completion basis.

Also included in other receivables is a refundable deposit with Castle Harlan Inc for future investments of $23,765,000.

(d) Fair values

The fair values and carrying values of non-current receivables of the Group are as follows:

	2011		2010	
	Carrying amount $'000	Fair value $'000	Carrying amount $'000	Fair value $'000
Other receivables	**1,622**	1,622	**1,485**	1,485
	1,622	1,622	**1,485**	1,485

Due to the short term nature of these receivables, their carrying amount is assumed to approximate their fair value.

(e) Credit risk

There is no concentration of credit risk with respect to current and non-current receivables, as the Group has a large number of customers, nationally and internationally dispersed. Refer to note 2 for more information on the risk management policy of the Group and the credit quality of the entity's trade receivables.

The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above.

8 Receivables (continued)

(f) Foreign exchange and interest rate risk

The carrying amounts of the Group's and parent entity current and non-current receivables are denominated in the following currencies:

	2011 $'000	2010 $'000
Australian Dollars	**177,709**	84,041
US Dollars	**55,390**	44,694
Canadian Dollars	**14,063**	2,331
Chinese Yuan	**5,360**	6,345
Other *	**7,588**	6,422
	260,110	143,833

* Other refers to a basket of currencies (Euros, Great British Pounds, South African Rand, New Zealand Dollars)

Further information about the Group's and the parent entity's exposure to credit risk, foreign exchange risk and interest rate risk in relation to trade and other receivables is provided in note 2.

9 Other receivables

	2011 $'000	2010 $'000
Current receivables under finance leases (a)	**357**	-
Non current receivables under finance leases (a)	**5,542**	-

(a) Receivables under finance leases

The Group leases freight rail wagons to customers in Australia under finance lease arrangements. Lease agreements in which the other party, as lessee, is to be regarded as the economic owner of the leased assets give rise to accounts receivable in the amount of discounted future lease payments. The receivables under finance leases are as follows:

	Not later than one year $'000	Between one and five years $'000	Later than five years $'000
2011			
Present value	357	1,937	3,605
Unearned interest income	699	2,553	1,562
Total future payments	**1,056**	**4,490**	**5,167**

10 Inventories

	2011 $'000	2010 $'000
Construction work in progress:		
Contract costs incurred and recognised profits less recognised losses	**528,787**	564,069
Progress billing	**(529,076)**	(558,214)
Net construction work in progress	**(289)**	5,855
Raw materials and stores - at cost	**37,225**	37,528
Work in progress - at cost	**74,822**	60,098
Finished goods- at net realisable value	**65,789**	58,894
	177,547	162,375

(a) Inventory expense

Write downs of inventories to net realisable value recognised as an expense during the year ended 30 June 2011 amounted to $1,407,000 (2010: $2,225,000). The expense has been included in 'cost of sales' in the income statement.

11 Derivative financial instruments

	2011 $'000	2010 $'000
Current assets		
Interest rate swap and cap contracts - cash flow hedges ((a)(i))	-	120
Forward foreign exchange contracts - cash flow hedges ((a)(ii))	-	118
Total current derivative financial instrument assets	-	238
Current liabilities		
Interest rate swap and cap contracts - cash flow hedges ((b)(i))	27	190
Forward foreign exchange contracts ((a)(ii))	7,310	342
Total current derivative financial instrument liabilities	7,337	532
	(7,337)	(294)

(a) Instruments used by the Group

The Group is party to derivative financial instruments in the normal course of business in order to hedge exposure to fluctuations in interest and foreign exchange rates in accordance with the Group's financial risk management policies (refer to note 2).

(i) Interest rate swap and interest rate cap contracts - cash flow hedges

Bank loans of the Group had an average variable interest rate of 5.86% at 30 June 2011 (2010: 6.60%). It is policy to protect part of the loans from exposure to increasing interest rates. Accordingly, the Group has entered into interest rate swap contracts under which it is obliged to receive interest at variable rates and to pay interest at fixed rates, and interest rate caps which provide protection over an agreed interest rate level.

Swaps and caps currently in place cover approximately 40% of bank loans (2010: 61% of non US bank loans). The average fixed interest for the swaps and caps is 4.59% (2010: 4.47%).

At 30 June 2011, the notional principal amounts and periods of expiry of the interest rate swap and cap contracts are as follows:

	2011 $'000	2010 $'000
Interest rate swap contracts		
1 year or less	60,000	-
1 - 2 years	35,439	60,000
2 - 3 years	30,000	37,621
	125,439	97,621
Interest rate cap contract		
1 - 2 years	20,000	-
2 - 3 years	-	20,000
	20,000	20,000

The contracts require settlement of net interest receivable or payable each 90 days. The settlement dates coincide with the dates on which interest is payable on the underlying debt. The contracts are settled on a net basis.

The gain or loss from remeasuring the hedging instruments at fair value is deferred in equity in the hedging reserve, to the extent that the hedge is effective, and re-classified into profit and loss when the hedged interest expense is recognised. The ineffective portion is recognised in the income statement immediately.

At balance date for the Group these contracts were net liabilities with fair value of $27,000 (2010: $70,000 liability). In the year ended 30 June 2011 there was a gain from the change in fair value of $43,000 (2010: $622,000 loss).

11 Derivative financial instruments (continued)

(ii) Forward exchange contracts

It is the policy of the Group to enter into forward foreign exchange contracts to cover all foreign currency exposures other than those effectively covered within the natural hedging pool.

The following table details the forward foreign currency contracts outstanding and ranges of maturity as at reporting date:

	2011	2010	**2011**	2010

3 to 6 months	**177**	132	**11.2769**	11.3292

Amounts disclosed above represent currency bought and sold measured at the contracted rate.
The Group has not classified any of these hedging instruments to be effective hedges.

Group
At balance date these contracts were net liabilities of $7,310,000 (2010: $224,000 liability).
In the year ended 30 June 2011 there was a loss from the change in fair value of the liability of $7,086,000 (2010: loss of $352,000)

(b) Risk exposures
Further information about the Group's exposure to credit risk, foreign exchange risk and interest rate risk is provided in note 2.

(a) Impairment tests for goodwill and other intangibles

The impairment testing has been performed on the following cash generating units, Industrial, Mining Products, Rail, Power & Cement, Engineered Products and CMS.

The recoverable amount of the CGU is determined based on a value-in-use calculations. These calculations use cash flow projections based on financial forecasts approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using a perpetual growth rate of between 1.5% and 3.0% pa.

The carrying amounts of goodwill as disclosed in the balance sheet is $8.7m for the Industrial segment, $3.4m for the Rail segment, $38.8m for the Mining Products segment, $83.9m for the Engineered Products segment and $5.5m for CMS included in All Other Segments.

(b) Key assumptions used for value in use calculations

Management determined assumptions on revenue growth, gross margin, overhead level, working capital and capital expenditure have been determined based on past performance and expectations for the future. The weighted average growth rates used are consistent with forecasts included in industry reports.

In performing the value-in-use calculations, the company has applied a post tax discount rate to discount the forecast future attributable post tax cash flows. The post tax discount rate used is an estimated WACC of 11.0% (2010: 11.0%), which would translate into a pre tax discount rate of 15.7% (2010: 15.7%).

The pre tax discount rate for the US operations was 11.0% (2010: 19.4%).

14 Intangible assets (continued)

(c) Impairment charge

Impairment charges of $10,211,000 arose in the period. Goodwill in the Power & Cement business to the value of $8,759,000 was impaired due to continued weak market conditions resulting in projected future cash flows being unable to support the goodwill value carried. No class of asset other than goodwill was impaired in the Power & Cement business. A customer intangible in the Engineered Products business to the value of $1,452,000 was impaired following the loss of the customer.

(d) Impact of possible changes in key assumptions

The impairment testing highlights a reasonable buffer between the value-in-use amount and the net book value of assets of the CGU's. Significant changes in the major assumptions would be required to generate an impairment charge.

(e) Licence renewal

The Amsted licence expired in May 2011 and the Esco licence expired on 30 June 2011. The carrying value of the licences are nil and neither will be renewed.

15 Available for sale financial assets

	2011 $'000	2010 $'000
At beginning of year	**46,938**	10,379

Employee benefits	**7,475**	12,500
	7,475	12,500

(a) Warranties

Provision is made for known warranty claims at balance date. Most claims are expected to be settled in the next financial year. Management estimates the provision based on expected costs to be incurred to resolve the warranty claim.

(b) Movements in provisions

Movements in each class of provision during the financial year, other than employee benefits, are set out below:

2011 **Warranty**	Current $'000	Non current $'000
Carrying amount at start of year	1,683	-
Additional provisions recognised	4,225	-
FX variations	(118)	-
Amounts used	(4,105)	-
Carrying amount at end of year	1,685	-

(c) Amounts not expected to be settled within the next 12 months

The current provision for long service leave includes all unconditional entitlements where employees have completed the required period of service and also those where employees are entitled to pro-rata payments in certain circumstances. The entire amount is presented as current, since the Group does not have an unconditional right to defer settlement. However, based on past experience, the Group does not expect all employees to take the full amount of accrued long service leave or require payment within the next 12 months. The following amounts reflect leave that is not to be expected to be taken or paid within the next 12 months.

	2011 $'000	2010 $'000
Long service leave obligation expected to be settled after 12 months	**1,532**	728

18 Borrowings

	2011 $'000	2010 $'000
Current - secured		
Bank overdrafts	**-**	198
Bank loans	**817**	16,847
Lease liabilities (note 27)	**4,043**	4,447
Hire purchase liabilities (note 27)	**-**	1,199

Total unsecured current borrowings	**10,171**	1,363
Total current borrowings	**15,031**	24,054

18 Borrowings (continued)

	2011 $'000	2010 $'000
Non-current secured		
Bank loans	**-**	198,888
Lease liabilities (note 27)	**6,346**	7,908
Total secured non-current borrowings	**6,346**	206,796
Non-current unsecured		
Bank loans	**357,201**	-
US senior notes	**-**	76,933
Total unsecured non-current borrowings	**357,201**	76,933
Total non-current borrowings	**363,547**	283,729

(a) Secured liabilities

The total secured liabilities (current and non-current) are as follows:

	2011 $'000	2010 $'000
Bank loans	**817**	215,933
Lease liabilities	**10,389**	12,355
Hire purchase liabilities	**-**	1,199
Total secured liabilities	**11,206**	229,487

(b) Other loans

Other loans are repayable within twelve months. The current interest rate on these loans are 5.53% (2010: 5.48%).

(c) Risk exposures

The carrying amounts of the Group's borrowings are denominated in the following currencies:

	2011 $'000	2010 $'000
Australian Dollars	**260,850**	171,020
US Dollars	**88,744**	99,488
Great British Pounds	**26,978**	31,718
Canadian Dollars	**2,001**	-
Chinese Yuan	**5**	5,557
	378,578	307,783

Further information about the Group's and the parent entity's exposure to foreign exchange risk and interest rate risk and an analysis of the sensitivity of borrowings to interest rate and foreign exchange risk, is provided in note 2.

(d) Assets pledged as security

Refinancing of bank debt took place in April 2011 resulting in US and non US bank debt being repaid and a revised global facility was put in place on an unsecured basis. A Canadian dollar bank loan is secured by a general security arrangement creating a first priority security interest in all personal property of the borrower and a floating charge over all the borrower's real property.

Lease liabilities are effectively secured as the rights to the leased assets recognised in the financial statements revert to the lessor in the event of default.

	2011 $'000	2010 $'000

(e) Financing arrangements

Unrestricted access was available at balance date to the following lines of credit:

	2011 $'000	2010 $'000
Credit standby arrangements		
Total facilities		
Bank overdrafts	**30,827**	30,962
Standby letters of credit and bank guarantees	**147,602**	101,762
	178,429	132,724
Used at balance date		
Bank overdrafts	**9,420**	-
Standby letters of credit and bank guarantees	**67,427**	70,941
	76,847	70,941
Unused at balance date		
Bank overdrafts	**21,407**	30,962
Standby letters of credit and bank guarantees	**80,175**	30,821
	101,582	61,783
Bank loan facilities		
Total facilities	**552,951**	408,517
Used at balance date	**363,504**	222,214
Unused at balance date	**189,447**	186,303
US senior notes		
Total facilities	**-**	76,933
Used at balance date	**-**	76,933
Unused at balance date	**-**	-

Bank overdraft limits are comprised of a AUD 30,000,000 bilateral overdraft facility, a GBP 500,000 multi option facility and a NZD 100,000 overdraft facility.

Bank guarantees and letters of credit limits are comprised of a AUD 145,000,000 multicurrency revolving bank guarantee facility, a GBP 1,000,000 guarantees facility, a NZD 50,000 guarantees facility, a AUD 583,000 letter of credit facility and a CAD 500,000 letter of guarantee facility.

The bank loan facilities comprise CAD 5,000,000 revolving loan (Current Interest Rate 3.75%) and the Group Syndicated loan facility with three and five year revolving bullet term loan facilities with a AUD 425,000,000 multi-currency tranche, a USD 100,000,000 tranche and a GBP 20,000,000 tranche. Current interest rate is 5.85%.

18 Borrowings (continued)

(f) Fair value

The carrying amounts and fair values of interest bearing liabilities at balance date are:

	2011		2010	
	Carrying amount	**Fair value**	Carrying amount	Fair value
	$'000	**$'000**	$'000	$'000
On balance sheet				
Non traded financial liabilities				
Bank overdrafts	**9,420**	**9,420**	198	198
Bank loans	**358,018**	**358,018**	215,735	215,735
US senior notes	**-**	**-**	76,933	76,933
Other loans	**751**	**751**	1,363	1,363
Lease liabilities	**10,389**	**10,389**	12,355	12,355
Hire purchase liabilities	**-**	**-**	1,199	1,199
	378,578	**378,578**	307,783	307,783

Fair value is inclusive of costs which would be incurred on settlement of a liability.

(i) On balance sheet

The fair value of interest bearing liabilities is based upon market prices where a market exists or by discounting the expected future cash flows by the current interest rates for liabilities with similar risk profiles.

(ii) Off balance sheet

The parent entity and certain controlled entities have potential financial liabilities which may arise from certain contingencies disclosed in note 26. As explained in those notes, no material losses are anticipated in respect of any of those contingencies.

19 Retirement benefit obligations

(a) Superannuation plan

All employees of the Group are entitled to benefit from various superannuation or pension plans on retirement, disability or death. The Group operates one defined benefit retirement plan in the United States that covers hourly employees hired before May 10, 1993 in one of it's US subsidiaries. Benefits for the defined benefit plan are determined on years of credited service. The Group also operates a number of defined contribution plans which receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

The following sets out details in respect of the defined benefit plan only. The expense recognised in relation to the defined contribution plans is disclosed in note 5.

(b) Balance sheet amounts

The amounts recognised in the balance sheet are determined as follows:

	2011 $'000	2010 $'000
Present value of the defined benefit obligation	**24,653**	30,643
Fair value of defined benefit plan assets	**(19,616)**	(20,295)
Net liability in the balance sheet	**(5,037)**	(10,348)

The Group has no legal obligation to settle this liability with an immediate contribution or additional one off contributions. The Company contributes such amounts as deemed necessary on an actuarial basis to provide the Plan with assets sufficient to meet benefits paid to Plan participants.

(c) Categories of the plan assets

The major categories of plan assets are as follows:

	2011 $'000	2010 $'000
Cash equivalents	**4,120**	4,476
Fixed interest	**1,177**	1,839
Equity securities	**14,319**	13,980
	19,616	20,295

(d) Reconciliations

	2011 $'000	2010 $'000
Reconciliation of the present value of the defined benefit obligation, which is partly funded:		
Balance at the beginning of the year	**30,643**	27,599
Current service cost	**265**	269
Interest cost	**1,343**	1,590
Actuarial (gains) and losses	**69**	4,026
Benefits paid	**(1,356)**	(1,477)
FX Translation	**(6,311)**	(1,364)
	24,653	30,643
Reconciliation of the fair value of plan assets:		
Balance at the beginning of the year	**20,295**	20,007
Actual return on plan assets	**4,549**	2,719
Contributions by Group companies	**589**	97
Benefits paid	**(1,356)**	(1,477)
FX Translation	**(4,461)**	(1,051)
	19,616	20,295

19 Retirement benefit obligations (continued)

(e) Amounts recognised in profit or loss

The amounts recognised in profit or loss are as follow:

	2011 $'000	2010 $'000
Current service cost	**265**	269
Interest cost	**1,343**	1,590
Expected return on plan assets	**(1,199)**	(1,263)
Recognised net actuarial loss	**650**	559
Past service cost	**86**	96
Total included in employee benefits expense	**1,145**	1,251

(f) Amounts recognised in other comprehensive income

	2011 $'000	2010 $'000
Actuarial (loss)/gain recognised in the year	**3,622**	(2,012)
Cumulative actuarial (losses)/gains recognised in other comprehensive income	**(4,048)**	(8,945)

(g) Principal actuarial assumptions

The principal actuarial assumptions used (expressed as weighted averages) were as follows:

	2011	2010
Discount rate	**5.28%**	5.17%
Expected long-term return on plan assets	**7.00%**	7.00%
Rate of compensation increase	**N/A**	N/A

The Company selects the expected long-term rate of return on assets in consultation with its investment advisers and actuary. This rate is intended to reflect the average rate of earnings expected to be earned on the funds invested or to be invested to provide plan benefits, and the plan is assumed to continue in force as long as assets are expected to be invested. In estimating that rate, appropriate consideration is given to historical performance for the major asset classes held or anticipated to be held by the plan and to current forecasts of future rates of return for those asset classes. Cash flow and expenses are taken into consideration to the extent that the expected return would be affected by them. Because assets are held in a qualified trust, anticipated returns are not reduced for taxes.

(h) Employer contributions

Employer contributions to the defined benefit plan are based on recommendations by the plan's actuary. Actuarial assessments are performed annually, and the last such assessment was made during April 2011.

Total employer contributions expected to be paid by Group companies for the year ending 30 June 2012 are $1,095,278.

(i) Historic summary

	2011 $'000	2010 $'000	2009 $'000
Defined benefit plan obligation	**24,653**	30,643	27,599
Plan assets	**(19,616)**	(20,295)	(20,007)
Surplus / (deficit)	**(5,037)**	(10,348)	(7,592)

At 30 June 2011	**Balance**		**161,837,406**	**654,865**

(c) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

(d) Dividend reinvestment plan

The company has established a dividend reinvestment plan under which holders of ordinary shares may elect to have all or part of their dividend entitlements satisfied by the issue of new ordinary shares rather than by being paid in cash. The plan was active during the 2010 and 2011 years.

(e) Performance Rights Plan

Information relating to the Performance Rights Plan, including details of shares issued under the plan, is set out in note 35.

(f) Non-executive director share acquisition plan

Information relating to the non-exective director share acquisition plan, including details of shares issued under the plan, is set out in note 35.

(g) Share buy-back

There were no share buy-backs in the period.

Actuarial (losses) / gains on retirement benefit obligations, net of tax	**2,346**	(1,247)
Balance 30 June	**168,206**	153,270

(c) Nature and purpose of reserves

(i) Hedging reserve - cash flow hedges

The hedging reserve is used to record gains or losses on a hedging instrument in a cash flow hedge that are recognised directly in equity, as described in note 1(n). Amounts are recognised in profit and loss when the associated hedged transaction affects profit and loss.

(ii) Share-based payments reserve

The share based payments reserve is used to recognise the fair value of rights issued but not exercised.

(iii) Foreign currency translation reserve

Exchange differences arising on translation of the foreign controlled entity are taken to the foreign currency translation reserve, as described in note 1(d). The reserve is recognised in profit and loss when the net investment is disposed of.

22 Reserves and retained profits (continued)

(iv) Available-for-sale financial assets reserve

Changes in the fair value and exchange differences arising on translation of investments, such as equities classified as available-for-sale financial assets, are recognised in other comprehensive income as described in note 1(m) and accumulated in a separate reserve within equity. Amounts are reclassified to profit or loss when the associated assets are sold or impaired.

(v) Transactions with non-controlling interests

This reserve is used to record the differences described in note 1(b)(ii) which may arise as a result of transactions with non-controlling interests that do not result in a loss of control.

23 Dividends

	2011 $'000	2010 $'000
(a) Ordinary shares		
Final dividend for the year ended 30 June 2010 of 21.0 cents (2009: 13.0 cents) per fully paid share paid on 13 September 2010 (2009: 7 September 2009)		
Fully franked based on tax paid @ 30%	**29,138**	16,499
Interim dividend for the year ended 30 June 2011 of 18.5 cents (2010: 13.0 cents) per fully paid share paid 21 March 2011 (2010: 15 March 2010)		
Fully franked based on tax paid @ 30%	**25,833**	16,872
Total dividends provided for or paid	**54,971**	33,371
Dividends paid in cash or satisfied by the issue of shares under the dividend reinvestment plan during the years ended 30 June 2010 and 30 June 2011 were as follows:		
Paid in cash	**39,833**	11,905
Satisfied by issue of shares	**15,138**	21,466
	54,971	33,371
(b) Dividends not recognised at year end		
In addition to the above dividends, since year end the directors have recommended the payment of a final dividend of 21.0 cents per fully paid ordinary share, (2010: 21.0 cents) fully franked based on tax paid at 30%. The aggregate amount of the proposed dividend expected to be paid on 19 September 2011 out of retained profits at 30 June 2011, but not recognised as a liability at year end, is	**33,988**	29,137

(c) Franked dividends

The franked portions of the final dividends recommended after 30 June 2011 will be franked out of existing franking credits or out of franking credits arising from the payment of income tax in the year ending 30 June 2012.

	Consolidated		Parent entity	
	2011 $'000	2010 $'000	**2011 $'000**	2010 $'000
Franking credits available for subsequent financial years based on a tax rate of 30% (2010: 30%)	**47,544**	40,484	**47,544**	40,484

The above amounts represent the balance of the franking account as at the end of the financial year, adjusted for:

(a) franking credits that will arise from the payment of the amount of the provision for income tax

(b) franking debits that will arise from the payment of dividends recognised as a liability at the reporting date, and

(c) franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date.

The consolidated amounts include franking credits that would be available to the parent entity if distributable profits of subsidiaries were paid as dividends.

The impact on the franking account of the dividend recommended by the directors since year end, but not recognised as a liability at year end, will be a reduction in the franking account of $14,566,000 (2010: $12,487,000).

24 Key management personnel disclosures

(a) Directors

The following persons were directors of Bradken Limited during the financial year:

(i) Chairman - non-executive

Nick Greiner

(ii) Executive director

Brian Hodges, Managing Director

(iii) Non executive directors

Phil Arnall

Vince O'Rourke

Greg Laurie

Peter Richards

(b) Other key management personnel

The following persons also had authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, during the financial year:

Name	*Position*	*Employer*
Tom Armstrong	Chief Operating Officer - Engineered Products	Bradken Holdings USA, Inc
Bruce Arnott	Chief Financial Officer	Bradken Resources Pty Ltd
Andrew Allen	General Manager - Rail	Bradken Resources Pty Ltd
Enda Sheridan	General Manager - Mining Products & Industrial Products	Bradken Resources Pty Ltd

(c) Key management personnel compensation

	2011	2010
	$	$
Short-term employee benefits	**5,476,670**	4,156,221
Post-employment benefits	**198,106**	226,220
Share-based payments	**959,342**	858,917
	6,634,118	5,241,358

The company has taken advantage of the relief provided by *Corporations Regulation* 2M.6.04 and has transferred the detailed remuneration disclosures to the directors' report. The relevant information can be found in sections (a) to (d) of the remuneration report on pages 12 to 18.

(d) Equity instrument disclosures relating to key management personnel

(i) Rights provided as remuneration and shares issued on exercise of rights

Details of Performance Rights provided as remuneration and shares issued on the exercise of such Rights, together with terms and conditions of the Rights, can be found in section (d) of the remuneration report on pages 16 to 18.

24 Key management personnel disclosures (continued)

(ii) Rights holdings

The number of Rights over ordinary shares in the company held during the financial year by each director of Bradken Limited and other key management personnel of the Group, including their personally related entities, are set out below.

2011 Name	Balance at the start of the year	Granted during the year as compensation	Exercised during the year	Other changes during the year	Balance at the end of the year	Vested and exercisable at the end of the year
Directors of Bradken Limited

25 Remuneration of auditors

It is the Group's policy to employ PricewaterhouseCoopers on assignments additional to their statutory audit duties where PricewaterhouseCoopers' expertise and experience with the Group are important. These assignments are principally tax advice and due diligence reporting on acquisitions, or where PricewaterhouseCoopers is awarded assignments on a competitive basis. It is the Group's policy to seek competitive tenders for all major consulting projects.

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non related audit firms:

	2011 **$**	2010 $
(a) Assurance services		
Audit services		
PricewaterhouseCoopers Australian firm:		
Audit and review of financial reports and other audit work under *Corporations Act 2001*	**423,538**	383,275
Related practices of PricewaterhouseCoopers Australian firm	**177,885**	200,703
Non-PricewaterhouseCoopers audit firm (Deloittes NZ)	**16,103**	22,373
Non-PricewaterhouseCoopers audit firm (KPMG US)	**-**	24,144
Non-PricewaterhouseCoopers audit firm (Grant Thornton)	**290,431**	332,497
Total remuneration for audit services	**907,957**	962,992
Other assurance services		
Related practices of PricewaterhouseCoopers Australian firm		
Accounting services	**41,778**	-
Non-PricewaterhouseCoopers audit firm (Fubang China)		
Capital verification services	**428**	-
Total remuneration for other assurance services	**42,206**	-

26 Contingent liabilities

(a) Contingent Liabilities

The parent entity and Group had contingent liabilities at 30 June 2011 and 2010 in respect of:

Guarantees and letters of credit

	2011	2010
	$'000	$'000
Bank guarantees for contract performance	**64,392**	60,744
Letters of credit	**3,035**	10,197
Total estimated contingent liabilities	**67,427**	70,941

Information about guarantees given by entities within the Group, including the parent entity are described in note 31. No deficiencies of assets exist in any of these companies.

Claims

The Bradken Group has been involved from time to time in various claims and lawsuits incidental to the ordinary course of business, including damages and commercial disputes relating to its products and services. The Group has disclaimed liability and will defend any action flowing from specific claims. It is not practical to estimate the potential effect of these claims but legal advice obtained indicates that any liability that may arise in the unlikely event these claims are successful will not be significant.

No material losses are anticipated in respect of any of the above contingent liabilities.

27 Commitments

(a) Capital commitments

Capital expenditure contracted for at the reporting date but not recognised as liabilities is as follows:

	2011	2010
	$'000	$'000
Land & buildings		
Payable:		
Within one year	**17,597**	2,688
	17,597	2,688
Property, plant and equipment		
Payable:		
Within one year	**28,188**	5,576
	28,188	5,576

(b) Lease and hire purchase commitments

Commitments in relation to leases and hire purchases contracted for at the reporting date but not recognised as liabilities, payable:		
Within one year	**6,085**	4,502
Later than one year but not later than five years	**11,415**	6,168
Later than five years	**2,289**	900
	19,789	11,570
Representing:		
Non cancellable operating leases	**18,381**	9,599
Future finance charges on finance leases	**1,408**	1,941
Future finance charges on hire purchases	**-**	30
	19,789	11,570

27 Commitments (continued)

(i) Operating leases

Operating leases relate to buildings and plant and equipment with lease terms generally between 1 to 5 years with a small amount being payable over greater than 5 years. Leases generally provide the consolidated entity with a right of renewal at which time all terms are renegotiated.

	2011 $'000	2010 $'000
Commitments for minimum lease payments in relation to non cancellable operating leases are payable as follows:		
Within one year	**5,380**	3,584
Later than one year but not later than five years	**10,713**	5,133
Later than five years	**2,288**	882
	18,381	9,599

(ii) Finance leases

The Group leases various items of plant and equipment with a carrying amount of $10,442,000 (2010: $12,111,000) under finance leases expiring within three to five years. Under the terms of the leases, the Group has the option to acquire some of the leased assets on expiry of the leases.

	2011 $'000	2010 $'000
Commitments in relation to finance leases are payable as follows:		
Within one year	**4,775**	5,286
Later than one year but not later than five years	**7,002**	8,742
Later than five years	**20**	268
Minimum lease payments	**11,797**	14,296
Future finance charges	**(1,408)**	(1,941)
Total lease liabilities	**10,389**	12,355
Representing lease liabilities:		
Current (note 18)	**4,043**	4,447
Non current (note 18)	**6,346**	7,908
	10,389	12,355

The weighted average interest rate implicit in the leases is 8.73**%** (2010: 8.59%).

(iii) Hire purchase payment commitments

The Group acquired some items of production plant and equipment under hire purchase arrangements.

	2011 $'000	2010 $'000
Commitments in relation to hire purchases are payable as follows:		
Within one year	**-**	1,229
Minimum lease payments	**-**	1,229
Future finance charges	**-**	(30)
Recognised as a liability	**-**	1,199
Total lease liabilities	**-**	1,199
Representing lease liabilities:		
Current (note 18)	**-**	1,199
	-	1,199

The weighted average interest rate implicit in the agreement is Nil **%** (2010: 6.57%).

28 Related party transactions

(a) Parent entities

The ultimate parent entity within the Group is Bradken Limited.

(b) Subsidiaries

Interests in subsidiaries are set out in note 30.

(c) Key management personnel

Disclosures relating to key management personnel are set out in note 24.

(d) Terms and conditions

Transactions relating to dividends were on the same conditions that applied to other shareholders.

The terms and conditions of the tax funding agreement are set out in note 6(e).

All other transactions were made on normal commercial terms and conditions and at market rates, except that there are no fixed terms for the repayment of loans between the parties. Outstanding balances are unsecured with no fixed term for repayment.

29 Business combination

(a) Summary of acquisitions and assets and liabilities acquired

Current Period

(i) Almac Machine Works

On 10 July 2010 Bradken Canada Ltd (a 100% subsidiary of Bradken Limited) acquired the assets of Almac Machine Works in Edmonton, Alberta, Canada for a consideration of A$52.6m.

To fund the acquisition A$49.3 million was raised via a fully underwritten institutional placement which was completed on 18 May 2010 resulting in the issue of 7,092,200 ordinary shares. In addition a Share Purchase Plan raised an additional $8.0 million resulting in the issue of a further 1,136,133 ordinary shares.

As the acquired business has been absorbed into the North American Engineered Products business, it is not practical to disclose revenues and net profit after tax to the Group for the full year as if the acquisitions had taken place on 1 July 2010. Acquisition costs for the period were $744,000 and are included in administration expenses in profit or loss.

Details of net assets acquired and goodwill are as follows:

	$'000
Purchase consideration	**52,585**
Fair value of net identifiable assets acquired (refer below)	**50,452**
Goodwill	**2,133**

The goodwill is attributable to the profitability of the acquired business and synergies expected to arise after the Group's acquisition of the Almac business. The fair value of assets and liabilities arising from the acquisition are as follows:

	Fair value $'000
Property, plant and equipment	24,061
Inventories	4,811
Receivables	7,762
Customer lists	12,775
Patents	2,737
Payables	(1,694)
Net identifiable assets acquired	**50,452**

(ii) Other acquisitions in the period

Between 28 October 2010 and 19 May 2011 three small acquisitions have been made. The assets of Materix Enginerring Pty Ltd and Investment Castings Pty Ltd were acquired on 28 October 2010 and 15 November 2010 respectively. On 19 May 2011 the Bradken Group acquired Wear Protect Systems Pty Ltd and two of it's related companies.

Total provisional consideration for these acquisitions amounted to $29.7m, with funding from existing facilities.

As the acquired business have been absorbed into the Australian based Industrial and Mining Products businesses, it is not practical to disclose revenues and net profit after tax to the Group for the full year as if the acquisitions had taken place on 1 July 2010 . Acquisition costs for the period were $338,000 and are included in administration expenses in profit or loss.

Details of provisional net assets acquired and provisional goodwill are as follows:

	$'000
Provisional purchase consideration	**29,685**
Provisional fair value of net identifiable assets acquired (refer below)	**13,646**
Provisional goodwill	**16,039**

29 Business combination (continued)

(ii) Other acquisitions in the period (continued)

The provisional goodwill is attributable to the profitability of the acquired business and synergies expected to arise after the Group's acquisition of the businesses. The fair value will be finalised and any adjustments disclosed in the Group's financial statements for the year ended 30 June 2012. The provisional fair value of assets and liabilities arising from the acquisition are as follows:

	Provisional fair value $'000
Cash	661
Property, plant and equipment	7,825
Inventories	1,188
Receivables	4,157
Payables	(1,555)
Provisions for employee entitlements	(507)
Deferred tax assets	185
Current tax liabilities	1,692
Net identifiable assets acquired	**13,646**

30 Transactions with non-controlling interests

(a) Transactions with non-controlling interests

On 28 February 2011, Bradken Resources Pty Ltd acquired the remaining 30% of the issued shares of CMS HAA Pty Ltd that it did not already own for a purchase consideration of $216,669. The carrying amount of the non-controlling interests in CMS HAA Pty Ltd on the date of acquisition was $122,000. The group recognised a decrease in non-controlling interests of $122,000 and a decrease in equity attributable to owners of the parent of $95,000. The effect of changes in the ownership interest of CMS HAA Pty Ltd on the equity attributable to owners of Bradken Resources Pty Ltd during the year is summarised as follows:

	2011 $'000	2010 $'000
Carrying amount of non-controlling interests acquired	**122**	2,781
Consideration paid to non-controlling interests	**(217)**	(3,250)
Excess of consideration paid recognised in the transactions with non-controlling interests reserve within equity	**(95)**	(469)

31 Deed of cross guarantee

Pursuant to ASIC Class Order 98/1418 (as amended) dated 13 August 1998, the wholly-owned subsidiaries listed below are relieved from the Corporations Act 2001 requirements for preparation, audit, and lodgement of financial reports, and directors' report. It is a condition of the Class Order that the Company and each of the subsidiaries enter into a Deed of Cross Guarantee.

The effect of the Deed is that the Company guarantees to each creditor payment in full of any debt in the event of winding up of any of the subsidiaries under certain provisions of the Corporations Act 2001. If a winding up occurs under other provisions of the Act 2001, the Company will only be liable in the event that after six months any creditor has not been paid in full. The subsidiaries have also given similar guarantees in the event that the Company is wound up.

The companies subject to the Deed are:

- Bradken Limited
- Bradken SPV Pty Limited
- Bradken Resources Pty Limited
- Bradken Mining SPV Pty Limited
- Cast Metal Services Pty Limited (became a party to the deed on 16 June 2011)
- Geoff Brown and Co. Pty Limited (became a party to the deed on 16 June 2011)
- Bradken Holdings Pty Limited
- Bradken Operations Pty Limited
- Bradken Finance Pty Limited

The above companies represent a 'Closed Group' for the purposes of the Class Order, and as there are no other parties to the Deed of Cross Guarantee that are controlled by Bradken Limited, they also represent the 'Extended Closed Group'.

31 Deed of cross guarantee (continued)

(a) Consolidated income statement, statement of comprehensive income and summary of movements in consolidated retained earnings

Set out below is a consolidated income statement and a summary of movements in consolidated retained profits for the year ended 30 June 2011 of the Closed Group outlined above.

	2011 $'000	2010 $'000
Income statement

Acquisition of plant and equipment by means of finance leases	**3,966**	5,977
	3,966	5,977

Dividends satisfied by the issue of shares under the dividend reinvestment plan are shown in note 23 and rights and shares issued to employees under the Bradken Limited Performance Rights Plan and the Bradken Limited Employee Share Plan for no cash consideration are shown in note 35.

Ordinary shares issued for acquisition of entities for no cash consideration are shown in note 21.

34 Earnings per share

	2011 Cents	2010 Cents
(a) Basic earnings per share		
Profit from continuing operations attributable to the ordinary equity holders of the company	**47.6**	54.1
Profit attributable to the ordinary equity holders of the company	**47.6**	54.1
(b) Diluted earnings per share		
Profit from continuing operations attributable to the ordinary equity holders of the company	**47.1**	53.6
Profit attributable to the ordinary equity holders of the company	**47.1**	53.6

(c) Reconciliations of earnings used in calculating earnings per share

	2011 $'000	2010 $'000
Basic earnings per share		
Profit from continuing operations	**67,612**	70,770
Profit from continuing operations attributable to non-controlling interests	**(51)**	(329)
Profit from continuing operations attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**67,561**	70,441
Profit attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**67,561**	70,441
Diluted earnings per share		
Profit attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**67,561**	70,441
Profit attributable to the ordinary equity holders of the company used in calculating diluted earnings per share	**67,561**	70,441

(d) Weighted average number of shares used as the denominator

	2011 Number	2010 Number
Weighted average number of ordinary shares used as the denominator in calculating basic earnings per share	**141,860,442**	130,191,911
Adjustments for calculation of diluted earnings per share:		
Rights	**1,580,597**	1,261,850
Weighted average number of ordinary shares and potential ordinary shares used as the denominator in calculating diluted earnings per share	**143,441,039**	131,453,761

(e) Information concerning the classification of securities

(i) Rights

Rights granted to employees under the Bradken Performance Rights Plan are considered to be potential ordinary shares and have been included in the determination of diluted earnings per share to the extent to which they are dilutive. The Rights have not been included in the determination of basic earnings per share. Details relating to the Rights are set out in note 35.

35 Share based payments

(a) Non-Executive Director Share Acquisition Plan

The Company has a Non-Executive Director Share Acquisition Plan (NED Plan). All current and future Non-Executive Directors are encouraged to have a percentage of their annual Directors' fees provided in shares under the NED Plan. Shares will be allocated to the Non-Executive Directors under the NED Plan and must be held for a specified period.

Non-executive directors may elect to have a percentage of their annual fixed directors' fees provided in shares under the Non-Executive Director Share Acquisition Plan (NED plan). Participation in the plan is voluntary.

Non-Executive Directors will not be able to sell or otherwise dispose of the shares until the earliest of 10 years after acquisition or the Non-Executive Director ceasing to be a director of the Company (except in very limited circumstances). During this period the shares will be subject to a holding lock.

At 30 June 2011 there are no Directors participating in the plan.

(b) Performance Rights Plan

The Performance Rights Plan (PRP) is the Company's long-term incentive (LTI) scheme for selected key executives. The Managing Director recommends the list of executives who are entitled to participate in this scheme and seeks approval of the list from the Human Resources Committee which is then ratified by the Board. Under the PRP, eligible executives may be granted Performance Rights (each being a right to acquire a share, subject to the satisfaction of exercise conditions) on terms and conditions determined by the Board and as doocumented in the PRP Plan rules and Trust Deed. If the exercise conditions are satisfied, the Performance Rights may be exercised and the shares issued and delivered to the executive. The Board may impose restrictions on the disposal of the shares and implement procedures to enforce the restrictions.

The rules of the PRP provide that the Board may determine a price that is payable to exercise a Performance Right, or that no amount is payable by the executive upon exercise of the Right.

Shares will immediately be allocated on exercise of a Performance Right. Performance Rights may only be exercised following satisfaction of performance conditions, unless the Board determines an event (such as a takeover bid) has occurred.

All grants of Performance Rights issued so far have been at no cost to participating executives. In relation to future grants, the Board may impose performance conditions that reflect the Company's business plans, targets, budgets and its performance relative to peer groups of companies.

If any additional persons become entitled to participate in the PRP and their participation requires approval under Chapter 10 of the Listing Rules, they will not participate in the PRP until shareholder approval is received pursuant to Listing Rule 10.14. Mr Brian Hodges, being the only Executive Director of the Company, is the only Director entitled to participate in the PRP. If any other Director is to participate in the PRP, the Company would seek shareholder approval as required by the Listing Rules.

The performance conditions are based on the relative total shareholder return ("TSR") of the Company measured against other companies in the ASX Small Cap Industrials index during the performance period. TSR measures the total return on investment of a share taking into account capital appreciation, capital return and dividend income.

35 Share based payments (continued)

(b) Performance Rights Plan (continued)

In assessing whether the performance hurdles have been met, the Human Resources Committee receives independent data from an independent investment bank which provides both Bradken's growth from previous financial years and that of the ASX Small Industrials Index. The Company's performance against the hurdle is then determined with each company in the ASX Small Industrials Index and Bradken being ranked in order of growth in results from previous financial years. The Company's percentile ranking is determined by aggregating the weighting within the ASX Small Industrials Index (based on market capitalisation) of each company ranked below Bradken. The method of assessment was chosen as it provides the Committee with an objective means of measuring the Company's performance against its peer group.

Dividends, changes in share price, and return of capital are included in the TSR calculation which is one of the performance criteria assessed for the LTI. The specific TSR performance conditions in relation to the grants are:

Target	Percentage of Rights available in given year to vest
The Company's TSR does not meet performance of the median company in ASX Small Cap	0
The Company's TSR equals or exceeds performance of the median company in ASX Small Cap	50
The Company's TSR ranked in third quartile of companies in ASX Small Cap	Pro rata between 50 and 100
The Company's TSR ranked in fourth quartile of companies in ASX Small Cap	100

New entrants to the scheme are provided with a transition to the 3 year plan.

Summary of Rights issues in the plan:

Grant date	Number of Rights	Fair value per Right	Financial periods in which Rights may vest
31 October 2007	11,682	$6.87	30 June 2010 / 2011
31 October 2007	259,691	$8.45	30 June 2011
17 October 2008	25,025	$2.84	30 June 2010 / 2011
17 October 2008	15,621	$4.11	30 June 2011
17 October 2008	340,655	$4.82	30 June 2012
29 October 2009	29,831	$2.50	30 June 2011
29 October 2009	69,401	$3.71	30 June 2011 / 2012
29 October 2009	665,216	$4.41	30 June 2013
5 November 2010	34,537	$5.13	30 June 2012 / 2013
5 November 2010	26,832	$5.13	30 June 2013
5 November 2010	550,078	$6.12	30 June 2014

There were no other Rights eligible for issuance under the scheme at 30 June 2011.

35 Share based payments (continued)

The movements in Rights issues in the plan are as follows:

Grant Date	Fair value at grant date	Balance at start of the year Number	Granted during the year Number	Exercised during the year Number	Expired during the year Number	Balance at end of the year Number	Exercisable at end of the year Number
2011							
18 November 2005	2.35	10,344	-	-	-	10,344	10,344

29 October 2009	2.50	-	29,831	-	-	29,831	
29 October 2009	3.71	-	69,401	-	-	69,401	
29 October 2009	4.41	-	665,216	-	-	665,216	-
Total		944,272	764,448	(232,206)	(27,969)	1,448,545	89,615
Weighted average price		5.10	4.27	3.45	3.44	4.96	3.26

The expiry dates of all grants shown in the tables above are 10 years from the test date.

35 Share based payments (continued)

The weighted average share price at the date of exercise of Rights exercised regularly during the year ended 30 June 2011 was $8.10 (2010: $6.51). The weighted average remaining contractual life of share Rights outstanding at the end of the period was 1.44 years (2010: 1.63 years).

Fair value of Rights granted

The assessed fair value at grant date of Rights granted during the year ended 30 June 2011 was between $5.13 and $6.12 per right (2010: between $2.50 and $4.41). The fair value at grant date is determined using a Black Scholes option pricing model that takes into account the exercise price, the term of the Right, the vesting and performance criteria, the impact of dilution, the non tradeable nature of the Right, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the Right.

The following factors and assumptions have been used in determining the fair value of Rights for the issues granted:

Grant Date	Expiry Date	Fair value per Right	Exercise price	Price of shares on grant date	Estimated volatility	Risk free interest rate	Dividend yield
18/11/2005	Ten years from Test Date	2.35	-	4.15	90%	5.35%	0.00%
30/10/2006	Ten years from Test Date	2.80	-	6.00	90%	5.73%	0.00%
30/10/2006	Ten years from Test Date	3.44	-	6.00	90%	5.73%	0.00%
31/10/2007	Ten years from Test Date	4.44	-	14.68	90%	6.18%	0.00%
31/10/2007	Ten years from Test Date	6.87	-	14.68	90%	6.18%	0.00%
31/10/2007	Ten years from Test Date	8.45	-	14.68	90%	6.18%	0.00%
17/10/2008	Ten years from Test Date	2.84	-	6.30	139%	5.19%	0.00%
17/10/2008	Ten years from Test Date	4.11	-	6.30	139%	5.19%	0.00%
17/10/2008	Ten years from Test Date	4.82	-	6.30	139%	5.19%	0.00%
29/10/2009	Ten years from Test Date	2.50	-	6.05	129%	5.52%	0.00%
29/10/2009	Ten years from Test Date	3.71	-	6.05	129%	5.52%	0.00%
29/10/2009	Ten years from Test Date	4.41	-	6.05	129%	5.52%	0.00%
5/11/2010	Ten years from Test Date	5.13	-	8.60	125%	5.25%	0.00%
5/11/2010	Ten years from Test Date	5.13	-	8.60	125%	5.25%	0.00%
5/11/2010	Ten years from Test Date	6.12	-	8.60	125%	5.25%	0.00%

The expected price volatility is based on the historic volatility (based on the remaining life of the options), adjusted for any expected changes to future volatility due to publicly available information.

(d) Expenses arising from share based payment transactions

Total expenses arising from share based payment transactions recognised during the period as part of employee benefit expense were as follows:

	2011 **$'000**	2010 $'000
Rights issued under Performance Rights Plan	**2,906**	2,360
	2,906	2,360

36 Parent entity financial information

(a) Summary financial information

The individual financial statements for the parent entity show the following aggregate amounts:

	2011 $'000	2010 $'000
Balance sheet		
Total assets	**724,129**	512,785
Current liabilities	**11,822**	7,430
Total liabilities	**11,822**	7,430
Shareholders' equity		
Issued capital	**654,865**	468,460
Share-based payments reserve	**5,975**	5,457
Retained earnings	**51,467**	31,438
	712,307	505,355
Profit or loss for the year	**75,000**	-
Total comprehensive income	**75,000**	-

(b) Guarantees entered into by the parent entity

The parent entity is a guarantor under the Bradken Group - Common Terms Deed Poll and unconditionally and irrevocably guarantees payments due in connection with any financing facilities owed by any Group company.

(c) Contingent liabilities of the parent entity

The parent entity did not have any contingent liabilities as at 30 June 2011 or 30 June 2010.

(d) Contractual commitments for the acquisition of property, plant or equipment

The parent entity did not have any contractual commitments for the acquisition of property, plant or equipment at 30 June 2011 or 30 June 2010.

37 Events occurring after balance sheet date

Bradken acquired Australian and Overseas Alloys Pty Ltd based in Wollongong NSW for a total purchase price of $20m on 7 July 2011. Bradken finalised the acquisition of Norcast Castings Limited based in Canada from Castle Harlan Inc. on 12 July 2011 for a total cost of $202m AUD. Both of these acquisition were funded from existing cash and debt facilities.

Other than the acquisitions stated above no material events have occurred that affect the operations of the Group from the end of the financial period ended 30 June 2011 to the date of issue of this report.

In the directors' opinion:

(a) the financial statements and notes set out on pages 25 to 90 are in accordance with the Corporations Act 2001, including

(i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

(ii) giving a true and fair view of the consolidated entity's financial position as at 30 June 2011 and of it's performance for the financial year ended on that date; and

(b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable, and

(c) at the date of this declaration, there are reasonable grounds to believe that the members of the extended Closed Group identified in Note 31 will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee described in Note 31.

Note 1(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The directors have been given the declarations by the chief executive officer and chief financial officer required by section 295A of the *Corporations Act 2001*.

This declaration is made in accordance with a resolution of the directors:

Independent audit report to the members of Bradken Limited

Report on the financial report

We have audited the accompanying financial report of Bradken Limited (the company), which comprises the balance sheet as at 30 June 2011, and the income statement, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration for the Bradken Group (the consolidated entity). The consolidated entity comprises the company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements, that the financial statements comply with International Financial Reporting Standards.*

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

Our procedures include reading the other information in the Annual Report to determine whether it contains any material inconsistencies with the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001.*

Auditor's opinion

In our opinion:

(a) the financial report of Bradken Limited is in accordance with the *Corporations Act 2001*, including:

(i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2011 and of its performance for the year ended on that date; and

(ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*; and

(b) the financial report and notes also comply with International Financial Reporting Standards as disclosed in Note 1.

Report on the Remuneration Report

We have audited the remuneration report included in pages 12 to 20 of the directors' report for the year ended 30 June 2011. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's opinion

In our opinion, the remuneration report of Bradken Limited for the year ended 30 June 2011, complies with section 300A of the *Corporations Act 2001.*

Auditor's Independence Declaration

As lead auditor for the review of Bradken Limited for the half year ended 31 December 2011, I declare that, to the best of my knowledge and belief, there have been:

(a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review; and

(b) no contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of Bradken Limited and the entities it controlled during the period.

Cash and cash equivalents at the end of the half-year		**28,688**	6,377

The above consolidated statement of cash flows should be read in conjunction with the accompanying notes.

1 Basis of preparation of half-year financial report

This general purpose consolidated financial report for the interim half year reporting period ended 31 December 2011 has been prepared in accordance with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Act 2001.

This interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2011 and any public announcements made by Bradken Limited during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

(a) Impact of standards issued but not yet applied by the entity

In December 2009, the AASB issued AASB 9 Financial Instruments which addresses the classification and measurement of financial assets and may affect the group's accounting for its financial assets. The standard is not applicable until 1 January 2013 but is available for early adoption. The Group is yet to assess its full impact. The Group has not yet decided when to adopt AASB 9.

2 Segment information

(a) Description of segments

Operating segments are reported in a manner that is generally consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Managing Director.

Segment revenues, expenses, assets and liabilities are those that are directly attributable to a segment. Segment assets include all assets used by a segment and consist primarily of receivables, inventories and property, plant and equipment, net of related provisions.

Segment revenues, expenses and results include transfers between segments. Sales of scrap between controlled entities are made on an "arm's-length" basis and are eliminated on consolidation. All other transfers are made at variable cost and are eliminated on consolidation.

Industrial is a supplier of cast, machined and fabricated components manufactured to customer specifications or purpose designed to suit customer needs into industries such as Smelters and Refineries, Steel Manufacturers and Sugar Production. Mining Products consists of design, supply and service of wear components for all types of earth moving and mineral processing equipment in the Mining, Mineral Processing and Quarry industries. Rail is a package provider of Freight Rollingstock products and services including freight wagons, bogies, drawgear, inventory management, spare and renewed parts and the maintenance and refurbishment of rollingstock. Engineered Products based in the US is a supplier of cast parts to the Energy, Power, Cement, Industrial and Rail Transport industries specialising in large (greater than 4,500 kg) highly engineered steel castings.

Although the Industrial segment does not meet the quantitative thresholds required by AASB 8, management has concluded that this segment should be reported, as it is closely monitored by the Managing Director.

Responsibility for the Resource business previously included as part of the US based Engineered Products segment has been moved to the Mining Products segment. Management of the Power & Cement business based in the UK, previously reported in "all other segments", is now undertaken by the US based Resources business and as a consequence is reported under the Mining Products segment Responsibility for the Australian based part of the Power & Cement business is now the responsibility of the Australian based Industrial segment and has been moved to that segment. Comparative disclosures have also been amended to reflect these changes.

The Canadian based Norcast business has been included in the Mining Products segment as it is a manufacturer and distributor of mill liner products and complements the Mineral Processing business that is part of that segment.

2 Segment information (continued)

(b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the half-year ended 31 December 2011 is as follows:

	Industrial	Mining Products	Rail	Engineered Products	All other segments	Total
	$'000	$'000	$'000	$'000	$'000	$'000
Half-year 2011						
Total segment revenue	49,416	329,874	171,605	159,208	58,130	768,233
Inter-segment revenue	(269)	(31,376)	(6,946)	(3,950)	(42,542)	(85,083)
Revenue from external customers	49,147	298,498	164,659	155,258	15,588	683,150
Gross margin	15,880	99,939	28,054	52,015	9,110	204,998
Half-year 2010						
Total segment revenue	41,523	255,556	109,324	134,858	53,505	594,766
Inter-segment revenue	(1,144)	(19,161)	(3,493)	-	(38,492)	(62,290)
Revenue from external customers	40,379	236,395	105,831	134,858	15,013	532,476
Gross margin	12,936	87,549	28,306	44,726	7,842	181,359
Total segment assets						
At 31 December 2011	79,352	503,912	175,735	302,913	41,278	1,103,190
At 30 June 2011	79,566	407,239	139,665	236,762	37,012	900,244

The Managing Director assesses the performance of each operating segment based on a measure of gross margin. Gross margin is considered the most relevant measure of individual segment results as manufacturing plants all make product for the various segments and transfer product at cost. This measurement basis excludes the allocation of manufacturing variances and overheads from individual manufacturing plants as any allocation would be arbitrarily based.

A reconciliation of standard gross margin to operating profit before income tax is provided as follows:

	Half-year	
	2011	2010
	$'000	$'000
Gross margin	**204,998**	181,359
Fixed manufacturing overheads and other cost of sale adjustments	**(69,356)**	(55,118)
Other income	**7,573**	2,608
Selling and technical expenses	**(28,463)**	(24,725)
Administration expenses	**(37,327)**	(45,419)
Finance costs	**(16,286)**	(17,556)
Profit before income tax	**61,139**	41,149

The amounts provided to the Managing Director with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset.

3 Profit for the half-year

	Half-year 2011 $'000	Half-year 2010 $'000
Profit for the half-year includes the following items that are unusual by their nature, size or incidence:		
Expenses		
Impairment of Power & Cement goodwill	**-**	8,759
Less: Applicable income tax expense	**-**	-
	-	8,759
Impairment of customer intangibles	**-**	1,452
Less: Applicable income tax expense	**-**	-
	-	1,452
Impairment of UK tax asset	**-**	1,999
Acquisition costs	**920**	1,447
Less: Applicable income tax expense	**(276)**	(434)
	644	1,013

4 Dividends

	Half-year 2011 $'000	Half-year 2010 $'000
Ordinary shares		
Dividends provided for or paid during the half-year	**33,988**	29,138
Dividends not recognised at the end of the half-year		
In addition to the above dividends, since the end of the half-year the directors have declared the payment of an interim dividend of 19.5 cents per fully paid ordinary share (2010 - 18.5 cents), fully franked based on tax paid at 30%. The aggregate amount of the dividend to be paid on 19 March 2012 out of retained profits at 31 December 2011, but not recognised as a liability at the end of the half-year, is	**32,492**	25,833

5 Equity securities issued

	Half-year		Half-year	
	2011 Shares	2010 Shares	**2011 $'000**	2010 $'000
Issues of ordinary shares during the half-year				
Exercise of rights issued under the Bradken Limited Performance Rights Plan - shares issued	**188,673**	305,790	**-**	-
Dividend reinvestment plan issues	**1,940,948**	586,645	**14,136**	4,377
Shares issued in relation to underwriting of dividend	**2,657,773**	-	**19,852**	-
Institutional, Retail and Staff placements in connection with capital raising to acquire the assets of Americast Technologies Inc.	**-**	-	**-**	16
Adjustments to Institutional Placement costs June 2011	**-**	-	**(700)**	-
	4,787,394	892,435	**33,288**	4,393

6 Non-current borrowings

On 29 November 2011 the Group completed a US$200 million US Private Placement in the form of unsecured notes.

The unsecured notes comprised US$50 million of 7 year notes, US$100 million of 10 year notes and US$50 million of 12 year notes. The 7 and 10 year notes were issued with a margin of 2.75% while the 12 year notes were issued with a margin of 2.85% over US Treasuries.

The contractual maturity of the carrying value of the Group's non-current borrowings and undrawn borrowing facilities were as follows:-

	2 to 3 years $'000	4 to 5 years $'000	6 to 7 years $'000	9+ years $'000	Total $'000
31 December 2011					
Non-current borrowings (excluding leases and other financing)	153,655	143,655	49,222	147,667	**494,199**
Undrawn facilities					**256,479**
30 June 2011					
Non-current borrowings (excluding leases and other financing)	213,546	143,655	-	-	**357,201**
Undrawn facilities					**189,447**

7 Business Combinations

Current Period

(i) Australian and Overseas Alloys

On 7 July 2011 Bradken Resources Pty Ltd (a 100% subsidiary of Bradken Limited) acquired 100% of the issued shares of Australian and Overseas Alloys Pty Ltd based in Wollongong NSW.

The total consideration for the acquisition amounted to $20.5m, with funding from existing facilities.

The acquired business has been absorbed into the Mining Products business. It is not practical to disclose revenues and net profit after tax to the Group for the full year as if the acquisition had taken place on 1 July 2011. Acquisition costs for the period were $221,000 and are included in administration expenses in profit or loss.

Details of provisional net assets acquired and provisional goodwill are as follows:

	$'000
Purchase consideration	**20,475**
Provisional fair value of net identifiable assets acquired (refer below)	**3,421**
Provisional goodwill	**17,054**

The provisional goodwill is attributable to the profitability of the acquired business and synergies expected to arise after the acquisition of the business.

The provisional fair value will be finalised and any adjustments disclosed in the Group's financial statements for the year ended 30 June 2012. The provisional fair value of assets and liabilities arising from the acquisition are as follows:

	Provisional fair value $'000
Cash and cash equivalents	1,170
Property, plant and equipment	942
Inventories	521
Receivables	1,490
Payables	(688)
Employee benefits liabilities, including superannuation	(83)
Net deferred tax assets	69
Net identifiable assets acquired	**3,421**

7 Business combination (continued)

(ii) Norcast

On 11 July 2011 Bradken Operations Pty Ltd (a 100% subsidiary of Bradken Limited) acquired 100% of the issued shares of Norcast Wear Solutions Inc. (Norcast) based in Toronto, Canada from Castle Harlan Inc.

The total consideration for the acquisition amounted to $201.6m and was funded from existing facilities.

The acquired business has been absorbed into the Mining Products business. It is not practical to disclose revenues and net profit after tax to the Group for the full year as if the acquisition had taken place on 1 July 2011. Acquisition costs for the period were $571,000 and are included in administration expenses in profit or loss.

Details of provisional net assets acquired and provisional goodwill are as follows:

	$'000
Purchase consideration	**201,631**
Provisional fair value of net identifiable assets acquired (refer below)	**51,851**
Provisional goodwill	**149,780**

The provisional goodwill is attributable to the profitability of the acquired business and synergies expected to arise after the acquisition of the business.

The provisional fair value will be finalised and any adjustments disclosed in the Group's financial statements for the year ended 30 June 2012. The provisional fair value of assets and liabilities arising from the acquisition are as follows:

	Provisional fair value $'000
Cash and cash equivalents	6,182
Property, plant and equipment	38,626
Inventories	18,720
Receivables	23,656
Payables	(22,371)
Employee benefits liabilities, including superannuation	(3,238)
Borrowings	(209)
Current tax liability	(114)
Deferred tax liability	(9,401)
Net identifiable assets acquired	**51,851**

Intangibles other than goodwill have not been identified and valued in the provisional numbers above. However it is expected that a value will be recognised in relation to brands and existing customer contracts.

Prior Period

(i) Other acquisitions in the prior period

Between 28 October 2010 and 19 May 2011 three small acquisitions were made. The assets of Materix Enginerring Pty Ltd and Investment Castings Pty Ltd were acquired on 28 October 2010 and 15 November 2010 respectively. On 19 May 2011 the Bradken Group acquired Wear Protect Systems Pty Ltd and two of it's related companies.

Total provisional consideration for these acquisitions amounted to $29.5m, with funding from existing facilities.

Details of the business combinations were disclosed in Note 29 of the Group's annual financial statements for the year end 30 June 2011.

Directors' declaration

In the directors' opinion:

(a) the financial statements and notes set out on pages 3 to 12 are in accordance with the Corporations Act 2001, including:

   (i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

   (ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2011 and of its performance, for the half-year ended on that date; and

(b) there are reasonable grounds to believe that Bradken Limited will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of directors.

Independent auditor's review report to the members of Bradken Limited

Report on the half year financial report

We have reviewed the accompanying half-year financial report of Bradken Limited, which comprises the balance sheet as at 31 December 2011 and the income statement, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, selected explanatory notes and the directors' declaration for the Bradken Group (the consolidated entity). The consolidated entity comprises both Bradken Limited (the company) and the entities it controlled during that half-year.

Directors' responsibility for the half year financial report

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001* and for such control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of an Interim Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2011 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Bradken Limited ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Bradken Limited is not in accordance with the *Corporations Act 2001* including:

PricewaterhouseCoopers, ABN 52 780 433 757

PricewaterhouseCoopers Centre, 26 Honeysuckle Drive, PO Box 798, NEWCASTLE NSW 2300

T: +61 2 4925 1100, F: +61 2 4925 1199, www.pwc.com.au

(a) giving a true and fair view of the consolidated entity's financial position as at 31 December 2011 and of its performance for the half-year ended on that date; and

(b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001* .

Matters relating to the electronic presentation of the reviewed financial report

This review report relates to the financial report of the (company) for the half-year ended 31 December 2011 included on Bradken Limited's web site. The company's directors are responsible for the integrity of the Bradken Limited web site. We have not been engaged to report on the integrity of this web site. The review report refers only to the statements named above. It does not provide an opinion on any other information which may have been hyperlinked to/from these statements. If users of this report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the reviewed financial report to confirm the information included in the reviewed financial report presented on this web site.

Directors' report

Your directors present their report on the consolidated entity (referred to hereafter as the Group) consisting of Bradken Limited (referred to hereafter as the Company) and the entities it controlled at the end of, or during, the year ended 30 June 2012.

The report has been divided into five sections as follows:

A.	General information	D.	Remuneration report
B.	Corporate governance	E.	Other information
C.	Review of operations		

A. General information

Principal activities

During the year the principal activities of the Group consisted of:

- supply and service of wear components for mining and earthmoving equipment
- supply of equipment and consumables to the mineral processing, quarrying and power markets
- supply of cast, machined and fabricated components and highly engineered steel castings to the energy, industrial and rail transport industries
- manufacture and maintenance of freight rollingstock products
- supply of foundry consumables to the foundry and steelmaking industries

There were no major changes in the nature of the activities of the Group during the period.

Directors

The following persons were directors of Bradken Limited during the whole of the financial year and up to the date of this report unless otherwise noted:

Phil Arnall	10	10	3	4	3	4
Eileen Doyle	9	10	4	4	3	4
Greg Laurie	10	10	4	4	**	**
Vince O'Rourke	10	10	**	**	4	4
Peter Richards	10	10	4	4	**	**

A Number of meetings attended
B Number of meetings held during the time the director held office during the period
* Bradken Limited does not have a fully constituted Nominations Committee, however, as and when required the full Board participates as the Nominations Committee in order to fulfill its corporate governance responsibilities
** = Not a member of the relevant committee

B. Corporate governance

The Company and the Board are committed to achieving and demonstrating the highest standards of corporate governance. This statement outlines the main corporate governance practices in place throughout the financial year, which comply with the best practice recommendations released by the Australian Stock Exchange Corporate Governance Council in 2010 unless otherwise stated.

The relationship between the Board and senior management is critical to the Group's long-term success. The directors are responsible to the shareholders for the performance of the Group in both the short and the longer term and seek to balance sometimes competing objectives in the best interests of the Group as a whole. Their focus is to enhance the interests of shareholders and other key stakeholders and to ensure the Group is properly managed.

Day to day management of the Group's affairs and the implementation of the corporate strategy and policy initiatives are formally delegated by the Board to the Managing Director and senior executives.

A description of the Group's main corporate governance practices is set out below and on the Company's web site. All these practices, unless otherwise stated, were in place for the entire year.

The board of directors

The Board operates in accordance with broad principles set out in its charter which is available from the corporate governance information section of the Company's website at www.bradken.com. The charter details the Board's composition and responsibilities.

B. Corporate governance (continued)

Board composition

The charter states:

- the Board comprise both executive and non-executive directors with a majority of non-executive directors, and one executive director being the Managing Director / Chief Executive Officer
- in recognition of the importance of independent views and the Board's role in supervising the activities of management, the Chairman must be an independent non-executive director, the majority of the Board must be independent of management and all directors are required to bring independent judgement to bear in their Board decision making
- the Chairman is elected by the full Board and is required to meet regularly with the Managing Director
- the Company is to maintain a mix of directors from different backgrounds with complementary skills and experience both nationally and internationally with a majority of directors having knowledge of the Group or related industries and/or financial expertise
- the Board is required to undertake an annual board performance review and consider the appropriate mix of skills required by the Board to maximise its effectiveness and its contribution to the Group.

Responsibilities

The responsibilities of the Board include:

- providing strategic guidance to the Group including contributing to the development of and approving the corporate strategy
- reviewing and approving the business plans, the annual budget and financial plans including available resources and capital expenditure initiatives
- overseeing and monitoring:
  - organisational performance and the achievement of the Group's strategic goals and objectives
  - compliance with the Company's Code of Conduct (see page 9)
  - progress of major capital expenditures and other significant corporate projects including any acquisitions or divestments
- monitoring financial performance including approval of the annual and half-year financial reports and liaison with the Group's auditors
- appointment, performance assessment and, if necessary, removal of the Managing Director
- ratifying the appointment and/or removal and contributing to the performance assessment of the members of the senior management team including the CFO / Company Secretary
- ensuring there are effective management processes in place and approving major corporate initiatives
- enhancing and protecting the reputation of the Group
- overseeing the operation of the Group's system for compliance and risk management.

Board members

Details of the members of the Board, their experience, expertise, qualifications, term of office and independent status are set out in the directors' report under the heading "Information on directors". As at the date of this report the Board of the Company comprises six non-executive directors, all of whom are considered independent under the principles set out below, and the Managing Director.

The Board seeks to ensure that:

- at any point in time, its membership represents an appropriate balance between directors with experience and knowledge of the Group and directors with an external or fresh perspective
- the size of the Board is conducive to effective discussion and efficient decision-making.

Directors' independence

An independent director is a director who is not a member of management (a non-executive director) and who:

- holds less than 5% of the voting shares of the Company and is not an officer of, or otherwise associated, directly or indirectly, with a shareholder of more than 5% of the voting shares of the Company
- has not within the last three years been employed in an executive capacity by the Company or another Group member
- within the last three years has not been a principal or employee of a material professional adviser or a material consultant to the Company or another Group member
- is not a material supplier to or customer of the Company or another Group member, or an officer of or otherwise associated, directly or indirectly, with a material supplier or customer
- has no material contractual relationship with the Company or another Group member other than as a director of the Company
- has not served on the Board of the Group for a period which could materially interfere with the Director's ability to act in the best interests of the Group
- is free from any interest and any business or other relationship which could, or could reasonably be perceived to, materially interfere with the director's ability to act in the best interests of the Group.

The Board reviews the independence of each Director in light of interests disclosed to the Board from time to time.

B. Corporate governance (continued)

Term of office

The Board Charter recommends a maximum period of 12 years service as a director, subject to re-elections every year by rotation such that 1/3 of the directors are subject to re-election each year

The Company's Constitution specifies the tenure of the Managing Director is limited to that of his Executive Office.

Commitment

The Board has established a framework for the management of the Group including a system of internal control, a business risk management process and the establishment of appropriate ethical standards.

The full Board currently holds nine scheduled meetings each year, plus strategy meetings and any extraordinary meetings at such other times as may be necessary to address any specific matters that may arise.

The agenda for meetings is prepared in conjunction with the Chairman, Managing Director and Company Secretary. Standing items include the Managing Director’s report, financial reports, strategic matters, governance and compliance. Submissions are circulated in advance. Executives are regularly involved in Board discussions and directors have other opportunities, including visits to business operations, for contact with a wider group of employees.

To assist in the execution of its responsibilities, the Board has established a Human Resources Committee and an Audit and Risk Committee. These Committees have written mandates and operating procedures, which are reviewed on a regular basis.

The commitments of non-executive directors are considered by the Board prior to the directors' appointment to the Board of the Company and are reviewed each year as part of the annual performance assessment.

Prior to appointment or being submitted for re-election, each non-executive director is required to specifically acknowledge that they have and will continue to have the time to discharge their responsibilities to the Company.

Conflict of interest

Directors must keep the Board advised, on an ongoing basis, of any interest that could potentially conflict with those of the Group.

Where the Board believes that a significant conflict exists for a director on a board matter, the director concerned does not receive the relevant board papers and is not present at the meeting whilst the item is considered.

There were no director related entity transactions with companies of the Group.

Independent professional advice

Directors and board committees have the right, in connection with their duties and responsibilities, to seek independent professional advice from a suitably qualified adviser at the Group's expense. Prior written approval from the Chairman is required, but this will not be unreasonably withheld.

Performance assessment

The Board undertakes an annual self assessment of its collective performance, the performance of the Chairman and of its committees. Management are invited to contribute to this appraisal process. The results and any action plans are documented. The most recent assessment was undertaken in August 2011.

The Chairman meets privately with each director to discuss this assessment and their individual situation.

Corporate reporting

The Managing Director and the CFO have made the following certifications to the Board:

- that the Group’s financial reports are complete and present a true and fair view, in all material respects, of the financial condition and operational results of the Company and Group and are in accordance with relevant accounting standards
- that the above statement is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board and that the Group's risk management and internal compliance and control is operating efficiently and effectively in all material respects.

Board committees

The Board has established a number of committees to assist in the execution of its duties and to allow detailed consideration of complex issues. Current committees of the Board are the Human Resources Committee and the Audit and Risk Committee. Each is comprised entirely of non-executive directors. The committee structure and membership is reviewed on an annual basis.

Each committee has its own written charter setting out its role and responsibilities, composition, structure, membership requirements and the manner in which the committee is to operate. All of these charters are reviewed on an annual basis and are available on the Company website. All matters determined by the committees are submitted to the full board as recommendations for board decisions.

Additional requirements for specific reporting by the committees to the Board are addressed in the charter of the individual committees.

Bradken Limited does not have a fully constituted Nominations Committee, however, as and when required the full Board participates as the Nominations Committee in order to fulfill its corporate governance responsibilities in regard to:

- Board appointments and performance;
- Directors’ induction program;

B. Corporate governance (continued)

- Committee membership;
- Other relevant matters.

The full Board undertakes the functions of a Nominations Committee as described in the ASX Corporate Governance Council's Principles of Good Corporate Governance and Best Practice Recommendations.

Human Resources Committee

The Human Resources Committee consists of the following non-executive directors:

Vince O'Rourke (Chairman)

Eileen Doyle

Nick Greiner

Phil Arnall

Details of these directors attendance at Committee meetings are set out in the directors' report on page 4.

The Human Resources Committee operates in accordance with its charter which is available on the Company website. The Human Resource Committee advises the Board on remuneration and incentive policies and practices generally, and makes specific recommendations on remuneration packages and other terms of employment for the executive directors, other senior executives and non-executive directors.

The Human Resources Committee's terms of reference include:

- reviewing and approving remuneration policies including proposed short and long term incentives, superannuation, recruitment, redundancy/termination and other major personnel practices that will attract, motivate and retain high quality employees
- recommending to the Board the total employment cost of the Managing Director and approving the total employment cost of senior executives reporting to that position. The total cost being base pay, short and long term incentives (including shares and options), superannuation and other benefits
- recommending to the Board the entitlements under incentive plans for the Managing Director, including linkages to specific goals and objectives. Approve entitlements for senior executives reporting to that position
- recommending to the Board any service contracts for the Managing Director and approve service contracts for senior executives reporting to that position
- reviewing the personal development plans for senior executives to maintain a pool of capable senior management
- reviewing the development of management succession planning to ensure ongoing professional management of the Group and the development of the individuals
- reviewing the Group's development of human resource plans, training, workplace safety and environment systems designed to enhance corporate and individual performance
- overseeing the planning and development of business continuity, crisis management and quality and safety management systems
- undertaking any special projects delegated by the Board or deemed necessary by the Committee

Further information on directors' and executive remuneration is set out in the directors' report under the heading "Remuneration Report".

Audit and Risk Committee

The Audit and Risk Committee consists of the following non-executive directors:

Greg Laurie (Chairman)

Phil Arnall

Eileen Doyle

Peter Richards

Details of these directors attendance at Committee meetings are set out in the directors' report on page 4.

The Audit and Risk Committee has appropriate financial expertise and all members are financially literate and have an appropriate understanding of the businesses and markets in which the Group operates.

The Audit and Risk Committee operates in accordance with a charter which is available on the Company website. The main responsibilities of the Audit and Risk Committee are to:

- review and assess the integrity of the financial statements of the Group
- assess the suitability of the Group's accounting policies and processes
- ensure a process is in place to assess the adequacy and effectiveness of the Group's internal control processes
- act as an interface between the Board and the external auditors
- liaise with the external auditors on the conduct of the external audit
- review reports on the Group's financial statements and other matters, prepared by the external auditors

B. Corporate governance (continued)

- review any proposed provision of non-audit services by the external auditors
- ensure the independence of the external auditors
- consider the competence and assess the performance of the external auditors
- overview the effectiveness of the internal audit function
- ensure there is an appropriate process for the identification and management of business risks
- ensure a process is in place to monitor the Group's compliance with relevant laws and regulations
- review and monitor related party transactions and assess their propriety
- report to the Board on matters relevant to the Committee's role and responsibilities
- make recommendations to the Board in relation to the appointment, removal and remuneration of the external auditor.

The Audit and Risk Committee meets with the external and internal auditors on a regular basis. It reviews its performance and effectiveness periodically and reviews its charter and makes recommendations to the Board on its charter annually.

In fulfilling its responsibilities, the Audit and Risk Committee:

- receives regular reports from management, the external auditors and the internal auditors
- assesses the suitability of the Group's financial accounting policies, practices and procedures and the compliance with regulatory requirements
- reviews the processes the CEO and the CFO have in place to support their certifications to the Board
- reviews any significant disagreements between the auditors and management, irrespective of whether they have been resolved
- meets separately with the external and internal auditors at least twice a year without the presence of management
- provides the external and internal auditors with a clear line of direct communication at any time to either the Chairman of the Audit and Risk Committee or the Chairman of the Board.

The Audit and Risk Committee has authority, within the scope of its responsibilities, to seek any information it requires from any employee or external party.

External auditors

The Group policy is to appoint external auditors who clearly demonstrate quality and independence. The performance of the external auditor is reviewed annually. PricewaterhouseCoopers was appointed as the external auditor in 2005. It is PricewaterhouseCoopers policy to rotate audit engagement partners on listed companies at least every five years.

An analysis of fees paid to the external auditors, including a break-down of fees for non-audit services, is provided in the directors' report and in note 26 to the financial statements. It is the policy of the external auditors to provide an annual declaration of their independence to the Audit Committee.

The external auditor is required to attend the annual general meeting and be available to answer shareholder questions about the conduct of the audit and the preparation and content of the audit report.

Risk assessment and management

Bradken is committed to managing risk to protect it's people, the environment, Group assets, the community and it's reputation. Bradken operates an Enterprise Risk Management process consistent with international standards to manage it's business risk. This risk-based system helps the Group operate effectively and efficiently, achieve business objectives, ensure reliable reporting and comply with applicable laws and regulations.

The Board implements this policy by overseeing the establishment and implementation of the risk management system through the Audit and Risk Committee, reviewing the effectiveness of the Group's implementation of that system.

Not all aspects of risk management can be formalised and Bradken places considerable reliance on the skill, experience and judgement of its people to make risk based decisions within the policy framework, and to communicate openly on all risk related matters.

The environment, health and safety management system (EHSMS)

The Group recognises the importance of environmental and occupational health and safety (OH&S) issues and is committed to the highest levels of performance. To help meet this objective the EHSMS was established to facilitate the systematic identification of environmental and OH&S issues and to ensure they are managed in a structured way. This system has been operating for a number of years and allows the Group to:

- progressively implement a corporate environmental management system that is independently certified to international standards ISO 14001 at all major sites.
- implement the Bradken 21 Step Safety plan at all sites
- monitor its systems compliance with all relevant OH&S and environmental legislation
- continually assess and improve the impact of its operations on the environment
- encourage employees to actively participate in the management of environmental and OH&S issues
- work with trade associations representing the Group's businesses to raise standards

B. Corporate governance (continued)

- use energy and other resources as efficiently as practicable, and
- encourage the adoption of similar standards by the Group's principal suppliers and contractors.

Recently acquired operations are currently implementing environmental management systems. The Group continues to implement projects that improve the Group's environmental performance and to address any community concerns in the vicinity of manufacturing sites. Information on compliance with significant environmental regulations is set out in section E of this report on page 21.

Code of conduct

All directors, managers and employees are expected to act with the utmost integrity, objectivity and in compliance with the letter and spirit of the law and Group policies, striving at all times to enhance the reputation and performance of the Group. Every employee has a nominated supervisor to whom they may refer any issues arising from their employment.

The Group has advised each director, manager and employee that they must comply with the Group's Whistleblower Policy. The Policy may be viewed on the Company's website, and it covers the following:

- encouraging employees to report any behaviour that may be dishonest, fraudulent, corrupt, illegal, in breach of Commonwealth or State Legislation, unethical, improper, unsafe or any other behaviour that may cause financial or non-financial loss to the Group or would be otherwise detrimental to the interests of the Group
- ensuring that the Group complies with its obligations to protect the reporter of any such behaviour.

The Company also has a Securities Trading Policy (available on the Company's website) which details the insider trading provisions of the Corporations Act 2001. In summary, trading of the Company's shares is restricted to a period of six weeks after the release of the Group's half-year and annual results to the Australian Stock Exchange (ASX), the Annual General Meeting of the Company, at any time a prospectus or similar disclosure document has been lodged with ASIC and is open for acceptances and at such other times as the Board of Directors declare trading permissible. These windows are not available to individuals that posess inside information.

Continuous disclosure and shareholder communication

The Board provides shareholders with information using a comprehensive Continuous Disclosure Policy which includes identifying matters that, a reasonable person would expect, may have a material effect on the price of the Company's securities, notifying each matter to the ASX, posting them on the Company's website, and issuing media releases. Full details of the policy are available on the Company's website.

In summary, the Continuous Disclosure Policy operates as follows:

- the Chairman, the Managing Director and the Company Secretary comprise the Disclosure Committee. The responsibilities of the Disclosure Committee include:
  - ensuring the Company complies with its disclosure obligations
  - determining and authorising what information can or should be disclosed to the market
  - liaising with the Board where necessary
- the Company Secretary is responsible for all communications with the ASX. Such continuous disclosure matters are advised to the ASX by the required time, and all senior executives must follow a 'Continuous Disclosure Discovery' process, which involves monitoring all areas of the Group's internal and external environment
- all announcements made to the market, and related information including information provided to analysts or the media during briefings, are placed on the Company's website after they are released to the ASX
- the full text of notices of meetings and associated explanatory material are placed on the Company's website.

All shareholders can elect to receive a copy of the Group's annual report. In addition the Company seeks to provide opportunities for shareholders to participate through electronic means. All Company announcements, media briefings, details of Company meetings and press releases are available on the Company's website. All of the above information is made available on the Company's website within one day of public release, and is emailed to all shareholders who lodge their email contact details with the Company. Information on lodging email addresses with the Company is available on the Company's website.

C. Review of operations

Financial Overview

	2012	2011	Change
NPAT	$100.5m	$67.6m	Up 49%
EBITDA	$220.4m	$189.4m	Up 16%
EBITDA margin	15.2%	16.5%	
Sales revenue	$1451.3m	$1147.5m	Up 26%
Operating cash flow	$121.2m	$32.4m	Up 274%
Earnings per share	60.5 cents	47.6 cents	Up 12.9 cents
Dividends per share	41.0 cents	39.5 cents	Up 3.8%

A review of the operations of the Bradken Group during the year and the results of those operations is attached in the ASX Release.

Dividends

Dividends paid to members during the financial year were as follows:

	2012 $'000	2011 $'000
Final dividend for the year ended 30 June 2011 of 21.0 cents (2010: 21.0 cents) per fully paid share paid on 19 September 2011 (2010: 13 September 2010)	**33,988**	29,138
Interim dividend for the year ended 30 June 2012 of 19.5 cents (2011: 18.5 cents) per fully paid share paid 19 March 2012 (2011: 21 March 2011)	**32,492**	25,833
	66,480	54,971

In addition to the above dividends, since the end of the financial year the directors have declared the payment of a fully franked final dividend of $36,255,000 (21.5 cents per fully paid ordinary share) to be paid on 4 September 2012 out of retained profits at 30 June 2012.

Significant changes in the state of affairs

Significant changes in the state of affairs of the Group during the financial year were the:	2012 $'000
(a) increase in contributed equity of $49,319,000 (from $489,243,000 to $538,562,000) as a result of:	
■ Dividend reinvestment plan issues 1,940,948 shares @ $7.28 each	14,136
■ Shares pursuant to an underwritten dividend reinvestment plan issue 2,657,773 shares @ $7.47 each	19,853

Matters subsequent to the end of the financial year

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial years.

Likely developments and expected results of operations

Further disclosure on likely developments in the operations of the Group and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the Group.

D. Remuneration report

The remuneration report is set out under the following main headings:

(a) Principles used to determine the nature and amount of remuneration
(b) Details of remuneration
(c) Service agreements
(d) Share-based compensation
(e) Additional information

The information provided under headings (a) to (d) includes the remuneration disclosures that are required under the Accounting Standard AASB 124 *Related Party Disclosures* . These disclosures have been transferred from the financial report and have been audited. The information provided in this remuneration report has been audited as required by section 308(3C) of the *Corporations Act 2001* .

(a) *Principles used to determine the nature and amount of remuneration*

The objective of the Group's executive reward framework is to ensure reward for performance whilst maintaining competitiveness with the market and appropriateness for the results delivered. The framework aligns executive reward with achievement of strategic objectives and the creation of value for shareholders, and conforms with market best practice for delivery of reward. The Board ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency
- capital management.

Alignment to shareholders' interests:

- has economic profit as a core component of plan design
- focuses on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant return on assets as well as focusing the executive on key non-financial drivers of value
- attracts and retains high calibre executives.

Alignment to participants' interests:

- rewards capability and experience
- reflects competitive reward for contribution to growth in shareholder wealth
- provides a clear structure for earning rewards
- provides recognition for contribution.

Performance linked remuneration includes both short-term and long-term incentives and is designed to reward executive directors and senior executives for meeting or exceeding their financial and personal objectives. The short-term incentive (STI) is an “at risk” bonus provided in the form of cash, while the long-term incentive (LTI) is provided as rights over ordinary shares of Bradken Limited under the rules of the Performance Rights Plan (PRP).

No key management personal has entered into any arrangement to limit the exposure or risk related to their remuneration.

Role of the Human Resources Committee

The Human Resources Committee is a committee of the board. It is primarily responsible for making recommendations to the board on:

- non-executive director fees
- remuneration levels of managing director, executive directors and other key management personnel
- the over-arching executive remuneration framework and incentive plans.

Their objective is to ensure that remuneration policies and structures are fair and competitive and aligned with the long-term interests of the company. In doing this, the Human Resources Committee seeks advice from independent remuneration consultants.

The Corporate Governance Statement provides further information on the role of this committee.

Use of remuneration consultations

External consultants AON Hewitt were contracted on 23 March 2012 to provide remuneration advice to the Human Resources Committee. In the 2012 financial year AON Hewitt provided remuneration recommendations as defined in section 9B of the Corporations Act 2001 and was paid $26,500 for these services. AON Hewitt have confirmed the above recommendations were made free from undue influence by members of the Group's key management personnel.

D. Remuneration report (continued)

(a) *Principles used to determine the nature and amount of remuneration (continued)*

The following arrangements were made to ensure that the remuneration recommendations were free from undue influence:

- AON Hewitt was engaged by, and reported directly to, the chair of the Human Resources Committee. The agreement for the provision of remuneration consulting services was executed by the chair of the Human Resources Committee under delegated authority on behalf of the board;
- The report containing the remuneration recommendations was provided by AON Hewitt directly to the chair of the Human Resources Committee; and
- AON Hewitt was permitted to speak to management throughout the engagement to understand Group processes, practices and other business issues and obtain management perspectives. However, AON Hewitt was not permitted to provide any member of management with a copy of their draft or final report that contained the remuneration recommendations.

As a consequence, the Board is satisfied that the recommendations were made free from undue influence from any members of the key management personnel.

In addition to providing remuneration recommendations, AON Hewitt also provided advice on other aspects of the remuneration of the Group's employees.

Voting and comments made at the company's 2011 Annual General Meeting

Bradken Limited received more than 78% of "yes" votes on its remuneration report for the 2011 Financial year.

The company did not receive any specific feedback at the AGM. Throughout the year the company did receive correspondence from a group that was recommending superannuation proxy voting that had voted against the remuneration report at the 2011 AGM. Discussion centred around providing more disclosure of the methods of calculating the short term incentive bonus. No other correspondence was received.

Non executive directors

Fees and payments to non-executive directors reflect the demands which are made on, and the responsibilities of, the directors. Non-executive directors' fees and payments are reviewed annually by the Board. The Board also uses the advice of independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market.

(i) Directors' fees

The current base remuneration was last reviewed with effect from 1 October 2011. Total aggregate remuneration for all non-executive directors, last voted upon by shareholders in October 2011, is not to exceed $1,200,000 per annum and actual amounts payable to individual directors are determined after considering advice from external advisors and with reference to fees paid to other non-executive directors of comparable companies.

Directors' base fees are presently $130,000 (2011: $125,000) per annum. The Chairman' fee is currently $280,000 (2011: $270,000) per annum. Non-executive directors do not receive performance related remuneration. Directors' fees cover all main board activities and membership of any board committee.

(ii) Non-Executive Director Share Acquisition Plan

Non-executive directors may elect to have a percentage of their annual fixed directors' fees provided in shares under the Non-Executive Director Share Acquisition Plan (NED plan). Participation in the NED plan is voluntary.

Executive pay

In addition to base pay, at risk short term salary and benefits including superannuation , key management personnel are invited to participate in a long term (3 year) incentive scheme. The combination of these comprise total remuneration.

(i) Base pay and benefits

Structured as a total employment cost package which may be delivered as a combination of cash and prescribed non-financial benefits at the executives' discretion and includes contributions to employee superannuation funds.

Executives are offered a competitive base pay that comprises the fixed component of pay and rewards. External remuneration consultants provide analysis and advice to ensure base pay is set to reflect the market for a comparable role. Base pay for senior executives is reviewed annually to ensure the executive's pay is competitive with the market. An executive's pay is also reviewed on promotion.

Each year the Board sets the job goals for the Managing Director. The senior executives job goals are set and managed by the Managing Director. The job goals are focused on the growth of the business and generally include measures relating to the Group, the relevant business unit, and the individual, and include financial, people, customer, strategy and risk measures. The measures are chosen to directly align the individual's reward to the goals of the Group and to its strategy and performance.

D. Remuneration report (continued)

(a) *Principles used to determine the nature and amount of remuneration (continued)*

(ii) At risk short term salary

At the end of the financial year an assessment is made of the actual performance of the Group, the relevant business unit and the individual targets set at the beginning of the financial year. A percentage of the at risk short term salary is awarded depending on performance. At risk short term salary is not awarded where there is no year on year growth for the financial year.

The at risk short term salary is paid wholly on actual improvement in profitability. The value of the at risk short term salary payable is set within a range of 30% to 60% of the executive's total cash base remuneration depending on the position held by the executive. In calculating the at risk short term salary the growth in year on year NPAT is calculated and where applicable the EBITDA of the executive's business. To achieve the full at risk short term salary value a growth of 15% on the previous year profitability must be achieved.

The Human Resources Committee recommends the at risk short term salary to be paid to the Managing Director for approval by the Board. For other senior executives the Managing Director recommends the at risk short term salary to be paid, and seeks approval from the Human Resources Committee.

(iii) Long-term incentives - Performance Rights Plan

The Group's long-term incentive, the Performance Rights Plan, focuses on rewarding for long term growth and the retention of key people. Information on the Performance Rights Plan is set out on page 16.

The long term incentive (LTI) is paid wholly on relative total shareholder return (TSR) performance over a 3 year period. The initial rights are provided based on a set range of 30% to 50% of the executive's total cash base remuneration depending on the position held by the executive. No rights vest to the executive if Bradken's TSR over a 3 year period is below 50% of the index and no re-testing occurs.

(b) *Details of remuneration*

The key management personnel of Bradken Limited and the Group are the directors of Bradken Limited (see page 2), the Chief Financial Officer and the General Managers and Chief Operating Officer of the Bradken business units who report directly to the Managing Director. The executives are:

- Andrew Allen - *General Manager Corporate Development (appointed 1 September 2011)*
- Tom Armstrong - *Chief Operating Officer Engineered Products*
- Bruce Arnott - *CFO and Company Secretary (retired 30 November 2011)*
- Stephen Cantwell - *General Manager Rail (commenced 1 July 2011)*
- Steven Perry - *CFO and Company Secretary (appointed 1 December 2011)*
- Enda Sheridan - Executive *General Manager Mining and Industrial Products*

Details of the remuneration of the directors and the key management personnel (as defined in AASB 124 Related Party Disclosures) of Bradken Limited and the Bradken Limited Group are set out in the following tables.

The values in column (A) of each table below are remuneration as defined in Australian Accounting Standard AASB2 *Share-based payment*. This consists of share rights. These values are calculated based on a Black Scholes valuation of the rights in the year in which they are granted and are amortised over the performance period to which they relate, which is typically a 3 year period. The degree to which performance conditions will be met is unclear until the end of the relevant performance periods. There is no certainty performance conditions will be met and there is therefore no direct correlation of these values to the remuneration received by the executive in any period.

The values in column (B) of each table below shows the value of the rights that were granted to the executive for the performance periods 1 July 2009 to 30 June 2012 (2012) and 1 July 2008 to 30 June 2011 (2011). For the performance period 1 July 2009 to 30 June 2012 the performance conditions were not met and no rights are eligible to vest for that period. The values are based on the share price on 7 August 2011.

D. Remuneration report (continued)

* Bruce Arnott retired on 30 November 2011, values reported are for the period 1 July to 30 November 2011.

** Steven Perry was appointed Chief Financial Officer on 1 December 2011. Before this appointment he was Senior Commercial Manager of the Group's Mining business. The amounts shown above include all Mr Perry's remuneration during the reporting period. Amounts received as Chief Financial Officer were Cash Salary $192,661, Bonus $51,971, Superannuation $17,339, Long Service Leave $5,780 and Share Rights $22,585.

*** The payment of at risk short term salary has significantly reduced when compared to the previous year. In addition no share rights vested for the period. This is reflective of the quantum of year on year growth achieved and the current share price performance of Resource related stocks.

D. Remuneration report (continued)

(c) *Service agreements*

Remuneration and other terms of employment for the Managing Director and key management personnel required to be disclosed under the *Corporations Act 2001* are formalised in service agreements. Each of these agreements provide for the provision of performance-related cash bonuses, other benefits including, but not limited to, motor vehicles and participation, when eligible, in the Bradken Performance Rights Plan. Other major provisions of the agreements relating to remuneration are set out below.

Name	Term of Agreement	* Base salary including superannuation	** Termination Benefit
Brian Hodges, *Managing Director*	Ongoing commencing 2 July 2004	$1,360,800	6 months base salary
Andrew Allen, *General Manager Corporate Development* (*appointed 1 September 2011*)	Ongoing commencing 1 September 2011	$415,760	1 month base salary
Bruce Arnott, *Chief Financial Officer and Company Secretary* (until 30 November 2011)	Agreement terminated on retirement 30 November 2011	$242,622 (for the 5 months to 30 November 2011)	-
Steven Perry, *Chief Financial Officer and Company Secretary* (*appointed 1 December 2011*)	Ongoing commencing 1 December 2011	$360,000	3 months base salary
Tom Armstrong, *Chief Operating Officer Engineered Products*	Ongoing commencing 25 October 2006	$391,352	12 months base salary
Stephen Cantwell, *General Manager Rail* (*commenced 1 July 2011*)	Ongoing commencing 1 July 2011	$454,500	6 months base salary
Enda Sheridan, *Executive General Manager Mining and Industrial Products*	Ongoing commencing 17 June 2009	$613,111	3 months base salary

* Base salaries quoted are as at 30 June 2012; they are reviewed annually by the Human Resources Committee.

** Termination benefits are payable on early termination by the company, other than for gross misconduct; unless otherwise indicated, they are equal to the base salary for the remaining term of the agreement.

D. Remuneration report (continued)

(d) *Share-based compensation*

Non-Executive Director Share Acquisition Plan

Non-executive directors may elect to have a proportion of their quarterly directors' fees provided as shares under the NED Plan. Participation in the plan is voluntary.

Non-executive directors are not able to sell or otherwise dispose of the shares until the earliest of 10 years after acquisition or when the non-executive director ceases to be a director of the Company (except in very limited circumstances). During this period the shares are subject to a holding lock.

No shares were issued under the NED plan in the financial period.

Rights

The Performance Rights Plan (PRP) is the Company's long-term incentive (LTI) scheme for selected key executives. The Managing Director recommends the list of executives who are entitled to participate in this scheme and seeks approval of the list from the Human Resources Committee which is then ratified by the Board. Under the PRP, eligible executives may be granted Performance Rights (each being a right to acquire a share, subject to the satisfaction of exercise conditions) on terms and conditions determined by the Board and as documented in the PRP Plan rules and Trust Deed. If the exercise conditions are satisfied, the Performance Rights may be exercised and the shares issued and delivered to the executive. The Board may impose restrictions on the disposal of the shares and implement procedures to enforce the restrictions.

The rules of the PRP provide that the Board may determine a price that is payable to exercise a Performance Right, or that no amount is payable by the executive upon exercise of the Right.

If any additional persons become entitled to participate in the PRP and their participation requires approval under Chapter 10 of the Listing Rules, they will not participate in the PRP until shareholder approval is received pursuant to Listing Rule 10.14.

Mr Brian Hodges, being the only Executive Director of the Company, is the only Director entitled to participate in the PRP. If any other Director is to participate in the PRP, the Company will seek shareholder approval required by the Listing Rules.

The performance conditions are based on the relative total shareholder return (TSR) of the Company measured against other companies in the ASX Small Industrials Index during the performance period. TSR measures the total return on investment of a share taking into account capital appreciation, capital return and dividend income.

The TSR performance conditions in relation to the grants issued are:

Target	Percentage of Rights available in given year to vest
The Company's TSR does not meet performance of the median Company in ASX Small Cap	0
The Company's TSR equals or exceeds performance of the median Company in ASX Small Cap	50
The Company's TSR ranked in third quartile of companies in ASX Small Cap	Pro rata between 50 and 100
The Company's TSR ranked in fourth quartile of companies in ASX Small Cap	100

In assessing whether the performance hurdles have been met, the Human Resources Committee receives independent data from an investment bank which provides both the Company's TSR from previous financial years and that of the ASX Small Industrials Index. The Company's performance against the hurdle is then determined with each Company in the ASX Small Industrials Index and Bradken being ranked in order of TSR in results from previous financial years. The Company's percentile ranking is determined by aggregating the weighting within the ASX Small Industrials Index (based on market capitalisation) of each company ranked below Bradken. The method of assessment was chosen as it provides the Committee with an objective means of measuring the Company's performance against its peer group. Once vested the performance rights remain exercisable for a period of ten years or the final test date depending on the conditions of the grant.

Dividends, changes in share price, and return of capital are included in the TSR calculation which is the only performance criteria assessed for the PRP scheme. The terms and conditions of each grant of Rights affecting remuneration in the previous, this or future reporting periods are as follows:

D. Remuneration report (continued)

(d) *Share-based compensation (continued)*

Grant Date	Exercise price	Fair value per Right	Performance Period	Test Date (date vested and exercisable)	Expiry Date

** Changes to the Performance Rights Plan*

New entrants to the scheme are provided with a transition to the 3 year plan.

Rights granted under the PRP carry no dividend or voting rights.

Details of Rights over ordinary shares in the Company provided as remuneration to each director of Bradken Limited and each of the key management personnel are set out below. When exercisable, each Right is convertible into one ordinary share of Bradken Limited. Further information on the Rights is set out in note 37 to the financial statements.

Number of Rights granted and vested and Shares provided during the year on exercise of Performance Rights

Details of Rights granted and vested and ordinary shares in the Company provided as a result of the exercise of Performance Rights to the Managing Director of Bradken Limited and each of the key management personnel and other executives of the Group required to be disclosed under the *Corporations Act 2001* are set out below.

Name	**Number of Rights granted during the year**	**Number of Rights vested during the year**	**Number of ordinary shares issued on exercise of Rights during the year**
Directors of Bradken Limited			
Brian Hodges	**84,863**	**36,521**	**0**

Steven Perry	**6,762**	**3,143**	**3,143**
Enda Sheridan	**38,235**	**15,592**	**15,592**

No amounts were payable on the exercise of Rights during the period.

D. Remuneration report (continued)

(d) *Share-based compensation (continued)*

The assessed fair value at grant date of Rights granted to the individuals is allocated equally over the financial periods in which the Rights may vest, and the amount is included in the remuneration tables above. Fair values at grant date are determined using a Black Scholes option pricing model that takes into account the exercise price, the term of the Right, the vesting and performance criteria, the impact of dilution, the non-tradeable nature of the Right, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the Right.

Principles used to determine the nature and amount of remuneration: relationship between remuneration and Company performance

The overall level of executive reward takes into account the performance of the Group over a number of years, with greater emphasis given to the current and prior year.

Details of share remuneration: Rights

For each grant of Rights included in the tables on page 14, pages 17 to 18 and page 20, the percentage of the available Right that was paid, or that vested, in the financial year, and the percentage that was forfeited because the person did not meet the performance criteria is set out below. The Rights vest over a period up to three years, provided the vesting conditions are met (see page 16). Rights not vested when performance hurdles are not met do not carry forward to future periods.

D. Remuneration report (continued)

	2009	-	57	43	30/06/2012	-	-

A= The % of rights that failed to vest in the period as the performance criteria were not met.

B= The minimum value of Rights yet to vest is nil as the performance criteria may not be met and consequently the Right may not vest.

C= The maximum value of rights yet to vest is not determinable as it depends on the market price of shares of Bradken Limited on the Australian Stock Exchange at the date the right is exercised. The maximum values presented above are based on the closing share price at 30 June 2012 of $5.19.

Share based compensation: Rights

Further details relating to rights are set out below.

Name	A Remuneration consisting of Rights	B Value at grant date $	C Value at exercise date $	D Value at lapse date $
Andrew Allen	13.9%	98,732	46,056	37,703
Tom Armstrong	22.1%	91,963	58,575	-
Bruce Arnott	16.4%	-	67,912	55,590
Stephen Cantwell	9.0%	134,917	-	-
Brian Hodges	15.7%	403,948	-	203,295
Steven Perry	7.3%	32,187	66,606	17,498
Enda Sheridan	16.9%	181,999	106,026	86,798

A= The percentage of the value of remuneration consisting of Rights, based on the value at grant date set out in column B. Remuneration percentage refers to the AASB 2 Share-based payment values reported in the table in section (b) above and does not correlate to the remuneration received by the executive in the period.

B= The value at grant date calculated in accordance with AASB 2 *Share-based payment* of Rights granted during the year as part of remuneration.

C= The value at exercise date of Rights that were granted as part of remuneration and were exercised during the year.

D= The value at lapse date of Rights that were granted as part of remuneration and that lapsed during the year.

D. Remuneration report (continued)

(e) *Additional information (continued)*

Shares under Performance Rights

Unissued shares of Bradken Limited under Performance Right at the date of this report are as follows:

Date Rights granted	Expiry date	Exercise price	Number of shares under right
18 November 2005	Ten years from Test Date	Nil	10,344
30 October 2006	Ten years from Test Date	Nil	11,789
30 October 2006	Ten years from Test Date	Nil	14,993
31 October 2007	Ten years from Test Date	Nil	4,944
17 October 2008	Ten years from Test Date	Nil	116
17 October 2008	Ten years from Test Date	Nil	49,211
29 October 2009	Final Test Date	Nil	13,071
29 October 2009	Final Test Date	Nil	649,045
5 November 2010	Final Test Date	Nil	23,988
5 November 2010	Final Test Date	Nil	10,446
5 November 2010	Final Test Date	Nil	543,929
7 October 2011	Final Test Date	Nil	24,304
7 October 2011	Final Test Date	Nil	24,311
7 October 2011	Final Test Date	Nil	17,877
7 October 2011	Final Test Date	Nil	570,795

All Rights expire on the earlier of their expiry date, their exercise, their failure to meet exercise conditions or termination of the employee’s employment. In addition, the ability to exercise the Rights is conditional on the Group achieving certain performance hurdles related to relative total shareholder return to the ASX Small Cap Industrial index.

Further details are included in the Remuneration Report above.

17 October 2008	0.00	131,307
29 October 2009	0.00	20,507
5 November 2010	0.00	26,935

Shares purchased on exercise of Rights

The following ordinary shares of Bradken Limited were bought on market during the year ended 30 June 2012 on exercise of Rights granted under the Performance Rights Plan No further shares have been bought since that date.

Date Rights granted	Exercise price of right	Number of shares purchased
17 October 2008	0.00	7,420

E. Other information

Environmental regulation

The Group's operations are subject to significant environmental regulation under both Commonwealth and State legislation governing, amongst other things, noise, air emissions, the use, handling, and disposal of hazardous substances and waste. The Group has devoted and will continue to devote resources to environmental compliance and management in each of the jurisdictions in which it operates.

An environmental management system is in place which complies with the international standard ISO14001 in major sites in Australia the UK and New Zealand, while the US and China operate under local legal compliance requirements equivalent to ISO14001. It is Group policy to be environmentally proactive and to adopt practices that minimise adverse environmental impacts and to communicate and provide appropriate feedback on the Group's environmental performance. In accordance with the Group's environmental policy, procedures and goals have been established aimed at ensuring:

- all manufacturing and engineering sites have developed, implemented, and maintain environmental management systems meeting the requirements of ISO14001
- the environmental management systems are integrated with the existing business systems
- zero notifiable incidents and zero justified neighbourhood complaints
- continuing reduction of industrial waste disposal costs by continual improvement of working practices, such as cleaner production and improved recycling

Based upon the results of inquiries made, the Board is not aware of any significant breaches during the period covered by this report nor does it consider the Group is subject to any presently known material environmental liabilities. Under agreements with local authorities capital expenditure is required at some Australian sites to reduce dust and odour emissions.

Greenhouse gas and energy data reporting requirements

In Australia, the energy related requirements have corporate thresholds and Bradken group companies are subject to the reporting requirements of the Energy Efficiency Opportunities Act 2006 and the National Greenhouse and Energy Reporting Act 2007 and site thresholds for the National Pollutant Inventory NEPM.

The Energy Efficiency Opportunities Act 2006 requires the group to assess its energy usage, including the identification, investigation and evaluation of energy saving opportunities, and to report publicly on the assessments undertaken, including what action the group intends to take as a result. The group continues to meet its obligations under this Act.

The National Greenhouse and Energy Reporting Act 2007 requires the group to report its annual greenhouse gas emissions and energy use. The group has implemented systems and processes for the collection and calculation of the data required and submitted its 2009/10 report to the Greenhouse and Energy Data Officer on 27th October 2010.

Internationally energy related reporting requirements have facility thresholds. In the US, the Atchison facility will be reporting on energy as its emissions exceed the US reporting threshold. The USEPA has extended the deadline for reporting 2010 data to 30th Sept 2011. In the UK, the Bradken facilities complied with their respective Climate Change Agreements which finished in September 2010. There are no current energy reporting requirements applicable in Canada, China or New Zealand.

Certain Bradken facilities in Australia (NPI), Canada (NPRI) and USA (TRI) report energy use in the National Pollutant Inventory(NPI or NPRI) Reports or Toxic Release Inventory Reports (TRI) along with the associated emissions.

Insurance of officers

During the year, the Company paid a premium to insure the directors and secretaries of the Company and its Australian-based controlled entities, the general managers of each of the businesses, all executive officers of the Group and of any related body corporate against a liability incurred by such a director, secretary or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The Company has not otherwise, during or since the end of the financial year, indemnified or agreed to indemnify any officer of the Group or of any related body corporate against a liability incurred by any such officer.

Proceedings on behalf of the Company

No person has applied to the court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of these proceedings.

No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the Corporations Act 2001.

Non-audit services

The Company may decide to employ the auditor on assignments additional to their statutory audit duties where the auditor's expertise and experience with the Company and/or Group are important.

Details of the amounts paid to auditors for audit and non-audit services provided during the year are set out on the following page.

E. Other information (continued)

The Board of directors has considered the position and, in accordance with advice received from the Audit and Risk Committee, is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed by the Audit and Risk Committee to ensure they do not impact the impartiality and objectivity of the auditor
- none of the services undermine the general principles relating to auditor independence as set out in Professional Statement F1, including reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the Company, acting as advocate for the Company or jointly sharing economic risks and rewards.

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms:

Auditors' independence declaration

A copy of the auditors' independence declaration as required under section 307C of the Corporations Act 2001 is set out on page 24.

Rounding of amounts

The Company is of a kind referred to in Class Order 98/0100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the directors' report. Amounts in the directors' report have been rounded off in accordance with that Class Order to the nearest thousand dollars, or in certain cases, to the nearest dollar.

Auditor

PricewatehouseCoopers continues in office in accordance with section 327 of the *Corporations Act 2001.*

This report is made in accordance with a resolution of the directors:

Nick Greiner
Chairman

Brian Hodges
Managing Director

Sydney
6 August 2012

Auditor's Independence Declaration

As lead auditor for the review of Bradken Limited for the year ended 30 June 2012, I declare that, to the best of my knowledge and belief, there have been:

(a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and

(b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Bradken Limited and the entities it controlled during the period.

John Campion

Contents to the notes to the consolidated financial statements

1 Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistenty applied to all years presented, unless otherwise stated. The financial statements are for the consolidated entity consisting of Bradken Limited and its subsidiaries.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the *Corporations Act 2001*. Bradken Limited is a for-profit entity for the purpose of preparing the financial statements.

Compliance with IFRSs

The consolidated financial statements of the Bradken Limited group also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

New and amended standards adopted by the group

None of the new standards and amendments to standards that are mandatory for the first time for the financial year beginning 1 July 2011 affected any of the amounts recognised in the current period or any prior period and are not likely to affect future periods.

Historical cost convention

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and liabilities (including derivative instruments) at fair value through profit or loss.

Critical accounting estimates

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 3.

(b) Principles of consolidation

(i) Subsidiaries

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Bradken Limited ("company" or "parent entity") as at 30 June 2012 and the results of all subsidiaries for the year then ended. Bradken Limited and its subsidiaries together are referred to in this financial report as the Group or the consolidated entity.

Subsidiaries are all those entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries by the Group (refer to note 1(h)).

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated income statement, statement of comprehensive income, statement of changes in equity and balance sheet respectively.

(ii) Associates

Associates are all entities over which the group has significant influence but not control or joint control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost. The group's investment in associates includes goodwill identified on acquisition (refer to note 32).

The group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition other comprehensive income is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividends receivable from associates are recognised as reduction in the carrying amount of the investment.

1 Summary of significant accounting policies (continued)

When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured long-term receivables, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

(iii) Changes in ownership interests

The group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of Bradken Limited.

When the group ceases to have control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, jointly controlled entity or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a jointly-controlled entity or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

(c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director.

(d) Foreign currency translation

(i) Functional currency and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Australian dollars, which is Bradken Limited's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

Translation differences on non-monetary financial assets and liabilities are reported as part of the fair value gain or loss. Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available-for-sale financial assets are included in the fair value reserve in equity.

(iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each income statement and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

1 Summary of significant accounting policies (continued)

(e) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of returns, trade allowances and amounts collected on behalf of third parties. Revenue is recognised for the major business activities as follows:

(i) Sale of goods

Revenue from the sale of goods and disposal of other assets is recognised when the consolidated entity has passed the significant risks and rewards to the buyer.

(ii) Contract revenue

Contract revenue and expenses are recognised on an individual contract basis using the percentage of completion method when the stage of contract completion can be reliably determined, costs to date can be clearly identified, and total contract revenue and costs to complete can be reliably estimated.

The stage of completion is measured by reference to an assessment of total labour hours and other costs incurred to date as a percentage of costs for each contract.

Where the outcome of a contract cannot be reliably estimated, contract costs are expensed as incurred. Where it is probable that the cost will be recovered, revenue is recognised to the extent of costs incurred. Where it is probable that a loss will arise on a contract, the excess of total costs over revenue is recognised immediately as an expense.

(iii) Interest income

Interest income is recognised as it accrues, taking into account the effective yield on the financial asset.

(iv) Sale of non-current assets

The gain or loss on disposal of non-current assets is included as other income or expense at the date control passes to the buyer, usually when an unconditional contract of sale is signed. The gain or loss on disposal is calculated as the difference between the carrying amount of the asset at the time of disposal and the net proceeds on disposal.

(v) Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement.

(vi) Dividends

Dividends are recognised as revenue when the right to receive payment is established. This applies even if they are paid out of pre-acquisition profits. However, the investment may need to be tested for impairment as a consequence, refer note 1(m).

(f) Income tax

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

1 Summary of significant accounting policies (continued)

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in controlled entities where the parent entity is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation. As a consequence, these entities are taxed as a single entity and the deferred tax assets and liabilities of these entities are set off in the consolidated financial statements.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(i) Investment allowances

Companies within the group may be entitled to claim special tax deductions for investments in qualifying assets (investment allowances). The group accounts for such allowances as tax credits, which means that the allowance reduces income tax payable and current tax expense. A deferred tax asset is recognised for unclaimed tax credits that are carried forward as deferred tax assets.

(g) Leases

Leases of property, plant and equipment where the Group, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases (note 12). Finance leases are capitalised at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term, if there is no reasonable certainty that the Group will obtain ownership at the end of the lease term.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases (note 28). Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight line basis over the period of the lease.

Lease income from finance leases where the group is a lessor is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the receivable for each period (note 9). The respective lease receivable is included in the balance sheet.

(h) Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement and the fair value of any pre-existing equity interest in the subsidiary. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired and the measurement of all amounts has been reviewed, the difference is recognised directly in profit or loss as a bargain purchase.

1 Summary of significant accounting policies (continued)

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss.

(i) Impairment of assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(j) Cash and cash equivalents

For cash flow statement presentation purposes, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

(k) Receivables

Trade receivables are recognised initially at fair value and subsequently, less provision for doubtful debts. Trade receivables are normally due for settlement no more than 30 days from the date of recognition. They are presented as current assets unless collection is not expected for more than 12 months after the reporting date.

Collectibility of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off. A provision for doubtful receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the value of estimated future cash flows. The amount of the provision is recognised in the income statement.

(l) Inventories

(i) Raw materials and stores, work in progress and finished goods

Raw materials and stores, work in progress and finished goods are stated at the lower of cost and net realisable value. Cost comprises direct materials, direct labour and an appropriate portion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Costs are assigned to inventory on hand by the method most appropriate to each particular class of inventory, with the majority being valued on either standard or weighted average basis. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale such as expenses of marketing, selling and distribution to customers.

(ii) Construction and service contract work in progress

Construction and service contract work in progress is carried at cost plus profit recognised to date based on the value of work completed, less progress billings and less provision for foreseeable losses. If there are contracts where progress billings exceed the aggregate costs incurred plus profits less losses, the net amounts are presented under other liabilities.

Cost includes variable and fixed costs directly related to specific contracts, those costs related to contract activity in general which can be allocated to specific contracts on a reasonable basis and other costs specifically chargeable under the contract. Costs expected to be incurred under penalty clauses and rectification provisions are also included.

(iii) Stock Obsolescence

All inventory items are reviewed on a regular basis during the year and a provision raised for products which have not been sold for one year unless the review indicates that a sale is likely.

1 Summary of significant accounting policies (continued)

(m) Investments and other financial assets

Classification

The Group classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and, in the case of assets classified as held-to-maturity, re-evaluates this designation at each reporting date.

(i) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are expected to be settled within 12 months; otherwise they are classified as non-current.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of selling the receivable. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date which are classified as non-current assets. Loans and receivables are included in receivables in the balance sheet (note 8).

(iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group’s management has the positive intention and ability to hold to maturity.

(iv) Available-for-sale financial assets

Available-for-sale financial assets, comprising principally marketable equity securities, are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date – the date on which the group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

When securities classified as available-for-sale are sold, the accumulated fair value adjustments recognised in other comprehensive income are reclassified to profit or loss as gains and losses from investment securities.

Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Loans and receivables and held-to-maturity investments are subsequently carried at amortised cost using the effective interest method.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are presented in profit or loss within other income or other expenses in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in profit or loss as part of revenue from continuing operations when the group's right to receive payments is established. Interest income from these financial assets is included in the net gains/(losses).

Fair value

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

1 Summary of significant accounting policies (continued)

Impairment

The group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a ‘loss event’) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the assets are impaired.

(n) Derivatives and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either; (1) hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge); or (2) hedges of the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedge).

The Group documents at the inception of the hedging transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been and will continue to be highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair values of various derivative financial instruments used for hedging purposes are disclosed in note 11. Movements in the hedging reserve in shareholders' equity are shown in note 23.

The full fair value of a hedging derivative is classified as a non current asset or liability when the remaining maturity of the hedged item is more than 12 months; it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

(i) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The gain or loss relating to the effective portion of interest rate swaps hedging fixed rate borrowings is recognised in the income statement within other income or other expense together with the gain or loss relating to the ineffective portion and changes in the fair value of the hedge fixed rate borrowings attributable to the interest rate risk. The gain or loss relating to the ineffective portion is recognised in the income statement within other income or other expenses.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedge item for which the effective interest method is used is amortised to profit or loss over the period to maturity using a recalculated effective interest rate.

(ii) Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in equity in the hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in the income statement within other income or other expense.

Amounts accumulated in equity are recycled in the income statement in the periods when the hedged item will affect profit or loss (for instance when the forecast sale that is hedged takes place). The gain or loss relating to the effective portion of interest rate swaps hedging variable rate borrowings is recognised in the income statement within "finance costs". The gain or loss relating to the effective portion of forward foreign exchange contracts hedging export sales is recognised in the income statement within "sales". However, when the forecast transaction that is hedged results in the recognition of a non-financial asset (for example, inventory or a non-financial liability), the gains and losses previously deferred in equity are transferred from equity and included in the measurement of the initial cost or carrying amount of the asset or liability.

When a hedging instrument expires or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

(iii) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement and are included in other income or other expenses.

1 Summary of significant accounting policies (continued)

(o) Property, plant and equipment

All property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains/losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation is provided on property, plant and equipment, including freehold buildings but excluding land. Depreciation is calculated on a straight line basis so as to write off the net cost of each asset over its expected useful life. Assets are depreciated or amortised from the date of acquisition, or in respect of internally constructed assets, from the time an asset is completed and held ready for use. Depreciation is calculated using the straight line method to allocate their cost, net of their residual values, over their estimated useful lives, as follows:

Buildings	35 to 66 years
Plant and equipment	1 to 20 years
Patterns	1 to 40 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 1(i)).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the income statement.

(p) Intangible assets

(i) Goodwill

Goodwill is measured as described in note 1(h). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to operating segments (note 4).

(ii) Patents, trademarks and brand names

Patents are carried at fair value at acquisition and amortised on a straight line basis over the life of the patent. Trademarks are carried at their fair value at acquisition less impairment losses and amortised over 5 years with amortisation calculated on a straight line basis. Brand names are not amortised if they continue to be used and add value. Discontinued brand names are amortised over a period of 10 years as they are phased out.

(iii) Customer relationships

Customer relationships acquired as part of a business acquisition are recognised separately from goodwill. The customer relationships are carried at their fair value at the date of acquisition less accumulated amortisation and impairment losses. Amortisation is calculated based on their estimated useful lives, which currently vary from 10 to 20 years.

(iv) Research and development

Research expenditure is recognised as an expense as incurred. Costs incurred on development projects (relating to the design and testing of new or improved products) are recognised as intangible assets when it is probable that the project will be a success considering its commercial and technical feasibility and its costs can be measured reliably. The expenditure capitalised comprises all directly attributable costs, including costs of materials, services, direct labour and an appropriate proportion of overheads. Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use on a straight-line basis over its useful life, which varies from 3 to 10 years.

(q) Payables

These amounts represent liabilities for goods and services provided to the group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 60 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months from the reporting date. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

1 Summary of significant accounting policies (continued)

(r) Borrowings

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed.

(s) Borrowing costs

Borrowing costs are expensed as incurred. Borrowing costs include interest, amortisation of discounts or premiums relating to borrowings, amortisation of ancillary costs in connection with arrangement of borrowings, foreign exchange differences net of hedged amounts on borrowings, including trade creditors and lease finance charges.

(t) Provisions

A provision is recognised in the accounts when there is a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

(i) Warranties

Products are warranted against faulty workmanship and in some cases these are specifically extended to periods up to seven years or hours used depending on the type of product and contract in place. Rectification claims are settled in cash or by repair of the item, at the discretion of the Group. Provision for warranty claims are made for claims received and claims expected to be received in relation to sales made prior to reporting date adjusted for specific information arising from internal quality assurance processes.

(u) Employee Benefits

(i) Wages, salaries, annual leave, sick leave, rostered days off and non-monetary benefits

Liabilities for annual leave, accumulating sick leave and rostered days off, including non monetary benefits, expected to be settled within 12 months of the reporting date are recognised in current provisions in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non accumulating sick leave are recognised when the leave is taken and measured at the rates paid or payable. Liabilities for unpaid wages and salaries up to the reporting date are recognised in current payables.

(ii) Long service leave

The provision for long service leave represents the present value of the expected future cash outflows to be made resulting from employees' services provided to reporting date.

Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(iii) Bonus plans

A liability for employee benefits in the form of bonus plans is recognised in current provisions when there is no realistic alternative but to settle the liability and at least one of the following conditions is met:

- there are formal terms in the plan for determining the amount of the benefit
- the amounts to be paid are determined before the time of completion of the financial report
- past practice gives clear evidence of the amount of the obligation.

Liabilities for bonus plans are expected to be settled within 12 months and are measured at the amounts expected to be paid when they are settled.

(iv) Employee share and rights plans

Share based compensation benefits are provided to employees and directors via the Performance Rights Plan ('PRP') and the Non-Executive Director Share Acquisition Plan ('NEDSAP') respectively.

The fair value of Rights granted under the PRP are recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date taking into account market performance conditions only, and spread over the vesting period during which the employees become unconditionally entitled to the Rights. The fair value of Rights granted are measured using the Black & Scholes Pricing Model, taking into account the terms and conditions attached to the Rights. The amount recognised as an expense is adjusted to reflect the actual number of Rights that vest except where forfeiture is due to market related conditions.

The fair value of shares issued under the NEDSAP are recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date.

1 Summary of significant accounting policies (continued)

(v) Retirement benefit obligations

All employees of the Group are entitled to benefit from various superannuation or pension plans on retirement, disability or death. The Group operates two defined benefit retirement plans, one in the United States and the other in Canada. The United States plan is closed to new members and covers hourly employees hired before May 10, 1993 at one of our US subsidiaries. The Canadian plan is currently active at one of our Canadian subsidiaries for hourly employees but closed on March 1, 2010 to salaried employees. Benefits for the defined benefit plan are determined on years of credited service. The Group also operates a number of defined contribution plans which receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

A liability or asset in respect of defined benefit superannuation plans is recognised in the balance sheet, and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the funds assets at that date and any unrecognised past service cost. The present value of the defined benefit obligation is based on future payments which may arise from membership of the fund to the reporting date calculated annually by independent actuaries. Consideration is given to the experience of employee departures and periods of service.

(vi) Healthcare reserves

The Group's U.S. operations primarily self-insure employee healthcare expenses. Reserves are based on historical claims experience.

(v) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or rights are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or rights for the acquisition of a business are not included in the cost of the acquisition as part of the purchase consideration.

If the entity reacquires its own equity instruments, eg as the result of a share buy-back, those instruments are deducted from equity and the associated shares are cancelled. No gain or loss is recognised in the profit or loss and the consideration paid including any directly attributable incremental costs (net of income taxes) is recognised directly in equity.

(w) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the financial year but not distributed at balance date.

(x) Earnings per share

(i) Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

(y) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the taxation authority are presented as operating cash flows.

(z) Rounding of amounts

The Company is of a kind referred to in Class order 98/0100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the financial report. Amounts in the financial report have been rounded off in accordance with that Class Order to the nearest thousand dollars, or in certain cases, the nearest dollar.

1 Summary of significant accounting policies (continued)

(aa) Amended accounting standards and UIG interpretations

Certain amended accounting standards and interpretations have been published that are not mandatory for 30 June 2012 reporting periods. The Group's and the parent entity's assessment of the impact of these amended standards and interpretations is set out below.

AASB 9 *Financial Instruments, AASB 2009-11 Amendments to Australian Accounting Standards arising from AASB 9 and* AASB 2010-7 *Amendments to Australian Accounting Standards arising from AASB 9 (December 2010)* (effective from 1 January 2013)

AASB 9 Financial Instruments addresses the classification, measurement and derecognition of financial assets and financial liabilities. The standard is not applicable until 1 January 2013* but is available for early adoption. When adopted, the standard will affect in particular the group's accounting for its available-for-sale financial assets, since AASB 9 only permits the recognition of fair value gains and losses in other comprehensive income if they relate to equity investments that are not held for trading. There will be no impact on the group's accounting for its available-for-sale financial assets as the Group's investments are not held for trading.

Fair value gains and losses on available-for-sale debt investments, for example, will therefore have to be recognised directly in profit or loss. There will be no impact on the group's accounting for available-for-sale debt investments, as the new requirements only affect the accounting for available-for-sale debt investments that are designated at fair value through profit or loss and the group does not have any such investments. There will be no impact on the group's accounting for financial liabilities, as the new requirements only affect the accounting for financial liabilities that are designated at fair value through profit or loss and the group does not have any such liabilities. The derecognition rules have been transferred from AASB 139 Financial Instruments: Recognition and Measurement and have not been changed. The group has not yet decided when to adopt AASB 9.

* In December 2011, the IASB delayed the application date of IFRS 9 to 1 January 2015. The AASB is expected to make an equivalent amendment to AASB 9 shortly.

AASB 10 *Consolidated Financial Statements,* AASB 11 *Joint Arrangements,* AASB 12 *Disclosure of Interests in Other Entities,* revised AASB 127 *Separate Financial Statements and* AASB 128 *Investments in Associates and Joint Ventures* and AASB 2011-7 *Amendments to Australian Accounting Standards arising from the Consolidation and Joint Arrangements Standards* (effective 1 January 2013)

In August 2011, the AASB issued a suite of five new and amended standards which address the accounting for joint arrangements, consolidated financial statements and associated disclosures. AASB 10 replaces all of the guidance on control and consolidation in AASB 127 *Consolidated and Separate Financial Statements*, and Interpretation 12 *Consolidation – Special Purpose Entities*. The core principle that a consolidated entity presents a parent and its subsidiaries as if they are a single economic entity remains unchanged, as do the mechanics of consolidation.,However the standard introduces a single definition of control that applies to all entities. It focuses on the need to have both power and rights or exposure to variable returns before control is present. Power is the current ability to direct the activities that significantly influence returns. Returns must vary and can be positive, negative or both. There is also new guidance on participating and protective rights and on agent/principal relationships. While the group does not expect the new standard to have a significant impact on its composition, it has yet to perform a detailed analysis of the new guidance in the context of its various investees that may or may not be controlled under the new rules.

AASB 12 sets out the required disclosures for entities reporting under the two new standards, AASB 10 and AASB 11, and replaces the disclosure requirements currently found in AASB 128. Application of this standard by the group will not affect any of the amounts recognised in the financial statements, but will impact the type of information disclosed in relation to the group's investments. Amendments to AASB 128 provide clarification that an entity continues to apply the equity method and does not remeasure its retained interest as part of ownership changes where a joint venture becomes an associate, and vice versa. The amendments also introduce a "partial disposal" concept. The group is still assessing the impact of these amendments. The group does not expect to adopt the new standards before their operative date. They would therefore be first applied in the financial statements for the annual reporting period ending 30 June 2014.

AASB 13 *Fair Value Measurement* and AASB 2011-8 *Amendments to Australian Accounting Standards arising from AASB 13* (effective 1 January 2013)

AASB 13 was released in September 2011. It explains how to measure fair value and aims to enhance fair value disclosures. The group has yet to determine which, if any, of its current measurement techniques will have to change as a result of the new guidance. It is therefore not possible to state the impact, if any, of the new rules on any of the amounts recognised in the financial statements. [Alternatively: "The group does not use fair value measurements extensively. It is therefore unlikely that the new rules will have a significant impact on any of the amounts recognised in the financial statements.] However, application of the new standard will impact the type of information disclosed in the notes to the financial statements. The group does not intend to adopt the new standard before its operative date, which means that it would be first applied in the annual reporting period ending 30 June 2014.

1 Summary of significant accounting policies (continued)

AASB 119 - *Revised AASB 119 Employee Benefits*, AASB 2011-10 *Amendments to Australian Accounting Standards arising from AASB 119 (September 2011)* (effective 1 January 2013)
In September 2011, the AASB released a revised standard on accounting for employee benefits. It requires the recognition of all remeasurements of defined benefit liabilities/assets immediately in other comprehensive income (removal of the so-called 'corridor' method) and the calculation of a net interest expense or income by applying the discount rate to the net defined benefit liability or asset. This replaces the expected return on plan assets that is currently included in profit or loss. The standard also introduces a number of additional disclosures for defined benefit liabilities/assets and could affect the timing of the recognition of termination benefits. The amendments will have to be implemented retrospectively. While the group does not expect the new standard to have a significant impact, it has yet to perform detailed analysis. The Group has not yet decided when to adopt the new standard.

AASB 2011-9 *Amendments to Australian Accounting Standards – Presentation of Items of Other Comprehensive Income* (effective 1 July 2012)
In September 2011, the AASB made an amendment to AASB 101 Presentation of Financial Statements which requires entities to separate items presented in other comprehensive income into two groups, based on whether they may be recycled to profit or loss in the future. This will not affect the measurement of any of the items recognised in the balance sheet or the profit or loss in the current period. The group intends to adopt the new standard from 1 July 2012.

AASB 2011-4 *Amendments to Australian Accounting Standards to Remove Individual Key Management Personnel Disclosure Requirements* (effective 1 July 2013)
In July 2011 the AASB decided to remove the individual key management personnel (KMP) disclosure requirements from AASB 124 Related Party Disclosures , to achieve consistency with the international equivalent standard and remove a duplication of the requirements with the Corporations Act 2001 . While this will reduce the disclosures that are currently required in the notes to the financial statements, it will not affect any of the amounts recognised in the financial statements. The amendments apply from 1 July 2013 and cannot be adopted early. The Corporations Act requirements in relation to remuneration reports will remain unchanged for now, but these requirements are currently subject to review and may also be revised in the near future.

There are no other standards that are not yet effective and that are expected to have a material impact on the group in the current or future reporting periods on foreseeable future transactions.

(ab) Parent entity financial information

The financial information for the parent entity, Bradken Limited, disclosed in note 38 has been prepared on the same basis as the consolidated financial statements, except as set out below.

(i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the financial statements of Bradken Limited.

(ii) Tax consolidation legislation

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation.

The head entity, Bradken Limited, and the controlled entities in the tax consolidated group account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, Bradken Limited also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

The amounts receivable/payable are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of each financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as current amounts receivable from or payable to other entities in the group.

Any difference between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

(iii) Financial guarantees

The parent entity is a guarantor under the Bradken Group - Common Terms Deed Poll and unconditionally and irrevocably guarantees payments due in connection with any financing facilities owed by any Group company.

2 Financial risk management

The Group's activities expose it to a variety of financial risks; market risk (including currency risk, cash flow and fair value interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group uses derivative financial instruments such as foreign exchange contracts and interest rate swaps to hedge certain risk exposures. Derivatives are exclusively used as hedging instruments, not as trading or other speculative instruments. The Group uses different methods to measure different types of risk to which is it exposed. These methods include sensitivity analysis in the case of interest rate and foreign exchange risk and ageing analysis for credit risk.

Risk management is carried out centrally by the CFO and finance function under policies approved by the Board of Directors.

(a) Credit risk

The Group has no significant concentrations of credit risk. The Group has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history.

Derivative counterparties and cash transactions are limited to high credit quality financial institutions.

(b) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group aims at maintaining flexibility in funding by keeping committed credit lines available.

Management monitors forecasts of the Group's liquidity on the basis of expected cash flow. See note 19(e) for details of available facilities.

The tables below analyse the Group's financial liabilities and net settled derivative financial instruments into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the tables are the contractual undiscounted cash flows. There is no liquidity risk at the Parent entity level.

Group - 2012	Less than 1 year $'000	Between 1 and 3 years $'000	Between 3 and 5 years $'000	Between 5 and 8 years $'000	Over 8 years $'000
Non-derivatives					
Payables	203,245	-	-	-	-
Borrowings (excluding finance leases)	26,946	264,050	145,868	73,224	162,180
Finance leases liabilities	4,845	5,672	524	-	-
Derivatives					
Net settled interest rate swaps and caps	3,650	-	-	-	-

Group - 2011	Less than 1 year $'000	Between 1 and 3 years $'000	Between 3 and 5 years $'000	Between 5 and 8 years $'000	Over 8 years $'000
Non-derivatives					
Payables	127,394	-	-	-	-
Borrowings (excluding finance leases)	32,290	227,181	195,977	-	-
Finance leases liabilities	4,043	5,241	1,085	20	-
Derivatives					
Net settled interest rate swaps and caps	7,337	-	-	-	-

The Group enters into forward exchange contracts to hedge foreign currency denominated receivables and also to manage foreign currency denominated inventory and capital items.

Refer to note 11(a)(ii) for the maturity profiles of the Group's existing foreign exchange hedge contracts.

Refer to note 8(f) for receivables denominated in foreign currencies.

(c) Market risk

(i) Cash flow and fair value interest rate risk

The Group has no significant interest-bearing assets and the Group's income and operating cash flows are not materially exposed to changes in market interest rates.

The Group's interest-rate-risk arises from long term borrowings. Borrowings issued at variable rates expose the Group to cash flow interest-rate-risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate-risk. Group policy is to fix the rates for between 30% and 70% of its borrowings.

The Group manages its cash flow interest-rate-risk by using floating-to-fixed interest rate swaps and interest rate caps. Such instruments have the economic effect of converting borrowings from floating rates to fixed rates. Generally, the Group raises long-term borrowings at floating rates and swaps them into fixed rates. Under the interest-rate swaps, the Group agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed contract rates and floating-rate interest amounts calculated by reference to the agreed notional principal amounts.

2 Financial risk management (continued)

(c) Market risk (continued)

Refer to note 19 for further details generally of the Group's borrowings.

A sensitivity analysis of interest rate risk on the Group's financial assets and liabilities is provided in the table at note 2(c)(iv).

(ii) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the entity's functional currency. It is the policy of the Group to enter into forward foreign exchange contracts to cover all foreign currency exposure other than those effectively covered within the natural hedging pool.

Refer to note 8 and 17 for receivables and payables denominated in foreign currencies.

Unrealised gains or losses on outstanding foreign exchange contracts are taken to the Group's income statement on a monthly basis.

A sensitivity analysis of foreign exchange risk on the Group's financial assets and liabilities is provided in the table at note 2(c)(iv).

(iii) Price risk

The Group is exposed to commodity price risk through the purchase of steel and various alloys.

(iv) Summarised sensitivity analysis

The following table summarises the pre-tax sensitivity of the Group's financial assets and financial liabilities to interest rate risk and foreign exchange risk. These sensitivities are prior to the offsetting impact of hedging instruments.

2012		Interest rate risk				Foreign exchange risk			
	Carrying	-100 bps		+100 bps		-10%		+10%	
	amount	Profit	Equity	Profit	Equity	Profit	Equity	Profit	Equity
	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000
Financial assets									
Cash and cash equivalents	101,892	(1,018)	(1,018)	1,018	1,018	4,042	4,042	(4,042)	(4,042)

Financial liabilities									
Derivatives - cashflow hedges	(27)	-	(1,454)	-	1,519	-	-	-	-
Derivatives - FVTPL	(7,310)	-	-	-	-	6,893	6,893	(21,414)	(21,414)
Trade payables	(86,147)	-	-	-	-	(3,462)	(3,462)	3,462	3,462
Borrowings	(378,578)	3,786	3,786	(3,786)	(3,786)	(11,773)	(11,773)	11,773	11,773
Total increase/(decrease)		2,266	812	(2,266)	(747)	13,274	13,274	(27,795)	(27,795)

Financial risk exposure of the parent entity is limited to the exposure of the Group.

2 Financial risk management (continued)

(d) Fair value measurements

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

AASB 7 *Financial Instruments: Disclosures* requires disclosure of fair value measurement by level of the following fair value measurement hierarchy:

(a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)

(b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and

(c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following table presents the group's assets and liabilities measured and recognised at fair value at 30 June 2012 and 30 June 2011.

2012	**Level 1 $'000**	**Level 2 $'000**	**Level 3 $'000**	**Total $'000**
Assets				
Derivatives used for hedging	-	-	-	-
Total assets	-	-	-	-
Liabilities				
Derivatives used for hedging	-	3,650	-	3,650
Total liabilities	-	3,650	-	3,650

2011	**Level 1 $'000**	**Level 2 $'000**	**Level 3 $'000**	**Total $'000**
Assets				
Available-for-sale financial assets				
Equity Securities	70,054	-	-	70,054
Derivatives used for hedging	-	-	-	-
Total assets	70,054	-	-	70,054
Liabilities				
Derivatives used for hedging	-	7,337	-	7,337
Total liabilities	-	7,337	-	7,337

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in level 1.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques. The group uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used to estimate fair value for long-term debt for disclosure purposes. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward exchange contracts is determined using forward exchange market rates at the end of the reporting period. These instruments are included in level 2 and comprise debt investments and derivative financial instruments. In the circumstances where a valuation technique for these instruments is based on significant unobservable inputs, such instruments are included in level 3.

3 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

(a) Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in note 1(p). The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions. Refer to note 14 for details of these assumptions and the potential impact of changes to the assumptions.

(ii) Estimated percentage completion for major contracts

The Group reviews the percentage of completion for it's major contracts monthly including assessing costs to be incurred to complete the project in accordance with the accounting policy stated in note 1(e) and note 1(l). These assessments require an estimate of the remaining labour and material costs for the projects.

(iii) Equity accounting for Austin Engineering

The Group has equity accounted the latest available published results of Austin Engineering Limited for the half year ending 31 December 2011. Had the Group used results for the full year ended 30 June 2012 it is not expected there would be a material difference. Differences identified when Austin Engineering Limited publishes results for the 2012 financial period will be adjusted in Bradken Limited's interim report for the half year ending 31 December 2012.

(iv) Intangibles

The group values identifiable intangibles acquired in a business combination based on a combination of independent valuations in some cases and management's estimate of the net present value of estimated future cash flows of the assets. Identifiable intangible assets are amortised over their estimated useful lives. Given the estimates involved, management review the carrying value of these assets annually for impairment.

4 Segment information

Operating segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Managing Director.

Segment revenues, expenses, assets and liabilities are those that are directly attributable to a segment. Segment assets include all assets used by a segment and consist primarily of receivables, inventories and property, plant and equipment, net of related provisions. Segment liabilities consist primarily of trade and other creditors, employee benefits and provision for service warranties.

Segment revenues, expenses and results include transfers between segments. Sales of scrap between controlled entities are made on an "arm's-length" basis and are eliminated on consolidation. All other transfers are made at variable cost and are eliminated on consolidation.

(a) Description of segments

Industrial is a supplier of cast, machined and fabricated components manufactured to customer specifications or purpose designed to suit customer needs into industries such as Smelters and Refineries, Steel Manufacturers and Sugar Production. Mining Products consists of design, supply and service of wear components for all types of fixed and mobile plant in the Mining, Mineral Processing and Quarry industries. Rail is a package provider of Freight Rollingstock products and services including freight wagons, bogies, drawgear, inventory management, spare and renewed parts and the maintenance and refurbishment of rollingstock. Engineered Products based in the US is a supplier of cast parts to the Energy, Mining, Industrial and Rail Transport industries specialising in large (greater than 4,500 kg) highly engineered steel castings.

Although the Industrial segment does not meet the quantitative thresholds required by AASB 8, management has concluded that this segment should be reported, as it is closely monitored by the Managing Director.

Responsibility for the Resource business previously included as part of the US based Engineered Products segment has been moved to the Mining Products segment. Management of the former Power & Cement business based in the UK, now referred to as Bradken Europe and previously reported in "all other segments", is now undertaken by the US based Resources business and as a consequence is reported under the Mining Products segment. Responsibility for the Australian based part of the former Power & Cement business is now the responsibility of the Australian based Industrial segment and has been moved to that segment. Comparative disclosures have also been amended to reflect these changes.

The "all other" segment represents the other smaller businesses including Cast Metal Services.

4 Segment information (continued)

(b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the year ending 30 June 2012 and for the year ending 30 June 2011 are as follows:

2012	**Notes**	**Industrial**	**Mining Products**	**Rail**	**Engineered Products**	**All other segments**	**Total**
		$'000	**$'000**	**$'000**	**$'000**	**$'000**	**$'000**

4 Segment information (continued)

(c) Other segment information

The Group's divisions are managed on a global basis and operate in five main geographical areas, Australia, the home country of the parent entity, the UK, the US, Canada, China and Other countries. The majority of revenue classified as "Other" relates to Canada, and various European, African, Asian, and South American countries.

(i) Segment revenue

Sales between segments under the same tax jurisdiction are made at variable cost and are eliminated on consolidation. Sales between segments under different tax jurisdictions are carried out at arms length and are eliminated on consolidation.

The revenue from external parties reported to the Managing Director is measured in a manner consistent with that in the income statement. Segment revenue reconciles to total revenue from continuing operations as follows:

	2012 $'000	2011 $'000
Total segment revenue	**1,639,528**	1,276,364
Intersegment eliminations	**(188,272)**	(128,891)
Interest revenue	**369**	684
Other revenue	**1,218**	1,450
Rental income	**516**	359
Royalty income	**415**	388
Sale of scrap	**868**	756
Commission income	**62**	371
Other	**1,377**	2,367
Total revenue from continuing operations (note 5)	**1,456,081**	1,153,848

Segment revenues are allocated based on the country in which the customer is located.

	2012 $'000	2011 $'000
Australia	**733,420**	648,764
US	**401,910**	287,592
Other countries	**315,926**	211,117
Revenue from external customers	**1,451,256**	1,147,473

(ii) Gross margin

The Managing Director assesses the performance of each operating segment based on a measure of gross margin. Gross margin is considered the most relevant measure of individual segment results as manufacturing plants all make product for the various segments and transfer product at cost. This measurement basis excludes the allocation of manufacturing variances and overheads from individual manufacturing plants as any allocation would be arbitrarily based.

A reconciliation of standard gross margin to operating profit before income tax is provided as follows:

	2012 $'000	2011 $'000
Gross margin	**429,616**	380,577
Fixed manufacturing overheads and other cost of sale adjustments	**(132,376)**	(112,370)
Other reveune	**2,017**	-
Other income	**4,825**	6,375
Selling and technical expenses	**(57,803)**	(50,573)
Administration expenses	**(76,681)**	(88,154)
Finance costs	**(33,785)**	(37,549)
Share of net profit of associates accounted for using the equity method	**2,826**	-
Profit before income tax	**138,639**	98,306

4 Segment information (continued)

(c) Other segment information (continued)

(iii) Segment assets

The amounts provided to the Managing Director with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset. Reportable segments' assets are reconciled to total assets as follows:

	2012	2011
	$'000	$'000
Segment assets	**1,318,160**	900,244
Unallocated:		
Inventories	**(1,037)**	(2,675)
Current receivables	**(38,610)**	(650)
Intangibles	**137,743**	118,308
Property, plant and equipment	**16,023**	14,907
Available for sale financial assets	**-**	70,056
Investments accounted for using the equity method	**38,521**	-
Current tax assets	**7,150**	-
Deferred tax assets	**17,972**	11,864
Cash and cash equivalents	**101,844**	152,437
Derivative financial instruments	**-**	47
Total assets as per the balance sheet	**1,597,766**	1,264,538

Segment assets are allocated based on where the assets are located.

Australia	**539,416**	506,843
US	**255,264**	205,027
Canada	**298,681**	90,273
China	**149,065**	66,977
UK	**31,870**	25,371
Other countries	**43,864**	5,753
Total segment assets	**1,318,160**	900,244

(iv) Segment liabilities

The amounts provided to the Managing Director with respect to total liabilities are measured in a manner consistent with that of the financial statements. These liabilities are allocated based on the operations of the segment and the physical location of the liabilities. Reportable segments' liabilities are reconciled to total liabilities as follows:

	2012	2011
	$'000	$'000
Segment liabilities	**277,205**	171,223
Unallocated:		
Payables	**1,320**	13,106
Derivative financial instruments	**3,650**	7,309
Current provisions	**59**	4,285
Non-current provisions	**5,112**	3,399
Current borrowings	**3,642**	13,392
Non-current borrowings	**542,972**	360,905
Current tax liabilities	**6,198**	17,878
Deferred tax liabilities	**38,158**	21,978
Total liabilities as per the balance sheet	**878,316**	613,475

5 Profit from ordinary activities

Net bad and doubtful debts expense (revenue) including movements in doubtful debts provision	**326**	420
Employee benefits expense	**412,722**	342,766

(a) Capitalised borrowing costs

The borrowing costs capitalised represent amounts incurred upfront to renew finance facilities.

6 Income tax expense

	2012 $'000	2011 $'000
(a) Income tax expense		
Current tax	**32,376**	40,197
Deferred tax	**4,913**	(9,022)
Adjustment for current tax of prior periods	**817**	(481)
	38,106	30,694
Income tax expense is attributable to:		
Profit from continuing operations	**38,106**	30,694
Aggregate income tax expense	**38,106**	30,694
Deferred income tax (revenue) expense included in income tax expense comprises:		
Decrease (increase) in deferred tax assets (note 13)	**(482)**	(5,669)
(Decrease) increase in deferred tax liabilities (note 21)	**5,395**	(3,353)
	4,913	(9,022)
(b) Numerical reconciliation of income tax expense to prima facie tax payable		
Profit from continuing operations before income tax expense	**138,639**	98,306
	138,639	98,306
Tax at the Australian tax rate of 30% (2011: 30%)	**41,592**	29,492
Tax effect of amounts which are not deductible (taxable) in calculating taxable income:		
Goodwill impairment	**-**	3,084
Entertainment	**68**	71
Research and development	**(493)**	(213)
Share based payments	**601**	155
Tax offset for franked dividends	**(518)**	(523)
Sundry items	**(2,532)**	(3,044)
	38,718	29,022
Difference in overseas tax rates	**(167)**	(274)
Adjustment for tax of prior periods	**1,028**	377
Deferred tax assets restated for reduction in overseas tax rate	**231**	87
Prior year tax losses de-recognised as not probable of recovery	**(1,704)**	1,482
Income tax expense	**38,106**	30,694
(c) Amounts recognised directly in equity		
Aggregate current and deferred tax arising in the reporting period and not recognised in net profit or loss or other comprehensive income but directly debited or credited to equity		
Net deferred tax - debited (credited) directly to equity (notes 13 and 21)	**(1,196)**	(3,843)
	(1,196)	(3,843)
(d) Tax expense (income) relating to items of other comprehensive income		
Available-for-sale financial assets (note 23(a))	**(9,918)**	5,962
Cash flow hedges (note 23(a))	**(1,015)**	13
	(10,933)	5,975

6 Income tax expense (continued)

(e) Tax consolidation legislation

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation as of 1 July 2003. The accounting policy in relation to this legislation is set out in note 1(f).

On adoption of the tax consolidation legislation, the entities in the tax consolidated group entered into a tax sharing agreement which, in the opinion of the directors, limits the joint and several liability of the wholly-owned entities in the case of a default by the head entity, Bradken Limited.

The Australian entities have also entered into an agreement under which the wholly-owned entities fully compensate Bradken Limited for any current tax payable assumed and are compensated by Bradken Limited for any current tax receivable and deferred tax assets relating to the unused tax losses or unused tax credits that are transferred to Bradken Limited under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

The amounts receivable/payable are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of the financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

7 Cash and cash equivalents

	2012 $'000	2011 $'000
Cash at bank and in hand	**101,892**	152,476
	101,892	152,476

(a) Reconciliation to cash at the end of the year

The above figures are reconciled to cash at the end of the financial year as shown in the statement of cash flows as follows:

	2012 $'000	2011 $'000
Balances as above	**101,892**	152,476
Bank overdrafts (note 19)	**(173)**	(9,420)
Balances per statement of cash flows	**101,719**	143,056

(b) Interest rate risk exposure

The Group's and parent entity's exposure to interest rate risk is discussed in note 2.

8 Receivables

	2012 $'000	2011 $'000
Current		
Trade receivables	**202,922**	196,546
Provision for impairment of receivables	**(499)**	(476)
	202,423	196,070
Other receivables	**11,182**	57,722
Prepayments	**7,306**	4,696
	220,911	258,488
Non-current		
Other receivables	**1,873**	1,622
	1,873	1,622

8 Receivables (continued)

(a) Impaired trade receivables

As at 30 June 2012 current trade receivables of the Group with a nominal value of $499,000 (2011: $476,000) were impaired. The amount of the provision was $499,000 (2011: $476,000).

Movements in the provision for impairment of receivables are as follows:

	2012 $'000	2011 $'000
Balance at 1 July	476	358
Balances acquired on acquisition	66	-
Charge for the year	326	420
Receivables written off during the year as uncollectable	(375)	(151)
Unused amounts reversed	-	(61)
Foreign currency exchange differences	6	(90)
Balance at 30 June	499	476

The creation and release of the provision for impaired receivables has been included in administration expenses in the income statement. Amounts charged to the provision are generally written off when there is no expectation of recovering additional cash.

(b) Past due but not impaired

At 30 June, the ageing analysis of trade receivables is as follows:

	2012 $'000	2011 $'000
Current	138,817	136,818
0-30 days	48,947	44,186
31-60 days	9,575	10,018
61-90 days	3,483	466
91 + days	2,100	5,058
Total	202,922	196,546

As at 30 June 2012 trade receivables of $499,000 (2011:$476,000) were past due and considered impaired and trade receivables of $63,606,000 (2011:$59,252,000) were past due but not impaired.

The other classes within trade and other receivables do not contain impaired assets and are not past due. Based on the credit history of these other classes, it is expected that these amounts will be received when due.

In relation to the receivables recognised as past due but not impaired and impaired, collateral is held in the form of a retention of title over the goods until payment is received. Given the consumable nature of these goods the ability to determine an accurate value for this collateral has been unable to be performed.

(c) Other receivables

These amounts generally arise from transactions outside the usual operating activities of the Group and also include amounts receivable based on the revenue recognised for contracts on a percentage of completion basis.

(d) Fair values

The fair values and carrying values of non-current receivables of the Group are as follows:

	2012		2011	
	Carrying amount $'000	Fair value $'000	Carrying amount $'000	Fair value $'000
Other receivables	1,873	1,873	1,622	1,622
	1,873	1,873	1,622	1,622

Due to the short term nature of these receivables, their carrying amount is assumed to approximate their fair value.

(e) Credit risk

There is no concentration of credit risk with respect to current and non-current receivables, as the Group has a large number of customers, nationally and internationally dispersed. Refer to note 2 for more information on the risk management policy of the Group and the credit quality of the entity's trade receivables.

The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above.

8 Receivables (continued)

(f) Foreign exchange and interest rate risk

The carrying amounts of the Group's and parent entity current and non-current receivables are denominated in the following currencies:

	2012 $'000	2011 $'000
Australian Dollars	**82,539**	177,709
US Dollars	**95,870**	55,390
Canadian Dollars	**23,649**	14,063
Chinese Yuan	**7,808**	5,360
Other *	**12,918**	7,588
	222,784	260,110

* Other refers to a basket of currencies (Euros, Great British Pounds, Japanese Yen, New Zealand Dollars, Singapore Dollars, Malaysian Ringgit, South African Rand, Chilean Pesos)

Further information about the Group's and the parent entity's exposure to credit risk, foreign exchange risk and interest rate risk in relation to trade and other receivables is provided in note 2.

9 Other receivables

	2012 $'000	2011 $'000
Current receivables under finance leases (a)	**402**	357
Non current receivables under finance leases (a)	**5,323**	5,542

(a) Receivables under finance leases

The Group leases freight rail wagons to customers in Australia under finance lease arrangements. Lease agreements in which the other party, as lessee, is to be regarded as the economic owner of the leased assets give rise to accounts receivable in the amount of discounted future lease payments. The receivables under finance leases are as follows:

	Not later than one year $'000	Between one and five years $'000	Later than five years $'000
2011			
Present value	357	1,937	3,605
Unearned interest income	699	2,553	1,562
Total future payments	**1,056**	**4,490**	**5,167**
2012			
Present value	402	2,180	3,143
Unearned interest income	678	2,435	1,001
Total future payments	**1,080**	**4,615**	**4,144**

10 Inventories

	2012 $'000	2011 $'000
Construction work in progress:		
Contract costs incurred and recognised profits less recognised losses	**243,697**	528,787
Progress billing	**(181,716)**	(529,076)
Net construction work in progress	**61,981**	(289)
Raw materials and stores	**56,462**	37,225
Work in progress	**93,344**	74,822
Finished goods	**96,326**	65,789
	308,113	177,547

(a) Inventory expense

Write downs of inventories to net realisable value recognised as an expense during the year ended 30 June 2012 amounted to $498,000 (2011: $1,407,000). The expense has been included in 'cost of sales' in the income statement.

11 Derivative financial instruments

	2012 $'000	2011 $'000
Current liabilities		
Interest rate swap and cap contracts - cash flow hedges ((a)(i))	**3,409**	27
Forward foreign exchange contracts ((a)(ii))	**241**	7,310
Total current derivative financial instrument liabilities	**3,650**	7,337

(a) Instruments used by the Group

The Group is party to derivative financial instruments in the normal course of business in order to hedge exposure to fluctuations in interest and foreign exchange rates in accordance with the Group's financial risk management policies (refer to note 2).

(i) Interest rate swap and interest rate cap contracts - cash flow hedges

Bank loans of the Group had an average variable interest rate of 4.78% at 30 June 2012 (2011: 5.86%). It is policy to protect part of the loans from exposure to increasing interest rates. Accordingly, the Group has entered into interest rate swap contracts under which it is obliged to receive interest at variable rates and to pay interest at fixed rates, and interest rate caps which provide protection over an agreed interest rate level.

Swaps and caps currently in place cover approximately 36% of bank loans (2011: 40%). The average fixed interest for the swaps and caps is 4.82% (2011: 4.59%).

At 30 June 2012, the notional principal amounts and periods of expiry of the interest rate swap and cap contracts are as follows:

	2012 $'000	2011 $'000
Interest rate swap contracts		
1 year or less	**35,359**	60,000
1 - 2 years	**30,000**	35,439
2 - 3 years	**-**	30,000
4 - 5 years	**40,000**	-
	105,359	125,439
Interest rate cap contract		
1 year or less	**20,000**	-
1 - 2 years	**-**	20,000
	20,000	20,000

The contracts require settlement of net interest receivable or payable each 90 days. The settlement dates coincide with the dates on which interest is payable on the underlying debt. The contracts are settled on a net basis.

The gain or loss from remeasuring the hedging instruments at fair value is deferred in equity in the hedging reserve, to the extent that the hedge is effective, and re-classified into profit and loss when the hedged interest expense is recognised. The ineffective portion is recognised in the income statement immediately.

At balance date for the Group these contracts were net liabilities with fair value of $3,409,000 (2011: $27,000 liability). In the year ended 30 June 2012 there was a loss from the change in fair value of $3,382,000 (2011: $43,000 gain).

11 Derivative financial instruments (continued)

(ii) Forward exchange contracts

It is the policy of the Group to enter into forward foreign exchange contracts to cover all foreign currency exposures other than those effectively covered within the natural hedging pool.

The following table details the forward foreign currency contracts outstanding and ranges of maturity as at reporting date:

	2012	2011	**2012**	2011
	$'000	$'000	**Average exchange rate**	
Sell Australian Dollars				
Buy US Dollars				
0 to 3 months	**59,090**	89,709	**1.0127**	0.9980
3 to 6 months	**9,823**	16,436	**1.0253**	0.9905
6 to 12 months	**1,342**	23,354	**1.0080**	1.0099
Buy Euros				
0 to 3 months	**2,560**	1,214	**0.7701**	0.6964
3 to 6 months	**-**	1,062	**-**	0.6863
6 to 12 months	**-**	356	**-**	0.6825
Buy Great British Pounds				
0 to 3 months	**2,168**	641	**0.6575**	0.6470
6 to 12 months	**775**	-	**0.6330**	-
Buy Canadian Dollars				
0 to 3 months	**122**	-	**0.9976**	-
Buy New Zealand Dollars				
0 to 3 months	**28**	-	**1.2770**	-
Buy Japanese Yen				
0 to 3 months	**16**	-	**80.8600**	-

Amounts disclosed above represent currency bought and sold measured at the contracted rate.

The Group has not classified any of these hedging instruments to be effective hedges.

Group

At balance date these contracts were net liabilities of $241,000 (2011: $7,310,000 liability).

In the year ended 30 June 2012 there was a gain from the change in fair value of the liability of $7,069,000 (2011: loss of $7,086,000)

(b) Risk exposures

Further information about the Group's exposure to credit risk, foreign exchange risk and interest rate risk is provided in note 2.

(a) Impairment tests for goodwill and other intangibles

The impairment testing has been performed on the following cash generating units, Industrial, Mining Products, Rail, Engineered Products.

The recoverable amount of the CGU is determined based on a value-in-use calculations. These calculations use cash flow projections based on financial forecasts approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using a perpetual growth rate of 1.5% to 3.0% pa.

The carrying amounts of goodwill as disclosed in the balance sheet is $15.9m for the Industrial segment, $151.7m for the Mining Products segment, $3.4m for the Rail segment, $83.6m for the Engineered Products segment and $5.5m for the Other segment.

(b) Key assumptions used for value in use calculations

Management determined assumptions on revenue growth, gross margin, overhead level, working capital and capital expenditure have been determined based on past performance and expectations for the future. The weighted average growth rates used are consistent with forecasts included in industry reports.

In performing the value-in-use calculations, the company has applied a post tax discount rate to discount the forecast future attributable post tax cash flows. The post tax discount rate used is an estimated WACC of 7.4% (2011: 11.0%), which would translate into a pre tax discount rate of 10.6% (2011: 15.7%).

For the US operations the post tax discount rate used is an estimated WACC of 11.3% (2011: 11.0%), which would translate into a pre tax discount rate of 17.0% (2011: 16.6%).

Cash outflows for financial years from 30 June 2014 onwards have been adjusted to reflect an estimated increase in energy, supply chain and transport costs arising from the introduction of the Clean Energy Legislation (Clean Energy Act 2011 and supporting legislation) from 1 July 2012. It is unlikely that any of the group's activities will be identified as being emission-intensive trade-exposed (EITE). As a result, the cash inflows do not include any allowance for potential EITE assistance.

14 Intangible assets (continued)

(c) Impairment charge

There were no impairment charges in the period (2011: $10,211,000).

(d) Impact of possible changes in key assumptions

The impairment testing highlights a reasonable buffer between the value-in-use amount and the net book value of assets of the CGU's. Significant changes in the major assumptions would be required to generate an impairment charge.

15 Available for sale financial assets

Non current		
Other payables	**7,438**	6,970
	7,438	6,970

(a) Foreign currency risk

The carrying amounts of the Group's and parent entity's payables are denominated in the following currencies:		
Australian Dollars	**80,329**	76,693
US Dollars	**83,611**	32,118
Chinese Yuan	**33,721**	16,399
Other *	**13,022**	9,154
	210,683	134,364

* Other refers to a basket of currencies (Euros, Great British Pounds, Japanese Yen, New Zealand Dollars, Singapore Dollars, Malaysian Ringgit, South African Rand, Chilean Pesos)

(b) Fair value

Due to the short term nature of these payables, their carrying value is assumed to approximate their fair value.

18 Provisions

	2012 $'000	2011 $'000
Current		
Employee benefits	**47,133**	44,180
Warranty	**1,026**	1,685
	48,159	45,865
Non-current		
Employee benefits	**21,497**	7,475
	21,497	7,475

(a) Warranties

Provision is made for known warranty claims at balance date. Most claims are expected to be settled in the next financial year. Management estimates the provision based on expected costs to be incurred to resolve the warranty claim.

(b) Movements in provisions

Movements in each class of provision during the financial year, other than employee benefits, are set out below:

2012 **Warranty**	**Current** **$'000**	**Non current** **$'000**
Carrying amount at start of year	1,685	-
Additional provisions recognised	7,713	-
FX variations	16	-
Amounts used	(8,388)	-
Carrying amount at end of year	1,026	-

(c) Amounts not expected to be settled within the next 12 months

The current provision for long service leave includes all unconditional entitlements where employees have completed the required period of service and also those where employees are entitled to pro-rata payments in certain circumstances. The entire amount is presented as current, since the Group does not have an unconditional right to defer settlement. However, based on past experience, the Group does not expect all employees to take the full amount of accrued long service leave or require payment within the next 12 months. The following amounts reflect leave that is not to be expected to be taken or paid within the next 12 months.

	2012 $'000	2011 $'000
Long service leave obligation expected to be settled after 12 months	**2,749**	1,532

Malaysian Ringgits	**111**	-
Singapore Dollars	**17**	-
Euros	**173**	-
	549,971	378,578

Further information about the Group's and the parent entity's exposure to foreign exchange risk and interest rate risk and an analysis of the sensitivity of borrowings to interest rate and foreign exchange risk, is provided in note 2.

(d) Assets pledged as security

A Canadian dollar bank loan is secured by a general security arrangement creating a first priority security interest in all personal property of the borrower and a floating charge over all the borrower's real property. There are no drawings under this facility at 30 June 2012.

Lease liabilities are effectively secured as the rights to the leased assets recognised in the financial statements revert to the lessor in the event of default.

US private placement notes		
Total facilities	**196,541**	-
Used at balance date	**196,541**	-
Unused at balance date	**-**	-

Working capital facilities comprise bank overdraft facilities and bank guarantee and letter of credit lines. Bank overdraft facilities comprise a AUD 30,000,000 bilateral overdraft facility, a USD 10,000,000 overdraft facility, a GBP 500,000 multi option facility and a NZD 100,000 overdraft facility.

Bank guarantees and letters of credit facilities comprise a AUD 180,000,000 multicurrency revolving bank guarantee facility, a GBP 500,000 bank guarantee facility, a NZD 50,000 guarantees facility and a CNY 100,000,000 bank guarantee line.

Bank loan facilities comprise the following

(i) a syndicated loan with three and five year revolving bullet term loan facilities with a AUD 425,000,000 multi-currency tranche, a USD 100,000,000 tranche and a GBP 20,000,000 tranche. Current interest rate is 4.78%.

(ii) a USD 30 million revolving credit facility. Current interest rate is 2.56%

(ii) a CAD 5 million revolving loan that is undrawn at 30 June 2012

US Private Placement Notes comprise a 7 year USD 50,000,000 tranche, 10 year USD 100,000,000 tranche and 12 year USD 50,000,000 tranche. Current weighted average interest rate is 4.64%

19 Borrowings (continued)

(f) Fair value

The carrying amounts and fair values of interest bearing liabilities at balance date are:

	2012		2011	
	Carrying amount	**Fair value**	Carrying amount	Fair value
	$'000	**$'000**	$'000	$'000
On balance sheet				
Non traded financial liabilities				
Bank overdrafts	**173**	**173**	9,420	9,420
Bank loans	**341,187**	**341,187**	358,018	358,018
US senior notes	**196,541**	**196,541**	-	-
Other loans	**1,029**	**1,029**	751	751
Lease liabilities	**11,041**	**11,041**	10,389	10,389
	549,971	**549,971**	378,578	378,578

Fair value is inclusive of costs which would be incurred on settlement of a liability.

(i) On balance sheet

The fair value of interest bearing liabilities is based upon market prices where a market exists or by discounting the expected future cash flows by the current interest rates for liabilities with similar risk profiles.

(ii) Off balance sheet

The parent entity and certain controlled entities have potential financial liabilities which may arise from certain contingencies disclosed in note 27. As explained in those notes, no material losses are anticipated in respect of any of those contingencies.

20 Retirement benefit obligations

(a) Superannuation plan

All employees of the Group are entitled to benefit from various superannuation or pension plans on retirement, disability or death. The Group operates two defined benefit retirement plans, one in the United States and the other in Canada. The United States plan at one of our US subsidiaries is closed to new members and covers hourly employees hired before May 10, 1993. The Canadian plan is currently active at one of our Canadian subsidiaries for hourly employees but closed on March 1, 2010 to salaried employees. Benefits for the defined benefit plans are determined on years of credited service.

The Group also operates a number of defined contribution plans which receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

The following sets out details in respect of the defined benefit plans only.

(b) Balance sheet amounts

The amounts recognised in the balance sheet are determined as follows:

	2012	2011
	$'000	$'000
Present value of the defined benefit obligation	**52,110**	24,653
Fair value of defined benefit plan assets	**(35,111)**	(19,616)
Net liability in the balance sheet	**(16,999)**	(5,037)

The Group has no legal obligation to settle this liability with an immediate contribution or additional one off contributions. The Company contributes such amounts as deemed necessary on an actuarial basis to provide the Plan with assets sufficient to meet benefits paid to Plan participants.

(c) Categories of the plan assets

The major categories of plan assets are as follows:

	2012	2011
	$'000	$'000
Cash equivalents	**5,772**	4,120
Fixed interest	**5,675**	1,177
Equity securities	**23,665**	14,319
	35,112	19,616

(d) Reconciliations

	2012	2011
	$'000	$'000
Reconciliation of the present value of the defined benefit obligation, which is partly funded:		
Balance at the beginning of the year	**24,653**	30,643
Current service cost	**870**	265
Interest cost	**2,305**	1,343
Plan amendments	**395**	-
Actuarial (gains) and losses	**7,381**	69
Benefits paid	**(2,120)**	(1,356)
Acquired in business combinations	**17,351**	-
FX Translation	**1,275**	(6,311)
	52,110	24,653
Reconciliation of the fair value of plan assets:		
Balance at the beginning of the year	**19,616**	20,295
Actual return on plan assets	**(2,165)**	4,549
Contributions by Group companies	**3,499**	589
Benefits paid	**(2,120)**	(1,356)
Acquired in business combinations	**15,361**	-
FX Translation	**921**	(4,461)
	35,112	19,616

20 Retirement benefit obligations (continued)

(e) Amounts recognised in profit or loss

The amounts recognised in profit or loss are as follow:

	2012 $'000	2011 $'000
Current service cost	870	265
Interest cost	2,305	1,343
Expected return on plan assets	(2,468)	(1,199)
Recognised net actuarial loss	179	650
Past service cost	106	86
Total included in employee benefits expense	992	1,145

(f) Amounts recognised in other comprehensive income

	2012 $'000	2011 $'000
Actuarial (loss)/gain recognised in the year	(11,924)	3,622
Cumulative actuarial (losses)/gains recognised in other comprehensive income	(15,711)	(4,048)

(g) Principal actuarial assumptions

The principal actuarial assumptions used (expressed as weighted averages) were as follows:

	USA 2012	Canada 2012	USA 2011	Canada 2011
Discount rate	3.75%	4.60%	5.28%	N/A
Expected long-term return on plan assets	7.00%	6.25%	7.00%	N/A
Rate of compensation increase	N/A	N/A	N/A	N/A

The Company selects the expected long-term rates of return on assets in consultation with its investment advisers and actuaries. The rates are intended to reflect the average rate of earnings expected to be earned on the funds invested or to be invested to provide plan benefits, and the plans are assumed to continue in force as long as assets are expected to be invested. In estimating the rates, appropriate consideration is given to historical performance for the major asset classes held or anticipated to be held by the plans and to current forecasts of future rates of return for those asset classes. Cash flow and expenses are taken into consideration to the extent that the expected return would be affected by them. Because assets are held in a qualified trust, anticipated returns are not reduced for taxes.

(h) Employer contributions

Employer contributions to the defined benefit plans are based on recommendations by the plan actuaries. Actuarial assessments are performed annually, and the last such assessments were made during June 2012.

Total employer contributions expected to be paid by Group companies for the year ending 30 June 2013 are $3,193,179.

(i) Historic summary

	2012 $'000	2011 $'000	2010 $'000	2009 $'000
Defined benefit plan obligations	52,110	24,653	30,643	27,599
Plan assets	(35,111)	(19,616)	(20,295)	(20,007)
Surplus / (deficit)	(16,999)	(5,037)	(10,348)	(7,592)

(c) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

(d) Dividend reinvestment plan

The company has established a dividend reinvestment plan under which holders of ordinary shares may elect to have all or part of their dividend entitlements satisfied by the issue of new ordinary shares rather than by being paid in cash. The plan was active during the 2012 year.

(e) Performance Rights Plan

Information relating to the Performance Rights Plan, including details of shares issued under the plan, is set out in note 37.

(f) Non-executive director share acquisition plan

Information relating to the non-exective director share acquisition plan, including details of shares issued under the plan, is set out in note 37.

(g) Share buy-back

There were no share buy-backs in the period.

Balance 1 July	**(564)**	(469)
Acquisition of additional ownership Cast Metal Services Pty Ltd (s	**-**	(95)
Balance 30 June	**(564)**	(564)

(b) Retained profits

	2012 $'000	2011 $'000
Balance 1 July	**168,206**	153,270
Net profit for the year	**100,533**	67,561
Dividends	**(66,480)**	(54,971)
Actuarial (losses) / gains on retirement benefit obligations, net of tax	**(8,364)**	2,346
Balance 30 June	**193,895**	168,206

(c) Nature and purpose of reserves

(i) Hedging reserve - cash flow hedges

The hedging reserve is used to record gains or losses on a hedging instrument in a cash flow hedge that are recognised directly in equity, as described in note 1(n). Amounts are recognised in profit and loss when the associated hedged transaction affects profit and loss.

(ii) Share-based payments reserve

The share based payments reserve is used to recognise the fair value of rights issued but not exercised.

(iii) Foreign currency translation reserve

Exchange differences arising on translation of the foreign controlled entity are taken to the foreign currency translation reserve, as described in note 1(d). The reserve is recognised in profit and loss when the net investment is disposed of.

23 Reserves and retained profits (continued)

(iv) Available-for-sale financial assets reserve

Changes in the fair value and exchange differences arising on translation of investments, such as equities classified as available-for-sale financial assets, are recognised in other comprehensive income as described in note 1(m) and accumulated in a separate reserve within equity. Amounts are reclassified to profit or loss when the associated assets are sold or impaired.

Amounts are reversed when the classification of the investment changes to an associate.

(v) Transactions with non-controlling interests

This reserve is used to record the differences described in note 1(b)(iii) which may arise as a result of transactions with non-controlling interests that do not result in a loss of control.

24 Dividends

	2012 $'000	2011 $'000
(a) Ordinary shares		
Final dividend for the year ended 30 June 2011 of 21.0 cents (2010: 21.0 cents) per fully paid share paid on 19 September 2011 (2010: 13 September 2010)		
Fully franked based on tax paid @ 30%	**33,988**	29,138
Interim dividend for the year ended 30 June 2012 of 19.5 cents (2011: 18.5 cents) per fully paid share paid 19 March 2012 (2011: 21 March 2011)		
Fully franked based on tax paid @ 30%	**32,492**	25,833
Total dividends provided for or paid	**66,480**	54,971
Dividends paid in cash or satisfied by the issue of shares under the dividend reinvestment plan during the years ended 30 June 2011 and 30 June 2012 were as follows:		
Paid in cash	**16,461**	39,833
Satisfied by issue of shares	**50,019**	15,138
	66,480	54,971
(b) Dividends not recognised at year end		
In addition to the above dividends, since year end the directors have recommended the payment of a final dividend of 21.5 cents per fully paid ordinary share, (2011: 21.0 cents) fully franked based on tax paid at 30%. The aggregate amount of the proposed dividend expected to be paid on 4 September 2012 out of retained profits at 30 June 2012, but not recognised as a liability at year end, is	**36,255**	33,988

(c) Franked dividends

The franked portions of the final dividends recommended after 30 June 2012 will be franked out of existing franking credits or out of franking credits arising from the payment of income tax in the year ending 30 June 2013.

	Consolidated		Parent entity	
	2012 **$'000**	2011 $'000	**2012** **$'000**	2011 $'000
Franking credits available for subsequent financial years based on a tax rate of 30% (2011: 30%)	**34,121**	47,544	**34,121**	47,544

The above amounts represent the balance of the franking account as at the end of the financial year, adjusted for:

(a) franking credits that will arise from the payment of the amount of the provision for income tax

(b) franking debits that will arise from the payment of dividends recognised as a liability at the reporting date, and

(c) franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date.

The consolidated amounts include franking credits that would be available to the parent entity if distributable profits of subsidiaries were paid as dividends.

The impact on the franking account of the dividend recommended by the directors since year end, but not recognised as a liability at year end, will be a reduction in the franking account of $15,538,000 (2011: $14,566,000).

25 Key management personnel disclosures

(a) Directors

The following persons were directors of Bradken Limited during the financial year:

(i) Chairman - non-executive

Nick Greiner

(ii) Executive director

Brian Hodges, Managing Director

(iii) Non executive directors

Phil Arnall
Eileen Doyle
Vince O'Rourke
Greg Laurie
Peter Richards

(b) Other key management personnel

The following persons also had authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, during the financial year:

Name	*Position*	*Employer*
Tom Armstrong	Chief Operating Officer - Engineered Products	Bradken Inc.
Bruce Arnott	Chief Financial Officer (until 30 November, 2011)	Bradken Resources Pty Ltd
Andrew Allen	General Manager - Corporate Development (from 1 July 2011)	Bradken Resources Pty Ltd
Stephen Cantwell	General Manager Rail (commenced 1 July 2011)	Bradken Resources Pty Ltd
Steven Perry	Chief Financial Officer (from 1 December 2011)	Bradken Resources Pty Ltd
Enda Sheridan	General Manager - Mining Products & Industrial Products	Bradken Resources Pty Ltd

(c) Key management personnel compensation

	2012	2011
	$	$
Short-term employee benefits	**5,343,806**	5,476,670
Post-employment benefits	**259,726**	198,106
Other long-term benefits	**97,048**	77,302
Share-based payments	**860,488**	959,342
	6,561,068	6,711,420

The company has taken advantage of the relief provided by *Corporations Regulation* 2M.6.04 and has transferred the detailed remuneration disclosures to the directors' report. The relevant information can be found in sections (a) to (d) of the remuneration report on pages 12 to 18.

(d) Equity instrument disclosures relating to key management personnel

(i) Rights provided as remuneration and shares issued on exercise of rights

Details of Performance Rights provided as remuneration and shares issued on the exercise of such Rights, together with terms and conditions of the Rights, can be found in section (d) of the remuneration report on pages 16 to 18.

25 Key management personnel disclosures (continued)

(ii) Rights holdings

The number of Rights over ordinary shares in the company held during the financial year by each director of Bradken Limited and other key management personnel of the Group, including their personally related entities, are set out below.

26 Remuneration of auditors

It is the Group’s policy to employ PricewaterhouseCoopers on assignments additional to their statutory audit duties where PricewaterhouseCoopers’ expertise and experience with the Group are important. These assignments are principally tax advice and due diligence reporting on acquisitions, or where PricewaterhouseCoopers is awarded assignments on a competitive basis. It is the Group’s policy to seek competitive tenders for all major consulting projects. During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non related audit firms:

	2012 $	2011 $
(a) Assurance services		
Audit services		
PricewaterhouseCoopers Australian firm:		
Audit and review of financial reports and other audit work under *Corporations Act 2001*	**444,234**	423,538

27 Contingent liabilities

(a) Contingent Liabilities

The parent entity and Group had contingent liabilities at 30 June 2012 and 2011 in respect of:

Guarantees and letters of credit

	2012	2011
	$'000	$'000
Bank guarantees for contract performance	**177,634**	64,392
Letters of credit	**1,213**	3,035
Total estimated contingent liabilities	**178,847**	67,427

Information about guarantees given by entities within the Group, including the parent entity are described in note 33. No deficiencies of assets exist in any of these companies.

Claims

The Bradken Group has been involved from time to time in various claims and lawsuits incidental to the ordinary course of business, including damages and commercial disputes relating to its products and services. The Group has disclaimed liability and will defend any action flowing from specific claims. It is not practical to estimate the potential effect of these claims but legal advice obtained indicates that any liability that may arise in the unlikely event these claims are successful will not be significant.

No material losses are anticipated in respect of any of the above contingent liabilities.

Austin Engineering

There are no contingent liabilities that are known to Bradken that relate to Austin Engineering.

28 Commitments

(a) Capital commitments

Capital expenditure contracted for at the reporting date but not recognised as liabilities is as follows:

	2012	2011
	$'000	$'000
Land & buildings		
Payable:		
Within one year	**15,430**	17,597
	15,430	17,597
Property, plant and equipment		
Payable:		
Within one year	**25,947**	28,188
Later than one year but not later than five years	**1,043**	-
	26,990	28,188

(b) Lease commitments

Commitments in relation to leases contracted for at the reporting date but not recognised as liabilities, payable:		
Within one year	**7,826**	6,085
Later than one year but not later than five years	**14,853**	11,415
Later than five years	**2,338**	2,289
	25,017	19,789
Representing:		
Non cancellable operating leases	**23,687**	18,381
Future finance charges on finance leases	**1,330**	1,408
	25,017	19,789

28 Commitments (continued)

(i) Operating leases

Operating leases relate to buildings and plant and equipment with lease terms generally between 1 to 5 years with a small amount being payable over greater than 5 years. Leases generally provide the consolidated entity with a right of renewal at which time all terms are renegotiated.

	2012 $'000	2011 $'000
Commitments for minimum lease payments in relation to non cancellable operating leases are payable as follows:		
Within one year	**7,074**	5,380
Later than one year but not later than five years	**14,275**	10,713
Later than five years	**2,338**	2,288
	23,687	18,381

(ii) Finance leases

The Group leases various items of plant and equipment with a carrying amount of $11,186,000 (2011: $10,442,000) under finance leases expiring within three to five years. Under the terms of the leases, the Group has the option to acquire some of the leased assets on expiry of the leases.

	2012 $'000	2011 $'000
Commitments in relation to finance leases are payable as follows:		
Within one year	**5,596**	4,775
Later than one year but not later than five years	**6,751**	7,002
Later than five years	**-**	20
Minimum lease payments	**12,347**	11,797
Future finance charges	**(1,330)**	(1,408)
Total lease liabilities	**11,017**	10,389
Representing lease liabilities:		
Current (note 19)	**4,845**	4,043
Non current (note 19)	**6,196**	6,346
	11,041	10,389

The weighted average interest rate implicit in the leases is 8.40% (2011: 8.73%).

29 Related party transactions

(a) Parent entities

The ultimate parent entity within the Group is Bradken Limited.

(b) Subsidiaries

Interests in subsidiaries are set out in note 31.

(c) Key management personnel

Disclosures relating to key management personnel are set out in note 25.

(d) Terms and conditions

Transactions relating to dividends were on the same conditions that applied to other shareholders.

The terms and conditions of the tax funding agreement are set out in note 6(e).

All other transactions were made on normal commercial terms and conditions and at market rates, except that there are no fixed terms for the repayment of loans between the parties. Outstanding balances are unsecured with no fixed term for repayment.

30 Business combination

(a) Summary of acquisitions and assets and liabilities acquired

Current Period

(i) Australian and Overseas Alloys (AOA)

On 7 July 2011 Bradken Resources Pty Ltd (a 100% subsidiary of Bradken Limited) acquired 100% of the issued shares of Australian and Overseas Alloys Pty Ltd based in Wollongong NSW.

The total consideration for the acquisition amounted to $20.7m, with funding from existing facilities.

The acquired business has been absorbed into the Mining Products business. It is not practical to disclose revenues and net profit after tax to the Group for the full year as if the acquisition had taken place on 1 July 2011. Acquisition costs for the period were $227,000 and are included in administration expenses in profit or loss.

Details of net assets acquired and goodwill are as follows:

	$'000
Purchase consideration	**20,475**
Fair value of net identifiable assets acquired (refer below)	**3,421**
Goodwill	**17,054**

The goodwill is attributable to the profitability of the acquired business and synergies expected to arise after the Group's acquisition of the AOA business. The fair value of assets and liabilities arising from the acquisition are as follows:

	Fair value $'000
Cash	1,170
Property, plant and equipment	942
Inventories	521
Receivables	1,490
Payables	(688)
Provisions for employee entitlements	(83)
Deferred tax assets	20
Current tax liabilities	49
Net identifiable assets acquired	**3,421**

(ii) Norcast

On 11 July 2011 Bradken Operations Pty Ltd (a 100% subsidiary of Bradken Limited) acquired 100% of the issued shares of Norcast Wear Solutions Inc. (Norcast) based in Toronto, Canada from Castle Harlan Inc.

The total consideration for the acquisition amounted to $206.2m and was funded from existing facilities.

The acquired business has been absorbed into the Mining Products business. It is not practical to disclose revenues and net profit after tax to the Group for the full year as if the acquisition had taken place on 1 July 2011. Acquisition costs for the period were $621,000 and are included in administration expenses in profit or loss.

Details of net assets acquired and goodwill are as follows:

	$'000
Purchase consideration	**206,175**
Fair value of net identifiable assets acquired (refer below)	**109,338**
Goodwill	**96,837**

30 Business combination (continued)

The goodwill is attributable to the profitability of the acquired business and synergies expected to arise after the acquisition of the business.

The fair value of assets and liabilities arising from the acquisition are as follows:

	Fair value $'000
Cash and cash equivalents	9,655
Property, plant and equipment	37,247
Acquired intangibles	61,012
Inventories	19,482
Receivables	23,743
Payables	(22,376)
Provisions for employee entitlements	(2,706)
Borrowings	(31)
Current tax liability	630
Deferred tax liability	(17,318)
Net identifiable assets acquired	**109,338**

Prior Period

(i) Other acquisitions in the prior period

Between 28 October 2010 and 19 May 2011 three small acquisitions were made. The assets of Materix Enginerring Pty Ltd and Investment Castings Pty Ltd were acquired on 28 October 2010 and 15 November 2010 respectively. On 19 May 2011 the Bradken Group acquired Wear Protect Systems Pty Ltd and two of it's related companies.

Total consideration for these acquisitions amounted to $29.5m, with funding from existing facilities.

Details of the business combinations were disclosed in Note 29 of the Group's annual financial statements for the year end 30 June 2011.

31 Transactions with non-controlling interests

(a) Transactions with non-controlling interests

	2012 $'000	2011 $'000
Carrying amount of non-controlling interests acquired	-	122
Consideration paid to non-controlling interests	-	(217)
Excess of consideration paid recognised in the transactions with non-controlling interests reserve within equity	-	(95)

32 Investments in associates

		2012 $'000	2011 $'000
(a) Movements in carrying amounts			
Carrying amount at the beginning of the financial year		**-**	-
Cost of investment previously carried as an available for sale financial asset	Note 15	**36,312**	-
Increase in investment by way of share purchases in current period		**671**	-
Share of profits after income tax		**2,045**	-
Dividends received/receivable		**(507)**	-
Carrying amount at the end of the financial year		**38,521**	-

(b) Summarised financial information of associates

The group's share of the results of its principal associates and its aggregated assets (including goodwill) and liabilities are as follows:

	Company's share of:			
	Assets $'000	Liabilities $'000	Revenues $'000	Profit $'000
2012				
Austin Engineering Ltd * (ownership interest 20%)	46,499	24,599	21,943	2,045
	46,499	24,599	21,943	2,045

* Listed entity incorporated in Australia

(c) Fair value of listed investments in associates

	2012 $'000	2011 $'000
Austin Engineering Ltd	**62,306**	-
	62,306	-

33 Deed of cross guarantee

Pursuant to ASIC Class Order 98/1418 (as amended) dated 13 August 1998, the wholly-owned subsidiaries listed below are relieved from the Corporations Act 2001 requirements for preparation, audit, and lodgement of financial reports, and directors' report. It is a condition of the Class Order that the Company and each of the subsidiaries enter into a Deed of Cross Guarantee.

The effect of the Deed is that the Company guarantees to each creditor payment in full of any debt in the event of winding up of any of the subsidiaries under certain provisions of the Corporations Act 2001. If a winding up occurs under other provisions of the Act 2001, the Company will only be liable in the event that after six months any creditor has not been paid in full. The subsidiaries have also given similar guarantees in the event that the Company is wound up.

The companies subject to the Deed are:

- Bradken Limited
- Bradken SPV Pty Limited
- Bradken Resources Pty Limited
- Bradken Mining SPV Pty Limited
- Bradken Holdings Pty Limited
- Bradken Operations Pty Limited
- Bradken Finance Pty Limited
- Cast Metal Services Pty Limited
- Bradken Leasing Pty Limited (formerly Geoff Brown and Co. Pty Limited)

The above companies represent a 'Closed Group' for the purposes of the Class Order, and as there are no other parties to the Deed of Cross Guarantee that are controlled by Bradken Limited, they also represent the 'Extended Closed Group'.

(a) Consolidated income statement, statement of comprehensive income and summary of movements in consolidated retained earnings

Set out below is a consolidated income statement and a summary of movements in consolidated retained profits for the year ended 30 June 2012 of the Closed Group outlined above.

	2012	2011
	$'000	$'000
Income statement		
Revenue from continuing operations	**640,899**	766,478
Cost of sales	**(472,797)**	(583,135)
Gross profit	**168,102**	183,343
Other income	**4,407**	-
Selling and technical expenses	**(40,858)**	(39,352)
Administration expenses	**(39,579)**	(49,893)
Finance costs	**(26,861)**	(28,616)
Share of net profit of associates accounted for using the equity method	**2,826**	-

Increase / (decrease) in provision for income taxes payable	**(18,701)**	9,220
Increase / (decrease) in provision for deferred income tax	**8,780**	(3,294)
Increase / (decrease) in other provisions	**15,974**	7,184
Net cash inflow from operating activities	**121,241**	32,377

35 Non cash investing and financing activities

	2012 $'000	2011 $'000
Acquisition of plant and equipment by means of finance leases	**6,133**	3,966
	6,133	3,966

Dividends satisfied by the issue of shares under the dividend reinvestment plan are shown in note 24 and rights and shares issued to employees under the Bradken Limited Performance Rights Plan and the Bradken Limited Employee Share Plan for no cash consideration are shown in note 37.

Ordinary shares issued for acquisition of entities for no cash consideration are shown in note 22.

36 Earnings per share

	2012 Cents	2011 Cents
(a) Basic earnings per share		
Profit from continuing operations attributable to the ordinary equity holders of the company	**60.5**	47.6
Profit attributable to the ordinary equity holders of the company	**60.5**	47.6
(b) Diluted earnings per share		
Profit from continuing operations attributable to the ordinary equity holders of the company	**59.8**	47.1
Profit attributable to the ordinary equity holders of the company	**59.8**	47.1

(c) Reconciliations of earnings used in calculating earnings per share

	2012 $'000	2011 $'000
Basic earnings per share		
Profit from continuing operations	**100,533**	67,612
Profit from continuing operations attributable to non-controlling interests	**-**	(51)
Profit from continuing operations attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**100,533**	67,561
Profit attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**100,533**	67,561
Diluted earnings per share		
Profit attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**100,533**	67,561
Profit attributable to the ordinary equity holders of the company used in calculating diluted earnings per share	**100,533**	67,561

(d) Weighted average number of shares used as the denominator

	2012 Number	2011 Number
Weighted average number of ordinary shares used as the denominator in calculating basic earnings per share	**166,176,563**	141,860,442
Adjustments for calculation of diluted earnings per share:		
Rights	**1,814,155**	1,580,597
Weighted average number of ordinary shares and potential ordinary shares used as the denominator in calculating diluted earnings per share	**167,990,718**	143,441,039

(e) Information concerning the classification of securities

(i) Rights

Rights granted to employees under the Bradken Performance Rights Plan are considered to be potential ordinary shares and have been included in the determination of diluted earnings per share to the extent to which they are dilutive. The Rights have not been included in the determination of basic earnings per share. Details relating to the Rights are set out in note 35.

37 Share based payments

(a) Non-Executive Director Share Acquisition Plan

The Company has a Non-Executive Director Share Acquisition Plan (NED Plan). All current and future Non-Executive Directors are encouraged to have a percentage of their annual Directors' fees provided in shares under the NED Plan. Shares will be allocated to the Non-Executive Directors under the NED Plan and must be held for a specified period.

Non-executive directors may elect to have a percentage of their annual fixed directors' fees provided in shares under the Non-Executive Director Share Acquisition Plan (NED plan). Participation in the plan is voluntary.

Non-Executive Directors will not be able to sell or otherwise dispose of the shares until the earliest of 10 years after acquisition or the Non-Executive Director ceasing to be a director of the Company (except in very limited circumstances). During this period the shares will be subject to a holding lock.

At 30 June 2012 there are no Directors participating in the NED plan.

(b) Performance Rights Plan

The Performance Rights Plan (PRP) is the Company's long-term incentive (LTI) scheme for selected key executives. The Managing Director recommends the list of executives who are entitled to participate in this scheme and seeks approval of the list from the Human Resources Committee which is then ratified by the Board. Under the PRP, eligible executives may be granted Performance Rights (each being a right to acquire a share, subject to the satisfaction of exercise conditions) on terms and conditions determined by the Board and as documented in the PRP Plan rules and Trust Deed. If the exercise conditions are satisfied, the Performance Rights may be exercised and the shares issued and delivered to the executive. The Board may impose restrictions on the disposal of the shares and implement procedures to enforce the restrictions.

The rules of the PRP provide that the Board may determine a price that is payable to exercise a Performance Right, or that no amount is payable by the executive upon exercise of the Right.

Shares will immediately be allocated on exercise of a Performance Right. Performance Rights may only be exercised following satisfaction of performance conditions, unless the Board determines an event (such as a takeover bid) has occurred.

All grants of Performance Rights issued so far have been at no cost to participating executives. In relation to future grants, the Board may impose performance conditions that reflect the Company's business plans, targets, budgets and its performance relative to peer groups of companies.

If any additional persons become entitled to participate in the PRP and their participation requires approval under Chapter 10 of the Listing Rules, they will not participate in the PRP until shareholder approval is received pursuant to Listing Rule 10.14. Mr Brian Hodges, being the only Executive Director of the Company, is the only Director entitled to participate in the PRP. If any other Director is to participate in the PRP, the Company would seek shareholder approval as required by the Listing Rules.

The performance conditions are based on the relative total shareholder return ("TSR") of the Company measured against other companies in the ASX Small Cap Industrials index during the performance period. TSR measures the total return on investment of a share taking into account capital appreciation, capital return and dividend income.

37 Share based payments (continued)

(b) Performance Rights Plan (continued)

In assessing whether the performance hurdles have been met, the Human Resources Committee receives independent data from an independent investment bank which provides both Bradken's growth from previous financial years and that of the ASX Small Industrials Index. The Company's performance against the hurdle is then determined with each company in the ASX Small Industrials Index and Bradken being ranked in order of growth in results from previous financial years. The Company's percentile ranking is determined by aggregating the weighting within the ASX Small Industrials Index (based on market capitalisation) of each company ranked below Bradken. The method of assessment was chosen as it provides the Committee with an objective means of measuring the Company's performance against its peer group.

Dividends, changes in share price, and return of capital are included in the TSR calculation which is one of the performance criteria assessed for the LTI. The specific TSR performance conditions in relation to the grants are:

Target	Percentage of Rights available in given year to vest
The Company's TSR does not meet performance of the median company in ASX Small Cap	0
The Company's TSR equals or exceeds performance of the median company in ASX Small Cap	50
The Company's TSR ranked in third quartile of companies in ASX Small Cap	Pro rata between 50 and 100
The Company's TSR ranked in fourth quartile of companies in ASX Small Cap	100

New entrants to the scheme are provided with a transition to the 3 year plan.

Summary of Rights issues in the plan:

Grant date	Number of Rights	Fair value per Right	Financial periods in which Rights may vest
31 October 2007	11,682	$6.87	30 June 2010 / 2011
31 October 2007	259,691	$8.45	30 June 2011
17 October 2008	25,025	$2.84	30 June 2010 / 2011
17 October 2008	15,621	$4.11	30 June 2011
17 October 2008	340,655	$4.82	30 June 2012
29 October 2009	29,831	$2.50	30 June 2011
29 October 2009	69,401	$3.71	30 June 2011 / 2012
29 October 2009	665,216	$4.41	30 June 2013
5 November 2010	34,537	$5.13	30 June 2012 / 2013
5 November 2010	26,832	$5.13	30 June 2013
5 November 2010	550,078	$6.12	30 June 2014
7 October 2011	24,304	$4.76	30 June 2013 / 2015
7 October 2011	24,311	$4.76	30 June 2014 / 2015
7 October 2011	17,877	$4.01	30 June 2013 / 2014
7 October 2011	577,235	$4.76	30 June 2015

There were no other Rights eligible for issuance under the scheme at 30 June 2012.

37 Share based payments (continued)

The movements in Rights issues in the plan are as follows:

Grant Date	Fair value at grant date	Balance at start of the year Number	Granted during the year Number	Exercised during the year Number	Expired during the year Number	Balance at end of the year Number	Exercisable at end of the year Number
2012							
18 November 2005	2.35	10,344	-	-	-	10,344	10,344

Grant Date		Fair value at grant date	Balance at start of the year Number	Granted during the year Number	Exercised during the year Number	Expired during the year Number	Balance at end of the year Number	Exercisable at end of the year Number
Weighted average price			4.96	6.02	6.17	7.56	5.04	3.98

The expiry dates of all grants shown in the tables above are 10 years from the test date.

The weighted average share price at the date of exercise of Rights exercised regularly during the year ended 30 June 2012 was $6.98 (2011: $8.10). The weighted average remaining contractual life of share Rights outstanding at the end of the period was 1.52 years (2011: 1.44 years).

Fair value of Rights granted

The assessed fair value at grant date of Rights granted during the year ended 30 June 2012 was between $4.01 and $4.76 per right (2011: between $5.13 and $6.12). The fair value at grant date is determined using a Black Scholes option pricing model that takes into account the exercise price, the term of the Right, the vesting and performance criteria, the impact of dilution, the non tradeable nature of the Right, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the Right.

The following factors and assumptions have been used in determining the fair value of Rights for the issues granted:

Grant Date	Expiry Date	Fair value per Right	Exercise price	Price of shares on grant date	Estimated volatility	Risk free interest rate	Dividend yield
18/11/2005	Ten years from Test Date	2.35	-	4.15	90%	5.35%	0.00%
30/10/2006	Ten years from Test Date	2.80	-	6.00	90%	5.73%	0.00%

7/10/2011	Final test date	4.01	-	6.80	121%	4.24%	0.00%
7/10/2011	Final test date	4.76	-	6.80	121%	4.24%	0.00%

The expected price volatility is based on the historic volatility (based on the remaining life of the options), adjusted for any expected changes to future volatility due to publicly available information.

(c) Expenses arising from share based payment transactions

Total expenses arising from share based payment transactions recognised during the period as part of employee benefit expense were as follows:

	2012 $'000	2011 $'000
Rights issued under Performance Rights Plan	**2,064**	2,906
	2,064	2,906

38 Parent entity financial information

(a) Summary financial information

The individual financial statements for the parent entity show the following aggregate amounts:

	2012 $'000	2011 $'000
Balance sheet		
Total assets	**787,185**	724,129
Current liabilities	**-**	11,822
Total liabilities	**-**	11,822
Shareholders' equity		
Issued capital	**704,184**	654,865
Share-based payments reserve	**8,014**	5,975
Retained earnings	**74,987**	51,467
	787,185	712,307
Profit or loss for the year	**90,000**	75,000
Total comprehensive income	**90,000**	75,000

(b) Guarantees entered into by the parent entity

The parent entity is a guarantor under the Bradken Group - Common Terms Deed Poll and unconditionally and irrevocably guarantees payments due in connection with any financing facilities owed by any Group company.

(c) Contingent liabilities of the parent entity

The parent entity did not have any contingent liabilities as at 30 June 2012 or 30 June 2011.

(d) Contractual commitments for the acquisition of property, plant or equipment

The parent entity did not have any contractual commitments for the acquisition of property, plant or equipment at 30 June 2012 or 30 June 2011.

39 Events occurring after balance sheet date

No material events have occurred that affect the operations of the Group from the end of the financial period ended 30 June 2012 to the date of issue of this report.

In the directors' opinion:

(a) the financial statements and notes set out on pages 25 to 90 are in accordance with the Corporations Act 2001, including

  (i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

  (ii) giving a true and fair view of the consolidated entity's financial position as at 30 June 2012 and of it's performance for the financial year ended on that date; and

(b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable, and

(c) at the date of this declaration, there are reasonable grounds to believe that the members of the extended closed group identified in Note 33 will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee described in Note 33.

Note 1(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The directors have been given the declarations by the chief executive officer and chief financial officer required by section 295A of the *Corporations Act 2001*.

This declaration is made in accordance with a resolution of the directors:

Nick Greiner
Chairman

Brian Hodges
Managing Director

Independent auditor's report to the members of Bradken Limited

Report on the financial report

We have audited the accompanying financial report of Bradken Limited (the company), which comprises the balance sheet as at 30 June 2012, and the income statement, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration for the Bradken Group (the consolidated entity). The consolidated entity comprises the company and the entities it controlled at the year's end or from time to time during the financial year.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1(a), the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

Our procedures include reading the other information in the Annual Report to determine whether it contains any material inconsistencies with the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

Auditor's opinion

In our opinion:

(a) the financial report of Bradken Limited is in accordance with the *Corporations Act 2001* , including:

  (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2012 and of its performance for the year ended on that date; and

  (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001* ; and

(b) the financial report and notes also comply with International Financial Reporting Standards as disclosed in Note 1(a).

Report on the Remuneration Report

We have audited the remuneration report included in pages 12 to 20 of the directors' report for the year ended 30 June 2012. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001* . Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

Matters relating to the electronic presentation of the reviewed financial report

This auditor's report relates to the financial report and remuneration report of Bradken Limited (the company) for the year ended 30 June 2012 included on Bradken Limited web site. The company's directors are responsible for the integrity of the Bradken Limited web site. We have not been engaged to report on the integrity of this web site. The auditor's report refers only to the financial report and remuneration report named above. It does not provide an opinion on any other information which may have been hyperlinked to/from the financial report or the remuneration report. If users of this report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the audited financial report and remuneration report to confirm the information included in the audited financial report and remuneration report presented on this web site.

	Notes	Half-year 2012 $'000	Half-year 2011 $'000
Cash flows from operating activities			
Receipts from customers (inclusive of goods and services tax)		**853,651**	735,290
Payments to suppliers and employees (inclusive of goods and services tax)		**(753,843)**	(679,364)
Transaction costs relating to acquisition of subsidiary and acquisition of business		**(16)**	(920)
		99,792	55,006
Interest received		**77**	89
Interest paid		**(14,614)**	(16,185)
Income taxes paid		**(14,408)**	(28,179)
Net cash inflow / (outflow) from operating activities		**70,847**	10,731
Cash flows from investing activities			
Payments for purchase of businesses, net of cash acquired		**(2,461)**	(367)
Payments for purchase of subsidiary net of cash acquired		**-**	(189,869)
Payment for property, plant and equipment		**(66,678)**	(57,327)
Payments for design costs		**(3,428)**	(3,580)
Proceeds from sale of available for sale financial assets		**-**	681
Proceeds from sale of property, plant and equipment		**18,688**	97
Dividends received		**1,521**	1,218
Net cash inflow / (outflow) from investing activities		**(52,358)**	(249,147)
Cash flows from financing activities			
Proceeds from issue of shares		**-**	19,853
Transaction costs from issue of shares		**-**	(167)
Proceeds from borrowings		**72,894**	314,398
Repayment of borrowings		**(55,927)**	(184,233)
Payments of finance lease liabilities		**(5,519)**	(4,136)
Dividends paid to company's shareholders		**(32,446)**	(19,853)
Net cash inflow / (outflow) from financing activities		**(20,998)**	125,862
Net increase / (decrease) in cash and cash equivalents		**(2,509)**	(112,554)
Cash and cash equivalents at the beginning of the half-year		**101,719**	143,056
Effects of exchange rate changes on cash and cash equivalents		**(643)**	(1,814)
Cash and cash equivalents at the end of the half-year		**98,567**	28,688

The above consolidated statement of cash flows should be read in conjunction with the accompanying notes.

1 Basis of preparation of half-year financial report

This general purpose consolidated financial report for the interim half year reporting period ended 31 December 2012 has been prepared in accordance with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Act 2001.

This interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2012 and any public announcements made by Bradken Limited during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

(a) Impact of standards issued but not yet applied by the entity

In December 2009, the AASB issued AASB 9 Financial Instruments which addresses the classification and measurement of financial assets and may affect the group's accounting for its financial assets. The standard is not applicable until 1 January 2015 but is available for early adoption. The Group is yet to assess its full impact. The Group has not yet decided when to adopt AASB 9.

2 Segment information

(a) Description of segments

Operating segments are reported in a manner that is generally consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Managing Director.

Segment revenues, expenses, assets and liabilities are those that are directly attributable to a segment. Segment assets include all assets used by a segment and consist primarily of receivables, inventories and property, plant and equipment, net of related provisions.

Segment revenues, expenses and results include transfers between segments. Sales of scrap between controlled entities are made on an "arm's-length" basis and are eliminated on consolidation. All other transfers are made at variable cost and are eliminated on consolidation.

Mining Products consists of design, supply and service of wear components for all types of earth moving in the Mining and Quarry industries. Mineral Processing consists of design supply and service of mill liner components in the Mineral Processing industries. Rail is a package provider of Freight Rollingstock products and services including freight wagons, bogies, drawgear, inventory management, spare and renewed parts and the maintenance and refurbishment of rollingstock. Engineered Products, based in the North America, is a supplier of cast parts to the Energy, Power, Cement, Industrial and Rail Transport industries specialising in large (greater than 4,500 kg) highly engineered steel castings.

Responsibility for the North American based Resource business previously included as part of the Engineered Products segment has been moved to the Mining Products segment. The Mineral Processing business previously reporting within the Mining Products business has been removed from that segment following the acquisition and consolidation of the Canadian based Norcast business in 2011 and is now reported as a separate segment. Management has concluded that the results of the previously reported Industrial segment is no longer required to be separately disclosed. The segment does not meet any quantitative thresholds required by AASB 8 and is considered by management to be of decreasing relevance as the Group's operations continue to expand. Management has concluded that the results of this operation are better included in the "all other segments" column. Comparative disclosures have also been amended to reflect these changes.

Had the Industrial segment been separately disclosed revenue would have been $50,218,000 (2011: $49,147,000) and gross margin would have been $16,511,000 (2011: $15,880,000).

2 Segment information (continued)

(b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the half-year ended 31 December 2012 is as follows:

	Mining Products	Mineral Processing	Rail	Engineered Products	All other segments	Total
	$'000	$'000	$'000	$'000	$'000	$'000
Half-year 2012						
Total segment revenue	188,938	130,462	135,393	221,904	106,514	783,211
Inter-segment revenue	(18,590)	(20,350)	(3,486)	(16,998)	(43,271)	(102,695)
Revenue from external customers	170,348	110,112	131,907	204,906	63,243	680,516
Gross margin	59,267	40,514	17,509	70,088	26,339	213,717
Half-year 2011						
Total segment revenue	160,060	132,192	171,605	200,222	107,546	771,625
Inter-segment revenue	(9,871)	(15,943)	(6,946)	(12,904)	(42,811)	(88,475)
Revenue from external customers	150,189	116,249	164,659	187,318	64,735	683,150
Gross margin	50,454	39,477	28,054	62,023	24,990	204,998
Total segment assets						
At 31 December 2012	380,636	312,183	88,485	316,898	120,955	1,219,157
At 30 June 2012 *	334,958	333,164	172,161	327,312	119,088	1,286,683

* As part of the restatement of the comparative disclosures at 30 June 2012, $31.477m of Corporate assets were removed from the Engineered Products segment hence the total segments assets disclosed varies to that reported at 30 June 2012 by that amount.

Corporate assets are not disclosed separately within the half year financial statements.

The Managing Director assesses the performance of each operating segment based on a measure of gross margin. Gross margin is considered the most relevant measure of individual segment results as manufacturing plants all make product for the various segments and transfer product at cost. This measurement basis excludes the allocation of manufacturing variances and overheads from individual manufacturing plants as any allocation would be arbitrarily based.

A reconciliation of standard gross margin to operating profit before income tax is provided as follows:

	Half-year	
	2012	2011
	$'000	$'000
Gross margin	**213,717**	204,998
Fixed manufacturing overheads and other cost of sale adjustments	**(70,197)**	(69,356)
Other income	**4,311**	7,573
Selling and technical expenses	**(31,079)**	(28,463)
Administration expenses	**(39,272)**	(37,327)
Finance costs	**(15,768)**	(16,286)
Share of net profit of associates accounted for using the equity method	**5,692**	-
Profit before income tax	**67,404**	61,139

The amounts provided to the Managing Director with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset.

3 Dividends

	Half-year 2012 $'000	Half-year 2011 $'000
Ordinary shares		
Dividends provided for or paid during the half-year	**36,255**	33,988

Dividends not recognised at the end of the half-year

In addition to the above dividends, since the end of the half-year the directors have declared the payment of an interim dividend of 20.0 cents per fully paid ordinary share (2011 - 19.5 cents), fully franked based on tax paid at 30%. The aggregate amount of the dividend to be paid on 14 March 2013 out of retained profits at 31 December 2012, but not recognised as a liability at the end of the half-year, is	**33,848**	32,492

4 Equity securities issued

	Half-year		Half-year	
	2012	2011	**2012**	2011
	Shares	Shares	**$'000**	$'000
Issues of ordinary shares during the half-year				
Exercise of rights issued under the Bradken Limited Performance Rights Plan - shares issued	**-**	188,673	**-**	-
Dividend reinvestment plan issues	**611,286**	1,940,948	**3,809**	14,136
Shares issued in relation to underwriting of dividend	**-**	2,657,773	**-**	19,852
Adjustments to Institutional Placement costs June 2011	**-**	-	**18**	(700)
	611,286	4,787,394	**3,827**	33,288

5 Contingencies

(a) Contingent liabilities

A claim in the Federal Court for damages was lodged by Norcast S.ar.l (a related entity of Pala Investments) following the purchase of Norcast Wear Solutions (NWS), Inc by Bradken from Castle Harlan in July 2012. Norcast S.ar.l. is alleging that Bradken engaged in anticompetitive and misleading and deceptive conduct during the bidding and sale process for NWS. The case has been heard in the Federal Court and a decision is expected to be handed down in the first quarter of 2013. Bradken has vigorously defended the claim. At this stage legal advice obtained to date supports Bradken's current position and as such no provision has been recognised in the financial statements.

Directors' declaration

In the directors' opinion:

(a) the financial statements and notes set out on pages 3 to 10 are in accordance with the Corporations Act 2001, including:

(i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

(ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and of its performance, for the half-year ended on that date; and

(b) there are reasonable grounds to believe that Bradken Limited will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of directors.

Independent auditor's review report to the members of Bradken Limited

Report on the half year financial report

We have reviewed the accompanying half-year financial report of Bradken Limited, which comprises the balance sheet as at 31 December 2012, and the income statement, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, selected explanatory notes and the directors' declaration for the Bradken Group (the consolidated entity). The consolidated entity comprises both Bradken Limited (the company) and the entities it controlled during that half-year.

Directors' responsibility for the half year financial report

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* , in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001* . As the auditor of Bradken Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001* .

PricewaterhouseCoopers, ABN 52 780 433 757

T: +61 2 4925 1100, F: +61 2 4925 1199, www.pwc.com.au

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Bradken Limited is not in accordance with the *Corporations Act 2001* including:

(a) giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and of its performance for the half-year ended on that date; and
(b) complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001* .

Matters relating to the electronic presentation of the reviewed financial report

This review report relates to the financial report of the Company for the half-year 31 December 2012 included on Bradken Limited's web site. The company's directors are responsible for the integrity of the Bradken Limited web site. We have not been engaged to report on the integrity of this web site. The review report refers only to the statements named above. It does not provide an opinion on any other information which may have been hyperlinked to/from these statements. If users of this report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the reviewed financial report to confirm the information included in the reviewed financial report presented on this web site.

Directors' report

Your directors present their report on the consolidated entity (referred to hereafter as the group) consisting of Bradken Limited and the entities it controlled at the end of, or during, the year ended 30 June 2013.

This report has been divided into the following sections:

A. General information
B. Corporate governance statement
C. Operational and financial review
D. Remuneration report
E. Other information

A. General information

Directors

The following persons were directors of Bradken Limited during the whole of the financial year and up to the date of this report unless otherwise noted:

Nick Greiner	Brian Hodges	Greg Laurie
Phil Arnall	Eileen Doyle	Peter Richards

Vince O'Rourke was a director from the beginning of the financial year until his retirement on 23 October 2012.

Principal activities

During the year the principal activities of the Group consisted of:

- supply and service of wear components for mining and earthmoving equipment
- supply of equipment and consumables to the mineral processing, quarrying and power markets
- supply of cast, machined and fabricated components and highly engineered steel castings to the energy, industrial, oil & gas and rail transport industries
- manufacture and maintenance of freight rollingstock products
- supply of foundry consumables to the foundry and steelmaking industries

There were no major changes in the nature of the activities of the Group during the period.

Dividends - Bradken Limited

Dividends paid to members during the financial year were as follows:

	2013 **$'000**	2012 $'000
Final dividend for the year ended 30 June 2012 of 21.5 cents (2011: 21.0 cents) per fully paid share paid on 4 September 2012 (2011: 19 September 2011)	**36,255**	33,988
Interim dividend for the year ended 30 June 2013 of 20.0 cents (2012: 19.5 cents) per fully paid share paid 14 March 2013 (2012: 19 March 2012)	**33,848**	32,492
	70,103	66,480

In addition to the above dividends, since the end of the financial year the directors have declared the payment of a fully franked final dividend of $30,463,000 (18.0 cents per fully paid ordinary share) to be paid on 13 September 2013 out of retained profits at 30 June 2013.

Significant changes in the state of affairs

There are no significant changes in the state of affairs of the Group during the financial year.

Matters subsequent to the end of the financial year

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial years.

A. General information (continued)

Likely developments and expected results of operations

Additional comments on expected results of certain operations of the group are included in this annual report under the Operating and Financial Review section on pages 13 to 15.

Further disclosure on likely developments in the operations of the Group and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the Group.

Environmental regulation

The Group's operations are subject to significant environmental regulation under both Commonwealth and State legislation governing, amongst other things, noise, air emissions, the use, handling, and disposal of hazardous substances and waste. The Group has devoted and will continue to devote resources to environmental compliance and management in each of the jurisdictions in which it operates.

An environmental management system is in place which complies with the international standard ISO14001 in major sites in Australia, the UK and New Zealand, while the US and China operate under local legal compliance requirements equivalent to ISO14001. It is Group policy to be environmentally proactive and to adopt practices that minimise adverse environmental impacts and to communicate and provide appropriate feedback on the Group's environmental performance. In accordance with the Group's environmental policy, procedures and goals have been established aimed at ensuring:

- all manufacturing and engineering sites have developed, implemented, and maintain environmental management systems meeting the requirements of ISO14001
- the environmental management systems are integrated with the existing business systems
- zero notifiable incidents and zero justified neighbourhood complaints
- continuing reduction of industrial waste disposal costs by continual improvement of working practices, such as cleaner production and improved recycling.

Based upon the results of inquiries made, the Board is not aware of any significant breaches during the period covered by this report nor does it consider the Group is subject to any presently known material environmental liabilities. Under agreements with local authorities capital expenditure is required at some Australian sites to reduce dust and odour emissions.

Greenhouse gas and energy data reporting requirements

In Australia, the energy related requirements have corporate thresholds and Bradken Group companies are subject to the reporting requirements of the *Energy Efficiency Opportunities Act 2006* and the *National Greenhouse and Energy Reporting Act 2007* and site thresholds for the *National Pollutant Inventory*. Bradken site emissions are below the carbon tax criteria so Bradken is not liable to purchase carbon permits directly and pays the carbon tax via increased energy prices.

In Australia, Bradken is currently carrying out energy assessments in compliance with the *Energy Efficiency Opportunities Act 2006.* This includes the identification, investigation and evaluation of energy saving opportunities. Another requirement is to complete an Energy Mass Balance. By benchmarking energy and raw material consumption efficiency across the foundries, a range of cost saving opportunities have been identified. Bradken is required to report publicly (via the Bradken website) on the assessments undertaken, including what action the Group intends to take as a result. The Group continues to meet its obligations under this Act.

In Australia, the *National Greenhouse and Energy Reporting Act 2007* requires the group to report its annual Australia wide greenhouse gas emissions and energy use from large and small facilities. The data is collected at the end of the financial year and entered into the government website as required. Bradken continues to meet its obligations under this act.

The United Kingdom sites signed the *UK Climate Change Agreements* taking effect from 1st April 2013. This requires the foundries to reduce energy intensity by 3.4% by 2020 with reporting periods every 2 years from December 2014. There are possible changes with the UK carbon tax system that may exempt the metals sector. Bradken continues to meet its obligations under this act.

In the United States, Bradken Atchison will be reporting its GHG emissions as it exceeds the US Greenhouse Gas Reporting Rule threshold of 25,000 tpa CO_2e. Other US sites do not exceed this threshold. Bradken Atchison is also participating in the US Dept of Energy Better Plants program with a pledge to reduce energy intensity by 25% over 10 years.

None of the Bradken Canadian facilities exceed the 50,000 t CO_2e threshold for reporting under the Canadian GHGRP program.

There are no mandatory GHG or energy reporting requirements that apply to Bradken operations in China, Malaysia or New Zealand.

A. General information (continued)

Information on directors

Nick Greiner, AC, B.Ec., MBA. *Independent Non-Executive Chairman.* Age 66.

Experience and expertise

Chairman of Bradken Limited since 2004. Extensive experience in corporate roles. Formerly, Premier and Treasurer of New South Wales.

Other current directorships

Chairman of QBE Australia, Chairman of Nuance Global Traders, Deputy Chairman of Champ Private Equity and a director of various private groups.

Former directorships in the last three years

Chairman of Infrastructure NSW and Chairman of Citigroup Australia.

Special responsibilities

Member of Human Resources Committee.

Interest in shares

371,272 ordinary shares in Bradken Limited.

Brian Hodges, B.Chem.Eng. (Hons). *Managing Director.* Age 59.

Experience and expertise

Managing Director of the Bradken business since 2001. Formerly General Manager of the Bradken business from 1997. Extensive management and engineering experience in Australia for BHP, Australian National Industries and the Smorgon Steel Group.

Other current directorships

None.

Former directorships in the last three years

None

Special responsibilities

Managing Director.

Interest in shares and rights

2,316,630 ordinary shares in Bradken Limited.
305,774 rights over ordinary shares in Bradken

Phil Arnall, B.Com. *Independent Non-Executive Director.* Age 68.

Experience and expertise

Director of Bradken Limited since 2004. Extensive experience in mining and steel industries in management positions. Held senior management positions with Smorgon Steel Group and Australian National Industries.

Other current directorships

Non-executive director of AJ Lucas Limited.

Former directorships in the last three years

Chairman of Ludowici Limited and non-executive director of Macquarie Generation.

Special responsibilities

Member of Audit and Risk Committee
Member of Human Resources Committee.

Interest in shares

387,040 ordinary shares in Bradken Limited.

A. General information (continued)

Eileen Doyle, PhD *Independent Non-Executive Director.* Age 58.

Experience and expertise

Director of Bradken Limited since 1 July 2011. Over 30 years of experience in the materials and water industries in Australia, including senior executive roles in BHP, Hunter Water and CSR. A founding Director of OneSteel Limited and board member for 10 years and Chairman of Port Waratah Coal Services Pty Ltd for 11 years.

Other current directorships

Non-executive director of Boral Group Limited and GPT Group Limited and director of various private groups and government bodies.

Former directorships in the last three years

Director of Onesteel Limited, Ross Human Directions Limited and Steel and Tube Limited (NZ).

Special responsibilities

Member of Audit and Risk Committee
Chairman of Human Resources Committee.

Interest in shares

17,650 ordinary shares in Bradken Limited.

Greg Laurie, B.Com. *Independent Non-Executive Director.* Age 71.

Experience and expertise

Director of Bradken Limited since 2005. Extensive experience in manufacturing and distribution industries. Formerly Finance Director of Crane Group Limited and CFO of Rheem Australia Limited.

Other current directorships

Independent non-executive director of Nick Scali Limited and various private groups.

Former directorships in the last three years

None.

Special responsibilities

Chairman of Audit and Risk Committee.

Interest in shares

44,667 ordinary shares in Bradken Limited.

Peter Richards, B.Com. *Independent Non-Executive Director.* Age 54.

Experience and expertise

Appointed Director of Bradken Limited in 2009. Over 30 years of business and international experience with global companies including BP plc, Wesfarmers Ltd and most recently as CEO of Dyno Nobel Limited.

Other current directorships

Non-executive director of NSL Consolidated Limited, Emeco Holdings Limited and Sedgman Limited.

Former directorships in the last three years

Chairman and non-executive director of Minbos Resources Limited and Kangaroo Resources Limited and non-executive director of Norfolk Group Limited.

Special responsibilities

Member of Audit and Risk Committee.

Interest in shares

42,099 ordinary shares in Bradken Limited.

A. General information (continued)

Company Secretary

The Company Secretary is Mr Steven Perry, B.Com, MBA, CPA. Mr Perry joined the Group in 1990 and progressed through a number of financial roles most recently spending nine years as Commercial Manager Mining Products. As Company Secretary and Chief Financial Officer (CFO) Mr Perry is responsible for finance, treasury, taxation, investor relations, investments, audit and insurance. The Joint Company Secretary is Mr David Chesterfield, MBA.

Meetings of directors

The number of meetings of the Company's board of directors and of each Board committee held during the year ended 30 June 2013, and the number of meetings attended by each director were:

B. Corporate governance statement

Principle 1 - Lay solid foundations for management and oversight

Bradken Limited (the Company) and the Board are committed to achieving and demonstrating the highest standards of corporate governance. The Board continues to review the framework and practices to ensure they meet the interests of shareholders. The Company and its controlled entities together are referred to as the Group in this statement.

A description of the Group’s main corporate governance practices is set out below. All these practices, unless otherwise stated, were in place for the entire year. They comply with the ASX Corporate Governance Principles and Recommendations.

The responsibilities of the Board include:

- providing strategic guidance to the Group including contributing to the development of and approving the corporate strategy
- reviewing and approving the business plans, the annual budget and financial plans including available resources and capital expenditure initiatives
- overseeing and monitoring:
  - organisational performance and the achievement of the Group's strategic goals and objectives
  - compliance with the Company's Code of Conduct (see page 10)
  - progress of major capital expenditures and other significant corporate projects including any acquisitions or divestments
- monitoring financial performance including approval of the annual and half-year financial reports and liaison with the Group's auditors
- appointment, performance assessment and, if necessary, removal of the Managing Director
- ratifying the appointment and/or removal and contributing to the performance assessment of the members of the senior management team including the Chief Financial Officer (CFO) / Company Secretary
- ensuring there are effective management processes in place and approving major corporate initiatives
- enhancing and protecting the reputation of the organisation
- overseeing the operation of the Group's system for compliance and risk management.

Day to day management of the Group's affairs and the implementation of the corporate strategy and policy initiatives are formally delegated by the Board to the Managing Director and senior executives.

Principle 2 - Structure the Board to add value

The Board operates in accordance with broad principles set out in its charter which is available from the corporate governance information section of the Company's website at www.bradken.com. The charter details the Board's composition and responsibilities.

Board composition

The charter states:

- the Board comprise both executive and non-executive directors with a majority of non-executive directors, and one executive director being the Managing Director / Chief Executive Officer. Non-executive directors bring a fresh perspective to the Board’s consideration of strategic, risk and performance matters
- in recognition of the importance of independent views and the Board's role in supervising the activities of management, the Chairman must be an independent non-executive director, the majority of the Board must be independent of management and all directors are required to exercise independent judgement and review and constructively challenge the performance of management
- the Chairman is elected by the full Board and is required to meet regularly with the Managing Director
- the Company is to maintain a mix of directors from different backgrounds with complementary skills and experience both nationally and internationally with a majority of directors having knowledge of the Group or related industries and/or financial expertise
- the Board is required to undertake an annual Board performance review and consider the appropriate mix of skills required by the Board to maximise its effectiveness and its contribution to the Group.

The Board seeks to ensure that:

- at any point in time, its membership represents an appropriate balance between directors with experience and knowledge of the Group and directors with an external or fresh perspective
- the size of the Board is conducive to effective discussion and efficient decision-making.

B. Corporate governance (continued)

Directors' independence

The Board has adopted specific principles in relation to directors' independence. These state that when determining independence, a director must be a non-executive and the Board should consider whether the director:

- holds less than 5% of the voting shares of the Company and is not an officer of, or otherwise associated, directly or indirectly, with a shareholder of more than 5% of the voting shares of the Company
- has not within the last three years been employed in an executive capacity by the Company or another Group member
- within the last three years has not been a principal or employee of a material professional adviser or a material consultant to the Company or another Group member
- is not a material supplier to or customer of the Company or another Group member, or an officer of or otherwise associated, directly or indirectly, with a material supplier or customer
- has no material contractual relationship with the Company or another Group member other than as a director of the Company
- is free from any interest and any business or other relationship which could, or could reasonably be perceived to, materially interfere with the director's ability to act in the best interests of the Group
- has not served on the Board of the Group for a period which could materially interfere with the Director's ability to act in the best interests of the Group.

The Board reviews the independence of each Director in light of interests disclosed to the Board from time to time.

Board members

Details of the members of the Board, their experience, expertise, qualifications, term of office and independent status are set out in the directors' report under the heading "Information on directors" in Section A. As at the date of this report the Board of the Company comprises five non-executive directors, all of whom are considered independent under the principles set out above, and the Managing Director.

Non-executive directors

The five non-executive directors met twice during the year, in scheduled sessions without the presence of management, to discuss the operation of the Board and a range of other matters. Relevant matters arising from these meetings were shared with the full Board.

Term of office

The Board Charter recommends a maximum period of 12 years service as a director, subject to re-elections every year by rotation such that 1/3 of the directors are subject to re-election each year.

The Company's Constitution specifies the tenure of the Managing Director on the Board is limited to that of his Executive Office.

Chairman and chief executive officer (CEO)

The Chairman is responsible for leading the Board, ensuring directors are properly briefed in all matters relevant to their role and responsibilities, facilitating Board discussions and managing the Board's relationship with the Company's senior executives. In accepting the position, the Chairman has acknowledged that it will require a significant time commitment and has confirmed that other positions will not hinder his effective performance in the role of Chairman.

The Board charter specifies that these are separate roles to be undertaken by separate people. The CEO is responsible for implementing Group strategies and policies.

Induction

The induction provided to new directors and senior managers enables them to actively participate in Board decision-making as soon as possible. It ensures that they have a full understanding of the Company's financial position, strategies, operations, culture, values and risk management policies. It also explains the respective rights, duties, responsibilities, interaction and roles of the Board and senior executives, the role of the Board committees and the Company's meeting arrangements.

B. Corporate governance (continued)

Commitment

The Board has established a framework for the management of the Group including a system of internal control, a business risk management process and the establishment of appropriate ethical standards.

The full Board currently holds nine scheduled meetings each year, plus strategy meetings and any extraordinary meetings at such other times as may be necessary to address any specific matters that may arise.

The agenda for meetings is prepared in conjunction with the Chairman, Managing Director and Company Secretary. Standing items include the Managing Director's report, financial reports, strategic matters, governance and compliance. Submissions are circulated in advance. Executives are regularly involved in Board discussions and directors have other opportunities, including visits to business operations, for contact with a wider group of employees.

The commitments of non-executive directors are considered by the Board prior to the directors' appointment to the Board of the Company and are reviewed each year as part of the annual performance assessment.

Prior to appointment or being submitted for re-election, each non-executive director is required to specifically acknowledge that they have and will continue to have the time to discharge their responsibilities to the Company.

Conflict of interest

Directors must keep the Board advised, on an ongoing basis, of any interest that could potentially conflict with those of the Group.

Where the Board believes that a significant conflict exists for a director on a Board matter, the director concerned does not receive the relevant Board papers and is not present at the meeting whilst the item is considered.

There were no director related entity transactions with companies of the Group.

Independent professional advice

Directors and Board committees have the right, in connection with their duties and responsibilities, to seek independent professional advice from a suitably qualified adviser at the Group's expense. Prior approval from the Chairman is required, but this will not be unreasonably withheld.

Performance assessment

The Board undertakes an annual self assessment of its collective performance, the performance of the Chairman and of its committees. Management are invited to contribute to this appraisal process. The results and any action plans are documented. The most recent assessment was undertaken in July 2012.

The Chairman meets privately with each director to discuss this assessment and their individual situation.

Board committees

The Board has established a number of committees to assist in the execution of its duties and to allow detailed consideration of complex issues. Current committees of the Board are the Human Resources Committee and the Audit and Risk Committee. Each is comprised entirely of non-executive directors. The committee structure and membership is reviewed on an annual basis and a policy of rotation of committee members applies as considered appropriate by the Chairman.

Each committee has its own written charter setting out its role and responsibilities, composition, structure, membership requirements and the manner in which the committee is to operate. All of these charters are reviewed on an annual basis and are available on the Company website. All matters determined by the committees are submitted to the full Board as recommendations for Board decisions.

Minutes of committee meetings are tabled at the subsequent Board meeting. Additional requirements for specific reporting by the committees to the Board are addressed in the charter of the individual committees.

Bradken Limited does not have a fully constituted Nominations Committee, however, as and when required the full Board participates as the Nominations Committee in order to fulfill its corporate governance responsibilities in regard to:

- Board appointments and performance;
- Directors' induction program;
- Committee membership;
- Other relevant matters.

The full Board undertakes the functions of a Nominations Committee as described in the ASX Corporate Governance Council's Principles of Good Corporate Governance and Best Practice Recommendations.

Audit and Risk Committee

The Company also has an Audit and Risk Committee, see page 11 for details.

B. Corporate governance (continued)

Principle 3 - Promote ethical and responsible decision making

Code of conduct

The Company has developed a statement of values and a Code of Conduct (the Code) which has been fully endorsed by the Board and applies to all directors and employees. The Code is regularly reviewed and updated as necessary to ensure it reflects the highest standards of behaviour and professionalism and the practices necessary to maintain confidence in the Group's integrity and to take into account legal obligations and reasonable expectations of the Company's stakeholders.

All directors, managers and employees are expected to act with the utmost integrity, objectivity and in compliance with the letter and spirit of the law and Group policies, striving at all times to enhance the reputation and performance of the Group. Every employee has a nominated supervisor to whom they may refer any issues arising from their employment.

The Group has advised each director, manager and employee that they must comply with the Group's Whistleblower Policy. The Policy covers the following:

- encouraging employees to report any behaviour that may be dishonest, fraudulent, corrupt, illegal, in breach of Commonwealth or State Legislation, unethical, improper, unsafe or any other behaviour that may cause financial or non-financial loss to the Group or would be otherwise detrimental to the interests of the Group
- ensuring that the Group complies with its obligations to protect the reporter of any such behaviour.

The Company also has a Securities Trading Policy which details the insider trading provisions of the Corporations Act 2001. In summary, trading of the Company's shares is restricted to a period of six weeks after the release of the Group's half-year and annual results to the Australian Stock Exchange (ASX), the Annual General Meeting of the Company, at any time a prospectus or similar disclosure document has been lodged with ASIC and is open for acceptances and at such other times as the Board of Directors declare trading permissible. These windows are not available to individuals that possess inside information.

A copy of the Code, the Whistleblower Policy and the Securities Trading Policy are available on the Company's website.

Diversity and equality policy

The Group recognises the value contributed to the organisation by employing people with varying skills, cultural backgrounds, ethnicity and experience. The Group has established an Equal Opportunity and Diversity Policy, a copy of which can be accessed from the Company's website.

The Group believes its diverse workforce is the key to its continued growth, improved productivity and performance. The Group actively values and embraces the diversity of its employees and is committed to creating an inclusive workplace where everyone is treated equally and fairly, and where discrimination, harassment and inequity are not tolerated.

While the Group is committed to fostering diversity at all levels, gender diversity has been and continues to be a priority for the Group. The Board has not established any specific measurable objectives in terms of percentage of women employed, however, the Group's objective is to increase gender diversity throughout all levels of the organisation. This proactive approach begins at the recruitment phase but also is an important consideration in internal promotion, training and development activities.

The following statistics are provided outlining the percentage of women employed throughout the Group at the end of the current and previous financial year end.

	2013		2012	
	Number	%	Number	%
Number of women on the board	1	17%	1	14%
Number of women in senior management positions *	3	4%	2	3%
Number of women in all positions	406	8%	403	7%

* The percentage is expressed as the proportion of available positions in the described category.

Promote ethical and responsible decision making

The Group recognises the importance of integrating the company's values and Code of conduct into a transparent social responsibility culture of compliance to meet the expectations of its stakeholders, which is described in the Company's Corporate Social Responsibility Policy.

The policy sets out the social principles, responsibilities, guidelines and features of the Company's social responsibility policy in compliance with Australian Standard AS8003 “Corporate Social Responsibility”.

Management recognise that our social, economic and environmental responsibilities to our stakeholders are integral to our business and the Company aims to demonstrate these responsibilities through our actions and within our corporate policies.

B. Corporate governance (continued)

Principle 4 - Safeguard integrity in financial reporting

Audit and Risk Committee

It is the Board's responsibility to ensure that an effective internal control framework exists within the Group. This includes internal controls to deal with both the effectiveness and efficiency of significant business processes, the safeguarding of assets, the maintenance of proper accounting records and the reliability of financial information.

The Board has an Audit and Risk Committee which operates under a charter approved by the Board. The Board has delegated overseeing the establishment and maintenance of a framework of internal control, risk management and ethical standards to the Audit and Risk Committee. The committee also provides the Board with additional assurance regarding the reliability of financial information for inclusion in the financial reports. All members of the Audit and Risk Committee are non-executive directors. The charter under which the Audit and Risk Committee operates is available on the Company website.

The Audit and Risk Committee meets with the external and internal auditors on a regular basis. It reviews its performance and effectiveness periodically and reviews its charter and makes recommendations to the Board on its charter annually.

The Audit and Risk Committee has authority, within the scope of its responsibilities, to seek any information it requires from any employee or external party.

The members of the Audit and Risk Committee during the year were:

Greg Laurie (Chairman)

Phil Arnall

Eileen Doyle

Peter Richards

Details of these directors attendance at Committee meetings are set out in the directors' report on page 6.

External auditors

The Group policy is to appoint external auditors who clearly demonstrate quality and independence. The performance of the external auditor is reviewed annually and applications for tender of external audit services are requested as deemed appropriate, taking into consideration assessment of performance, existing value and tender costs. PricewaterhouseCoopers was appointed as the external auditor in 2005. It is PricewaterhouseCoopers policy to rotate audit engagement partners on listed companies at least every five years.

An analysis of fees paid to the external auditors, including a break-down of fees for non-audit services, is provided in the directors' report and in note 26 to the financial statements. It is the policy of the external auditors to provide an annual declaration of their independence to the Audit and Risk Committee.

The external auditor is required to attend the annual general meeting and be available to answer shareholder questions about the conduct of the audit and the preparation and content of the audit report.

Principle 5 and 6 - Make timely and balanced disclosures and respect the rights of shareholders

Continuous disclosure and shareholder communication

The Board provides shareholders with information using a comprehensive Continuous Disclosure Policy which focuses on continuous disclosure of any information concerning the Group that a reasonable person would expect to have a material effect on the price of the Company's securities. The Company's procedures also include arrangements the company has in place to promote communication with shareholders and encourage effective participation at general meetings. Full details of the Continuous Disclosure Policy is available on the Company's website.

The Company Secretary has been nominated as the person responsible for communications with the Australian Securities Exchange (ASX). This role includes responsibility for ensuring compliance with the continuous disclosure requirements in the ASX Listing Rules.

All shareholders can elect to receive a copy of the Group's annual report. In addition the Company seeks to provide opportunities for shareholders to participate through electronic means. All Company announcements, media briefings, details of Company meetings and press releases are available on the Company's website. All of the above information is made available on the Company's website within one day of public release, and is emailed to all shareholders who lodge their email contact details with the Company. Information on lodging email addresses with the Company is available on the Company's website.

B. Corporate governance (continued)

Principle 7 - Recognise and manage risk

Risk assessment and management

Bradken is committed to managing risk to protect it's people, the environment, Group assets, the community and it's reputation. Bradken operates an Enterprise Risk Management process consistent with international standards to manage it's business risk. This risk-based system helps the Group operate effectively and efficiently, achieve business objectives, ensure reliable reporting and comply with applicable laws and regulations.

The Board implements this policy by overseeing the establishment and implementation of the risk management system through the Audit and Risk Committee, reviewing the effectiveness of the Group's implementation of that system.

A copy of the Group's Risk Management Policy is available on the Company website.

Not all aspects of risk management can be formalised and Bradken places considerable reliance on the skill, experience and judgement of its people to make risk based decisions within the policy framework, and to communicate openly on all risk related matters.

Corporate reporting

The Managing Director and the CFO have made the following certifications to the Board:

- that the Group’s financial reports are complete and present a true and fair view, in all material respects, of the financial condition and operational results of the Company and Group and are in accordance with relevant accounting standards
- that the above statement is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board and that the Group's risk management and internal compliance and control is operating efficiently and effectively in all material respects.

Principle 8 - Remunerate fairly and responsibly

Human Resources Committee

The members of the Human Resources Committee during the year were:

Eileen Doyle (Chairman)

Nick Greiner

Phil Arnall

Vince O'Rourke - retired 23 October 2012

Details of these directors attendance at Committee meetings are set out in the directors' report on page 6.

The Human Resources Committee operates in accordance with its charter which is available on the Company website. The Human Resource Committee advises the Board on remuneration and incentive policies and practices generally, and makes specific recommendations on remuneration packages and other terms of employment for the executive directors, other senior executives and non-executive directors.

The committee also assumes responsibility for overseeing management succession planning, including the implementation of appropriate executive development programmes and ensuring adequate arrangements are in place, so that appropriate candidates are recruited for later promotion to senior positions. This includes overseeing processes in relation to meeting diversity objectives for executives and staff below board level.

Further information on directors’ and executives’ remuneration, including principles used to determine remuneration, is set out in the Directors’ report under the heading ‘Remuneration Report’.

C. Review of operations

Operating and Financial Review

	2013	2012	Change
NPAT	$66.9m	$100.5m	(33%)
EBITDA	$183.6m	$220.4m	(17%)
Underlying NPAT	$96.1m	$100.5m	(4%)
Underlying EBITDA	$214.0m	$219.2m	(2%)
Underlying EBITDA margin	16.2%	15.1%	
Sales revenue	$1,313.1m	$1,451.3m	(10%)
Operating cash flow	$217.6m	$121.2m	80%
Earnings per share	39.6 cents	60.5 cents	(35%)
Dividends per share	38.0 cents	41.0 cents	(7%)

The Group recorded a net profit after tax for the year ended 30 June 2013 of $66.9 million, however this included a one-off pre-tax charge of $30.4 million relating to the Federal Court proceedings associated with the Norcast acquisition. While statutory EBITDA was $183.6 million, underlying EBITDA before the costs resulting from the Federal Court action was $214.0 million, a decrease of only 2% on the previous year. This result was achieved in a quietening market, but with sales down only 10% to $1,313.1 million, demonstrating the strength of the Group's consumable products focus and the defensibility of its margins.

Operating cash flow before capital expenditure for the year was $217.6 million, an improvement of 80% over the previous period. The improvement was driven by working capital reductions of $79 million and reductions in tax payments, however the results included $26.7 million of cash costs relating to the Federal Court proceedings. Net capital expenditure was $96.7 million for the year, down from $131.9 million in the previous year.

Net debt levels decreased to $425.3 million from $442.8 in the previous year. The reduction in debt was achieved after allowing for the Federal Court action costs of $26.7 million and the depreciation in the AUD against the USD during May and June which resulted in an additional $28.8 million on translation of the Group's USD denominated debt. The Group's gearing remains conservative at 2.0 times (net debt / EBITDA) and unchanged from the gearing level at the end of the previous year.

In December 2012, the Group successfully commissioned a world class 20,000 tonne foundry in Xuzhou, China with the foundry producing resources-related consumable products during the start-up production phase. This facility will be a cornerstone for future growth.

Mining Products Division

The Mining Products Division supplies consumable wear products to the global mining industry. Products include ground engaging tools (GET), Crawler System products for hydraulic mining excavators and electric rope shovels and wear solutions for mining fixed plant equipment including plate, block, rubber and ceramic products. These are produced in the Group's manufacturing facilities in Australia, China, Canada, the USA and the UK. The Division also produces wear pipe products and fabrications for customers in the northern oil sands region of Alberta, Canada and has foundry capacity in the United Kingdom to serve the European markets.

A fall in commodity prices during the year led to a slowdown in capital and maintenance spending along with destocking in Australia and global markets. Despite difficult market conditions, sales revenue of $413m was 4% higher than the prior year and the gross margin increased from 33.1% to 34.1%.

Ground Engaging Tools global sales increased due to the uptake of the new range of GET products in both Australia and overseas markets. The increase reflected the strong market penetration of the new product range as well as the fact that although capital expenditure by miners slowed, production volumes were up on the previous year, which increased the demand for the Division's consumable mining products.

Crawler Systems sales increased, attributable to higher sales to Original Equipment Manufacturers' ("OEM") customers as well as growth in direct aftermarket sales in Australia and Europe. The lower prices for mining commodities saw a reduction in capital expenditure on new mining equipment that adversely impacted order intake and sales of Crawler System products particularly in the second half.

The Fixed Plant business sales revenue was down with Australian sales reduced 14% due to lower capital project activity in the Western Australia iron ore market and cutbacks in spending by major mining companies.

The Canadian Oil & Gas business sales were up 6% over F12 with a second half rebound in wear pipe sales and more project work from the oil sands secured in 2H13.

C. Review of operations (continued)

Operating and Financial Review (continued)

Mineral Processing Division

The Mineral Processing Division is a global manufacturer of custom designed products for grinding mills, crushing and conveying equipment for the hard rock mining industry and operates a metal recycling business that purchases and processes steel feed for the Group's foundries. The Division's customers include the world's largest mining companies and some OEMs, with products supplied to mining operations on five continents and over 30 countries. Products are manufactured in the Division's manufacturing facilities in Australia, Malaysia and Canada as well as obtained from other Group facilities in Australia, China, the USA and the UK. The Division is the market leader in the manufacture of grinding mill liners.

Sales of $250 million were in line with the previous year with gross margin increasing from 35.4% to 37.7%. The margin gains were achieved through excellent operational performance at the Mont Joli, Canada facility, the introduction of new differentiated products into target markets and the rationalisation of many products into the optimal plant of manufacture. This resulted in a strong improvement in the quality of earnings with the additional margin more than offsetting a moderate increase in overheads that included an increase in regional selling and product development resources in line with plans to continue growing the business in the world's major mining regions.

Engineered Products Division

The Engineered Products Division is a leading North American manufacturer of large, highly-engineered steel castings and differentiated consumable products to the mining, resource, transportation, and energy industries. The Division is a leader in the North American market for highly engineered steel castings greater than 4,500 kilograms.

Overall, sales of $309 million were down approximately 11% on the prior financial year. This net change resulted from a significant second half decline due to deteriorating market conditions. The Division responded to the reduction in demand in the second half by realigning workforce levels and reducing fixed costs and discretionary expenses to align with the current period of slower economic activity.

Annual sales in the Industrial Product's business, the largest portion of the Engineered Products Division, were impacted by a softening of demand in the mining and rail locomotive sectors, with sales declining for the year compared to the previous year. This was driven primarily by a reduction in second half sales from the comparable period in F12 after experiencing an increase in the first half. This reduced customer demand and excess industry capacity will continue to create a very competitive marketplace in the near term.

The Energy business' annual sales declined in the first half but rebounded in the second half of the financial year. The market remains highly competitive with pressure on pricing of products and services.

Rail Division

The Rail Division's products are used by customers in Australia to move more than 320 million tonnes of product annually. This represents more than one third of Australia's total mineral production. The Division is renowned for the supply of high quality rollingstock equipment and parts for mining, agricultural and general freight markets. At present, about 85% of the Division's sales are in rollingstock manufactured for the Australian market, while the remaining 15% is represented by parts sales into the same market. During F13, the Rail Division produced 1,070 rail cars in the Xuzhou manufacturing facility in China. This represented a 48% volume reduction on the prior year and is reflective of the general down-turn in the resources sector.

Overall, sales of $223 million were down approximately 33% on the prior financial year. The Division's margins have improved over the last 12 months with a return to more traditional iron ore and coal wagon manufacture. Notwithstanding the lower volumes, profitability significantly improved as a consequence of the disciplined and deliberate execution of the Division's "Contain and Consolidate" business plan.

Business Strategies and Outlook

The difficult market conditions are expected to continue into 2014 particularly in the first half of the year. The main business strategy in these difficult conditions is to reduce both operating and overhead costs in line with the reduced activity levels and to reduce working capital and capital expenditure to maximise cash flow.

Management will continue to pursue opportunities to grow the existing business both organically and through acquisitions at the appropriate time, all the while maintaining a solid balance sheet and strategic focus consistent with the Group' s global business strategies.

C. Review of operations (continued)

Operating and Financial Review (continued)

Business Strategies and Outlook (continued)

The Group's business strategy remains focused on growing the mining consumables business by designing, manufacturing and selling differentiated consumable wear products throughout the major global mining regions. A number of discrete strategies will be implemented to aid this focus including:

- expanding our sales presence direct to mining customers throughout the world;
- new product design and innovation;
- further reducing manufacturing costs; and
- global distribution network to include targeted stock holdings in key mining regions to support direct sales.

Business Risks

The Group maintains a proactive Risk Management System, which identifies potential risks by site, business, region and function, by actively pursuing the minimisation of identified business interruption risks. While each of the Group's Divisions has its own discrete business risks, as a group, the Group's Executive Management Team identify high level business risks with the potential of having a material impact on the financial prospects of the Group.

A major risk to the Group is the high cost of manufacturing within Australia. The local environment suffers from high labour costs, high energy costs and regional scale manufacture, which may over time adversely affect the viability of manufacturing in Australia.

A further high level business risk with the potential of having a material impact on the financial prospects of the Group is the general economic and business conditions, both globally and domestically, particularly an extended pull-back in mining investment due to a slowdown in China, having the potential to produce significant fluctuations in demand for the Group's products and an impact on earnings potential.

The Group is continuing to address and mitigate these risks by globalising its manufacturing footprint and by growing its capabilities offshore. Most recently, stage one of the Group's new world-class manufacturing facility in Xuzhou, China was commissioned, which will substantially reduce the Group's average cost of production, particularly for mining and mineral processing products.

D. Remuneration report

The remuneration report is set out under the following main headings:

(a) Introduction
(b) Principles used to determine the nature and amount of remuneration
(c) Key management personnel remuneration disclosure
(d) Service agreements
(e) Share-based compensation
(f) Additional information

(a) *Introduction*

The information provided under headings (b) to (e) includes the remuneration disclosures that are required under the Accounting Standard AASB 124 *Related Party Disclosures*. These disclosures have been transferred from the financial report and have been audited. Information provided in this remuneration report has been audited as required by section 308(3C) of the *Corporations Act 2001*.

This report details the Bradken Group's remuneration objectives, practices and outcomes for Non-executive Directors, the Managing Director / Chief Executive Officer and other key management personnel of the Group for the year to 30 June 2013.

Consistent with the Company's normal process, external consultants AON Hewitt were again contracted to provide remuneration advice to the Human Resources Committee. In the 2013 financial year AON Hewitt provided remuneration recommendations as defined in section 9B of the Corporations Act 2001 and was paid $25,000 for these services (2012: $26,500). AON Hewitt have confirmed the above recommendations were made free from undue influence by members of the Group's key management

There were no changes to the remuneration framework in the current period compared to the previous period.

Role of the Human Resources Committee

The Human Resources Committee is a committee of the Board. It is primarily responsible for making recommendations to the Board on:

- non-executive director fees
- remuneration levels of the managing director, executive directors and other key management personnel
- the over-arching executive remuneration framework and incentive plans.

Its objective is to ensure that remuneration policies and structures are fair and competitive and aligned with the long-term interests of the company. In doing this, the Human Resources Committee seeks advice from independent remuneration consultants.

The Corporate Governance Statement provides further information on the role of this committee.

Voting and comments made at the company's 2012 Annual General Meeting

Bradken Limited received more than 97% of "yes" votes on its remuneration report for the 2012 Financial year.

The company did not receive any specific feedback at the AGM. No other correspondence was received throughout the year pertaining to the remuneration report.

(b) *Principles used to determine the nature and amount of remuneration*

The objective of the Group's executive reward framework is to ensure reward for performance whilst maintaining competitiveness with the market and appropriateness for the results delivered. The framework aligns executive reward with achievement of strategic objectives and the creation of value for shareholders, and conforms with market best practice for delivery of reward. The Board ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency
- capital management.

Alignment to shareholders' interests:

- has economic profit as a core component of plan design
- focuses on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant return on assets as well as focusing the executive on key non-financial drivers of value
- attracts and retains high calibre executives.

Alignment to participants' interests:

- rewards capability and experience
- reflects competitive reward for contribution to growth in shareholder wealth
- provides a clear structure for earning rewards
- provides recognition for contribution.

D. Remuneration report (continued)

(b) *Principles used to determine the nature and amount of remuneration (continued)*

Performance linked remuneration includes both short-term and long-term incentives and is designed to reward executive directors and senior executives for meeting or exceeding their financial and personal objectives. The short-term incentive (STI) is an “at risk” bonus provided in the form of cash, while the long-term incentive (LTI) is provided as rights over ordinary shares of Bradken Limited under the rules of the Performance Rights Plan (PRP).

No key management personnel has entered into any arrangement to limit the exposure or risk related to their remuneration.

The following arrangements were made to ensure that the remuneration recommendations were free from undue influence:

- AON Hewitt was engaged by, and reported directly to, the chair of the Human Resources Committee. The agreement for the provision of remuneration consulting services was executed by the chair of the Human Resources Committee under delegated authority on behalf of the board;
- The report containing the remuneration recommendations was provided by AON Hewitt directly to the chair of the Human Resources Committee; and
- AON Hewitt was permitted to speak to management throughout the engagement to understand Group processes, practices and other business issues and obtain management perspectives. However, AON Hewitt was not permitted to provide any member of management with a copy of their draft or final report that contained the remuneration recommendations.

As a consequence, the Board is satisfied that the recommendations were made free from undue influence from any members of the key management personnel.

In addition to providing remuneration recommendations, AON Hewitt also provided advice on other aspects of the remuneration of the Group’s employees.

Non-executive directors

Fees and payments to non-executive directors reflect the demands which are made on, and the responsibilities of, the directors. Non-executive directors' fees and payments are reviewed annually by the Board. The Board also uses the advice of independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market.

(i) Directors' fees

The current base remuneration was last reviewed with effect from 1 October 2011. Total aggregate remuneration for all non-executive directors, last voted upon by shareholders in October 2011, is not to exceed $1,200,000 per annum and actual amounts payable to individual directors are determined after considering advice from external advisors and with reference to fees paid to other non-executive directors of comparable companies.

Directors’ base fees are presently $130,000 (2012: $130,000) per annum. The Chairman's fee is currently $280,000 (2012: $280,000) per annum. Non-executive directors do not receive performance related remuneration. Directors’ fees cover all main board activities and membership of any Board committee.

In recognition of the prevailing external economic market conditions, the Chairman, the Non-Executive Directors and the Chief Executive Officer have decided to voluntarily forego fee and salary increases in the period to June 30 2014.

(ii) Non-Executive Director Share Acquisition Plan

Non-executive directors may elect to have a percentage of their annual fixed directors’ fees provided in shares under the Non-Executive Director Share Acquisition Plan (NED plan). Participation in the NED plan is voluntary.

Executive pay

In addition to base pay, at risk short-term salary and benefits including superannuation , key management personnel are invited to participate in a long term (3 year) incentive scheme. The combination of these comprise total remuneration.

(i) Base pay and benefits

Structured as a total employment cost package which may be delivered as a combination of cash and prescribed non-financial benefits at the executives' discretion it includes contributions to employee superannuation funds.

Executives are offered a competitive base pay that comprises the fixed component of pay and rewards. External remuneration consultants provide analysis and advice to ensure base pay is set to reflect the market for a comparable role. Base pay for senior executives is reviewed annually to ensure the executive's pay is competitive with the market and reflects the individual's performance. An executive's pay is also reviewed on promotion.

Each year the Board sets the job goals for the Managing Director. The senior executives job goals are set and managed by the Managing Director. The job goals are focused on the growth of the business and generally include measures relating to the Group, the relevant business unit, and the individual, and include financial, people, customer, strategy and risk measures. The measures are chosen to directly align the individual's reward to the goals of the Group and to its strategy and performance.

D. Remuneration report (continued)

(b) *Principles used to determine the nature and amount of remuneration (continued)*

(ii) At risk short term salary

At the end of the financial year an assessment is made of the actual performance of the Group, the relevant business unit and the individual targets set at the beginning of the financial year. A percentage of the at risk short term salary is awarded depending on performance. At risk short term salary is not awarded where there is no year on year growth for the financial year.

The at risk short term salary is paid wholly on actual improvement in profitability. The value of the at risk short term salary payable is set within a range of 30% to 60% of the executive's total cash base remuneration depending on the position held by the executive. In calculating the at risk short term salary the growth in year on year NPAT is calculated and where applicable the EBITDA of the executive's business. To achieve the full at risk short term salary value a growth of 15% on the previous year profitability must be achieved.

The Human Resources Committee recommends the at risk short term salary to be paid to the Managing Director for approval by the Board. For other senior executives the Managing Director recommends the at risk short term salary to be paid, and seeks approval from the Human Resources Committee.

(iii) Long-term incentives - Performance Rights Plan

The Group's long-term incentive, the Performance Rights Plan, focuses on rewarding for long term growth and the retention of key people. Information on the Performance Rights Plan is set out on page 21.

The long-term incentive (LTI) is paid wholly on relative total shareholder return (TSR) performance over a 3 year period. The initial rights are provided based on a set range of 30% to 50% of the executive's total cash base remuneration depending on the position held by the executive. No rights vest to the executive if Bradken's TSR over a 3 year period is below 50% of the ASX Small Ordinaries Index and no re-testing occurs.

(c) *Key management personnel remuneration disclosure*

The key management personnel of Bradken Limited and the Group are the directors of Bradken Limited (see page 2), the Chief Financial Officer and the General Managers and Chief Operating Officer of the Bradken business units who report directly to the Managing Director. The executives are:

- Andrew Allen - *General Manager Corporate Development*
- Tom Armstrong - *Chief Operating Officer Engineered Products*
- Stephen Cantwell - *General Manager Rail*
- Steven Perry - *CFO and Company Secretary*
- Enda Sheridan - Executive *General Manager Mining Products*
- Brad Ward - *Executive General Manager Mineral Processing (appointed 1 July 2012)*

Details of the remuneration of the directors and the key management personnel (as defined in AASB 124 Related Party Disclosures) of Bradken Limited and the Bradken Limited Group are set out in the following tables.

The values in column (A) of each table below are remuneration as defined in Australian Accounting Standard AASB2 *Share-based payment*. This consists of share rights. These values are calculated based on a Black Scholes valuation of the rights in the year in which they are granted and are amortised over the performance period to which they relate, which is typically a 3 year period. The degree to which performance conditions will be met is unclear until the end of the relevant performance periods. There is no certainty performance conditions will be met and there is therefore no direct correlation of these values to the remuneration received by the executive in any period.

The values in column (B) of each table below shows the value of the rights that were granted to the executive for the performance periods 1 July 2010 to 30 June 2013 (2013) and 1 July 2009 to 30 June 2012 (2012).

For the performance period 1 July 2010 to 30 June 2013 the performance conditions were not met and no rights are eligible to vest for that period.

*** Steven Perry was appointed Chief Financial Officer on 1 December 2011. Before this appointment he was Senior Commercial Manager of the Group's Mining business. The amounts shown above include all Mr Perry's remuneration during the reporting period. Amounts received as Chief Financial Officer were Cash Salary $192,661, Bonus $51,971, Superannuation $17,339, Long Service Leave $5,780 and Share Rights $22,585.

D. Remuneration report (continued)

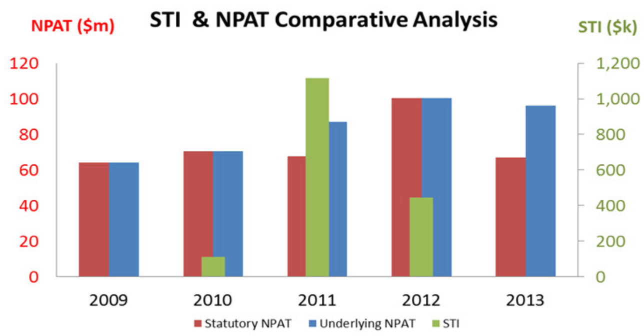
Relationship between remuneration and Bradken Limited's performance

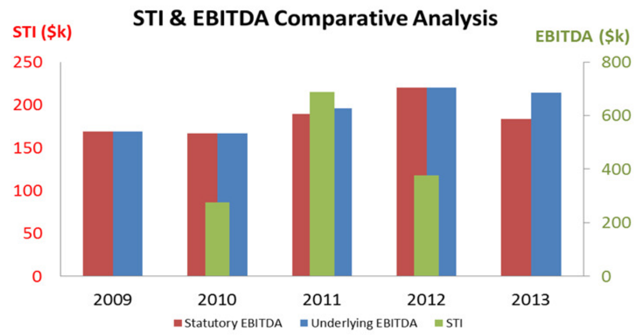
The following table shows key performance indicators for the group over the last five years:

	2009	2010	2011	2012	2013
Unadjusted EBITDA ($'000)	169,098	167,034	189,422	220,402	183,604
Underlying EBITDA ($'000)	169,098	167,034	196,059	220,402	214,016
Profit for the year attributable to owners of Bradken Limited ($'000)	64,268	70,441	67,561	100,533	66,937
Underlying profit for the year attributable to owners of Bradken Limited ($'000)	64,268	70,441	87,082	100,533	96,054
Basic earnings per share (cents)	52.5	54.1	47.6	60.5	39.6
Dividends ($'000)	28,856	46,009	59,821	68,747	64,311
Dividend payout ratio (%)	44.9%	65.3%	88.5%	68.4%	96.1%
BKN Y/E Share Price ($'s)	4.31	7.20	7.96	5.19	4.31
Increase/(decrease) in share price (%)	-50%	67%	11%	-35%	-17%
Total KMP incentives as percentage of profit/ (loss) for the year (%)	1.1%	1.8%	4.1%	1.7%	1.8%

Dividends shown above and the payout ratio calculated is in respect to profit earned for the year.

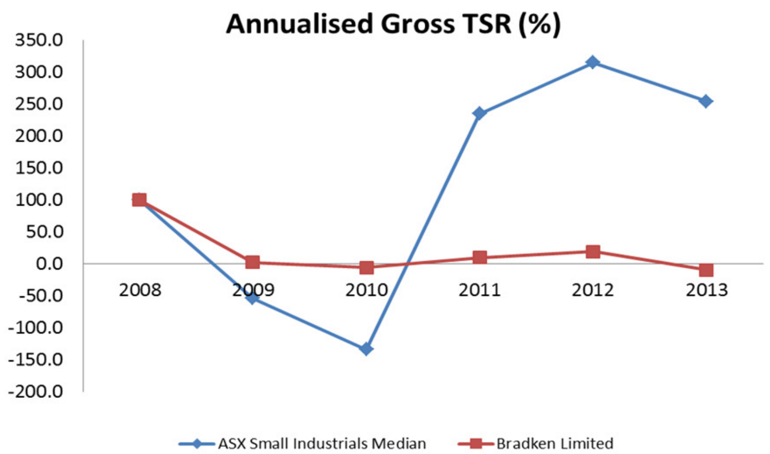
The graphs below illustrate two of the key links between key management personnel remuneration and Bradken Limited's performance.
The first two graphs illustrate the link between Bradken Limited's net profit before tax and EBITDA, both unadjusted and underlying, compared to payments made under the STI plan. In the 2011 year STI payouts were calculated against underlying NPAT and underlying EBITDA.





* Profit before tax is profit from continuing operations before income tax expense.
** STI % of target reflects the percentage of the target STI pool that was paid out to executives.

The last graph illustrates the operation of the long-term incentive plan by comparing Bradken Limited's TSR performance to the median TSR of the ASX Small Industrials Index (see page 22 below) over the last five years.



D. Remuneration report (continued)

(d) *Service agreements*

Remuneration and other terms of employment for the Managing Director and key management personnel required to be disclosed under the *Corporations Act 2001* are formalised in service agreements. Each of these agreements provide for the provision of performance-related cash bonuses, other benefits including, but not limited to, motor vehicles and participation, when eligible, in the Bradken Performance Rights Plan. Other major provisions of the agreements relating to remuneration are set out below.

Name	Term of Agreement	* Base salary including superannuation	** Termination Benefit
Brian Hodges, *Managing Director*	Ongoing commencing 2 July 2004	$1,426,118	6 months base salary
Andrew Allen, *General Manager Corporate Development*	Ongoing commencing 1 September 2011	$432,390	3 months base salary
Steven Perry, *Chief Financial Officer and Company Secretary*	Ongoing commencing 1 December 2011	$432,000	3 months base salary
Tom Armstrong, *Chief Operating Officer Engineered Products*	Ongoing commencing 25 October 2006	$455,372	12 months base salary
Stephen Cantwell, *General Manager Rail*	Ongoing commencing 1 July 2011	$468,135	6 months base salary
Enda Sheridan, *Executive General Manager Mining Products*	Ongoing commencing 17 June 2009	$637,635	3 months base salary
Brad Ward, *Executive General Manager Mineral Processing*	Ongoing commencing 1 July 2012	$403,650	3 months base salary

* Base salaries quoted are as at 30 June 2013; they are reviewed annually by the Human Resources Committee.

** Termination benefits are payable on early termination by the company, other than for gross misconduct; unless otherwise indicated, they are equal to the base salary for the remaining term of the agreement.

(e) *Share-based compensation*

Non-Executive Director Share Acquisition Plan

Non-executive directors may elect to have a proportion of their quarterly directors' fees provided as shares under the NED Plan. Participation in the plan is voluntary.

Non-executive directors are not able to sell or otherwise dispose of the shares until the earliest of 10 years after acquisition or when the non-executive director ceases to be a director of the Company (except in very limited circumstances). During this period the shares are subject to a holding lock. No shares were issued under the NED plan in the financial period.

Rights

The Performance Rights Plan (PRP) is the Company's long-term incentive (LTI) scheme for selected key executives. The Managing Director recommends the list of executives who are entitled to participate in this scheme and seeks approval of the list from the Human Resources Committee which is then ratified by the Board. Under the PRP, eligible executives may be granted Performance Rights (each being a right to acquire a share, subject to the satisfaction of exercise conditions) on terms and conditions determined by the Board and as documented in the PRP Plan rules and Trust Deed. If the exercise conditions are satisfied, the Performance Rights may be exercised and the shares issued and delivered to the executive. The Board may impose restrictions on the disposal of the shares and implement procedures to enforce the restrictions.

The rules of the PRP provide that the Board may determine a price that is payable to exercise a Performance Right, or that no amount is payable by the executive upon exercise of the Right.

If any additional persons become entitled to participate in the PRP and their participation requires approval under Chapter 10 of the Listing Rules, they will not participate in the PRP until shareholder approval is received pursuant to Listing Rule 10.14.

Mr Brian Hodges, being the only Executive Director of the Company, is the only Director entitled to participate in the PRP. If any other Director is to participate in the PRP, the Company will seek shareholder approval required by the ASX Listing Rules.

The performance conditions are based on the relative total shareholder return (TSR) of the Company measured against other companies in the ASX Small Industrials Index during the performance period. TSR measures the total return on investment of a share taking into account capital appreciation, capital return and dividend income.

D. Remuneration report (continued)

(e) *Share-based compensation (continued)*

The TSR performance conditions in relation to the grants issued are:

Target	Percentage of Rights available in given year to vest
The Company's TSR does not meet performance of the median Company in ASX Small Cap	0
The Company's TSR equals or exceeds performance of the median Company in ASX Small Cap	50
The Company's TSR ranked in third quartile of companies in ASX Small Cap	Pro rata between 50 and 100
The Company's TSR ranked in fourth quartile of companies in ASX Small Cap	100

In assessing whether the performance hurdles have been met, the Human Resources Committee receives independent data from an investment bank which provides both the Company's TSR from previous financial years and that of the ASX Small Industrials Index. The Company's performance against the hurdle is then determined with each Company in the ASX Small Industrials Index and Bradken being ranked in order of TSR in results from previous financial years. The Company's percentile ranking is determined by aggregating the weighting within the ASX Small Industrials Index (based on market capitalisation) of each company ranked below Bradken. The method of assessment was chosen as it provides the Committee with an objective means of measuring the Company's performance against its peer group. Once vested the performance rights remain exercisable for a period of ten years or the final test date depending on the conditions of the grant.

Dividends, changes in share price, and return of capital are included in the TSR calculation which is the only performance criteria assessed for the PRP scheme. The terms and conditions of each grant of Rights affecting remuneration in the previous, this or future reporting periods are as follows:

Grant Date	Exercise price	Fair value per Right	Performance Period	Test Date (date vested and exercisable)	Expiry Date
29 October 2009	$0.00	$4.41	1 Jul 09 to 30 Jun 12	Result announcement y/e 12	Final Test Date
5 November 2010	$0.00	$5.13	1 Jul 10 to 30 Jun 12	Result announcement y/e 12	Final Test Date
5 November 2010	$0.00	$6.12	1 Jul 10 to 30 Jun 13	Result announcement y/e 13	Final Test Date
7 October 2011	$0.00	$4.76	1 Jul 11 to 30 Jun 14	Result announcement y/e 14	Final Test Date
7 October 2011	$0.00	$4.76	1 Jul 11 to 30 Jun 14	Result announcement y/e 13	Final Test Date
7 October 2011	$0.00	$4.76	1 Jul 11 to 30 Jun 14	Result announcement y/e 14	Final Test Date
23 October 2012	$0.00	$2.84	1 Jul 12 to 30 Jun 13	Result announcement y/e 13	Final Test Date
23 October 2012	$0.00	$3.39	1 Jul 12 to 30 Jun 14	Result announcement y/e 14	Final Test Date
23 October 2012	$0.00	$2.84	1 Jul 12 to 30 Jun 13	Result announcement y/e 13	Final Test Date
23 October 2012	$0.00	$3.39	1 Jul 12 to 30 Jun 15	Result announcement y/e 15	Final Test Date

New entrants to the scheme are provided with a transition to the 3 year plan. Rights granted under the PRP carry no dividend or voting rights.

Details of Rights over ordinary shares in the Company provided as remuneration to each director of Bradken Limited and each of the key management personnel are set out below. When exercisable, each Right is convertible into one ordinary share of Bradken Limited. Further information on the Rights is set out in note 35 to the financial statements.

Number of Rights granted and vested and Shares provided during the year on exercise of Performance Rights

Details of Rights granted and vested and ordinary shares in the Company provided as a result of the exercise of Performance Rights to the Managing Director of Bradken Limited and each of the key management personnel and other executives of the Group required to be disclosed under the *Corporations Act 2001* are set out below.

Name	**Number of Rights granted during the year**	**Number of Rights vested during the year**	**Number of ordinary shares issued on exercise of Rights during the year**	**Value at exercise date ***
Directors of Bradken Limited				
Brian Hodges	**141,021**	**0**	**36,521**	**$ 225,335**
Other key management personnel of the Group				
Andrew Allen	**34,205**	**0**	**0**	**$ -**
Tom Armstrong	**39,334**	**0**	**0**	**$ -**
Stephen Cantwell	**49,377**	**0**	**0**	**$ -**
Steven Perry	**34,175**	**0**	**0**	**$ -**
Enda Sheridan	**63,052**	**0**	**0**	**$ -**
Brad Ward	**39,915**	**0**	**0**	**$ -**

* The value at exercise date is deemed to be the closing price of the security on the date exercised.

No amounts were payable on the exercise of Rights during the period.

D. Remuneration report (continued)

(e) *Share-based compensation (continued)*

The assessed fair value at grant date of Rights granted to the individuals is allocated equally over the financial periods in which the Rights may vest, and the amount is included in the remuneration tables above. Fair values at grant date are determined using a Black Scholes option pricing model that takes into account the exercise price, the term of the Right, the vesting and performance criteria, the impact of dilution, the non-tradeable nature of the Right, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the Right.

Principles used to determine the nature and amount of remuneration: relationship between remuneration and Company performance

The overall level of executive reward takes into account the performance of the Group over a number of years, with greater emphasis given to the current and prior year.

Details of share remuneration: Rights

For each grant of Rights included in the tables on pages 19 to 23, the percentage of the available Right that was paid, or that vested, in the financial year, and the percentage that was forfeited because the person did not meet the performance criteria is set out below. The Rights vest over a period up to three years, provided the vesting conditions are met (see page 21). Rights not vested when performance hurdles are not met do not carry forward to future periods.

	2010	-	-	100	30/06/2013	-	-

A= The % of rights that failed to vest in the period as the performance criteria were not met.

B= The minimum value of Rights yet to vest is nil as the performance criteria may not be met and consequently the Right may not vest.

C= The maximum value of rights yet to vest is not determinable as it depends on the market price of shares of Bradken Limited on the Australian Stock Exchange at the date the right is exercised. The maximum values presented above are based on the closing share price at 30 June 2013 of $4.31.

D. Remuneration report (continued)

(f) *Additional information (continued)*

Share based compensation: Rights

Further details relating to rights are set out below.

Name	A Remuneration consisting of Rights	B Value at grant date $	C Value at exercise date $	D Value at lapse date $
Andrew Allen	20.3%	115,955	-	122,957
Tom Armstrong	20.8%	133,342	-	163,280
Stephen Cantwell	21.5%	160,599	-	-
Brian Hodges	23.8%	478,061	225,335	633,587
Steven Perry	13.0%	115,853	-	54,524
Enda Sheridan	24.0%	213,746	-	282,747
Brad Ward	18.7%	135,312	-	146,037

A= The percentage of the value of remuneration consisting of Rights, based on the value at grant date set out in column B. Remuneration percentage refers to the AASB 2 Share-based payment values reported in the table in section (b) above and does not correlate to the remuneration received by the executive in the period.

B= The value at grant date calculated in accordance with AASB 2 *Share-based payment* of Rights granted during the year as part of remuneration.

C= The value at exercise date of Rights that were granted as part of remuneration and were exercised during the year.

D= The value at lapse date of Rights that were granted as part of remuneration and that lapsed during the year.

Shares under Performance Rights

Unissued shares of Bradken Limited under Performance Right at the date of this report are as follows:

Date Rights granted	Expiry date	Exercise price	Number of shares under right
18 November 2005	Ten years from Test Date	Nil	10,344
30 October 2006	Ten years from Test Date	Nil	7,340
30 October 2006	Ten years from Test Date	Nil	14,993
31 October 2007	Ten years from Test Date	Nil	3,353
17 October 2008	Ten years from Test Date	Nil	116
17 October 2008	Ten years from Test Date	Nil	12,690
5 November 2010	Final Test Date	Nil	23,988
5 November 2010	Final Test Date	Nil	543,929
7 October 2011	Final Test Date	Nil	619,410
7 October 2011	Final Test Date	Nil	17,877
23 October 2012	Final Test Date	Nil	61,369
23 October 2012	Final Test Date	Nil	1,122,908

All Rights expire on the earlier of their expiry date, their exercise, their failure to meet exercise conditions or termination of the employee's employment. In addition, the ability to exercise the Rights is conditional on the Group achieving certain performance hurdles related to relative total shareholder return to the ASX Small Cap Industrial index.

Further details are included in the Remuneration Report above.

Shares purchased on exercise of Rights

The following ordinary shares of Bradken Limited were bought on market during the year ended 30 June 2013 on exercise of Rights granted under the Performance Rights Plan. No further shares have been bought since that date.

Date Rights granted	Exercise price of right	Number of shares purchased
17 October 2008	0.00	36,521

E. Other information

Non-audit services

The Company may decide to employ the auditor on assignments additional to their statutory audit duties where the auditor's expertise and experience with the Company and/or Group are important.

Details of the amounts paid to auditors for audit and non-audit services provided during the year are set out below.

The Board of directors has considered the position and, in accordance with advice received from the Audit and Risk Committee, is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed by the Audit and Risk Committee to ensure they do not impact the impartiality and objectivity of the auditor
- none of the services undermine the general principles relating to auditor independence as set out in Professional Statement F1, including reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the Company, acting as advocate for the Company or jointly sharing economic risks and rewards.

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms:

E. Other information (continued)

Insurance of officers

During the year, the Company paid a premium to insure the directors and secretaries of the Company and its Australian-based controlled entities, the general managers of each of the businesses, all executive officers of the Group and of any related body corporate against a liability incurred by such a director, secretary or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The independent Non-Executive Directors who are not individual parties to the proceedings in the Federal Court of Australia brought by Norcast (Pala Investments) (being proceedings number VID 356 of 2012), have obtained independent legal advice concerning those proceedings. The independent Non-Executive Directors are of the view that the interests of the Company and each of the Directors are aligned in pursuing a successful appeal. The independent Non-Executive Directors are of the view that Mr Hodges and Mr Greiner were acting in good faith in relation to the conduct, the subject of the proceedings and accordingly if there is no available claim that can be made against an insurer of Mr Hodges and Mr Greiner, the Deeds of Indemnity will then operate to indemnify Mr Hodges and Mr Greiner in connection with the proceedings.

The Company has not otherwise, during or since the end of the financial year, indemnified or agreed to indemnify any officer of the Group or of any related body corporate against a liability incurred by any such officer.

Proceedings on behalf of the Company

No person has applied to the court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of these proceedings.

No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the *Corporations Act 2001.*

Auditors' independence declaration

A copy of the auditors' independence declaration as required under section 307C of the Corporations Act 2001 is set out on page 27.

Rounding of amounts

The Company is of a kind referred to in Class Order 98/0100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the directors' report. Amounts in the directors' report have been rounded off in accordance with that Class Order to the nearest thousand dollars, or in certain cases, to the nearest dollar.

Auditor

PricewatehouseCoopers continues in office in accordance with section 327 of the *Corporations Act 2001.*

This report is made in accordance with a resolution of the directors:

Nick Greiner
Chairman

Brian Hodges
Managing Director

Sydney
12 August 2013

Auditor's Independence Declaration

As lead auditor for the audit of Bradken Limited for the year ended 30 June 2013, I declare that to the best of my knowledge and belief, there have been:

a) no contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and

b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Bradken Limited and the entities it controlled during the period.

John Campion

Contents to the notes to the consolidated financial statements

1 Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistenty applied to all years presented, unless otherwise stated. The financial statements are for the consolidated entity consisting of Bradken Limited and its subsidiaries.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the *Corporations Act 2001*. Bradken Limited is a for-profit entity for the purpose of preparing the financial statements.

Compliance with IFRSs

The consolidated financial statements of the Bradken Limited group also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

New and amended standards adopted by the group

None of the new standards and amendments to standards that are mandatory for the first time for the financial year beginning 1 July 2012 affected any of the amounts recognised in the current period or any prior period and are not likely to affect future periods.

However, amendments made to AASB 101 *Presentation of Financial Statements* effective 1 July 2012 now require the statement of comprehensive income to show the items of comprehensive income grouped into those that are not permitted to be reclassified to profit or loss in a future period and those that may have to be reclassified if certain conditions are met.

Historical cost convention

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and liabilities (including derivative instruments) at fair value through profit or loss.

Critical accounting estimates

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 3.

(b) Principles of consolidation

(i) Subsidiaries

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Bradken Limited (''company'' or ''parent entity'') as at 30 June 2013 and the results of all subsidiaries for the year then ended. Bradken Limited and its subsidiaries together are referred to in this financial report as the Group or the consolidated entity.

Subsidiaries are all those entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The acquisition method of accounting is used to account for the acquisition of subsidiaries by the Group (refer to note 1(h)).

Intercompany transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated income statement, statement of comprehensive income, statement of changes in equity and balance sheet respectively.

(ii) Associates

Associates are all entities over which the group has significant influence but not control or joint control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost. The group's investment in associates includes goodwill identified on acquisition (refer to note 32).

The group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition other comprehensive income is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividends receivable from associates are recognised as reduction in the carrying amount of the investment.

1 Summary of significant accounting policies (continued)

When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured long-term receivables, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

(iii) Changes in ownership interests

The group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of Bradken Limited.

When the group ceases to have control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, jointly controlled entity or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a jointly-controlled entity or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

(c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director.

(d) Foreign currency translation

(i) Functional currency and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Australian dollars, which is Bradken Limited's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

Translation differences on non-monetary financial assets and liabilities are reported as part of the fair value gain or loss. Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available-for-sale financial assets are included in the fair value reserve in equity.

(iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each income statement and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

1 Summary of significant accounting policies (continued)

(e) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of returns, trade allowances and amounts collected on behalf of third parties. Revenue is recognised for the major business activities as follows:

(i) Sale of goods

Revenue from the sale of goods is recognised when the consolidated entity has passed the significant risks and rewards to the buyer.

(ii) Contract revenue

Contract revenue and expenses are recognised on an individual contract basis using the percentage of completion method when the stage of contract completion can be reliably determined, costs to date can be clearly identified, and total contract revenue and costs to complete can be reliably estimated.

The stage of completion is measured by reference to an assessment of components completed to date as a percentage of total components for each contract.

Where the outcome of a contract cannot be reliably estimated, contract costs are expensed as incurred. Where it is probable that the cost will be recovered, revenue is recognised to the extent of costs incurred. Where it is probable that a loss will arise on a contract, the excess of total costs over revenue is recognised immediately as an expense.

(iii) Interest income

Interest income is recognised as it accrues, taking into account the effective yield on the financial asset.

(iv) Sale of non-current assets

The gain or loss on disposal of non-current assets is included as other income or expense at the date control passes to the buyer, usually when an unconditional contract of sale is signed. The gain or loss on disposal is calculated as the difference between the carrying amount of the asset at the time of disposal and the net proceeds on disposal.

(v) Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement.

(vi) Dividends

Dividends are recognised as revenue when the right to receive payment is established. This applies even if they are paid out of pre-acquisition profits. However, the investment may need to be tested for impairment as a consequence, refer note 1(m).

(f) Income tax

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in controlled entities where the parent entity is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

1 Summary of significant accounting policies (continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation. As a consequence, these entities are taxed as a single entity and the deferred tax assets and liabilities of these entities are set off in the consolidated financial statements.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(i) Investment allowances

Companies within the group may be entitled to claim special tax deductions for investments in qualifying assets (investment allowances). The group accounts for such allowances as tax credits, which means that the allowance reduces income tax payable and current tax expense. A deferred tax asset is recognised for unclaimed tax credits that are carried forward as deferred tax assets.

(g) Leases

Leases of property, plant and equipment where the Group, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases (note 12). Finance leases are capitalised at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term, if there is no reasonable certainty that the Group will obtain ownership at the end of the lease term.

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases (note 28). Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight line basis over the period of the lease.

Lease income from finance leases where the group is a lessor is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the receivable for each period (note 9). The respective lease receivable is included in the balance sheet.

(h) Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement and the fair value of any pre-existing equity interest in the subsidiary. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired and the measurement of all amounts has been reviewed, the difference is recognised directly in profit or loss as a bargain purchase.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss.

1 Summary of significant accounting policies (continued)

(i) Impairment of assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(j) Cash and cash equivalents

For cash flow statement presentation purposes, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

(k) Receivables

Trade receivables are recognised initially at fair value and subsequently, less provision for doubtful debts. Trade receivables are normally due for settlement no more than 30 days from the date of recognition. They are presented as current assets unless collection is not expected for more than 12 months after the reporting date.

Collectibility of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off. A provision for doubtful receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the value of estimated future cash flows. The amount of the provision is recognised in the income statement.

(l) Inventories

(i) Raw materials and stores, work in progress and finished goods

Raw materials and stores, work in progress and finished goods are stated at the lower of cost and net realisable value. Cost comprises direct materials, direct labour and an appropriate portion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Costs are assigned to inventory on hand by the method most appropriate to each particular class of inventory, with the majority being valued on either standard or weighted average basis. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale such as expenses of marketing, selling and distribution to customers.

(ii) Construction and service contract work in progress

Construction and service contract work in progress is carried at cost plus profit recognised to date based on the value of work completed, less progress billings and less provision for foreseeable losses. If there are contracts where progress billings exceed the aggregate costs incurred plus profits less losses, the net amounts are presented under other liabilities.

Cost includes variable and fixed costs directly related to specific contracts, those costs related to contract activity in general which can be allocated to specific contracts on a reasonable basis and other costs specifically chargeable under the contract. Costs expected to be incurred under penalty clauses and rectification provisions are also included.

(iii) Stock Obsolescence

All inventory items are reviewed on a regular basis during the year and a provision raised for products which have not been sold for one year unless the review indicates that a sale is likely.

(m) Investments and other financial assets

Classification

The Group classifies its investments in the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and, in the case of assets classified as held-to-maturity, re-evaluates this designation at each reporting date.

(i) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if they are expected to be settled within 12 months; otherwise they are classified as non-current.

1 Summary of significant accounting policies (continued)

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of selling the receivable. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date which are classified as non-current assets. Loans and receivables are included in receivables in the balance sheet (note 8).

(iii) Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity.

(iv) Available-for-sale financial assets

Available-for-sale financial assets, comprising principally marketable equity securities, are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the balance sheet date.

Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date – the date on which the group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

When securities classified as available-for-sale are sold, the accumulated fair value adjustments recognised in other comprehensive income are reclassified to profit or loss as gains and losses from investment securities.

Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Loans and receivables and held-to-maturity investments are subsequently carried at amortised cost using the effective interest method.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are presented in profit or loss within other income or other expenses in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in profit or loss as part of revenue from continuing operations when the group's right to receive payments is established. Interest income from these financial assets is included in the net gains/(losses).

Fair value

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

Impairment

The group assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the assets are impaired.

1 Summary of significant accounting policies (continued)

(n) Derivatives and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as either; (1) hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedge); or (2) hedges of the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedge).

The Group documents at the inception of the hedging transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been and will continue to be highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair values of various derivative financial instruments used for hedging purposes are disclosed in note 11. Movements in the hedging reserve in shareholders' equity are shown in note 23.

The full fair value of a hedging derivative is classified as a non current asset or liability when the remaining maturity of the hedged item is more than 12 months; it is classified as a current asset or liability when the remaining maturity of the hedged item is less than 12 months.

(i) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The gain or loss relating to the effective portion of interest rate swaps hedging fixed rate borrowings is recognised in the income statement within other income or other expense together with the gain or loss relating to the ineffective portion and changes in the fair value of the hedge fixed rate borrowings attributable to the interest rate risk. The gain or loss relating to the ineffective portion is recognised in the income statement within other income or other expenses.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedge item for which the effective interest method is used is amortised to profit or loss over the period to maturity using a recalculated effective interest rate.

(ii) Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in equity in the hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in the income statement within other income or other expense.

Amounts accumulated in equity are recycled in the income statement in the periods when the hedged item will affect profit or loss (for instance when the forecast sale that is hedged takes place). The gain or loss relating to the effective portion of interest rate swaps hedging variable rate borrowings is recognised in the income statement within "finance costs". The gain or loss relating to the effective portion of forward foreign exchange contracts hedging export sales is recognised in the income statement within "sales". However, when the forecast transaction that is hedged results in the recognition of a non-financial asset (for example, inventory or a non-financial liability), the gains and losses previously deferred in equity are transferred from equity and included in the measurement of the initial cost or carrying amount of the asset or liability.

When a hedging instrument expires or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

(iii) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the income statement and are included in other income or other expenses.

1 Summary of significant accounting policies (continued)

(o) Property, plant and equipment

All property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains/losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Depreciation is provided on property, plant and equipment, including freehold buildings but excluding land. Depreciation is calculated on a straight line basis so as to write off the net cost of each asset over its expected useful life. Assets are depreciated or amortised from the date of acquisition, or in respect of internally constructed assets, from the time an asset is completed and held ready for use. Depreciation is calculated using the straight line method to allocate their cost, net of their residual values, over their estimated useful lives, as follows:

Buildings	20 to 66 years
Plant and equipment	1 to 20 years
Patterns	1 to 40 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 1(i)).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the income statement.

(p) Intangible assets

(i) Goodwill

Goodwill is measured as described in note 1(h). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to operating segments (note 4).

(ii) Patents, trademarks and brand names

Patents are carried at fair value at acquisition and amortised on a straight line basis over the life of the patent. Trademarks are carried at their fair value at acquisition less impairment losses and amortised over 5 years with amortisation calculated on a straight line basis. Brand names are not amortised if they continue to be used and add value. Discontinued brand names are amortised over a period of 10 years as they are phased out.

(iii) Customer relationships

Customer relationships acquired as part of a business acquisition are recognised separately from goodwill. The customer relationships are carried at their fair value at the date of acquisition less accumulated amortisation and impairment losses. Amortisation is calculated based on their estimated useful lives, which currently vary from 10 to 20 years.

(iv) Research and development

Research expenditure is recognised as an expense as incurred. Costs incurred on development projects (relating to the design and testing of new or improved products) are recognised as intangible assets when it is probable that the project will be a success considering its commercial and technical feasibility and its costs can be measured reliably. The expenditure capitalised comprises all directly attributable costs, including costs of materials, services, direct labour and an appropriate proportion of overheads. Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use on a straight-line basis over its useful life, which varies from 3 to 10 years.

(q) Payables

These amounts represent liabilities for goods and services provided to the group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 60 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months from the reporting date. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

1 Summary of significant accounting policies (continued)

(r) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

(s) Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed.

(t) Provisions

A provision is recognised in the accounts when there is a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

(i) Warranties

Products are warranted against faulty workmanship and in some cases these are specifically extended to periods up to seven years or hours used depending on the type of product and contract in place. Rectification claims are settled in cash or by repair of the item, at the discretion of the Group. Provision for warranty claims are made for claims received and claims expected to be received in relation to sales made prior to reporting date adjusted for specific information arising from internal quality assurance processes.

(u) Employee Benefits

(i) Wages, salaries, annual leave, sick leave, rostered days off and non-monetary benefits

Liabilities for annual leave, accumulating sick leave and rostered days off, including non monetary benefits, expected to be settled within 12 months of the reporting date are recognised in current provisions in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non accumulating sick leave are recognised when the leave is taken and measured at the rates paid or payable. Liabilities for unpaid wages and salaries up to the reporting date are recognised in current payables.

(ii) Long service leave

The provision for long service leave represents the present value of the expected future cash outflows to be made resulting from employees' services provided to reporting date.

Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(iii) Bonus plans

A liability for employee benefits in the form of bonus plans is recognised in current provisions when there is no realistic alternative but to settle the liability and at least one of the following conditions is met:

- there are formal terms in the plan for determining the amount of the benefit
- the amounts to be paid are determined before the time of completion of the financial report
- past practice gives clear evidence of the amount of the obligation.

Liabilities for bonus plans are expected to be settled within 12 months and are measured at the amounts expected to be paid when they are settled.

1 Summary of significant accounting policies (continued)

(iv) Employee share and rights plans

Share based compensation benefits are provided to employees and directors via the Performance Rights Plan ('PRP') and the Non-Executive Director Share Acquisition Plan ('NEDSAP') respectively.

The fair value of Rights granted under the PRP are recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date taking into account market performance conditions only, and spread over the vesting period during which the employees become unconditionally entitled to the Rights. The fair value of Rights granted are measured using the Black & Scholes Pricing Model, taking into account the terms and conditions attached to the Rights. The amount recognised as an expense is adjusted to reflect the actual number of Rights that vest except where forfeiture is due to market related conditions.

The fair value of shares issued under the NEDSAP are recognised as an employee benefit expense with a corresponding increase in equity. The fair value is measured at grant date.

(v) Retirement benefit obligations

All employees of the Group are entitled to benefit from various superannuation or pension plans on retirement, disability or death. The Group operates two defined benefit retirement plans, one in the United States and the other in Canada. The United States plan is closed to new members and covers hourly employees hired before May 10, 1993 at one of our US subsidiaries. The Canadian plan is currently active at one of our Canadian subsidiaries for hourly employees but closed on March 1, 2010 to salaried employees. Benefits for the defined benefit plan are determined on years of credited service. The Group also operates a number of defined contribution plans which receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

A liability or asset in respect of defined benefit superannuation plans is recognised in the balance sheet, and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the funds assets at that date and any unrecognised past service cost. The present value of the defined benefit obligation is based on future payments which may arise from membership of the fund to the reporting date calculated annually by independent actuaries. Consideration is given to the experience of employee departures and periods of service.

Unrecognised actuarial gains / losses in excess of the 10% corridor are being recognised on a straight-line basis over the average life remaining service period of the active participant group.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yields of government bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation. In countries where there is a deep market in high-quality corporate bonds, the market rates on those bonds are used.

Past service costs are recognised immediately in profit or loss, unless the changes to the pension fund are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past service costs are amortised on a straight-line basis over the vesting period.

(vi) Healthcare reserves

The Group's U.S. operations primarily self-insure employee healthcare expenses. Reserves are based on historical claims experience.

(v) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or rights are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or rights for the acquisition of a business are not included in the cost of the acquisition as part of the purchase consideration.

If the entity reacquires its own equity instruments, eg as the result of a share buy-back, those instruments are deducted from equity and the associated shares are cancelled. No gain or loss is recognised in the profit or loss and the consideration paid including any directly attributable incremental costs (net of income taxes) is recognised directly in equity.

(w) Dividends

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the financial year but not distributed at balance date.

(x) Earnings per share

(i) Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

1 Summary of significant accounting policies (continued)

(y) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to, the taxation authority are presented as operating cash flows.

(z) Rounding of amounts

The Company is of a kind referred to in Class order 98/0100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the financial report. Amounts in the financial report have been rounded off in accordance with that Class Order to the nearest thousand dollars, or in certain cases, the nearest dollar.

(aa) Amended accounting standards and UIG interpretations

Certain amended accounting standards and interpretations have been published that are not mandatory for 30 June 2013 reporting periods. The Group's and the parent entity's assessment of the impact of these amended standards and interpretations is set out below.

AASB 10 *Consolidated Financial Statements,* AASB 11 *Joint Arrangements,* AASB 12 *Disclosure of Interests in Other Entities,* revised AASB 127 *Separate Financial Statements and* AASB 128 *Investments in Associates and Joint Ventures* and AASB 2011-7 *Amendments to Australian Accounting Standards arising from the Consolidation and Joint Arrangements Standards* (effective for annual periods beginning on or after 1 January 2013)

In August 2011, the AASB issued a suite of five new and amended standards which address the accounting for joint arrangements, consolidated financial statements and associated disclosures. AASB 10 replaces all of the guidance on control and consolidation in AASB 127 *Consolidated and Separate Financial Statements*, and Interpretation 12 *Consolidation – Special Purpose Entities*. The core principle that a consolidated entity presents a parent and its subsidiaries as if they are a single economic entity remains unchanged, as do the mechanics of consolidation. However the standard introduces a single definition of control that applies to all entities. It focuses on the need to have both power and rights or exposure to variable returns before control is present. Power is the current ability to direct the activities that significantly influence returns. Returns must vary and can be positive, negative or both. There is also new guidance on participating and protective rights and on agent/principal relationships. While the group does not expect the new standard to have a significant impact on its composition, it has yet to perform a detailed analysis of the new guidance in the context of its various investees that may or may not be controlled under the new rules.

AASB 12 sets out the required disclosures for entities reporting under the two new standards, AASB 10 and AASB 11, and replaces the disclosure requirements currently found in AASB 128. Application of this standard by the group will not affect any of the amounts recognised in the financial statements, but will impact the type of information disclosed in relation to the group's investments. Amendments to AASB 128 provide clarification that an entity continues to apply the equity method and does not remeasure its retained interest as part of ownership changes where a joint venture becomes an associate, and vice versa. The amendments also introduce a "partial disposal" concept. The group is still assessing the impact of these amendments. The group does not expect to adopt the new standards before their operative date. They would therefore be first applied in the financial statements for the annual reporting period ending 30 June 2014.

AASB 13 *Fair Value Measurement* and AASB 2011-8 *Amendments to Australian Accounting Standards arising from AASB 13* (effective for annual periods beginning on or after 1 January 2013)

AASB 13 was released in September 2011. It explains how to measure fair value and aims to enhance fair value disclosures. The group has yet to determine which, if any, of its current measurement techniques will have to change as a result of the new guidance. It is therefore not possible to state the impact, if any, of the new rules on any of the amounts recognised in the financial statements. However, application of the new standard will impact the type of information disclosed in the notes to the financial statements. The group does not intend to adopt the new standard before its operative date, which means that it would be first applied in the annual reporting period ending 30 June 2014.

AASB 2011-4 *Amendments to Australian Accounting Standards to Remove Individual Key Management Personnel Disclosure Requirements* *(effective for annual periods beginning on or after 1 January 2013)*

In July 2011 the AASB decided to remove the individual key management personnel (KMP) disclosure requirements from AASB 124 Related Party Disclosures , to achieve consistency with the international equivalent standard and remove a duplication of the requirements with the Corporations Act 2001 . While this will reduce the disclosures that are currently required in the notes to the financial statements, it will not affect any of the amounts recognised in the financial statements. The amendments apply from 1 July 2013 and cannot be adopted early. The Corporations Act requirements in relation to remuneration reports will remain unchanged for now, but these requirements are currently subject to review and may also be revised in the near future.

1 Summary of significant accounting policies (continued)

AASB 119 - *Revised AASB 119 Employee Benefits*, AASB 2011-10 *Amendments to Australian Accounting Standards arising from AASB 119 (September 2011)* *(effective for annual periods beginning on or after 1 January 2013)*
In September 2011, the AASB released a revised standard on accounting for employee benefits. It requires the recognition of all remeasurements of defined benefit liabilities/assets immediately in other comprehensive income (removal of the so-called 'corridor' method) and the calculation of a net interest expense or income by applying the discount rate to the net defined benefit liability or asset. This replaces the expected return on plan assets that is currently included in profit or loss. The standard also introduces a number of additional disclosures for defined benefit liabilities/assets and could affect the timing of the recognition of termination benefits. The amendments will be implemented retrospectively. The Group will adopt the new standard from 1 July 2013.

Amendments to AASB 136 *Recoverable Amount Disclosures for Non-Financial Assets* *(effective for annual periods beginning on or after 1 January 2014)*
The AASB has made small changes to some of the disclosures that are required under AASB 136 Impairment of Assets. These may result in additional disclosures if the group recognises an impairment loss or the reversal of an impairment loss during the period. They will not affect any of the amounts recognised in the financial statements. The group intends to apply the amendment from 1 July 2014.

AASB 2012-5 *Amendments to Australian Accounting Standard arising from Annual Improvements 2009-2011 cycle* (effective for annual periods beginning on or after 1 January 2013)
In June 2012, the AASB approved a number of amendments to Australian Accounting Standards as a result of the 2009-2011 annual improvements project. The group does not expect that any adjustments will be necessary as the result of applying the revised rules.

There are no other standards that are not yet effective and that are expected to have a material impact on the group in the current or future reporting periods on foreseeable future transactions.

(ab) Parent entity financial information

The financial information for the parent entity, Bradken Limited, disclosed in note 36 has been prepared on the same basis as the consolidated financial statements, except as set out below.

(i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the financial statements of Bradken Limited.

(ii) Tax consolidation legislation

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation.

The head entity, Bradken Limited, and the controlled entities in the tax consolidated group account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, Bradken Limited also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

The entities have also entered into a tax funding agreement under which the wholly-owned entities fully compensate Bradken Limited for any current tax payable assumed and are compensated by Bradken Limited for any current tax receivable and deferred tax assets relating to unused tax losses or unused tax credits that are transferred to Bradken Limited under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

The amounts receivable/payable are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of each financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as current amounts receivable from or payable to other entities in the group.

Any difference between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

(iii) Financial guarantees

The parent entity is a guarantor under the Bradken Group - Common Terms Deed Poll and unconditionally and irrevocably guarantees payments due in connection with any financing facilities owed by any Group company.

2 Financial risk management

The Group's activities expose it to a variety of financial risks; market risk (including currency risk, cash flow and fair value interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group uses derivative financial instruments such as foreign exchange contracts and interest rate swaps to hedge certain risk exposures. Derivatives are exclusively used as hedging instruments, not as trading or other speculative instruments. The Group uses different methods to measure different types of risk to which is it exposed. These methods include sensitivity analysis in the case of interest rate and foreign exchange risk and ageing analysis for credit risk.

Risk management is carried out centrally by the CFO and finance function under policies approved by the Board of Directors.

(a) Credit risk

The Group has no significant concentrations of credit risk. The Group has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history.

Derivative counterparties and cash transactions are limited to high credit quality financial institutions.

The maximum exposure to credit risk best represents the carrying value of the financial assets at balance date.

The standard terms and conditions on sale of goods includes a clause which allows Bradken to repossess goods which have not been consumed should Bradken require it necessary to recoup unpaid debts owed to them.

Bradken's global customer base is large and diverse and subject to strict credit application and assessment criteria to minimise impairment risk.

Details on the past due but not impaired trade receivables are disclosed at note 8(b).

(b) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group aims at maintaining flexibility in funding by keeping committed credit lines available.

Management monitors forecasts of the Group's liquidity on the basis of expected cash flow. See note 19(e) for details of available facilities.

The tables below analyse the Group's financial liabilities and net settled derivative financial instruments into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the tables are the contractual undiscounted cash flows. There is no liquidity risk at the Parent entity level.

Group - 2013	Less than 1 year $'000	Between 1 and 3 years $'000	Between 3 and 5 years $'000	Between 5 and 8 years $'000	Over 8 years $'000
Non-derivatives					
Payables	197,029	-	-	-	-
Borrowings (excluding finance leases)	47,910	341,263	16,649	69,981	165,111
Finance leases liabilities	4,805	5,138	1,058	890	-
Derivatives					
Net settled interest rate swaps and caps	2,310	-	-	-	-

Group - 2012	Less than 1 year $'000	Between 1 and 3 years $'000	Between 3 and 5 years $'000	Between 5 and 8 years $'000	Over 8 years $'000
Non-derivatives					
Payables	203,245	-	-	-	-
Borrowings (excluding finance leases)	26,946	264,050	145,868	73,224	162,180
Finance leases liabilities	4,845	5,672	524	-	-
Derivatives					
Net settled interest rate swaps and caps	3,650	-	-	-	-

The Group enters into forward exchange contracts to hedge foreign currency denominated receivables and also to manage foreign currency denominated inventory and capital items.

Refer to note 8(f) for receivables denominated in foreign currencies.

(c) Market risk

(i) Cash flow and fair value interest rate risk

The Group has no significant interest-bearing assets and the Group's income and operating cash flows are not materially exposed to changes in market interest rates.

The Group's interest-rate-risk arises from long term borrowings. Borrowings issued at variable rates expose the Group to cash flow interest-rate-risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate-risk. Group policy is to fix the rates for between 30% and 70% of its borrowings.

2 Financial risk management (continued)

(c) Market risk (continued)

The Group manages its cash flow interest-rate-risk by using floating-to-fixed interest rate swaps and interest rate caps. Such instruments have the economic effect of converting borrowings from floating rates to fixed rates. Generally, the Group raises long-term borrowings at floating rates and swaps them into fixed rates. Under the interest-rate swaps, the Group agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed contract rates and floating-rate interest amounts calculated by reference to the agreed notional principal amounts.

Refer to note 19 for further details generally of the Group's borrowings.

A sensitivity analysis of interest rate risk on the Group's financial assets and liabilities is provided in the table at note 2(c)(iv).

(ii) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the entity's functional currency. It is the policy of the Group to enter into forward foreign exchange contracts to cover all foreign currency exposure other than those effectively covered within the natural hedging pool.

Refer to note 8 and 17 for receivables and payables denominated in foreign currencies.

Unrealised gains or losses on outstanding foreign exchange contracts are taken to the Group's income statement on a monthly basis.

A sensitivity analysis of foreign exchange risk on the Group's financial assets and liabilities is provided in the table at note 2(c)(iv).

(iii) Price risk

The Group is exposed to commodity price risk through the purchase of steel and various alloys.

(iv) Summarised sensitivity analysis

The following table summarises the pre-tax sensitivity of the Group's financial assets and financial liabilities to interest rate risk and foreign exchange risk. These sensitivities are prior to the offsetting impact of hedging instruments.

2013		Interest rate risk				Foreign exchange risk			
	Carrying	-100 bps		+100 bps		-10%		+10%	
	amount	Profit	Equity	Profit	Equity	Profit	Equity	Profit	Equity
	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000
Financial assets									
Cash and cash equivalents	92,489	(924)	(924)	924	924	5,735	5,735	(5,735)	(5,735)
Accounts receivable	155,353	-	-	-	-	11,552	11,552	(11,552)	(11,552)
Receivables under finance leases	5,531	-	-	-	-	-	-	-	-

Borrowings	(524,032)	5,240	5,240	(5,240)	(5,240)	(37,222)	(37,222)	37,222	37,222
Total increase/(decrease)		4,316	4,349	(4,316)	(4,348)	(8,147)	(8,147)	33,781	33,781

2012		Interest rate risk				Foreign exchange risk			
	Carrying	-100 bps		+100 bps		-10%		+10%	
	amount	Profit	Equity	Profit	Equity	Profit	Equity	Profit	Equity
	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000	$'000
Financial assets									
Cash and cash equivalents	101,892	(1,018)	(1,018)	1,018	1,018	4,042	4,042	(4,042)	(4,042)
Accounts receivable	202,922	-	-	-	-	12,342	12,342	(12,342)	(12,342)
Receivables under finance leases	5,725	-	-	-	-	-	-	-	-
Financial liabilities									
Derivatives - cashflow hedges	(3,409)	-	494	-	(494)	-	-	-	-
Derivatives - FVTPL	(241)	-	-	-	-	546	546	(974)	(974)
Trade payables	(158,762)	-	-	-	-	(9,320)	(9,320)	9,320	9,320
Borrowings	(549,971)	5,500	5,500	(5,500)	(5,500)	(32,850)	(32,850)	32,850	32,850
Total increase/(decrease)		4,482	4,976	(4,482)	(4,976)	(25,240)	(25,240)	24,812	24,812

Financial risk exposure of the parent entity is limited to the exposure of the Group.

2 Financial risk management (continued)

(d) Fair value measurements

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

AASB 7 *Financial Instruments: Disclosures* requires disclosure of fair value measurement by level of the following fair value measurement hierarchy:

(a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)

(b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and

(c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following table presents the group's assets and liabilities measured and recognised at fair value at 30 June 2013 and 30 June 2012.

2013	Level 1 $'000	Level 2 $'000	Level 3 $'000	Total $'000
Assets				
Derivatives used for hedging	-	12,897	-	12,897
Total assets	-	12,897	-	12,897
Liabilities				
Derivatives used for hedging	-	2,310	-	2,310
Total liabilities	-	2,310	-	2,310

2012	Level 1 $'000	Level 2 $'000	Level 3 $'000	Total $'000
Liabilities				
Derivatives used for hedging	-	3,650	-	3,650
Total liabilities	-	3,650	-	3,650

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in level 1.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques. The group uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used to estimate fair value for long-term debt for disclosure purposes. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward exchange contracts is determined using forward exchange market rates at the end of the reporting period. In the circumstances where a valuation technique for these instruments is based on significant unobservable inputs, such instruments are included in level 3.

3 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

(a) Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in note 1(p). The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions. Refer to note 14 for details of these assumptions and the potential impact of changes to the assumptions.

(ii) Estimated percentage completion for major contracts

The Group reviews the percentage of completion for its major contracts monthly including assessing costs to be incurred to complete the project in accordance with the accounting policy stated in note 1(e) and note 1(l). These assessments require an estimate of the remaining labour and material costs for the projects.

(iii) Equity accounting for Austin Engineering

The Group has equity accounted the latest available published results of Austin Engineering Limited for the half year ending 31 December 2012 and extrapolated these to 30 June 2013 based on market conditions and analyst estimates. Differences identified when Austin Engineering Limited publishes results for the 2013 financial period will be adjusted in Bradken Limited's interim report for the half year ending 31 December 2013.

(iv) Intangibles

The group values identifiable intangibles acquired in a business combination based on a combination of independent valuations in some cases and management's estimate of the net present value of estimated future cash flows of the assets. Identifiable intangible assets are amortised over their estimated useful lives. Given the estimates involved, management review the carrying value of these assets annually for impairment.

4 Segment information

Operating segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Managing Director.

Segment revenues, expenses, assets and liabilities are those that are directly attributable to a segment. Segment assets include all assets used by a segment and consist primarily of receivables, inventories and property, plant and equipment, net of related provisions. Segment liabilities consist primarily of trade and other creditors, employee benefits and provision for service warranties.

Segment revenues, expenses and results include transfers between segments. Sales of scrap between controlled entities are made on an "arm's-length" basis and are eliminated on consolidation. All other transfers are made at variable cost and are eliminated on consolidation.

(a) Description of segments

Mining Products consists of design, supply and service of wear components for all types of earth moving in the Mining and Quarry industries. Mineral Processing consists of design supply and service of mill liner components in the Mineral Processing industries. Rail is a package provider of Freight Rollingstock products and services including freight wagons, bogies, drawgear, inventory management, spare and renewed parts and the maintenance and refurbishment of rollingstock. Engineered Products, based in the North America, is a supplier of cast parts to the Energy, Power, Cement, Industrial and Rail Transport industries specialising in large (greater than 4,500 kg) highly engineered steel castings.

Responsibility for the North American based Resource business previously included as part of the Engineered Products segment has been moved to the Mining Products segment. The Mineral Processing business previously reporting within the Mining Products business has been removed from that segment following the acquisition and consolidation of the Canadian based Norcast business in 2011 and is now reported as a separate segment. Management has concluded that the results of the previously reported Industrial segment is no longer required to be separately disclosed. The segment does not meet any quantitative thresholds required by AASB 8 and is considered by management to be of decreasing relevance as the Group's operations continue to expand. Management has concluded that the results of this operation are better included in the "all other segments" column. Comparative disclosures have also been amended to reflect these changes.

The "all other" segment also represents other smaller businesses including Cast Metal Services.

4 Segment information (continued)

(b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the year ending 30 June 2013 and for the year ending 30 June 2012 are as follows:

2013	Notes	Mining Products $'000	Mineral Processing $'000	Engineered Products $'000	Rail $'000	All other segments $'000	Total $'000
Total segment revenue		417,235	289,987	389,477	227,392	198,495	1,522,586
Inter-segment revenue		(51,933)	(39,898)	(32,875)	(4,830)	(79,911)	(209,447)
Revenue from external customers		**365,302**	**250,089**	**356,602**	**222,562**	**118,584**	**1,313,139**
Gross margin		**125,573**	**94,256**	**124,394**	**37,779**	**47,583**	**429,585**
Depreciation and amortisation expense		14,413	13,177	17,574	4,734	2,496	52,394
Net interest expense		1,689	3,409	2,312	124	(16)	7,518
Impairment of inventories	Note 10	836	73	575	(2)	20	1,502
Impairment of trade receivables	Note 8	-	-	407	-	257	664
Income tax expense / (income)		12,640	11,289	2,109	310	6,599	32,947
Other non cash expenses / (revenue)		3,808	375	82	1,609	(2,888)	2,986

4 Segment information (continued)

(c) Other segment information

The Group's divisions are managed on a global basis and operate in five main geographical areas, Australia, the home country of the parent entity, the UK, the US, Canada, China and Other countries. The majority of revenue classified as "Other" relates to Canada, and various European, African, Asian, and South American countries.

(i) Segment revenue

Sales between segments under the same tax jurisdiction are made at variable cost and are eliminated on consolidation. Sales between segments under different tax jurisdictions are carried out at arms length and are eliminated on consolidation.

The revenue from external parties reported to the Managing Director is measured in a manner consistent with that in the income statement. Segment revenue reconciles to total revenue from continuing operations as follows:

	2013	2012
	$'000	$'000
Total segment revenue	**1,522,586**	1,648,148
Intersegment eliminations	**(209,447)**	(196,892)
Interest revenue	**254**	369
Other revenue	**-**	1,218
Rental income	**400**	516
Royalty income	**506**	415
Sale of scrap	**925**	868
Commission income	**145**	62
Other	**2,073**	1,377
Total revenue from continuing operations (note 5)	**1,317,442**	1,456,081

Segment revenues are allocated based on the country in which the customer is located.

Australia	**605,717**	733,420
US	**326,148**	401,910
Other countries	**381,274**	315,926
Revenue from external customers	**1,313,139**	1,451,256

(ii) Gross margin

The Managing Director assesses the performance of each operating segment based on a measure of gross margin. Gross margin is considered the most relevant measure of individual segment results as manufacturing plants all make product for the various segments and transfer product at cost. This measurement basis excludes the allocation of manufacturing variances and overheads from individual manufacturing plants as any allocation would be arbitrarily based.

A reconciliation of standard gross margin to operating profit before income tax is provided as follows:

	2013	2012
	$'000	$'000
Gross margin	**429,585**	431,798
Fixed manufacturing overheads and other cost of sale adjustments	**(152,000)**	(134,558)
Other reveune	**14,570**	2,017
Other income	**4,303**	4,825
Selling and technical expenses	**(60,726)**	(57,803)
Administration expenses	**(110,089)**	(76,681)
Finance costs	**(31,501)**	(33,785)
Share of net profit of associates accounted for using the equity method	**9,847**	2,826
Profit before income tax	**103,989**	138,639

4 Segment information (continued)

(c) Other segment information (continued)

(iii) Segment assets

The amounts provided to the Managing Director with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset. Reportable segments' assets are reconciled to total assets as follows:

	2013 $'000	2012 $'000
Segment assets	**1,307,546**	1,318,160
Unallocated:		
Inventories	**(1,593)**	(1,037)
Current receivables	**(29,913)**	(38,610)
Intangibles	**162,547**	137,743
Property, plant and equipment	**16,461**	16,023
Investments accounted for using the equity method	**49,261**	38,521
Current tax assets	**11,794**	7,150
Deferred tax assets	**6,059**	17,972
Cash and cash equivalents	**92,449**	101,844
Total assets as per the balance sheet	**1,614,611**	1,597,766

Segment assets are allocated based on where the assets are located.

Australia	**434,234**	539,416
US	**212,888**	255,264
Canada	**338,254**	298,681
China	**219,113**	149,065
UK	**40,504**	31,870
Other countries	**62,553**	43,864
Total segment assets	**1,307,546**	1,318,160

(iv) Segment liabilities

The amounts provided to the Managing Director with respect to total liabilities are measured in a manner consistent with that of the financial statements. These liabilities are allocated based on the operations of the segment and the physical location of the liabilities. Reportable segments' liabilities are reconciled to total liabilities as follows:

	2013 $'000	2012 $'000
Segment liabilities	**261,059**	277,205
Unallocated:		
Payables	**12,853**	1,320
Derivative financial instruments	**2,310**	3,650
Current provisions	**2,506**	59
Non-current provisions	**4,155**	5,112
Current borrowings	**26,486**	3,642
Non-current borrowings	**493,046**	542,972
Current tax liabilities	**3,004**	6,198
Deferred tax liabilities	**43,882**	38,158
Total liabilities as per the balance sheet	**849,301**	878,316

5 Profit from ordinary activities

	2013 $'000	2012 $'000
Revenue		
From continuing operations		
Sales revenue		
Sale of goods	**1,313,139**	1,451,256
	1,313,139	1,451,256

Other income		
Foreign exchange gains (net) (note (a))	**12,137**	2,017
Net gain on disposal of property, plant and equipment (note (b))	**2,433**	-
	14,570	2,017

(a) Net foreign exchange gains

	2013 $'000	2012 $'000
Net foreign exchange gains included in other income for the year	**12,137**	2,017
Net foreign exchange gains recognised in profit before income tax for the year (as either other income or expense)	**12,137**	2,017

(b) Net gain on disposal of property, plant and equipment

There was a net loss on disposal of property, plant and equipment in 2012 of $100,000.

5 Profit from ordinary activities (continued)

Expenses

	Notes	2013 $'000	2012 $'000
Profit before income tax includes the following specific expenses:			
Depreciation			
Buildings		**4,639**	3,802
Plant & equipment		**36,251**	32,723
Leasehold improvements		**339**	236
Plant & equipment under finance leases		**5,129**	5,080
Total depreciation		**46,358**	41,841
Amortisation			
Customer lists		**7,341**	6,846
Trademarks		**1,289**	1,294
Licences and other		**3,226**	1,192
Total amortisation		**11,856**	9,332
Finance costs - net			
Interest and finance charges paid/payable		**30,127**	35,732
Borrowing costs amortisation		**1,474**	2,203
		31,601	37,935
Amount capitalised (note (a))		**(100)**	(4,150)
Finance costs expensed		**31,501**	33,785
Net loss on disposal of property, plant and equipment		**-**	100
Rental expense relating to operating leases			
Minimum lease payments		**8,590**	7,404
Total rental expense relating to operating leases		**8,590**	7,404
Research and development		**6,861**	1,740
Costs associated with the Pala legal case, judgement and associated costs	27(b)	**30,412**	-
Restructuring provision		**2,558**	-
Warranty		**8,892**	7,713
Stock Obsolescence		**1,502**	498
Net bad and doubtful debts expense (revenue) including movements in doubtful debts provision		**664**	326
Employee benefits expense		**415,056**	412,722

(a) Capitalised borrowing costs
The borrowing costs capitalised represent amounts incurred upfront to renew finance facilities.

6 Income tax expense

	Notes	2013 $'000	2012 $'000
(a) Income tax expense			
Current tax		**30,860**	32,376
Deferred tax		**12,943**	4,913
Adjustment for current tax of prior periods		**(6,751)**	817
		37,052	38,106
Income tax expense is attributable to:			
Profit from continuing operations		**37,052**	38,106
Aggregate income tax expense		**37,052**	38,106
Deferred income tax (revenue) expense included in income tax expense comprises:			
Decrease (increase) in deferred tax assets (note 13)		**(2,704)**	(482)
(Decrease) increase in deferred tax liabilities (note 21)		**15,647**	5,395
		12,943	4,913
(b) Numerical reconciliation of income tax expense to prima facie tax payable			
Profit from continuing operations before income tax expense		**103,989**	138,639
		103,989	138,639
Tax at the Australian tax rate of 30% (2012: 30%)		**31,197**	41,592
Tax effect of amounts which are not deductible (taxable) in calculating taxable income:			
Entertainment		**61**	68

Cash flow hedges (note 23(a))		**346**	(1,015)
		346	(10,933)

6 Income tax expense (continued)

(e) Tax consolidation legislation

Bradken Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation as of 1 July 2003. The accounting policy in relation to this legislation is set out in note 1(f).

On adoption of the tax consolidation legislation, the entities in the tax consolidated group entered into a tax sharing agreement which, in the opinion of the directors, limits the joint and several liability of the wholly-owned entities in the case of a default by the head entity, Bradken Limited.

The Australian entities have also entered into an agreement under which the wholly-owned entities fully compensate Bradken Limited for any current tax payable assumed and are compensated by Bradken Limited for any current tax receivable and deferred tax assets relating to the unused tax losses or unused tax credits that are transferred to Bradken Limited under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

The amounts receivable/payable are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of the financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

7 Cash and cash equivalents

	2013 $'000	2012 $'000
Cash at bank and in hand	**92,489**	101,892
	92,489	101,892

(a) Reconciliation to cash at the end of the year

The above figures are reconciled to cash at the end of the financial year as shown in the statement of cash flows as follows:

	2013 $'000	2012 $'000
Balances as above	**92,489**	101,892
Bank overdrafts (note 19)	**(667)**	(173)
Balances per statement of cash flows	**91,822**	101,719

(b) Interest rate risk exposure

The Group's and parent entity's exposure to interest rate risk is discussed in note 2.

8 Receivables

	2013 $'000	2012 $'000
Current		
Trade receivables	**155,353**	202,922
Provision for impairment of receivables	**(405)**	(499)
	154,948	202,423
Other receivables	**6,298**	11,182
Prepayments	**6,564**	7,306
	167,810	220,911
Non-current		
Other receivables	**2,880**	1,873
	2,880	1,873

8 Receivables (continued)

(a) Impaired trade receivables

As at 30 June 2013 current trade receivables of the Group with a nominal value of $405,000 (2012: $499,000) were impaired. The amount of the provision was $405,000 (2012: $499,000).

Movements in the provision for impairment of receivables are as follows:

	2013 $'000	2012 $'000
Balance at 1 July	**499**	476
Balances acquired on acquisition	**-**	66
Charge for the year	**664**	326
Receivables written off during the year as uncollectable	**(739)**	(375)
Unused amounts reversed	**(49)**	-
Foreign currency exchange differences	**30**	6
Balance at 30 June	**405**	499

The creation and release of the provision for impaired receivables has been included in administration expenses in the income statement. Amounts charged to the provision are generally written off when there is no expectation of recovering additional cash.

(b) Past due but not impaired

At 30 June, the ageing analysis of trade receivables is as follows:

	2013 $'000	2012 $'000
Current	**68,838**	138,817
0-30 days	**48,431**	48,947
31-60 days	**22,064**	9,575
61-90 days	**13,929**	3,483
91 + days	**2,091**	2,100
Total	**155,353**	202,922

As at 30 June 2013 trade receivables of $405,000 (2012:$499,000) were past due and considered impaired and trade receivables of $86,110,000 (2012:$63,606,000) were past due but not impaired.

The other classes within trade and other receivables do not contain impaired assets and are not past due. Based on the credit history of these other classes, it is expected that these amounts will be received when due.

In relation to the receivables recognised as past due but not impaired and impaired, collateral is held in the form of a retention of title over the goods until payment is received. Given the consumable nature of these goods the ability to determine an accurate value for this collateral has been unable to be performed.

(c) Other receivables

These amounts generally arise from transactions outside the usual operating activities of the Group and also include amounts receivable based on the revenue recognised for contracts on a percentage of completion basis.

(d) Fair values

The fair values and carrying values of non-current receivables of the Group are as follows:

	2013		2012	
	Carrying amount $'000	**Fair value $'000**	Carrying amount $'000	Fair value $'000
Other receivables	**2,880**	2,880	**1,873**	1,873
	2,880	2,880	**1,873**	1,873

Due to the short term nature of these receivables, their carrying amount is assumed to approximate their fair value.

(e) Credit risk

There is no concentration of credit risk with respect to current and non-current receivables, as the Group has a large number of customers, nationally and internationally dispersed. Refer to note 2 for more information on the risk management policy of the Group and the credit quality of the entity's trade receivables.

The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above.

8 Receivables (continued)

(f) Foreign exchange and interest rate risk

The carrying amounts of the Group's and parent entity current and non-current receivables are denominated in the following currencies:

	2013 $'000	2012 $'000
Australian Dollars	**42,848**	82,539
US Dollars	**79,213**	95,870
Canadian Dollars	**31,968**	23,649
Chinese Yuan	**1,628**	7,808
Other *	**15,033**	12,918
	170,690	222,784

* Other refers to a basket of currencies (Euros, Great British Pounds, Japanese Yen, New Zealand Dollars, Singapore Dollars, Malaysian Ringgit, South African Rand, Chilean Pesos)

Further information about the Group's and the parent entity's exposure to credit risk, foreign exchange risk and interest rate risk in relation to trade and other receivables is provided in note 2.

9 Other receivables

	2013 $'000	2012 $'000
Current receivables under finance leases (a)	**453**	402
Non current receivables under finance leases (a)	**5,078**	5,323

(a) Receivables under finance leases

The Group leases freight rail wagons to customers in Australia under finance lease arrangements. Lease agreements in which the other party, as lessee, is to be regarded as the economic owner of the leased assets give rise to accounts receivable in the amount of discounted future lease payments. The receivables under finance leases are as follows:

	Not later than one year $'000	Between one and five years $'000	Later than five years $'000
2012			
Present value	402	2,180	3,143
Unearned interest income	678	2,435	1,001
Total future payments	**1,080**	**4,615**	**4,144**
2013			
Present value	453	2,453	2,625
Unearned interest income	654	2,305	479
Total future payments	**1,107**	**4,758**	**3,104**

10 Inventories

	2013 $'000	2012 $'000
Construction work in progress:		
Contract costs incurred and recognised profits less recognised losses	**86,046**	243,697
Progress billing	**(70,370)**	(181,716)
Net construction work in progress	**15,676**	61,981
Raw materials and stores	**56,843**	56,462
Work in progress	**79,518**	93,344
Finished goods	**114,889**	96,326
	266,926	308,113

(a) Inventory expense

Write downs of inventories to net realisable value recognised as an expense during the year ended 30 June 2013 amounted to $1,502,000 (2012: $498,000). The expense has been included in 'cost of sales' in the income statement.

11 Derivative financial instruments

	2013 $'000	2012 $'000
Current assets		
Forward foreign exchange contracts - cash flow hedges ((a)(ii))	**12,897**	-
Total current derivative financial instrument assets	**12,897**	-
Current liabilities		
Interest rate swap and cap contracts - cash flow hedges ((a)(i))	**2,310**	3,409
Forward foreign exchange contracts ((a)(ii))	**-**	241
Total current derivative financial instrument liabilities	**2,310**	3,650

(a) Instruments used by the Group

The Group is party to derivative financial instruments in the normal course of business in order to hedge exposure to fluctuations in interest and foreign exchange rates in accordance with the Group's financial risk management policies (refer to note 2).

(i) Interest rate swap and interest rate cap contracts - cash flow hedges

Bank loans of the Group had an average variable interest rate of 4.40% at 30 June 2013 (2012: 4.78%). It is policy to protect part of the loans from exposure to increasing interest rates. Accordingly, the Group has entered into interest rate swap contracts under which it is obliged to receive interest at variable rates and to pay interest at fixed rates, and interest rate caps which provide protection over an agreed interest rate level.

Swaps and caps currently in place cover approximately 14% of bank loans (2012: 36%). The average fixed interest for the swaps and caps is 4.88% (2012: 4.82%).

At balance date, the notional principal amounts and periods of expiry of the interest rate swap and cap contracts are as follows:

	2013 $'000	2012 $'000
Interest rate swap contracts		
1 year or less	**30,000**	35,359
1 - 2 years	**-**	30,000
3 - 4 years	**40,000**	-
4 - 5 years	**-**	40,000
	70,000	105,359
Interest rate cap contract		
1 year or less	**-**	20,000
	-	20,000

The contracts require settlement of net interest receivable or payable each 90 days. The settlement dates coincide with the dates on which interest is payable on the underlying debt. The contracts are settled on a net basis.

The gain or loss from remeasuring the hedging instruments at fair value is deferred in equity in the hedging reserve, to the extent that the hedge is effective, and re-classified into profit and loss when the hedged interest expense is recognised. The ineffective portion is recognised in the income statement immediately.

At balance date for the Group these contracts were net liabilities with fair value of $2,310,000 (2012: $3,409,000 liability). In the year ended 30 June 2013 there was a gain from the change in fair value of $1,099,000 (2012: $3,382,000 loss).

(ii) Forward exchange contracts

It is the policy of the Group to enter into forward foreign exchange contracts to cover all foreign currency exposures greater than $100,000 AUD.

At balance date these contracts were net assets of $12,897,000 (2012: $241,000 liability). The Group has not classified any of these hedging instruments to be effective hedges.

In the year ended 30 June 2013 there was a gain from the change in fair value of the liability of $13,138,000 (2012: gain of $7,069,000)

(b) Risk exposures

Further information about the Group's exposure to credit risk, foreign exchange risk and interest rate risk is provided in note 2.

12 Property, plant and equipment

(a) Impairment tests for goodwill and other intangibles

The impairment testing has been performed on the following operating segment levels, Industrial, Mining Products, Rail, Engineered Products.

The recoverable amount of the CGU is determined based on a value-in-use calculations. These calculations use cash flow projections based on financial forecasts approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using perpetual per annum growth rates per segment of Mining 3.0%, Mineral Processing 3.0%, Engineered Products 2.0%, Rail 1.0% and Other in a range of 1.0% to 3.0%.

The carrying amounts of goodwill as disclosed in the balance sheet is $15.9m for the Industrial segment, $45.9m for the Mining Products segment, $117.1m for the Mineral Processing segment, $86.0m for the Engineered Products segment, $3.4m for the Rail segment and $7.1m for the Other segment.

(b) Key assumptions used for value in use calculations

Management determined assumptions on revenue growth, gross margin, overhead level, working capital and capital expenditure have been determined based on past performance and expectations for the future. The weighted average growth rates used are consistent with forecasts included in industry reports.

In performing the value-in-use calculations, the company has applied a post tax discount rate to discount the forecast future attributable post tax cash flows. The post tax discount rate used is an estimated WACC of 8.5% (2012: 7.4%), which would translate into a pre tax discount rate of 12.1% (2012: 10.6%).

For the US operations the post tax discount rate used is an estimated WACC of 11.1% (2012: 11.3%), which would translate into a pre tax discount rate of 16.6% (2012: 17.0%).

14 Intangible assets (continued)

(c) Impairment charge

There were no impairment charges in the period (2012: $NIL).

(d) Impact of possible changes in key assumptions

The impairment testing highlights a reasonable buffer between the value-in-use amount and the net book value of assets of the CGU's. Significant changes in the major assumptions would be required to generate an impairment charge.

15 Available for sale financial assets

	2013 $'000	2012 $'000
At beginning of year	**-**	70,054
Additions / (Disposals)	**-**	(681)
Revaluation surplus/(deficit) transfer to equity	**-**	(33,061)
Transfers to investments accounted for using the equity method	**-**	(36,312)
At end of year	**-**	-

16 Investments accounted for using the equity method

	2013 $'000	2012 $'000
Shares in associates (note 30)	**49,261**	38,521
	49,261	38,521

17 Payables

	2013 $'000	2012 $'000
Current		
Trade payables	**115,931**	158,762
Other payables	**81,098**	44,483
	197,029	203,245
Non current		
Other payables	**8,231**	7,438
	8,231	7,438

(a) Foreign currency risk

The carrying amounts of the Group's and parent entity's payables are denominated in the following currencies:

Australian Dollars	**88,708**	80,329
US Dollars	**60,079**	83,611
Chinese Yuan	**35,686**	33,721
Other *	**20,787**	13,022
	205,260	210,683

* Other refers to a basket of currencies (Euros, Great British Pounds, Japanese Yen, New Zealand Dollars, Singapore Dollars, Malaysian Ringgit, South African Rand, Chilean Pesos)

(b) Fair value

Due to the short term nature of these payables, their carrying value is assumed to approximate their fair value.

18 Provisions

	2013 $'000	2012 $'000
Current		
Employee benefits	**47,652**	47,133
Restructuring	**2,558**	-
Warranty	**2,640**	1,026
	52,850	48,159
Non-current		
Employee benefits	**17,963**	21,497
	17,963	21,497

(a) Warranties

Provision is made for known warranty claims at balance date. Most claims are expected to be settled in the next financial year. Management estimates the provision based on expected costs to be incurred to resolve the warranty claim.

(b) Restructuring

A provision of $2,558,000 has been created in the current period to cover redundancies made in the Group's Australian operations from July 2013.

(c) Movements in provisions

Movements in each class of provision during the financial year, other than employee benefits, are set out below:

2013	**Warranty Current $'000**	**Restructuring Current $'000**
Carrying amount at start of year	1,026	-
Additional provisions recognised	8,892	2,558
FX variations	-	-
Amounts used	(7,278)	-
Carrying amount at end of year	2,640	2,558

(d) Amounts not expected to be settled within the next 12 months

The current provision for long service leave includes all unconditional entitlements where employees have completed the required period of service and also those where employees are entitled to pro-rata payments in certain circumstances. The entire amount is presented as current, since the Group does not have an unconditional right to defer settlement. However, based on past experience, the Group does not expect all employees to take the full amount of accrued long service leave or require payment within the next 12 months. The following amounts reflect leave that is not to be expected to be taken or paid within the next 12 months.

	2013 $'000	2012 $'000
Long service leave obligation expected to be settled after 12 months	**4,137**	2,749

19 Borrowings

	2013 $'000	2012 $'000
Current - secured		
Lease liabilities (note 28)	**4,805**	4,845
Total secured current borrowings	**4,805**	4,845
Current - unsecured		
Bank overdrafts	**667**	173
Bank loans	**22,836**	-
Other loans	**975**	1,029
Total unsecured current borrowings	**24,478**	1,202
Total current borrowings	**29,283**	6,047
Non-current secured		
Lease liabilities (note 28)	**7,086**	6,196
Total secured non-current borrowings	**7,086**	6,196
Non-current unsecured		
Bank loans	**268,988**	341,187
US private placement	**218,675**	196,541
Total unsecured non-current borrowings	**487,663**	537,728
Total non-current borrowings	**494,749**	543,924

(a) Secured liabilities

The total secured liabilities (current and non-current) are as follows:

	2013 $'000	2012 $'000
Lease liabilities	**11,891**	11,041
Total secured liabilities	**11,891**	11,041

(b) Other loans

Other loans are repayable within twelve months. The current interest rate on these loans are 4.75% (2012: 4.91%).

(c) Risk exposures

The carrying amounts of the Group's borrowings are denominated in the following currencies:

	2013 $'000	2012 $'000
Australian Dollars	**151,808**	221,470
US Dollars	**317,229**	297,676
Great British Pounds	**33,250**	29,238
Canadian Dollars	**727**	1,286
Chinese Yuan	**20,204**	-
Malaysian Ringgits	**163**	111
Singapore Dollars	**2**	17
Euros	**649**	173
	524,032	549,971

Further information about the Group's and the parent entity's exposure to foreign exchange risk and interest rate risk and an analysis of the sensitivity of borrowings to interest rate and foreign exchange risk, is provided in note 2.

19 Borrowings (continued)

(d) Assets pledged as security

A Canadian dollar bank loan has been extinguished during the year and there are no assets pledged as security at balance date.

	2013 $'000	2012 $'000
Non-current		
First mortgage		
Freehold land and buildings	-	8,261
Floating charge		
Property plant & equipment	-	11,107
	-	11,107
Total non-current assets pledged as security	-	19,368
Total assets pledged as security	-	19,368

(e) Financing arrangements

Unrestricted access was available at balance date to the following lines of credit:

	2013 $'000	2012 $'000
Credit standby arrangements		
Total facilities		
Bank overdrafts	41,765	40,673
Standby letters of credit and bank guarantees	100,655	196,561
	142,420	237,234
Used at balance date		
Bank overdrafts	667	173
Standby letters of credit and bank guarantees	77,677	178,847
	78,344	179,020
Unused at balance date		
Bank overdrafts	41,098	40,500
Standby letters of credit and bank guarantees	22,978	17,714
	64,076	58,214
Bank loan facilities		
Total facilities	633,190	588,263
Used at balance date	297,446	348,460
Unused at balance date	335,744	239,803
US private placement notes		
Total facilities	218,675	196,541
Used at balance date	218,675	196,541
Unused at balance date	-	-

Working capital facilities comprise bank overdraft facilities and bank guarantee and letter of credit lines. Bank overdraft facilities comprise a AUD 30,000,000 bilateral overdraft facility, a USD 10,000,000 overdraft facility, a GBP 500,000 multi option facility and a NZD 100,000 overdraft facility.

Bank guarantees and letters of credit facilities comprise a AUD 82,000,000 multicurrency revolving bank guarantee facility, a GBP 500,000 bank guarantee facility, a NZD 50,000 guarantees facility and a CNY 100,000,000 bank guarantee line.

Bank loan facilities comprise the following

(i) a syndicated loan with three and five year revolving bullet term loan facilities with a AUD 425,000,000 multi-currency tranche, a USD 100,000,000 tranche and a GBP 20,000,000 tranche. Current interest rate is 4.21% (2012: 4.78%).

(ii) a USD 60 million revolving credit facility. Current interest rate is 4.90% (2012: 2.56%)

US Private Placement Notes comprise a 7 year USD 50,000,000 tranche, 10 year USD 100,000,000 tranche and 12 year USD 50,000,000 tranche. Current weighted average interest rate is 4.64% (2012: 4.64%).

On 1 July 2013 the 3 year component of the syndicated facility agreement was reduced by $117.5m AUD and $10.0m USD reflecting excess capacity over and above current debt requirements.

19 Borrowings (continued)

(f) Fair value

The carrying amounts and fair values of interest bearing liabilities at balance date are:

	2013		2012	
	Carrying amount	**Fair value**	Carrying amount	Fair value
	$'000	**$'000**	$'000	$'000
On balance sheet				
Non traded financial liabilities				
Bank overdrafts	**667**	**667**	173	173
Bank loans	**291,824**	**294,147**	341,187	346,016
US private placement	**218,675**	**223,025**	196,541	201,256
Other loans	**975**	**975**	1,029	1,029
Lease liabilities	**11,891**	**11,891**	11,041	11,041
	524,032	**530,705**	549,971	559,515

Fair value is inclusive of costs which would be incurred on settlement of a liability.

(i) On balance sheet

The fair value of interest bearing liabilities is based upon market prices where a market exists or by discounting the expected future cash flows by the current interest rates for liabilities with similar risk profiles.

(ii) Off balance sheet

The parent entity and certain controlled entities have potential financial liabilities which may arise from certain contingencies disclosed in note 27. As explained in those notes, no material losses are anticipated in respect of any of those contingencies.

20 Retirement benefit obligations

(a) Superannuation plan

All employees of the Group are entitled to benefit from various superannuation or pension plans on retirement, disability or death. The Group operates two defined benefit retirement plans, one in the United States and the other in Canada. The United States plan at one of the Group's US subsidiaries is closed to new members and covers hourly employees hired before May 10, 1993. The Canadian plan is currently active at one of the Group's Canadian subsidiaries for hourly employees but closed on March 1, 2010 to salaried employees. Benefits for the defined benefit plans are determined on years of credited service.

The Group also operates a number of defined contribution plans which receive fixed contributions from Group companies and the Group's legal or constructive obligation is limited to these contributions.

The following sets out details in respect of the defined benefit plans only.

(b) Balance sheet amounts

The amounts recognised in the balance sheet are determined as follows:

	2013 $'000	2012 $'000
Present value of the defined benefit obligation	**56,530**	52,110
Fair value of defined benefit plan assets	**(44,825)**	(35,111)
Net liability in the balance sheet	**(11,705)**	(16,999)

The Group has no legal obligation to settle this liability with an immediate contribution or additional one off contributions. The Company contributes such amounts as deemed necessary on an actuarial basis to provide the Plan with assets sufficient to meet benefits paid to Plan participants.

(c) Categories of the plan assets

The major categories of plan assets are as follows:

	2013 $'000	2012 $'000
Cash equivalents	**8,093**	5,772
Fixed interest	**6,174**	5,675
Equity securities	**30,558**	23,665
	44,825	35,112

(d) Reconciliations

	2013 $'000	2012 $'000
Reconciliation of the present value of the defined benefit obligation, which is partly funded:		
Balance at the beginning of the year	**52,110**	24,653
Current service cost	**1,112**	870
Interest cost	**2,112**	2,305
Plan amendments	**-**	395
Actuarial (gains) and losses	**(1,620)**	7,381
Benefits paid	**(2,305)**	(2,120)
Acquired in business combinations	**-**	17,351
FX Translation	**5,121**	1,275
	56,530	52,110
Reconciliation of the fair value of plan assets:		
Balance at the beginning of the year	**35,112**	19,616
Actual return on plan assets	**4,374**	(2,165)
Contributions by Group companies	**3,580**	3,499
Benefits paid	**(2,305)**	(2,120)
Acquired in business combinations	**-**	15,361
FX Translation	**4,064**	921
	44,825	35,112

20 Retirement benefit obligations (continued)

(e) Amounts recognised in profit or loss

The amounts recognised in profit or loss are as follow:

	2013 $'000	2012 $'000
Current service cost	**1,112**	870
Interest cost	**2,112**	2,305
Expected return on plan assets	**(2,385)**	(2,468)
Recognised net actuarial loss	**1,404**	179
Past service cost	**138**	106
Total included in employee benefits expense	**2,381**	992

(f) Amounts recognised in other comprehensive income

	2013 $'000	2012 $'000
Actuarial (loss)/gain recognised in the year	**5,633**	(11,924)
Cumulative actuarial (losses)/gains recognised in other comprehensive income	**(10,777)**	(15,711)

(g) Principal actuarial assumptions

The principal actuarial assumptions used (expressed as weighted averages) were as follows:

	USA 2013	Canada 2013	USA 2012	Canada 2012
Discount rate	**4.38%**	**4.60%**	3.75%	4.60%
Expected long-term return on plan assets	**7.00%**	**6.25%**	7.00%	6.25%
Rate of compensation increase	**N/A**	**N/A**	N/A	N/A

The Company selects the expected long-term rates of return on assets in consultation with its investment advisers and actuaries. The rates are intended to reflect the average rate of earnings expected to be earned on the funds invested or to be invested to provide plan benefits, and the plans are assumed to continue in force as long as assets are expected to be invested. In estimating the rates, appropriate consideration is given to historical performance for the major asset classes held or anticipated to be held by the plans and to current forecasts of future rates of return for those asset classes. Cash flow and expenses are taken into consideration to the extent that the expected return would be affected by them. Because assets are held in a qualified trust, anticipated returns are not reduced for taxes.

(h) Employer contributions

Employer contributions to the defined benefit plans are based on recommendations by the plan actuaries. Actuarial assessments are performed annually, and the last such assessments were made during June 2013.

Total employer contributions expected to be paid by Group companies for the year ending 30 June 2014 are $3,041,471.

(i) Historic summary

	2013 $'000	2012 $'000	2011 $'000	2010 $'000	2009 $'000
Defined benefit plan obligations	**56,530**	52,110	24,653	30,643	27,599
Plan assets	**(44,825)**	(35,111)	(19,616)	(20,295)	(20,007)
Surplus / (deficit)	**(11,705)**	(16,999)	(5,037)	(10,348)	(7,592)

21 Deferred tax liabilities

	2013 $'000	2012 $'000
The balance comprises temporary differences attributable to:		
Amounts recognised in profit or loss		
Prepayments	**608**	449
Design assets	**4,940**	741
Unrealised foreign exchange differences	**8,977**	310
Financial assets at fair value through profit or loss	**1,595**	1,434
Depreciation	**56,752**	48,596
Other	**5,319**	5,599
Total deferred tax liabilities	**78,191**	57,129
Set off of deferred tax liabilities of parent entity pursuant to set off provisions (note 13)	**(34,309)**	(18,971)
Net deferred tax liabilities	**43,882**	38,158
Movements:		
Opening balance at 1 July	**57,129**	42,987
Charged/(credited) to the income statement (note 6)	**15,647**	5,395
Charged/(credited) to other comprehensive income (note 6)	**-**	(9,918)
Charged/(credited) to equity (notes 22 and 23)	**5,415**	1,358
Acquisition of subsidiary (note 30)	**-**	17,307

(b) Movements in ordinary share capital (continued):

Date	Details	Notes	Number of shares	Parent entity $'000
4 September 2012	Dividend reinvestment plan issues	(d)	611,286	3,810
31 December 2012	Deferred tax asset adjustment relating to prior period equity raising costs		-	18
14 March 2013	Dividend reinvestment plan issues	(d)	1,064,244	7,695
6 March 2013 to 8 March 2013	Share buyback and cancellation	(g)	(1,064,244)	(8,014)
At 30 June 2013	**Balance**		**169,240,662**	**707,693**

(c) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

(d) Dividend reinvestment plan

The company has established a dividend reinvestment plan under which holders of ordinary shares may elect to have all or part of their dividend entitlements satisfied by the issue of new ordinary shares rather than by being paid in cash. The plan was active during the 2013 year.

(e) Performance Rights Plan

Information relating to the Performance Rights Plan, including details of shares issued under the plan, is set out in note 35.

(f) Non-executive director share acquisition plan

Information relating to the non-exective director share acquisition plan, including details of shares issued under the plan, is set out in note 35.

(g) Share buy-back

During March 2013 the company purchased and cancelled 1,064,244 fully paid ordinary shares on-market in order to cover the issue of shares for the interim dividend for the half year ending 31 December 2012. The buyback and cancellations were approved by the Board at a meeting held on 11 February 2013. The shares were acquired at an average price of $7.51 per share, with prices ranging from $6.45 to $7.55.

The total cost of $8,014,000, including $18,165 of after tax transaction costs, was deducted from shareholder equity.

There is no current on-market buy-back.

(h) Capital risk management

The group's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The group monitors it's performance against these objectives on the basis of its gearing levels expressed as a ratio of net debt to earnings before interest, tax, depreciation and amortisation (EBITDA).

During 2013, the group's strategy, which was unchanged from 2012, was to maintain the net debt level to around 2.0 times EBITDA. The comparative ratios at 30 June 2013 and 30 June 2012 were as follows:

	Notes	2013 $'000	2012 $'000
Net Debt	7, 19	**431,543**	448,079
EBITDA *		**214,016**	220,402
Net debt to EBITDA		**2.0**	2.0

* EBITDA for 2013 adjusted for Pala judgement and associated costs

Bradken Limited has complied with the financial covenants of its borrowing facilities during the 2013 and 2012 reporting periods.

23 Reserves and retained profits

Net profit for the year	**66,937**	100,533
Dividends	**(70,103)**	(66,480)
Actuarial (losses) / gains on retirement benefit obligations, net of tax	**3,365**	(8,364)
Balance 30 June	**194,094**	193,895

(c) Nature and purpose of reserves

(i) Hedging reserve - cash flow hedges

The hedging reserve is used to record gains or losses on a hedging instrument in a cash flow hedge that are recognised directly in equity, as described in note 1(n). Amounts are recognised in profit and loss when the associated hedged transaction affects profit and loss.

(ii) Share-based payments reserve

The share based payments reserve is used to recognise the fair value of rights issued but not exercised.

(iii) Foreign currency translation reserve

Exchange differences arising on translation of the foreign controlled entity are taken to the foreign currency translation reserve, as described in note 1(d). The reserve is recognised in profit and loss when the net investment is disposed of.

23 Reserves and retained profits (continued)

(iv) Available-for-sale financial assets reserve

Changes in the fair value and exchange differences arising on translation of investments, such as equities classified as available-for-sale financial assets, are recognised in other comprehensive income as described in note 1(m) and accumulated in a separate reserve within equity. Amounts are reclassified to profit or loss when the associated assets are sold or impaired.

Amounts are reversed when the classification of the investment changes to an associate.

(v) Transactions with non-controlling interests

This reserve is used to record the differences described in note 1(b)(iii) which may arise as a result of transactions with non-controlling interests that do not result in a loss of control.

24 Dividends

	2013 **$'000**	2012 $'000
(a) Ordinary shares		
Final dividend for the year ended 30 June 2012 of 21.5 cents (2011: 21.0 cents) per fully paid share paid on 4 September 2012 (2011: 19 September 2011)		
Fully franked based on tax paid @ 30%	**36,255**	33,988
Interim dividend for the year ended 30 June 2013 of 20.0 cents (2012: 19.5 cents) per fully paid share paid 14 March 2013 (2012: 19 March 2012)		
Fully franked based on tax paid @ 30%	**33,848**	32,492
Total dividends provided for or paid	**70,103**	66,480
Dividends paid in cash or satisfied by the issue of shares under the dividend reinvestment plan during the years ended 30 June 2012 and 30 June 2013 were as follows:		
Paid in cash	**58,598**	16,461
Satisfied by issue of shares	**11,505**	50,019
	70,103	66,480
(b) Dividends not recognised at year end		
In addition to the above dividends, since year end the directors have recommended the payment of a final dividend of 18.0 cents per fully paid ordinary share franked to 100%, (2012: 21.5 cents franked to 100%) based on tax paid at 30%. The aggregate amount of the proposed dividend expected to be paid on 13 September 2013 out of retained profits at 30 June 2013, but not recognised as a liability at year end, is	**30,463**	36,255

(c) Franked dividends

The franked portions of the final dividends recommended after 30 June 2013 will be franked out of existing franking credits or out of franking credits arising from the payment of income tax in the year ending 30 June 2014.

	Consolidated		**Parent entity**	
	2013 **$'000**	2012 $'000	**2013** **$'000**	2012 $'000
Franking credits available for subsequent financial years based on a tax rate of 30% (2012: 30%)	**5,917**	34,121	**5,917**	34,121

The above amounts represent the balance of the franking account as at the end of the financial year, adjusted for:

(a) franking credits that will arise from the payment of the amount of the provision for income tax

(b) franking debits that will arise from the payment of dividends recognised as a liability at the reporting date, and

(c) franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date.

The consolidated amounts include franking credits that would be available to the parent entity if distributable profits of subsidiaries were paid as dividends.

The impact on the franking account of the dividend recommended by the directors since year end, but not recognised as a liability at year end, will be a reduction in the franking account of $13,056,000 (2012: $15,538,000).

25 Key management personnel disclosures

(a) Directors

The following persons were directors of Bradken Limited during the financial year:

(i) Chairman - non-executive

Nick Greiner

(ii) Executive director

Brian Hodges, Managing Director

(iii) Non executive directors

Phil Arnall

Eileen Doyle

Vince O'Rourke (resigned 23 October 2012)

Greg Laurie

Peter Richards

(b) Other key management personnel

The following persons also had authority and responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, during the financial year:

Name	*Position*	*Employer*
Tom Armstrong	Chief Operating Officer - Engineered Products	Bradken Inc.
Andrew Allen	General Manager - Corporate Development	Bradken Resources Pty Ltd
Stephen Cantwell	General Manager Rail	Bradken Resources Pty Ltd
Steven Perry	Chief Financial Officer	Bradken Resources Pty Ltd
Enda Sheridan	General Manager - Mining Products & Industrial Products	Bradken Resources Pty Ltd
Brad Ward	General Manager - Mineral Processing (from 1 July 2012)	Bradken Resources Pty Ltd

(c) Key management personnel compensation

	2013	2012
	$	$
Short-term employee benefits	**4,843,370**	5,343,806
Post-employment benefits	**280,763**	259,726

26 Remuneration of auditors

It is the Group's policy to employ PricewaterhouseCoopers on assignments additional to their statutory audit duties where PricewaterhouseCoopers' expertise and experience with the Group are important. These assignments are principally tax advice and due diligence reporting on acquisitions, or where PricewaterhouseCoopers is awarded assignments on a competitive basis. It is the Group's policy to seek competitive tenders for all major consulting projects. During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non related audit firms:

	2013	2012
(a) Assurance services	**$**	$
Audit services		
PricewaterhouseCoopers Australian firm:		
Audit and review of financial reports and other audit work under *Corporations Act 2001*	**409,550**	444,234
Related practices of PricewaterhouseCoopers Australian firm	**389,601**	619,044

Total remuneration for taxation services	**833,756**	1,037,414

27 Contingencies

(a) Contingent Liabilities

The parent entity and Group had contingent liabilities at 30 June 2013 and 2012 in respect of:

Guarantees and letters of credit

	2013 $'000	2012 $'000
Bank guarantees for contract performance	**76,915**	177,634
Letters of credit	**762**	1,213
Total estimated contingent liabilities	**77,677**	178,847

Information about guarantees given by entities within the Group, including the parent entity are described in note 31. No deficiencies of assets exist in any of these companies.

Claims

The Bradken Group has been involved from time to time in various claims and lawsuits incidental to the ordinary course of business, including damages and commercial disputes relating to its products and services. The Group has disclaimed liability and will defend any action flowing from specific claims. It is not practical to estimate the potential effect of these claims but legal advice obtained indicates that any liability that may arise in the unlikely event these claims are successful will not be significant. Also refer to Note 27 (b) below.

No material losses are anticipated in respect of any of the above contingent liabilities.

Austin Engineering

There are no contingent liabilities that are known to Bradken that relate to Austin Engineering.

(b) Pala litigation

Bradken has appealed the adverse decision with regards to the Norcast / Pala case that was handed down by the Federal Court in April 2013. As a result of this decision an amount of $24,594,000 being the judgment sum, was placed in escrow with the Federal Court pending the outcome of the appeal. Bradken does not control the escrow account and in the event that Bradken is successful on appeal, the escrow sum, together with an estimated amount covering Bradken's legal and other associated costs, which have both been taken as an expense in the year ended 30 June 2013, would be expected to be shown as income in the financial statements for the year ended 30 June 2014.

28 Commitments

(a) Capital commitments

Capital expenditure contracted for at the reporting date but not recognised as liabilities is as follows:

	2013 $'000	2012 $'000
Land & buildings		
Payable:		
Within one year	**66**	15,430
	66	15,430
Property, plant and equipment		
Payable:		
Within one year	**26,532**	25,947
Later than one year but not later than five years	**3,266**	1,043
	29,798	26,990

(b) Lease commitments

	2013 $'000	2012 $'000
Commitments in relation to leases contracted for at the reporting date but not recognised as liabilities, payable:		
Within one year	**11,276**	7,826
Later than one year but not later than five years	**29,556**	14,853
Later than five years	**18,303**	2,338
	59,135	25,017
Representing:		
Non cancellable operating leases	**57,797**	23,687
Future finance charges on finance leases	**1,338**	1,330
	59,135	25,017

28 Commitments (continued)

(i) Operating leases

Operating leases relate to buildings and plant and equipment with lease terms generally between 1 to 5 years with a small amount being payable over greater than 5 years. Leases generally provide the consolidated entity with a right of renewal at which time all terms are renegotiated.

	2013 $'000	2012 $'000
Commitments for minimum lease payments in relation to non cancellable operating leases are payable as follows:		
Within one year	**10,599**	7,074
Later than one year but not later than five years	**28,928**	14,275
Later than five years	**18,270**	2,338
	57,797	23,687

(ii) Finance leases

The Group leases various items of plant and equipment with a carrying amount of $12,292,000 (2012: $11,186,000) under finance leases expiring within three to five years. Under the terms of the leases, the Group has the option to acquire some of the leased assets on expiry of the leases.

	2013 $'000	2012 $'000
Commitments in relation to finance leases are payable as follows:		
Within one year	**5,489**	5,620
Later than one year but not later than five years	**6,817**	6,751
Later than five years	**923**	-
Minimum lease payments	**13,229**	12,371
Future finance charges	**(1,338)**	(1,330)
Total lease liabilities	**11,891**	11,041
Representing lease liabilities:		
Current (note 19)	**4,805**	4,845
Non current (note 19)	**7,086**	6,196
	11,891	11,041

The weighted average interest rate implicit in the leases is 8.48**%** (2012: 8.40%).

29 Related party transactions

(a) Parent entities

The ultimate parent entity within the Group is Bradken Limited.

(b) Key management personnel

Disclosures relating to key management personnel are set out in note 25.

(c) Terms and conditions

Transactions relating to dividends were on the same conditions that applied to other shareholders.

The terms and conditions of the tax funding agreement are set out in note 6(e).

All other transactions were made on normal commercial terms and conditions and at market rates, except that there are no fixed terms for the repayment of loans between the parties. Outstanding balances are unsecured with no fixed term for repayment.

30 Investments in associates

		2013 $'000	2012 $'000
(a) Movements in carrying amounts			
Carrying amount at the beginning of the financial year		**38,521**	-
Cost of investment previously carried as an available for sale financial asset	Note 15	**-**	36,312
Increase in investment by way of share purchases in current period		**5,877**	671
Share of profits after income tax		**7,041**	2,045
Dividends received/receivable		**(2,178)**	(507)
Carrying amount at the end of the financial year		**49,261**	38,521

(b) Summarised financial information of associates

The group's share of the results of its principal associates and its aggregated assets (including goodwill) and liabilities are as follows:

	Company's share of:			
	Assets $'000	Liabilities $'000	Revenues $'000	Profit $'000
2013				
Austin Engineering Ltd * (ownership interest 21%)	60,309	31,194	33,704	7,041
	60,309	31,194	33,704	7,041
2012				
Austin Engineering Ltd * (ownership interest 20%)	46,499	24,599	21,943	2,045
	46,499	24,599	21,943	2,045

* Listed entity incorporated in Australia

(c) Fair value of listed investments in associates

	2013 $'000	2012 $'000
Austin Engineering Ltd	**49,481**	62,306
	49,481	62,306

31 Deed of cross guarantee

Pursuant to ASIC Class Order 98/1418 (as amended) dated 13 August 1998, the wholly-owned subsidiaries listed below are relieved from the Corporations Act 2001 requirements for preparation, audit, and lodgement of financial reports, and directors' report. It is a condition of the Class Order that the Company and each of the subsidiaries enter into a Deed of Cross Guarantee.

The effect of the Deed is that the Company guarantees to each creditor payment in full of any debt in the event of winding up of any of the subsidiaries under certain provisions of the Corporations Act 2001. If a winding up occurs under other provisions of the Act 2001, the Company will only be liable in the event that after six months any creditor has not been paid in full. The subsidiaries have also given similar guarantees in the event that the Company is wound up.

The companies subject to the Deed are:

- Bradken Limited
- Bradken SPV Pty Limited
- Bradken Resources Pty Limited
- Bradken Leasing Pty Limited
- Bradken Holdings Pty Limited
- Bradken Operations Pty Limited
- Bradken Finance Pty Limited
- Cast Metal Services Pty Limited

The above companies represent a 'Closed Group' for the purposes of the Class Order, and as there are no other parties to the Deed of Cross Guarantee that are controlled by Bradken Limited, they also represent the 'Extended Closed Group'.

(a) Consolidated income statement, statement of comprehensive income and summary of movements in consolidated retained earnings

Set out below is a consolidated income statement and a summary of movements in consolidated retained profits for the year ended 30 June 2013 of the Closed Group outlined above.

	2013 $'000	2012 $'000
Income statement		
Revenue from continuing operations	**614,922**	640,899
Cost of sales	**(467,344)**	(472,797)
Gross profit	**147,578**	168,102
Other income	**16,983**	4,407
Selling and technical expenses	**(41,647)**	(40,858)
Administration expenses	**(76,959)**	(39,579)
Finance costs	**(18,503)**	(26,861)
Share of net profit of associates accounted for using the equity method	**9,847**	2,826

Retained profits	**108,714**	152,078
Total equity	**660,075**	695,494

32 Reconciliation of profit after income tax to net cash inflow from operating activities

	2013 $'000	2012 $'000
Profit for the year	**66,937**	100,533
Share of profits of associates	**(9,847)**	(2,045)
Depreciation and amortisation of licences and designs	**58,214**	51,173
Amortisation of finance costs	**1,474**	2,203
Non-cash employee benefits expense - share-based payments	**3,597**	2,064
Net (gain) loss on sale of non-current assets	**(2,433)**	100
Net exchange differences	**(11,121)**	(4,177)
(Increase) / decrease in trade debtors and bills of exchange	**67,347**	34,412
(Increase) / decrease in inventories	**59,913**	(118,689)
(Increase) / decrease in deferred tax assets	**9,105**	(3,013)
Increase / (decrease) in trade creditors	**(20,695)**	56,314
(Increase) / decrease in other financial liabilities at fair value through profit or loss	**(1,340)**	(3,687)
Increase / (decrease) in provision for income taxes payable	**(7,838)**	(18,701)
Increase / (decrease) in provision for deferred income tax	**5,724**	8,780
Increase / (decrease) in other provisions	**(1,402)**	15,974
Net cash inflow from operating activities	**217,635**	121,241

33 Non cash investing and financing activities

	2013 $'000	2012 $'000
Acquisition of plant and equipment by means of finance leases	**5,889**	6,133
	5,889	6,133

Dividends satisfied by the issue of shares under the dividend reinvestment plan are shown in note 24 and rights and shares issued to employees under the Bradken Limited Performance Rights Plan and the Bradken Limited Employee Share Plan for no cash consideration are shown in note 35.

34 Earnings per share

	2013 **Cents**	2012 Cents
(a) Basic earnings per share		
Profit from continuing operations attributable to the ordinary equity holders of the company	**39.6**	60.5
Profit attributable to the ordinary equity holders of the company	**39.6**	60.5
(b) Diluted earnings per share		
Profit from continuing operations attributable to the ordinary equity holders of the company	**39.1**	59.8
Profit attributable to the ordinary equity holders of the company	**39.1**	59.8

(c) Reconciliations of earnings used in calculating earnings per share

	2013 **$'000**	2012 $'000
Basic earnings per share		
Profit from continuing operations	**66,937**	100,533
Profit from continuing operations attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**66,937**	100,533
Profit attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**66,937**	100,533
Diluted earnings per share		
Profit attributable to the ordinary equity holders of the company used in calculating basic earnings per share	**66,937**	100,533
Profit attributable to the ordinary equity holders of the company used in calculating diluted earnings per share	**66,937**	100,533

(d) Weighted average number of shares used as the denominator

	2013 **Number**	2012 Number
Weighted average number of ordinary shares used as the denominator in calculating basic earnings per share	**169,131,803**	166,176,563
Adjustments for calculation of diluted earnings per share:		
Rights	**2,039,469**	1,814,155
Weighted average number of ordinary shares and potential ordinary shares used as the denominator in calculating diluted earnings per share	**171,171,272**	167,990,718

(e) Information concerning the classification of securities

(i) Rights

Rights granted to employees under the Bradken Performance Rights Plan are considered to be potential ordinary shares and have been included in the determination of diluted earnings per share to the extent to which they are dilutive. The Rights have not been included in the determination of basic earnings per share. Details relating to the Rights are set out in note 35.

35 Share based payments

(a) Non-Executive Director Share Acquisition Plan

The Company has a Non-Executive Director Share Acquisition Plan (NED Plan). All current and future Non-Executive Directors are encouraged to have a percentage of their annual Directors' fees provided in shares under the NED Plan. Shares will be allocated to the Non-Executive Directors under the NED Plan and must be held for a specified period.

Non-executive directors may elect to have a percentage of their annual fixed directors' fees provided in shares under the Non-Executive Director Share Acquisition Plan (NED plan). Participation in the plan is voluntary.

Non-Executive Directors will not be able to sell or otherwise dispose of the shares until the earliest of 10 years after acquisition or the Non-Executive Director ceasing to be a director of the Company (except in very limited circumstances). During this period the shares will be subject to a holding lock.

At 30 June 2013 there are no Directors participating in the NED plan.

(b) Performance Rights Plan

The Performance Rights Plan (PRP) is the Company's long-term incentive (LTI) scheme for selected key executives. The Managing Director recommends the list of executives who are entitled to participate in this scheme and seeks approval of the list from the Human Resources Committee which is then ratified by the Board. Under the PRP, eligible executives may be granted Performance Rights (each being a right to acquire a share, subject to the satisfaction of exercise conditions) on terms and conditions determined by the Board and as documented in the PRP Plan rules and Trust Deed. If the exercise conditions are satisfied, the Performance Rights may be exercised and the shares issued and delivered to the executive. The Board may impose restrictions on the disposal of the shares and implement procedures to enforce the restrictions.

The rules of the PRP provide that the Board may determine a price that is payable to exercise a Performance Right, or that no amount is payable by the executive upon exercise of the Right.

Shares will immediately be allocated on exercise of a Performance Right. Performance Rights may only be exercised following satisfaction of performance conditions, unless the Board determines an event (such as a takeover bid) has occurred.

All grants of Performance Rights issued so far have been at no cost to participating executives. In relation to future grants, the Board may impose performance conditions that reflect the Company's business plans, targets, budgets and its performance relative to peer groups of companies.

If any additional persons become entitled to participate in the PRP and their participation requires approval under Chapter 10 of the Listing Rules, they will not participate in the PRP until shareholder approval is received pursuant to Listing Rule 10.14. Mr Brian Hodges, being the only Executive Director of the Company, is the only Director entitled to participate in the PRP. If any other Director is to participate in the PRP, the Company would seek shareholder approval as required by the Listing Rules.

The performance conditions are based on the relative total shareholder return ("TSR") of the Company measured against other companies in the ASX Small Cap Industrials index during the performance period. TSR measures the total return on investment of a share taking into account capital appreciation, capital return and dividend income.

35 Share based payments (continued)

(b) Performance Rights Plan (continued)

In assessing whether the performance hurdles have been met, the Human Resources Committee receives independent data from an independent investment bank which provides both Bradken's growth from previous financial years and that of the ASX Small Industrials Index. The Company's performance against the hurdle is then determined with each company in the ASX Small Industrials Index and Bradken being ranked in order of growth in results from previous financial years. The Company's percentile ranking is determined by aggregating the weighting within the ASX Small Industrials Index (based on market capitalisation) of each company ranked below Bradken. The method of assessment was chosen as it provides the Committee with an objective means of measuring the Company's performance against its peer group.

Dividends, changes in share price, and return of capital are included in the TSR calculation which is one of the performance criteria assessed for the LTI. The specific TSR performance conditions in relation to the grants are:

Target	Percentage of Rights available in given year to vest
The Company's TSR does not meet performance of the median company in ASX Small Cap	0
The Company's TSR equals or exceeds performance of the median company in ASX Small Cap	50
The Company's TSR ranked in third quartile of companies in ASX Small Cap	Pro rata between 50 and 100
The Company's TSR ranked in fourth quartile of companies in ASX Small Cap	100

New entrants to the scheme are provided with a transition to the 3 year plan.

Summary of Rights issues in the plan:

Grant date	Number of Rights	Fair value per Right	Financial periods in which Rights may vest
5 November 2010	34,537	$5.13	30 June 2012 / 2013
5 November 2010	550,078	$6.12	30 June 2014
7 October 2011	24,304	$4.76	30 June 2013 / 2015
7 October 2011	24,311	$4.76	30 June 2014 / 2015
7 October 2011	17,877	$4.01	30 June 2013 / 2014
7 October 2011	577,235	$4.76	30 June 2015
23 October 2012	16,493	$2.84	30 June 2014 / 2016
23 October 2012	32,987	$3.39	30 June 2015 / 2016
23 October 2012	44,876	$2.84	30 June 2014 / 2015
23 October 2012	1,089,921	$3.39	30 June 2016

There were no other Rights eligible for issuance under the scheme at 30 June 2013.

35 Share based payments (continued)

The movements in Rights issues in the plan are as follows:

Grant Date	Balance at start of the year Number	Granted during the year Number	Exercised during the year Number	Expired during the year Number	Balance at end of the year Number	Exercisable at end of the year Number

Weighted average price	5.04	4.74	4.88	4.76	4.98	4.02

The expiry dates of all grants shown in the tables above are 10 years from the test date. The weighted average share price at the date of exercise of Rights exercised regularly during the year ended 30 June 2013 was $6.17 (2012: $6.98). The weighted average remaining contractual life of share Rights outstanding at the end of the period was 1.63 years (2012: 1.52 years).

35 Share based payments (continued)

Fair value of Rights granted

The assessed fair value at grant date of Rights granted during the year ended 30 June 2013 was between $2.84 and $3.39 per right (2012: between $4.01 and $4.76). The fair value at grant date is determined using a Black Scholes option pricing model that takes into account the exercise price, the term of the Right, the vesting and performance criteria, the impact of dilution, the non tradeable nature of the Right, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the Right.

The following factors and assumptions have been used in determining the fair value of Rights for the issues granted:

Grant Date	Expiry Date	Fair value per Right	Exercise price	Price of shares on grant date	Estimated volatility	Risk free interest rate	Dividend yield
18/11/2005	Ten years from Test Date	2.35	-	4.15	90%	5.35%	0.00%
30/10/2006	Ten years from Test Date	2.80	-	6.00	90%	5.73%	0.00%

7/10/2011	Final test date	4.76	-	6.80	121%	4.24%	0.00%
7/10/2011	Final test date	4.01	-	6.80	121%	4.24%	0.00%
23/10/2012	Final test date	2.84	-	4.96	119%	3.08%	0.00%
23/10/2012	Final test date	3.39	-	4.96	119%	3.08%	0.00%

The expected price volatility is based on the historic volatility (based on the remaining life of the options), adjusted for any expected changes to future volatility due to publicly available information.

(c) Expenses arising from share based payment transactions

Total expenses arising from share based payment transactions recognised during the period as part of employee benefit expense were as follows:

	2013 $'000	2012 $'000
Rights issued under Performance Rights Plan	**3,597**	2,064
	3,597	2,064

36 Parent entity financial information

(a) Summary financial information

The individual financial statements for the parent entity show the following aggregate amounts:

	2013 $'000	2012 $'000
Balance sheet		
Total assets	**773,963**	787,185
Shareholders' equity		
Issued capital	**707,693**	704,184
Share-based payments reserve	**11,386**	8,014
Retained earnings	**54,884**	74,987
	773,963	787,185
Profit or loss for the year	**50,000**	90,000
Total comprehensive income	**50,000**	90,000

(b) Guarantees entered into by the parent entity

The parent entity is a guarantor under the Bradken Group - Common Terms Deed Poll and unconditionally and irrevocably guarantees payments due in connection with any financing facilities owed by any Group company.

(c) Contingent liabilities of the parent entity

The parent entity did not have any contingent liabilities as at 30 June 2013 or 30 June 2012.

(d) Contractual commitments for the acquisition of property, plant or equipment

The parent entity did not have any contractual commitments for the acquisition of property, plant or equipment at 30 June 2013 or 30 June 2012.

37 Events occurring after balance sheet date

No material events have occurred that affect the operations of the Group from the end of the financial period ended 30 June 2013 to the date of issue of this report.

In the directors' opinion:

(a) the financial statements and notes set out on pages 28 to 89 are in accordance with the Corporations Act 2001, including

(i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

(ii) giving a true and fair view of the consolidated entity's financial position as at 30 June 2013 and of its performance for the financial year ended on that date; and

(b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable, and

(c) at the date of this declaration, there are reasonable grounds to believe that the members of the extended closed group identified in Note 31 will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee described in Note 31.

Note 1(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The directors have been given the declarations by the chief executive officer and chief financial officer required by section 295A of the *Corporations Act 2001*.

This declaration is made in accordance with a resolution of the directors:

Independent auditor's report to the members of Bradken Limited

Report on the financial report

We have audited the accompanying financial report of Bradken Limited (the company), which comprises the balance sheet as at 30 June 2013, the income statement and statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration for Bradken Limited (the consolidated entity). The consolidated entity comprises the company and the entities it controlled at year's end or from time to time during the financial year.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 1(a), the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with *International Financial Reporting Standards*.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the consolidated entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

PricewaterhouseCoopers, ABN 52 780 433 757
PricewaterhouseCoopers Centre, 26 Honeysuckle Drive, PO Box 798, NEWCASTLE NSW 2300
T: +61 2 4925 1100, F: +61 2 4925 1199, www.pwc.com.au

Auditor's opinion

In our opinion:

(a) the financial report of Bradken Limited is in accordance with the *Corporations Act 2001,* including:

   (i) giving a true and fair view of the consolidated entity's financial position as at 30 June 2013 and of its performance for the year ended on that date; and

   (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*.

(b) the financial report and notes also comply with International Financial Reporting Standards as disclosed in Note 1(a).

Report on the Remuneration Report

We have audited the remuneration report included in pages 16 to 24 of the directors' report for the year ended 30 June 2013. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's opinion

In our opinion, the remuneration report of Bradken Limited for the year ended 30 June 2013, complies with section 300A of the *Corporations Act 2001*.

Directors' Report

Your directors present their report on the consolidated entity consisting of Bradken Limited and the entities it controlled at the end of, or during, the half-year ended 31 December 2013.

Directors

The following persons were directors of Bradken Limited during the whole of the half-year and up to the date of this report:

Name

Nick Greiner
Non Executive Chairman

Brian Hodges
Managing Director

Phil Arnall
Non Executive Director

Eileen Doyle
Non Executive Director

Greg Laurie
Non Executive Director

Peter Richards
Non Executive Director

David Smith
Non Executive Director (appointed 1 February 2014)

Commentary on results and review of operations

Financial Overview

	HY14	HY13	Change
NPAT	$38.1m	$46.7m	Down 18%
EBITDA	$86.2m	$105.1m	Down 18%
EBITDA margin	15.3%	15.5%	
Sales revenue	$563.6m	$680.5m	Down 17%
Operating cash flow	$67.0m	$70.8m	
Earnings per share	22.5 cents	27.6 cents	Down 5.1 cents
Dividends per share	15.0 cents	20.0 cents	Down 25%
LTIFR	4.8	4.3	

Net profit after tax attributable to members for the half-year was $38.1m (2013 $46.7m).

Additional information on the review of the operations of the Bradken Group during the half-year and the results of those operations is attached in the ASX Release.

State of affairs

During the period, the company announced that it has made a scrip based non-binding and indicative proposal to acquire all of the ordinary shares in Austin Engineering Ltd. (ANG) that it does not currently own at a fixed exchange ratio of 0.75 Bradken shares for one Austin share. Bradken currently owns 21.5% of the outstanding shares in ANG. Discussions remain ongoing.

Segment revenues and results

A summary of consolidated revenues and results for the half-year by significant industry segments is set out on pages 10 and 11.

Auditors' independence declaration

A copy of the auditors' independence declaration as required under section 307C of the *Corporations Act 2001* is set out on page 3 and forms part of this report.

Rounding of amounts

The company is of a kind referred to in Class order 98/0100, issued by the Australian Securities and Investments Commission, relating to the "rounding off" of amounts in the director's report and financial report. Amounts in the directors' report and financial report have been rounded off to the nearest thousand dollars in accordance with that Class Order unless otherwise noted.

This report is made in accordance with a resolution of directors.

The above consolidated statement of cash flows should be read in conjunction with the accompanying notes.

1 Basis of preparation of half-year financial report

This general purpose consolidated financial report for the interim half year reporting period ended 31 December 2013 has been prepared in accordance with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Act 2001.

This interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2013 and any public announcements made by Bradken Limited during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period. The presentation of financial information may also differ to the previous financial report to facilitate comparability of current year financial information.

(a) Impact of standards issued but not yet applied by the entity

In December 2009, the AASB issued AASB 9 Financial Instruments which addresses the classification and measurement of financial assets and may affect the group's accounting for its financial assets. The standard is not applicable until 1 January 2015 but is available for early adoption. The Group is yet to assess its full impact. The Group has not yet decided when to adopt AASB 9.

(b) Impact of adoption of the revised AASB 119 Employee Benefits

Defined benefit superannuation plans

The group operates three defined benefit plans in its North American operations. The revised AASB 119 has been applied retrospectively from 1 July 2012. This has not had a material impact on the financial statements as the only change in the Group's accounting policy is with respect to the way the Group accounts for the expected return on plan assets. The difference between actual returns and the amount reported in the profit and loss will permanently bypass the profit and loss by being recorded as an actuarial variance.

The Group recognises a liability or asset in respect of defined benefit superannuation plans in the statement of financial position measured as the present value of the defined benefit obligation at the end of the reporting period less the fair value of the superannuation fund's assets at that date. The present value of the defined benefit obligation is based on expected future payments which arise from membership of the fund to the end of the reporting period, calculated on a regular basis by independent actuaries using the projected unit credit method.

Expected future payments are discounted using market yields at the end of the reporting period on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income.

(c) Changes in accounting policy

The following accounting standards are applicable to the Group for the first time during the current period.

AASB 10 Consolidated Financial Statements

AASB 11 Joint Arrangements

AASB 12 Disclosure of Interests in Other Entities ; and

AASB 13 Fair Value Measurement

The adoption of these standards did not have a significant impact on the Group's financial results, balance sheet or disclosures, with the exception of *AASB 13 Fair Value Measurement* , which has resulted in additional disclosure in the notes to the financial statements (Note 7). All other accounting policies are consistent with those adopted and disclosed in the annual financial report for the year ended 30 June 2013. Accounting policies are applied consistently by each entity in the Group.

2 Investments in associates

	Half-year December 2013 $'000
(a) Movements in carrying amounts	
Carrying amount at the beginning of the financial period	**49,261**
Increase in investment by way of share purchases in current period *	**6,441**
Share of profits after income tax	**952**
Dividends received/receivable	**(1,649)**
Carrying amount at the end of the financial period	**55,005**

* During the period, Bradken fully subscribed to its entitlement under the Austin Engineering Limited share placement. This resulted in Bradken paying $6,440,928 to receive 2,012,790 shares in Austin Engineering Limited. As a result there has been no change to Bradken's ownership interest (21.47%) in Austin Engineering Limited.

3 Segment information

(a) Description of segments

Operating segments are reported in a manner that is generally consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Managing Director.

Segment revenues, expenses, assets and liabilities are those that are directly attributable to a segment. Segment assets include all assets used by a segment and consist primarily of receivables, inventories and property, plant and equipment, net of related provisions.

Segment revenues, expenses and results include transfers between segments. Sales of scrap between controlled entities are made on an "arm's-length" basis and are eliminated on consolidation. All other transfers are made at variable cost and are eliminated on consolidation.

Mining Products consists of design, supply and service of wear components for all types of earth moving in the Mining and Quarry industries. Mineral Processing consists of design supply and service of mill liner components in the Mineral Processing industries. Rail is a package provider of Freight Rollingstock products and services including freight wagons, bogies, drawgear, inventory management, spare and renewed parts and the maintenance and refurbishment of rollingstock. Engineered Products, based in North America, is a supplier of cast parts to the Energy, Power, Cement, Industrial and Rail Transport industries specialising in large (greater than 4,500 kg) highly engineered steel castings.

The "all other" segment also represents other smaller businesses including Cast Metal Services.

(b) Segment information provided to the Managing Director

The segment information provided to the Managing Director for the reportable segments for the half-year ended 31 December 2013 is as follows:

	Mining Products	Mineral Processing	Engineered Products	Rail	All other segments	Total
	$'000	$'000	$'000	$'000	$'000	$'000

Corporate liabilities are not disclosed separately within the half year financial statements.

3 Segment information (continued)

The Managing Director assesses the performance of each operating segment based on a measure of gross margin. Gross margin is considered the most relevant measure of individual segment results as manufacturing plants all make product for the various segments and transfer product at cost. This measurement basis excludes the allocation of manufacturing variances and overheads from individual manufacturing plants as any allocation would be arbitrarily based.

A reconciliation of standard gross margin to operating profit before income tax is provided as follows:

	Half-year	
	December 2013 $'000	December 2012 $'000
Gross margin	**190,883**	213,717
Fixed manufacturing overheads and other cost of sale adjustments	**(77,685)**	(70,197)
Other income	**4,050**	4,311
Selling and technical expenses	**(29,307)**	(31,079)
Administration expenses	**(32,544)**	(39,272)
Finance costs	**(17,287)**	(15,768)
Share of net profit of associates accounted for using the equity method	**952**	4,053
Profit before income tax	**39,062**	65,765

The amounts provided to the Managing Director with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset.

4 Dividends

	Half-year	
	December 2013 $'000	December 2012 $'000
Ordinary shares		
Dividends provided for or paid during the half-year	**30,463**	36,255
Dividends not recognised at the end of the half-year		
In addition to the above dividends, since the end of the half-year the directors have declared the payment of an unfranked dividend of 15.0 cents per fully paid ordinary share (2012 - 20.0 cents fully franked based on tax paid at 30%). The aggregate amount of the dividend to be paid on 21 March 2014 out of retained profits at 31 December 2013, but not recognised as a liability at the end of the half-year, is	**25,386**	33,848

5 Significant items

During the period the company reached a commercial in confidence settlement with Norcast S.ar.L regarding the 2011 acquisition of Norcast. An amount of $30,412k (before tax) had been expensed during the 30 June 2013 financial year pursuant to the legal case relating to the Federal Court of Australia judgment sum, interest and associated costs. As a consequence of the Federal Court of Australia setting aside its initial judgement and the settlement reached with Norcast S.ar.L, a gain of $13,668k (before tax) has been recorded in the current period. The income tax benefit associated with this settlement has been reflected in the current period.

6 Equity securities issued

	Half-year		Half-year	
	December 2013 Shares	December 2012 Shares	**December 2013 $'000**	December 2012 $'000
Issues of ordinary shares during the half-year				
Dividend reinvestment plan issues	**-**	611,286	**-**	3,809
Adjustments to Institutional Placement costs June 2011	**-**	-	**-**	18
	-	611,286	**-**	3,827

7 Fair value measurement

Derivative financial instruments are initially recognised in the statement of financial position at cost and subsequently remeasured to their fair value. Accordingly there is no difference between the carrying value and the fair value of derivative financial instruments at reporting date.

The Group uses two different methods in estimating the fair value of a financial instrument. The methods comprise:-

- Level 1 - the fair value is calculated using quoted prices in active markets; and
- Level 2 - the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

The valuation techniques applied by the Group are consistent with those applied and disclosed in the 2013 annual financial report. As at 31 December 2013, all derivatives measured at fair value are done so using the Level 2 method. There were no transfers between Level 1 and Level 2, and no financial instruments were measured at Level 3 (where fair value is measured using unobservable inputs for the asset or liability) for the periods presented in this report.

The carrying amounts and fair values of interest bearing liabilities at balance date are:

	31 December 2013		30 June 2013	
	Carrying amount $'000	**Fair value $'000**	Carrying amount $'000	Fair value $'000
On balance sheet				
Non traded financial liabilities				
Bank overdrafts	**3**	**3**	667	667
Bank loans	**336,541**	**339,253**	291,824	294,147
US private placement	**220,895**	**225,051**	218,675	223,025
Other loans	**870**	**870**	975	975
Lease liabilities	**12,548**	**12,548**	11,891	11,891
	570,857	**577,725**	524,032	530,705

8 Offsetting financial assets and liabilities

Bradken presents derivative assets and derivative liabilities on a gross basis. Certain derivative assets and liabilities are subject to enforcable master netting arrangements with individual counterparties if they were subject to default. As at 31 December 2013, if these netting arrangements were to be applied to the derivative portfolio, derivative assets are reduced by $2.75m (30 June 2013: $4.4m) and derivative liabilities are reduced by $2.75m (30 June 2013: $4.4m).

Directors' declaration

In the directors' opinion:

(a) the financial statements and notes set out on pages 4 to 12 are in accordance with the Corporations Act 2001, including:

  (i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements; and

  (ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2013 and of its performance, for the half-year ended on that date; and

(b) there are reasonable grounds to believe that Bradken Limited will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of directors.

To the members of Bradken Limited

Report on the Half Year Financial Report

We have reviewed the accompanying half year financial report of Bradken Limited, which comprises the consolidated statement of financial position as at 31 December 2013, the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the half year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the half year end or from time to time during the half year.

Directors' responsibility for the half year financial report

The directors of the company are responsible for the preparation of the half year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act* 2001 and for such internal controls that the directors determine are necessary to enable the preparation of the half year financial report that is free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2013 and its performance for the half year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Bradken Limited and the entities it controlled during the half year, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We have given to the directors of the company a written Auditor's Independence Declaration, a copy of which is referenced in the Directors' Report.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half year financial report of Bradken Limited is not in accordance with the *Corporations Act 2001*, including:

a) giving a true and fair view of the consolidated entity's financial position as at 31 December 2013 and of its performance for the half year ended on that date; and

b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Code of Conduct and Ethics

Proud to Belong

BRADKEN®

Code of Conduct and Ethics

Bradken is a company with a proud 85 year history. As employees, we pride ourselves on being professional and ethical in all areas of business and strive to ensure that at all times we maintain our integrity and responsibility to the wider community.

We take responsibility for our own behaviour, for the actions we take and for the way in which we conduct both our personal dealings and those of Bradken.

As employees we have a duty to protect and enhance the reputation of Bradken while conducting all business activities. Whilst this may be challenging and require considerable courage, it is critical to the company's long term success.

Bradken's Values continue to evolve, to ensure that the company maintains its standing as a good corporate citizen and complies with all relevant legislation, company policies, guidelines and procedures.

I endorse this publication and encourage all employees to embrace these Values and in all dealings, to act professionally and ethically.

Brian Hodges - Managing Director and CEO

Proud to Belong

Proud to Belong

Our Business Model

The creation of differentiated consumable products for the resources industry and sale of their value to our customers.

Proud to Belong

Our Business Culture

We Value People Who:

- Are health, safety and environmentally responsible;
- Have exemplary personal integrity;
- Enjoy a healthy family and social life;
- Strive for continuous improvement in all that they do;
- Are customer focused;
- Possess courage and loyalty;
- Are highly motivated;
- Work together for common goals;
- Respect the individual rights of others,

ensuring Bradken is a good corporate citizen.

BRADKEN

A number of core values define Bradken as both an employer and a corporate citizen.

Proud to Belong

Health, Safety and Environment

Bradken acknowledges that health, safety and environment (HS&E) is a critical and integral part of effective business and management practices. Bradken integrates HS&E into all areas of its operations so that our sites, equipment and work practices are healthy, safe and environmentally responsible. Bradken promotes HS&E as a value, to ensure that a positive culture of safe behaviour evolves through employee involvement in ongoing education and training programs.

BRADKEN

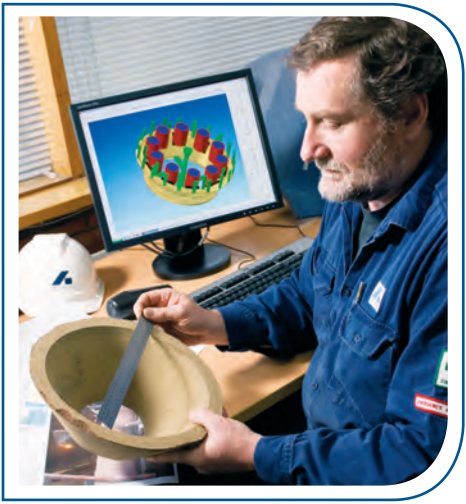
Exemplary Integrity

At Bradken, we place a high importance on personal integrity. We value employees who strive at all times to adhere to the law and meet the expectations of their colleagues, customers and the community.

Work Life Balance

At Bradken, we recognise that a happy, healthy work life must be balanced by an employee's family, friends and community involvement. For this reason, Bradken values employees' commitments outside the workplace as much as we value success at work.

Continuous Improvement



To be successful in our markets, Bradken must create increased value for our customers. We recognise that this success can only be achieved through ongoing technological development, employee education and training, and the commitment of our employees to continuous improvement and innovation.

Customer Focused

Our customers are an integral part of our business. We value employees who strive at all times to work with our customers to understand their needs and expectations and to build positive business relationships by delivering on their commitments.

Courage and Loyalty

The dedication of our employees through their service is highly valued at Bradken. Our employees' contributions of ideas, skills, energy and experience allow us to grow and prosper. While the easy solution is safe and comfortable, Bradken encourages its employees to explore alternative options, to take risk and to go the extra yard when exploring new avenues for success.

Proud to Belong

Motivation

Bradken values employees who are self motivated and committed to success. We strive to foster a work environment which empowers all employees to achieve outstanding results.

BRADKEN

Teamwork

Bradken acknowledges that teamwork is the cornerstone to our future success. Only when our employees pool their skills, talent and knowledge can we achieve our ambitious goals. We recognise the whole is more than the sum of the parts.

Respect

At Bradken, we not only respect and appreciate each other's differences, we endeavour to learn and grow through the experience.

BRADKEN

Our Business Dealings

In our business dealings, we set the highest standards by:

- Striving to be good corporate citizens;
- Respecting the law;
- Respecting confidentiality and privacy;
- Avoiding conflicts of interest;
- Acting with honesty and integrity;
- Maintaining personal and professional values; and
- Accepting the consequences of our actions.

1. We strive to be good corporate citizens

We uphold Bradken's Values and are committed to the business objectives of the Company while striving to be good corporate citizens.

In all dealings, we consider the effects of our actions on our colleagues, customers and the wider community.

We believe that good corporate citizenship is more than an occasional gesture, but an ideal that is integrated into every decision-making process.

2. We respect the law and act accordingly

We understand that violation of laws and regulations can have serious consequences for Bradken and ourselves, therefore, we comply with the laws and regulations in all countries in which the company operates or transacts business.

We follow and obey the policies and procedures prescribed by Bradken so as to ensure that our actions comply with good business practices, ethical behaviours and expectations.

Throughout the course of our employment and in compliance with corporate policy, we notify the appropriate people responsible for taking action when we observe or become aware of any breach of the law.

BRADKEN

3. We respect confidentiality and privacy

At all times, we treat as confidential the business affairs of Bradken and those of our customers, colleagues and business associates, maintaining compliance with the privacy laws governing the use and disclosure of information.

We respect the privacy of others and keep confidential the disclosure of all sensitive, personal or privileged information of others.

We do not use confidential information for personal gain or for the benefit of others such as friends, relatives or business associates.

If at any time we are in doubt or uncertain whether an action we have taken has been or resulted in a breach of this Code, we can raise the matter, in confidence, with our Supervisor or Manager and be assured that we will receive a fair hearing.

4. We avoid conflicts of interest

We avoid participating in activities that involve a conflict with our duties and responsibilities to Bradken or which may be perceived as prejudicial to Bradken's business interests.

We do not become involved in any business activities outside our employment that could adversely affect our ability or commitment to perform our duties and responsibilities to Bradken.

We do not solicit, accept or offer inducements or favours, which might influence or adversely affect our business judgement, professionalism or relationships with others.

5. We act with honesty and integrity

We are judged by our actions, therefore, if we act with honesty and integrity in all dealings and strive to always do the right thing, we will earn the respect and admiration of others.

We do not tolerate dishonest behaviour by our colleagues or customers and always endeavour to avoid conflict or activities, which may harm the good reputation of Bradken and ourself.

We do not use information provided by others for personal gain or betterment and in all things, endeavour to provide accurate and honest information to our customers and colleagues.

6. We maintain our personal and professional values

In all ways, to foster and preserve our personal reputation and that of Bradken, we conduct ourselves in a professional and ethical manner and pursue excellence in our pursuit of the highest possible quality of work.

We maintain and strive to improve the skills, knowledge and competencies required to fulfil our role in the company and always work as an effective team member, striving for a safe, harmonious and effective work environment.

We do not tolerate harassment or unlawful discrimination and are committed to diversity, equal opportunity and a “fair go” for all.

7. We accept the consequences of our actions

We understand that our actions can have a dramatic effect on the performance of our duties and the reputation of Bradken and therefore the responsibilities we have to Bradken.

We accept as a consequence of our actions in violating this Code of Conduct and Ethics that disciplinary action may be an outcome and in extreme cases such action may result in the termination of our employment contract.

Other Business Practices

Restrictive Trade Practices

Bradken employees will comply with the law at all times. As trade practices principles affect the Company's daily business operations, it is essential that all Company business activities compete in conformity with prescribed legislation.

Employees will comply with legislation established to provide, maintain and protect competition for the benefit of all customers. No employees shall make any untruthful remarks about any of the Company's competitors, their products or services.

The basic principles underlying these rules are that:

- all companies must act independently of each other in their business activities and maintain healthy rivalry;
- all companies must be considerate to their customers and suppliers but distant from their competitors, and
- large companies must not use their size to manipulate smaller ones.

The following conduct is prohibited, no matter what the circumstances:

- **Resale price maintenance** i.e. requiring distributors to sell products at certain prices or set a minimum price;
- **Forcing anothers' product** i.e. placing a condition on the supply of goods or services where a customer must acquire goods or services from a nominated supplier;

- **Price fixing** i.e. making an agreement which would have the purpose or effect of fixing, controlling or maintaining the price of goods or services;
- **Arrangements to exclude** i.e. an arrangement between parties to exclude another;
- **Exclusive dealing** i.e. where one entity in a business relationship places restrictions on the freedom of the other to deal with outsiders – that is, to trade competitively;
- **Anti-competitive arrangements** i.e. arrangements between businesses which prevent, restrict or distort competition;
- **Secondary boycott** i.e. an attempt to influence the actions of one business by exerting pressure on another business;
- **Misuse of market power** i.e. preventing the entry of a competitor into a market, or deterring or preventing a competitor from engaging in competitive conduct in a market; and
- **Unconscionable conduct** i.e. the use of a superior bargaining position to enforce harsh contractual conditions against another party.

In addition to the above prohibitions, there are high risk situations, which employees should be cognisant of. These include:

- Pricing arrangements;
- Dealing with competitors;
- Dealing with trade associations;
- Refusal to supply, and
- Following or being a market leader.

BRADKEN

Travelling on Behalf of Bradken

Travelling, particularly to overseas countries, means that we must be conscious of any cultural differences which may exist. Whilst we endeavour to respect these differences, we must uphold the values that are core to Bradken.

Bradken is responsible for an employee's safety 24 hours a day when travelling. To this end, Bradken provides travel insurance for all employees throughout the duration of their travel. This means that employees are representatives of Bradken both during and outside normal working hours.

It is expected that travellers will make appropriate enquiries prior to visiting unfamiliar destinations including seeking recommendations for vaccinations or other specific medications, to ensure that they are aware of potential health risks, regional issues and differing laws and customs. When travelling in foreign countries, engaging an experienced guide or consulting local Bradken senior management may be the best way of avoiding any potentially unsafe situations.

Bradken will not tolerate any activities that may lead to involvement in excessive consumption of alcohol, taking of illicit drugs, prostitution, illegal activities or any behaviour that may bring into disrepute either the Company or an employee.

Bradken in Other Countries

Bradken is developing new overseas businesses and the Company's reputation and culture are critical assets to its continuing success.

When overseas, all employees need to be cognisant of the fact that they are ambassadors of both Bradken and their country.

Whilst overseas, employees should be aware of the following.

- **You may find yourself in a situation in which you do not wish to participate**. It is important that you say "no" in a way that will not offend.
- **You may be seen as having more authority than your position holds**. You need to be careful to act within your authority limits and ensure that your behaviour is not misleading.
- **You may need to take public transport from a location frequented by beggars and pickpockets where English signage is poor**. It is often better to have a local person take you to these areas.
- **You may be required to take a taxi to your destination**. Look at the condition of the vehicle and ensure that it is with a reputable company.
- **You may be invited to accept a gift**. Look at the appropriateness of the gift. Gifts are not normally accepted during any negotiation period.
- **You may be offered an inducement**. Bradken does not participate in or condone the practice of accepting gratuities, bribes or inducements by its employees or business partners.

BRADKEN

Whistleblowing

In keeping with Bradken's goal of creating a climate in the company where the truth can be heard, all employees are actively encouraged to challenge any behaviour which they believe to be inconsistent with any of our Values or our Code of Conduct and Ethics. All such challenges, including those concerning acting with integrity, will be handled constructively, with the objective of either remedying the issue or explaining why the behaviour is considered consistent with our business culture.

We encourage all of our employees to report any behaviour which they, acting in good faith, believe to be:

- Dishonest;
- Fraudulent;
- Corrupt;
- Illegal (including theft, drug sales/use, violence or threatened violence and criminal damage against property);
- In breach of government legislation;
- Unethical;
- Seriously improper (including harassment and bullying);
- Unsafe work practice; or
- Behaviour which may cause financial and non-financial loss to Bradken or would be otherwise detrimental to the interests of Bradken.

Individuals who report or seek to report unlawful or unethical behaviour will be given a guarantee of anonymity (if anonymity is desired by them), subject to any legal requirements which may require disclosure of the identity of the individual.

Bradken will ensure that any individual who makes a report is kept informed about the outcomes of the investigation of his or her report, subject to considerations of the privacy of those against whom the allegations are made and our customary practices of confidentiality.

Bradken has in place internal reporting arrangements to ensure that all verifiable, unlawful or unethical behaviour is dealt with appropriately, and commits to rectify the wrong doing verified by the investigation to the extent practicable in all the circumstances, and ensure that systematic and recurring problems of unlawful or unethical behaviour are reported to those with sufficient authority to correct them.

Equal Opportunity

Bradken is committed to providing a work environment in which the principles of equal opportunity are incorporated into all business decisions. Bradken, as an employer has a strong commitment to equal opportunity in employment and recognises the right of all employees to be treated fairly and with respect at all times and works in an environment free from harassment and discrimination.

Bradken will not tolerate discrimination in any form and will take disciplinary action against any person or persons discriminating against another individual or group.

BRADKEN

BRADKEN®

10. Has the business or any of the business's owners of shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?
A: No.
11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, probed the last three (3) years audited financial statements for each entity.
A: Please see Appendix 1 for CNR CRC's brief financial statements. A full financial statement has been provided for CNR CRC in this proposal in **PART B ATTACHMENTS**- Attachment 2.
12. Provide the business's the current code of business ethics or equivalent.
A: Please see our response as below:

CNR CRC is a world class manufacturer that adopts as its mission to become the leader in manufacturing, innovation, design, technical capability, and customer support. We believe in honesty, integrity, mutual support and respect. Our values shape the culture of our company. It is through these values, and their practice in our world, that we become what we do. We believe that our actions, when viewed by all others, must support our intentions. Our success depends upon the ability of our employees and all of our representatives, to make decisions and to act in a manner that is consistent with these

values. We will conduct our business with honesty and integrity, and we will act in a manner that does not harm the reputation of our company.

What Do We Value?

Excellence

We respect winning with integrity.

We strive to set and achieve the highest standards.

We want to do things the right way.

We seek to learn continuously.

We strive to make better places of the communities we work, serve, and live.

Teamwork

We treat one another with respect and communicate clearly.

We encourage ideas.

We support each other and the communities we work, serve and live in.

We treasure diversity because it fosters innovation.

We take pride in our work and in the products we make.

We assume responsibility for our work and our actions.

We create an environment where questions and issues can be raised without fear.

Customer Relations

We strive to execute flawlessly.

We continuously seek to improve our products, our service, and our responsiveness.

Our customer relationships are based upon trust and mutual advantage.

We compete vigorously, with a sense of pride in being fair and honest in our actions.

We try to anticipate the needs of our customers.

We take pride in our relationships, our dealings, and our position in serving our customers.

MANAGEMENT REPORT OF THE MANAGEMENT BOARD

TO THE COMBINED GENERAL MEETING OF 14 SEPTEMBER 2011

Ladies and gentlemen,

We have convened this General Meeting, in compliance with legal and regulatory requirements, to submit for your approval the Faiveley Transport annual and consolidated financial statements at 31 March 2011.

These financial statements have been prepared in accordance with Articles L 232-1 and L 233-16 of the Commercial Code.

The parent company and consolidated financial statements have been approved by the Management Board on 9 June 2011 and were presented to the Supervisory Board and approved at their meeting of 9 June 2011.

This report has been compiled by applying Articles L 232-1 paragraph 2 and L 233-26 of the Commercial Code. It was made available to the shareholders prior to the General Meeting in accordance with legal and regulatory requirements.

The annual financial statements of Faiveley Transport and the consolidated financial statements have been compiled in conformity with legal and regulatory rules of presentation and valuation.

- Change to the term of office of members of the Supervisory Board:

  The Combined General Meeting of 13 September 2010 amended the bylaws of the Company and reduced the term of office of members of the Supervisory Board to three years.

- Changes in Group governance:

  On 1 September 2010, Guillaume Bouhours was appointed Chief Financial Officer to replace Etienne Haumont. On the same day, Etienne Haumont resigned his term of office as a member of the Management Board.

  Robert Joyeux resigned his duties as Chief Executive Officer and Chairman of the Management Board of Faiveley Transport at 31 March 2011. On 1 April 2011, Thierry Barel, previously Deputy Chief Executive Officer, was appointed Chief Executive Officer and Chairman of the Management Board. On the same day, Guillaume Bouhours was appointed as a member of the Management Board.

- The Combined General Meeting of 13 September 2010 delegated to the Management Board its powers in relation to:

  – granting share subscription and/or purchase options;
  – allocating free shares, also known as performance-based shares, either existing or to be issued;
  – issuing shares or marketable securities giving right to new or existing shares of the Company, with, in cases new shares are granted, the waiver of the pre-emption right.

The Management Board decided, in its meetings held on 3 December 2010 and 24 February 2011, to implement the authorisation to issue free shares, for a total of 69,700 shares. The final allocation, in accordance with pre-defined performance criteria, will take place at the end of a two-year vesting period starting from the date of allocation. Thierry Barel, a beneficiary of free shares as part of this plan, must retain the shares allotted to him in his capacity as Chief Executive Officer. The Supervisory Board of the Company decided in its meeting of 26 November 2010 that the Chief Executive Officer must retain at least 50% of the shares allotted to him by the Management Board in relation to this plan, after the end of the vesting period established by plan regulations. This rule will apply until the Chief Executive Officer holds at least one year of net salary in Company shares granted within the framework of the various stock option or free share allocation plans of the Company.

A. GROUP OPERATIONS 2010/2011 – CONSOLIDATED FINANCIAL STATEMENTS

In accordance with legal provisions, the financial statements of companies under direct or indirect control of Faiveley Transport were consolidated at 31 March 2011 with those of the parent company. The principles and conditions of this consolidation for the financial year 2010/2011, the related scope of consolidation and the restatements undertaken in accordance with the accounting techniques of consolidation are presented in the notes to the consolidated financial statements.

A.1. Consolidation methods

The year ended on 31 March 2011 and had a standard duration of 12 months.

A.2. Changes in group structure

- Newly-created companies:

  On 30 July 2010, Faiveley Transport's American subsidiary, Ellcon National, and Amsted Rail, worldwide leader for the manufacture of bogy components for the freight market announced the creation of a joint venture, Amsted Rail-Faiveley LLC, based at Ellcon National's premises in Greenville, South Carolina and whose share capital is under the majority control of Faiveley Transport USA.

  This new company started operating on 1 October 2010.

  Faiveley Transport brings to this company a wide range of AAR (Association of American Railroads)-approved brake equipment destined towards the railway freight market, as well as its engineering & project management abilities and associated industrial production methods – assets which were previously held by its American subsidiary, Ellcon-National. Ellcon-National mainly retains its passenger train activities.

Amsted Rail provides the company with access to its US and international distribution network, as well as a portfolio of braking equipment that will complement Ellcon-National's contribution.

Faiveley Transport USA initially held 67.5% of the joint venture's share capital and is in charge of appointing the management. Amsted Rail is entitled to increase its investment from 32.5% to a maximum of 49% by re-investing the dividends received from the joint-venture.

- Acquisitions of subsidiaries:
  - In the fourth quarter of 2010/11, Faiveley Transport announced the acquisition of 80% of Urs Dolder AG, a company based in Haegendorf, Switzerland. Urs Dolder AG employs 19 people with annual sales of €4 million. The company produces heating devices for the railway industry.
    This acquisition will enable the Faiveley Transport Group to offer a complete system of railway air treatment – and air conditioning, both for local Swiss customers and for other carbuilders and operators worldwide.
  - In the fourth quarter of 2010/11, Faiveley Transport acquired the 25% minority interests in its Czech subsidiary, Faiveley Transport Lekov, its centre of expertise for pantographs and associated electromechanical equipment.
- Merger:

  At 31 March 2011, Espas was merged into Faiveley Transport Tours. This merger was recognised for accounting and tax purposes retrospectively to 1 April 2010.

A.3. Subsidiary operations

- **Annual sales**

By region of delivery	2010/2011	2009/2010
Europe	557,966	594,118
Americas	79,141	67,800
Asia – Pacific	268,907	198,319
Rest of world	7,858	15,711
TOTAL GROUP	**913,872**	**875,948**

Faiveley Transport reported sales growth of 4.3% for the 2010/11 financial year, to €914 million. On a like-for-like basis, Group sales grew moderately (organic growth of 0.5%), in line with forecasts released at the start of the year. The foreign exchange effects had a favourable effect of 3.8% on growth.

The moderate growth in sales on a like-for-like basis reflected contrasting developments in the various regions:

- strong growth in the Asia-Pacific region (up 25%), driven by China and India;
- buoyant sales in the Americas (up 7%), due to a strong performance in Brazil and the beginning of a recovery in the freight market in the US; and
- a decline in Europe (down 7%), in particular in Spain (impact of the economic crisis) and in France (finalisation of delivery of major projects, such as AGC).

The Customer Services business achieved organic sales growth of 5%, thanks to a larger customer base and a strategy of expanding the range of services proposed to railway operators. Original equipment sales declined by 2%, primarily due to the postponement of the delivery schedule of a number of customer projects.

- **Sales by activity**

	2010/2011	2009/2010	2008/2009
Air conditioning	15%	17%	18%
Couplers	2%	2%	2%
Customer Services	33%	31%	31%
PIC	7%	8%	9%
Brakes	25%	24%	25%
On-board doors	12%	13%	12%
Platform doors and gates	6%	4%	4%

The relative weight of activities within the Group remained stable compared to the previous financial year.

A.4. IFRS consolidated financial statements of Faiveley Transport

4.1. PUBLISHED FINANCIAL STATEMENTS

- **Income statement**

	2010/2011	2009/2010	2008/2009
Sales	**913,872**	**875,948**	**852,024**

Net earnings per share	5.43	5.04	4.06

(*) Operating profit + amortisation and depreciation.

- **Operating profit**

Operating profit totalled €129.8 million, which is 14.2% of sales. This is a continuing improvement compared to the previous year (up 9.2%).

After deducting restructuring costs and adding net proceeds from the disposal of non-current assets, operating profit grew by 7.1% compared to 2009/2010, to €126.7 million. The operating margin was thus 13.9%.

The various items making up operating profit may be analysed as follows:

	2010/2011	2009/2010	2008/2009
Sales	913,872	875,948	852,024
Gross profit	261,468	247,031	242,291
Administrative costs	(65,564)	(68,758)	(73,938)
Sales and marketing costs	(50,236)	(46,107)	(38,451)
R&D costs	(11,638)	(11,425)	(12,864)
Other operating income and expenses from recurring operations	(4,248)	(1,890)	(2,540)
Profit from recurring operations	**129,782**	**118,851**	**114,498**
Non-recurring income and expenses	(3,116)	(604)	(711)
OPERATING PROFIT	**126,666**	**118,247**	**113,787**

– Gross profit

The Group's gross profit amounted to €261.5 million for the year to 31 March 2011 (28.6% of sales), compared to €247 million (28.2% of sales) for the year to 31 March 2010 and €242.3 million (28.4% of sales) for the year to 31 March 2009.

The 0.4 percentage point increase in the gross profit margin during the year was primarily due to:

- a favourable mix of projects and activities;
- improved productivity and purchasing.

– Administrative costs

Administrative costs amounted to €65.6 million during 2010/2011, compared to €68.8 million during the previous financial year and €73.9 million during 2008/2009, which was a decline of 4.7% during the year, compared to a decrease of 7% during the 2009/2010 period. These costs represented 7.2% of sales, compared to 7.8% for the year to 31 March 2010 and 8.7% for the year to 31 March 2009.

The decrease in administrative costs during the year was primarily due to:

- the reclassification of the CVAE (*value-added business tax*) tax as income tax in 2010/2011, for an amount of €1.9 million;
- the cost reduction plans implemented since the 2009/2010 financial year.

– Sales and marketing costs

Sales and marketing costs were €50.2 million during 2010/2011, compared to €46.1 million during the previous financial year and €38.5 million during 2008/2009, which was an increase of 9% over the previous period and 19.9% over the 2009/2010. They represented 5.5% of sales for the year to 31 March 2011, compared to 5.3% for the year to 31 March 2010 and 4.5% for the year to 31 March 2009.

The increase in sales and marketing costs primarily resulted from the growth in the sales force and tendering expenses, within a business environment that remained buoyant during the year. These sales and marketing efforts enabled the Group to increase its order book significantly during the period.

– Research and development costs

Research and Development costs are taken to the balance sheet if they meet the capitalisation criteria set by IAS 38. If not, they are recognised as expenses.

The Group's research and development costs that were recognised as expenses represented €11.6 million during the 2010/2011 financial year (1.3% of sales), compared to €11.4 million (1.3% of sales) for the year to 31 March 2010 and €12.9 million (1.5% of sales) for the year to 31 March 2009.

– Other operating income and expenses

Other operating income and expenses correspond to a net expense of €4.2 million during the period, compared to a net expense of €1.9 million for the year to 31 March 2010 and €2.5 million for the year to 31 March 2009.

The increase in this heading was primarily due to the decline in other operating income. In 2009/10, the Group recognised the compensation paid by Wabtec following the favourable arbitration award of 24 December 2009 (see 6.2 Risk of counterfeit).

– Profit from recurring operations

As a result, profit from recurring operations increased by 9.2% compared to the previous year to €129.8 million, being 14.2% of sales. It had totalled €118.9 million (13.6% of sales) for the year to 31 March 2010 and €114.5 million (13.4% of sales) for the year to 31 March 2009.

During the 2010/2011 financial year, the reclassification of CVAE as income tax had a favourable impact of 0.2 percentage points on the operating margin compared to the previous year.

– Non-recurring operating income and expenses

The majority of non-recurring operating expenses was due to restructuring costs and gains and losses from the disposal of property, plant and equipment and intangible assets.

Restructuring costs amounted to €2.6 million during the period, compared to €0.3 million for the previous year and €0.5 million for the year to 31 March 2009. During the 2010/2011 financial year, these restructuring costs primarily related to the closure of the Madrid production site and the transfer of operations to the Tarragona site.

The loss on disposal of non-current assets was €0.5 million during the period, compared to €0.3 million for the year to 31 March 2010 and €0.2 million for the year to 31 March 2009.

- **Consolidated net profit**

The consolidated net profit was €81.1 million, compared to €74.9 million of the previous financial year, which is an increase of 8.4%.

Net profit was influenced by the following items:

– Net finance cost

The net finance cost amounted to €13.4 million for the year to 31 March 2011, compared to €15.5 million for the year to 31 March 2010. This charge is analysed as follows:

- interest relating to borrowings taken out as part of the December 2008 reorganisation of the Group's bank debt for an amount of €10 million;
- the slightly unfavourable realised and unrealised foreign exchange loss on financial transactions, after deducting the value of derivative instruments, for an amount €0.3 million;
- other financial charges and income, comprising sundry bank charges, lease interest, interest on overdraft and other borrowings taken out by the subsidiaries, the interest expense on pension commitments, offset by other financial income was a net expense of €3.1 million.

Interest charges relating to borrowings decreased by €1.8 million during the financial year, due to the part repayment of the principal of the loan taken out in 2008/2009.

– Income tax

The income tax charge was €32.1 million for the year to 31 March 2011, which was a 15.2% increase compared to the previous financial year (€27.9 million for the year to 31 March 2010, down 0.9% from 2008/2009).

The €4.2 million increase in income tax during the year was primarily due to the increase in pre-tax profit, which grew from €102.7 million for the year to 31 March 2010 to €113.2 million for the year to 31 March 2011. On a constant income tax rate, the additional tax charge for the year would have been €2.8 million. In addition to the increase related to the growth in profits, the Group elected to reclassify the CVAE tax of €1.9 million as income tax. In the previous year, this tax was accounted for in operating profit.

The effective tax rate was 28.3%, compared to 27.1% for the year to 31 March 2010 and 28.3% for the year to 31 March 2009.

The current income tax rate was 27.5%, compared to 25.9% for the year to 31 March 2010 and 29.9% for the year to 31 March 2009.

– Net profit from discontinued operations

None.

– Minority interests

The minority interest's breakdown is as follows:

(€millions)	2010/2011	2009/2010	2008/2009
35.86% held by Sagard in Faiveley Transport	–	–	17.1[(1)]
2.40% held by Management in Faiveley Transport	–	–	1.2[(1)]
Other[(2)]	5.5	3.7	1.5
MINORITY INTERESTS	**5.5**	**3.7**	**19.8**

(1) Share of profit attributable to Sagard and the Management at 23 December 2008, the date their shares were purchased.

(2) At 31 March 2011, "other" primarily related to the share attributable to minority interests in Nowe GmbH (75% owned), Shanghai Faiveley Railway Technology (51% owned), Amsted Rail-Faiveley LLC (67.5% owned) and Urs Dolder AG (80% owned).

The significant increase in minority interests in 2010/2011 was primarily due to the strong operating performance of Shanghai Faiveley Railway Technology and Nowe and the creation of the joint-venture Amsted-Rail Faiveley LLC.

- **Group share of net profit**

After taking account of the above items, the Group reported a consolidated net profit of €75.7 million, compared to €71.1 million in the previous year and €51.5 million in 2008/2009.

Net earnings per share was €5.43, compared to €5.04 for the year to 31 March 2010, an increase of 7.8%. Net earnings per share was calculated after deducting the treasury shares held by Faiveley Transport, of which there were 462,777 for the year to 31 March 2011, compared to 283,889 shares for the year to 31 March 2010 and 331,195 shares for the year to 31 March 2009.

- **Summarised balance sheet**

	2010/2011	2009/2010	2008/2009 Restated *	2008/2009

(*) Restated following the adjustment of Ellcon National's acquisition goodwill during the year of allocation.

– Acquisition goodwill

Acquisition goodwill increased by €22 million, from €540 million at 31 March 2010 to €562 million at 31 March 2011.

This growth was primarily due to:
- the recognition of a USD 6.3 million (€4.6 million) increase in the acquisition goodwill following the incorporation of the Amsted-Rail Faiveley LLC joint-venture;
- the translation adjustment of the Ellcon National and Amsted Rail-Faiveley LLC goodwill (assessed in USD), which had a €1.7 million negative impact;
- the restatement of the acquisition goodwill of Faiveley Transport Lekov for a negative €0.6 million, following the acquisition of minority shareholdings in January 2011;
- the recognition of a €2.3 million goodwill following the acquisition of 80% of the Swiss company Urs Dolder AG in February 2011;
- the recognition of an additional goodwill of €3 million, following the signing of an addendum to the put options held by minority shareholders in Nowe GmbH;
- the reclassification of the Sab Wabco brand to goodwill, for an amount of €14.4 million (net of the deferred tax liability recognised when the Sab Wabco brand was first accounted for in the consolidated financial statements at 31 March 2005).

Acquisition goodwill had increased by €4.1 million, from €535.9 million at 31 March 2009 (published data) to €540 million at 31 March 2010.

This growth was primarily due to:
- the adjustment of Ellcon National's acquisition goodwill during the allocation period. The value of this acquisition goodwill increased from €24.4 million at 31 March 2009 to €25.2 million at 1 April 2009, an increase of €0.8 million.
- the translation adjustment of the Ellcon National goodwill (assessed in USD on the acquisition date) had a €0.3 million negative impact;

- the adjustment of the acquisition goodwill during its allocation period, resulting from the acquisition of minority interests in Faiveley Transport generated an increase of €0.2 million;
- the recognition of a €1 million increase in the acquisition goodwill of Faiveley Transport Lekov, following the appraisal of the put option that minority shareholders hold in respect of their shares;
- the recognition of a €2.8 million increase in the acquisition goodwill of Nowe following the appraisal of the put option that minority shareholders hold in respect of their shares;
- the recognition, as a reduction of the acquisition goodwill of Sab Wabco, of tax savings achieved during the financial year, relating to the subsidiaries originating from Sab Wabco's former group structure, which had tax losses carried forward at the time of their acquisition by Faiveley Transport Group, for a total of €0.4 million.

– Net non-current assets

Net non-current assets decreased from €123.6 million at 31 March 2010 to €133.4 million at 31 March 2011, an increase of €9.8 million.

Net non-current assets had changed from €125.6 million at 31 March 2009 to €123.6 million at 31 March 2010, a decrease of €2 million.

The constituents of non-current assets are detailed in chapter 3.3.6, Notes E.2, E.3, E.4 and E.5, respectively, to the consolidated financial statements.

– Working capital requirements (WCR):

At 31 March 2011, the net WCR(1) was €55.9 million, an increase of €2.6 million compared to 31 March 2010. This change was primarily due to an increase in projects in progress (up €12 million) due to the launch of the engineering phase of numerous projects, offset by an increase in customer advances (up €12.4 million).

At 31 March 2010, the net WCR was €53.3 million, compared to €43.8 million at 31 March 2009. After restatement for the disposal of receivables deconsolidated, movements in losses on completion and the impact of IAS 32/39 on projects, the WCR increased by €8.1 million.

– Cash and cash equivalents

Analysis of cash and cash equivalents at 31 March 2011:

Short-term investments	€44,925
Factoring	€45,682
Banks (available cash)	€107,564
Cash	€211
TOTAL CASH AND CASH EQUIVALENTS	**€198,382**

At 31 March 2011, the amount of factoring was €45.7 million, compared to €59.2 million at 31 March 2010. No funds were drawn from the factoring facility at 31 March 2011. The Group completed the deconsolidation process by disposing of receivables on one-off bases totalling €50.2 million, compared to €38.6 million at 31 March 2010.

– Equity

Equity amounted to €453.3 million at 31 March 2011, compared to €376.7 million at 31 March 2010, which is an increase of €76.6 million.

This movement is primarily due to the impact of:
- net profit for the year: €81.1 million;
- the payment of a cash dividend to shareholders of the parent company and other minority shareholders: (€17 million)
- the movement in translation difference: €10 million;
- the increase in minority interests following the creation of the Amsted Rail-Faiveley LLC joint-venture (32.5%) for €12.9 million;
- the exercise of stocks options during the financial year, for €3.7 million;
- the buyback of treasury shares for (€17.9 million), within the framework of the share buyback programme approved by the Combined General Meeting of 13 September 2010;
- the movement in minority interests, for €0.6 million, following the discounting of the put option held by minority interests in Nowe GmbH;
- the recognition under equity of the put option held by minority interests in Urs Dolder AG, for (€1.1 million).

Equity amounted to €376.7 million at 31 March 2010, compared to €296.9 million at 31 March 2009, which is an increase of €79.7 million.

This movement is primarily due to the impact of:
- net profit for the year: €74.9 million;
- the payment of a cash dividend to shareholders of the parent company and other minority shareholders: (€14.1 million);
- the movement in translation difference: €21.9 million;
- the movement in minority interests, for (€2.3 million), following the appraisal of the put option held by minority interests in Faiveley Transport Lekov and Nowe GmbH.

– Provisions

At 31 March 2011, provisions totalled €107.7 million, compared to €109.8 million at 31 March 2010, a net decrease of €2.1 million.

The various items comprising this movement may be analysed as follows:
- €0.2 million decrease in provisions for completed contracts;
- €2.3 million decrease in provisions for pension commitments;
- €0.7 million increase in provisions for restructuring;
- €0.3 million decrease in other provisions for liabilities and charges.

At 31 March 2010, provisions totalled €109.8 million, compared to €105.3 million at 31 March 2009, a net increase of €4.5 million.

The various items comprising this movement may be analysed as follows:
- €8.7 million increase in provisions for completed contracts;
- €1.8 million decrease in provisions for pension commitments;
- €0.7 million decrease in provisions for restructuring;
- €1.7 million decrease in other provisions for liabilities and charges.

– Net financial debt

Net financial debt, as defined in chapter 3.3.6, Note E.15.4 to the consolidated financial statements, decreased by €55.7 million, from €255.5 million at 31 March 2010 to €169.8 million at 31 March 2011.

This change was due to:
- a €52.8 million decrease in financial debt;
- a €1.7 million increase in cash and cash equivalents;
- a €1.2 million increase in financial receivables.

(1) Calculated based on net balance sheet values, on a constant group structure and foreign exchange basis and after deducting losses on completion up to the value of projects in progress. The WCR used in the cash flow statement presented in Note E.12 to the consolidated financial statements was calculated excluding changes in group structure, movements in foreign exchange and without deducting provisions for losses on completion deducted from the asset.

As a result, the Group's financial structure changed during the year:

- the net debt to EBITDA ratio underlying the level of bank margin fell from 1.73 at 31 March 2010 to 1.15 at 31 March 2011,
- the net debt to equity ratio (gearing ratio) was 37.5% at 31 March 2011, compared to 59.9% at 31 March 2010.

From a financial point of view, Group equity includes treasury shares, which are held for transfer as part of the share purchase or subscription option plans. The exercise of share options (261,541 at the end of March 2011) would result in an improvement of Group cash and cash equivalents by €11.9 million. The value of treasury shares not allocated amounted to €11.6 million at the 31 March 2011 share price (including treasury shares held as part of the liquidity contract). This €11.6 million amount includes part of the performance-based shares allocated in December 2010, being 34,153 shares (49%). Based on an estimate made by a specialised firm, a percentage of 51% was determined, corresponding to the number of shares that should eventually be exercised. This percentage was determinated by taking into account the performance criteria and the likelihood that managers will be employed by the Company on the date of the calculation of these performance criteria.

- **Cash flow statement**

	2010/2011	2009/2010	2008/2009
Net profit	81,145	74,857	71,247

CASH AND CASH EQUIVALENTS AT END OF PERIOD	**192,711**	**191,726**	**145,180**

– Self-financing capacity

At 31 March 2011, the self-financing capacity was €97.7 million, a moderate decline of 1.5% compared to the previous year (€99.3 million), which had increased by 27.6% compared to the year-end at 31 March 2009.

This change was primarily due to the growth in net profit for 2010/2011, which was €81.1 million, compared to €74.8 million in the previous year, but was offset by the €7.8 million unfavourable movement in provisions for liabilities and charges and deferred taxation. Amortisation and depreciation charges were similar in the two financial years.

– Net cash from operating activities

Excluding changes in transfers of deconsolidated receivables and the impact of IAS 32/39, WCR increased by €4.1 million. This was primarily due to the volume effect resulting from the sales growth.

– Net cash used in investing activities

Investments in property, plant and equipment and intangible assets increased moderately by €0.9 million during the year and were stable compared to the previous two years. The same was true of financial investments, which increased by €1 million during the 2010/2011 period.

In addition to these investments, Faiveley Transport Group continued to grow by way of acquisitions and purchased 80% of the share capital of Urs Dolder AG for €2.6 million. Furthermore, the Group acquired the 25% minority interests in Faiveley Transport Lekov for €2.4 million.

– Net cash from (used in) financing activities

The Faiveley Transport Group distributed a cash dividend of €17 million during the year, compared to €14.1 million in the previous year. The Group also continued to implement its share buyback programme for €17.9 million to service its various stock option and free share plans. These cash outflows were partly offset by the exercise of stock options during the year, for €3.7 million.

The change in borrowings was primarily due to the repayment of the debt taken out in December 2008, for an amount of €50.5 million.

4.2. RESEARCH AND DEVELOPMENT

The majority of the research and development conducted within the Group falls within the framework of the engineering included in contracts and is therefore primarily sold to customers, with Faiveley Transport retaining the intellectual property rights.

In application of IFRS standards, €3.1 million in development costs was capitalised at 31 March 2011, compared to €3.8 million at 31 March 2010, and €2 million at 31 March 2009. The amortisation charge was €2 million at 31 March 2011, compared to €1.9 million at 31 March 2010 and €1.8 million at 31 March 2009.

At 31 March 2011, the total development costs recognised in balance sheet assets were €8.6 million. Development costs taken to the balance sheet are amortised over 3 years.

Public operating grants are recognised in the income statement of the parent company financial statements under "operating subsidies". Under IFRS, if certain costs incurred can be capitalised pursuant to IAS 38, operating subsidies are offset against the "investment grant" item of equity in accordance with IAS 20. Subsequently, the "investment grant" item is taken to the income statement, also over a period of three years, in line with the amortisation charge applied to development costs previously capitalised.

4.3. BUSINESS DEVELOPMENTS SINCE THE YEAR-END

4.3.1. Significant events after the year-end

On 1 April 2011, Thierry Barel was appointed as Chairman of the Management Board and Chief Executive Officer by the Supervisory Board, to replace Robert Joyeux who resigned from his duties.

On the same day, the Supervisory Board also appointed Guillaume Bouhours, Group Chief Financial Officer, as a member of the Management Board.

In a ruling dated 13 April 2011, the District Court of New York acknowledged that Wabtec was responsible to subsidiaries of Faiveley Transport for acts of unfair competition, misappropriation of confidential and secret information and unjust enrichment. The federal court will examine the damage alleged by Faiveley Transport in future hearings, which are expected in the month of June 2011.

The Group has decided to move from the premises housing its headquarters to a building in Gennevilliers, which benefits from HQE (High Environmental Quality). The move took place in the month of July 2011.

4.3.2. 2011/2012 outlook

- **Order book at 31 March 2011**

The order book at 31 March 2011 totalled €1,453 million, compared to €1,302 million at 31 March 2010, a year-on-year increase of 11.6% (up 11.3% on a like-for-like basis).

- **Enterprise Resource Planning System (ERP)**

The basic configuration has been implemented at two pilot sites (Leipzig and Gennevilliers). Following a stabilisation phase, it should be rolled out more extensively throughout the Group, starting in 2012/2013.

- **Forecasts**

Business activity should remain strong during the 2011/2012 financial year. In Europe, major calls for tenders are expected over the coming quarters, in particular in Germany (ICEx programme) and the UK (Thameslink, IEP). The US market should benefit from a strong recovery in investment in new freight carriages. In Asia, the Indian market should continue to expand, in particular with the extension of the Delhi underground and the launch of similar projects in other cities. In China, the recent change of ministerial team may cause orders to be postponed in the short term, before a recovery with different priorities in terms of platforms, speed levels and technologies.

The significant number of contracts awarded on new train platforms and the reduction in optional orders resulted in greater order book depth. The engineering, testing and certification phase of these new programmes takes eighteen months on average.

Against this backdrop, the Group forecasts moderate sales growth on a like-for-like basis during the 2011/2012 financial year, to be followed by more rapid growth in subsequent years.

4.4. CASH AND CAPITAL

4.4.1. Capital

A/ Share capital of Faiveley Transport

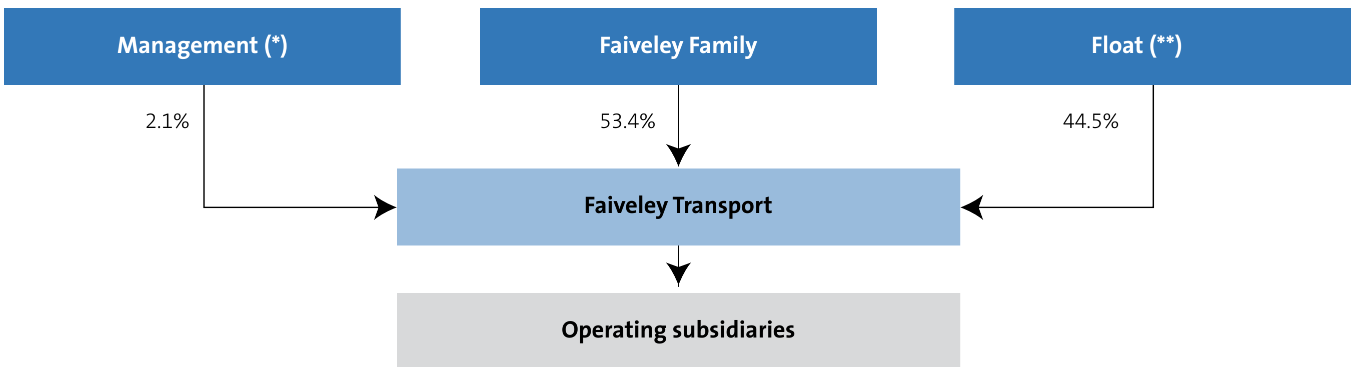
See chapter C. Information on the share capital.

B/ Shareholding structure of Faiveley Transport

Reminder of transactions of 23 December 2008:

The Extraordinary General Meeting of 23 December 2008 approved the transactions, as presented in the document E registered with the Autorité des Marchés Financiers under number E.08-115 on 25 November 2008. The implementation of these agreements resulted in particular in the contribution and merger transactions carried out between 23 December 2008 and 31 March 2009. Lastly, in February 2009, Sagard sold their entire equity holding in Faiveley S.A. on the market. This investment had been held following the contribution transactions approved by the General Meeting of 23 December 2008.

At the Annual General Meeting of 22 September 2009, Faiveley S.A. was renamed Faiveley Transport. Following these transactions, the Group's shareholding is now structured as follows:



(*) including employee shareholding and Robert Joyeux
(**) of which treasury shares 3.2%

4.4.2. Financing conditions

A/ Long-term loans

- **Bank financing**

Following the reorganisation of its shareholding structure and the overall refinancing of the existing bank debt, on 23 December 2008, the Faiveley Transport Group finalised a credit agreement with a pool of nine banks in relation to a term loan of €407 million and USD 50 million, drawn down when the transaction was signed. A revolving credit line of €49 million was also established to fund the Group's general financing requirements. At 31 March 2011, in accordance with the repayment schedule, the outstanding portion of these loans was €339 million and USD 40 million. No drawdowns had been made on the revolving credit facility.

This debt is subject to a number of covenants, of which the two most important relate to the Group's profitability and financial structure:

- "Leverage Ratio", calculated on a rolling 12 month period ending at each half-year close, Consolidated Net Debt to Consolidated EBITDA (as defined in the loan documentation).

  At each of the following dates, the Group must maintain this ratio below or equal to the following levels:

Dates	Leverage ratio
31 March 2011	2.50
30 September 2011	2.50
31 March 2012	2.00
30 September 2012	2.00
31 March 2013	2.00
30 September 2013	2.00

  At 31 March 2011, the ratio was 1.15.

- The "gearing ratio", calculated at each half-year end, Consolidated Net Debt to Consolidated Equity.

  At each of the following dates, the Group must maintain this ratio below or equal to the following levels:

Dates	Gearing ratio
31 March 2011	1.50
30 September 2011	1.50
31 March 2012	1.50
30 September 2012	1.50
31 March 2013	1.50
30 September 2013	1.50

  At 31 March 2011, the ratio was 0.35.

The new bank debt bears interest indexed on Euribor and USD Libor, with a margin that varies depending on the leverage ratio.

The average rate applied to net debt during the 1 April 2010 - 31 March 2011 period was 2.43% and 2.93% on the Euro and US dollar debt, respectively. These average rates take account of the hedging in place.

In line with financing agreements, the Group put a hedging strategy into place based on swaps and options. The hedging level varies between 71% and 100% of the debt drawn in Euro, depending on Euro interest rates over the 2011/2012 period. The US-denominated debt is fully hedged.

The cost of the bank debt is estimated at 2.64% over 2011/2012, including hedges and margins for the Euro debt, and 2.81% for the USD–denominated debt.

Interest rate hedges in place are detailed in Note E.16.5.b to the consolidated financial statements.

B/ Analysis of Faiveley Transport Group net debt

At 31 March 2010, Group debt was €225.5 million, comprising financial debt taken out from banks totalling €430.7 million, offset by financial receivables of €8.5 million and cash and cash equivalents of €196.7 million (including short-term investments of €40.9 million and cash of €155.8 million).

At 31 March 2011, Group debt was €169.8 million, comprising financial debt taken out from banks totalling €377.9 million, offset by financial receivables of €9.7 million and cash and cash equivalents of €198.4 million (including short-term investments of €44.9 million and cash of €153.5 million).

The cash of €153.5 million included €45.7 million of uncalled factoring and €107.8 million available cash. Following the financial crisis and its impact on the credit market, the Group decided to maintain some financial flexibility to ensure internal organic growth and/or finance acquisitions.

It should be noted that Faiveley Transport holds 462,777 treasury shares that are designated, in their majority, to be purchased by managers within the framework of the share purchase or subscription option plan or who benefit from the performance-based stock option plan. These shares are currently deducted from equity. The exercise of these stock options (261,541 at the end of March 2011) would result in a cash inflow for the Group of €11.9 million. Unallocated treasury shares were valued at €11.6 million at the stock market price of 31 March 2011 (including treasury shares held as part of the liquidity contract). The amount of €11.6 million includes a portion of 34,153 performance shares (49%) that were granted in December 2010. An estimate made by a specialist determined that 51% of the shares should eventually be exercised. This percentage was estimated based on the expected final performance criteria and on the presence of managers in the Company at the date of calculation of these performance criteria.

4.4.3. Restrictions on the use of capital

The debt documentation established in December 2008 includes limitations in terms of existing or new bilateral debt and similar financing.

The ceilings were set as follows:
- bilateral debt: €40 million;
- lease finance: €15 million;
- disposal of receivables: €100 million;
- various financing: €10 million;
- overdraft pursuant to a cash pooling agreement: €10 million;
- seller credit authorised up to 25% of the selling price.

In addition, off-balance sheet commitments (bank guarantees on long-term contracts) may not exceed 22% of the Group's order book in each financial year.

Subsidiaries' borrowings (excluding joint ventures) must not exceed 20% of the Group's gross debt.

4.4.4. Financing of operations and expected sources

Cash flow generation and available finance currently cover the Group's recurring industrial investment requirements.

A €49 million revolving credit facility can be used for the Group's general funding needs. It was unused at 31 March 2011.

Euro-denominated amortisable repayments are funded by cash flow generated outside the US and the US dollar repayments by cash flow generated by Ellcon National, with the bullet portion (fifth year, or end 2013) to be refinanced when required.

The conditions for the early repayment of Group debt notably include the loss of the majority control of voting rights by the Faiveley Family and failure to comply with financial ratios.

A.5. Environmental information

The Group's production activities, by their nature, generate little waste in the environment. The optimisation of the protection of the environment is one of the priorities for the Group whether in France or in its foreign subsidiaries. To this end, the Group takes initiatives to integrate environmental concerns into the management of its operations and facilities, in order to:
- comply with the legal and regulatory requirements that apply to all sites;
- find solutions that limit the impact of operations on the environment, prevent pollution and ensure continuous improvement in economic competitiveness;
- reduce non-renewable energy consumption and improve the quality of waste gases as well as improving waste sorting;
- contribute to the business and social aspects of sustainable development.

The procedures aimed at correctly applying environmental, health and safety regulatory provisions are decentralised and controlled by each of the main industrial sites. Environmental, health and safety costs are budgeted at site or unit level and recognised in the consolidated income statement. In all other subsidiaries, aspects liable to have an impact on the environment are integrated in the decision making and implementation structures of the management system. The year 2010/2011 saw the continuing implementation of procedures and methods aimed at providing better management of legal provisions, objectives and rules in terms of environmental management.

The sites continued to take steps with a view to achieving ISO 14001 certification. This process is essential to meet customers' expectations and improve the public authorities and shareholders' trust in the Group.

At 31 March 2011, about ten entities, including the Group's main industrial sites, had been awarded ISO 14001 certification in relation to their environmental management; Faiveley Transport Iberica, which is a major production site in Europe, should be certified ISO 14001 in the summer of 2011. This certification process has been initiated at other sites that have not yet been certified. Each site now has an in-house manager responsible for coordinating Environmental, Health and Safety aspects.

In addition, the Group decided to move from the premises housing its headquarters to a building in Gennevilliers, which has already been certified for HQE (High Environmental Quality). The move took place in the month of July 2011.

5.1. MEASURES TAKEN TO ENSURE COMPLIANCE WITH LEGISLATIVE REQUIREMENTS

The Group seeks to associate all French and foreign sites in a regular and genuine gathering of environmental information. This collective commitment led to the setting up of a general supervision programme at the sites.

The Company's process is decentralised: each unit is responsible for its environmental self-assessment, for defining an action plan and associated objectives and for reporting its own environmental data.

As part of this monitoring, possible irregularities and potential sources of nuisance or energy waste are specifically targeted for observation: an example of this is the battle against noise and the particular measures taken to remedy this issue in all the Group's industrial sites.

The Quality Safety Environment staff at production sites have a duty to follow the applicable legislation and to analyse action plans implemented in order to conform. The effects of the Regulation Reach N°1907/2006 of 18 December 2006, which came into force on 1 June 2007 for the use of chemical substances by the Group that were included in the scope of application of this text, were taken into account in their entirety. The Group is committed to providing a positive contribution to the sustainable development of the European rail industry. The Company has voiced its intent to maintain and expand its operations in accordance with the founding principles of sustainable development.

The Saint-Pierre-des-Corps site has doubled its capacity for water-soluble paint over the year and this one can now paint 160 panels per week.

The Group is fully aware of the requirements and has dedicated the necessary human and financial resources to take full responsability and meet its targets.

Relative to the implementation of Directive 2002/95/CE of the restrictions on the use of dangerous substances and the Directive 2002/96/CE in respect of waste electronic and electrical equipment (WEEE), it appears that the Group's operations are not precisely covered by the categories stated in the various EU and national texts and are therefore not required to meet a deadline to conform.

Concerning the use of metals such as cadmium and lead, the various European production sites have adopted an approach to progressively eliminate these metals from products manufactured. The requirement to limit the use of these metals remains a medium-term objective, to the extent that Article 5 of the Directive 2002/95/CE expressly provides an exemption where substitution is technically or scientifically impossible or exempt from total safety compared to the final solution.

Despite the fact that the constraints imposed by the texts target more specifically the mass market electronic and electrical products, specific attention is still paid to these issues.

Lastly, the Group seeks to make all suppliers aware by auditing their sustainable development policies.

5.2. SPECIFIC MEASURES TO LIMIT DAMAGE TO THE BIOLOGICAL BALANCE

In addition to the exercise of these controls, various new measures were introduced during the year just ended:

- doubling the water-soluble paint capacity for door panels;
- installation of heat exchangers and heat economisers;
- use of bio-degradable oils and water-based paint;
- waste containers;
- reduction of packaging waste (wood, plastic, cardboard) and all associated treatment costs;
- particle filters to reduce air emissions;
- retention basins and waste water disposal systems;
- energy assessment of the Group's industrial sites;
- central vacuum system with filters for sanding booths.

A significant reduction in environmental impact was also noted following the investment in cleaning machines that resulted in reduced water and solvent consumption and waste, at the sites dedicated to the "Customer Services" activity and also due to substantial investment at the Saint-Pierre-des-Corps site to double the production capacity in water-soluble paint and to comply with regulations on the discharge of Organically Volatile Compounds (OVCs). The new processes and systems can thus avoid any discharge into the atmosphere of polluting compounds.

As part of its commitments to its customers, Faiveley Transport now submits each major project to an environmental analysis at inception (% recyclability, % recovery, etc.).

The Group took full note of the environment public liability Directive 2004/35/CE, adopted on 21 April 2004, on environmental responsibility in respect of the prevention and restoration of environmental damage.

By this text, which was transferred into French law by the law n°2008-757 of 1 August 2008, a Group operation that damages fauna or flora is required to reverse the damage done or to bear the associated costs (at the discretion of the public authorities). Faced with this new regulation, the Group increased its attention to the protection of the environment and implemented the various options to cover this new area of liability with its insurers.

5.3. REDUCED ENERGY INTENSITY AND GREENHOUSE GAS EMISSIONS AND OTHER ENVIRONMENTAL IMPACTS

For a number of years, the Group has sought to collect data on the energy consumption within its industrial processes. This information enables the Group to be in keeping with greenhouse gas emission reduction objectives, established at an international level, in particular within the framework of the European Union's commitments.

- **Gas consumption at the main industrial sites during the financial year ending 31 March 2011 (in KWh):**

Entity	2009-2010	2010-2011
Shanghai Faiveley Railway Technology	–	
Shijiazhuang Jiaxiang	104,579	143,807
Faiveley Transport Leipzig	2,081,485	2,470,000
Faiveley Transport Witten	–	–
Nowe	39,797	23,133
Faiveley Transport India	–	–
Faiveley Transport Lekov	2,572,522	2,746,909
Faiveley Transport Italia	226,231	223,105
Faiveley Transport Iberica	–	24,725
Faiveley Transport Amiens	2,300,919	2,267,896
Faiveley Transport Gennevilliers	4,784,537	5,248,977
Faiveley Transport Tours and Espas	7,973,268	9,171,830
Faiveley Transport NSF	155,315	613,988

The French (Amiens) and Italian sites have optimised their gas costs by using updated models of heaters. At other Group sites, a significant increase in gas costs was noted. An additional effort will be launched next year in an attempt to reduce gas consumption at the Group's industrial sites.

- **Electricity consumption at the main industrial sites during the financial year ending 31 March 2011 (in KWh):**

Entity	2009-2010	2010-2011
Shanghai Faiveley Railway Technology	3,414,368	3,509,000
Shijiazhuang Jiaxiang	540,800	726,760
Faiveley Transport Leipzig	1,553,703	1,550,500
Faiveley Transport Witten	3,612,837	3,621,034
Nowe	23,350	30,581
Faiveley Transport India	984,337	1,149,551
Faiveley Transport Lekov	1,338,943	1,387,636
Faiveley Transport Italia	1,687,035	1,840,960
Faiveley Transport Iberica	1,150,576	1,817,805
Faiveley Transport Amiens	2,044,456	2,284,168
Faiveley Transport Gennevilliers	2,680,079	2,382,333
Faiveley Transport Tours and Espas	4,889,870	4,886,504
Faiveley Transport NSF	206,754	154,559
Ellcon National Inc	–	5,470,000
Faiveley Transport do Brazil	–	311,820
Faiveley Transport Nordic	–	2,061,000

The general trend noted within the major production units is the stability of electricity consumption, despite a long and cold winter in Europe. A significant decrease in consumption was however reported in Faiveley Transport NSF (25%). European sites have improved their lighting by installing energy saving light bulbs and by upgrading their electric heating systems.

- **Water consumption at the main industrial sites during the financial year ending 31 March 2011 (in m³):**

Entity	2009-2010	2010-2011
Shanghai Faiveley Railway Technology	34,282	35,200
Shijiazhuang Jiaxiang	9,031	3,989
Faiveley Transport Leipzig	2,443	2,776
Nowe	74	50
Faiveley Transport India	5,579	4,345
Faiveley Transport Lekov	3,861	4,269
Faiveley Transport Italia	18,445	3,195
Faiveley Transport Iberica	2,788	1,624
Faiveley Transport Amiens	2,214	2,193
Faiveley Transport Gennevilliers	5,062	13,002
Faiveley Transport NSF	5,300	467
Faiveley Transport Tours and Espas	5,868	7,500
Faiveley Transport do Brazil	–	1,468
Ellcon National Inc.	–	2,847
Faiveley Transport Nordic	–	1,639

The general trend noted within the major production units, except for Faiveley Transport Gennevilliers, reflects a reduction in water consumption compared to the previous financial year.

Faiveley Transport Italia replaced its continuous flow fountains with better performing equipment. Leak detection devices and leak-proof safety systems have been widely implemented at the sites.

5.4. EXPENSES INCURRED AS PART OF THE POLICY OF PREVENTING ENVIRONMENTAL RISKS

Expenses incurred by Group subsidiaries to prevent the consequences of their industrial operations to the environment increase steadily.

For instance, the following subsidiaries incurred the following expenses:
- Faiveley Transport Tours: €340 thousand, excluding waste processing costs, with €260 thousand of additional investment for the extension of the spray paint booth at the Saint-Pierre-des-Corps site;
- Faiveley Transport Amiens: €83.6 thousand, in particular for waste processing;
- Faiveley Transport Iberica: €65 thousand;
- Faiveley Transport Italia: €90 thousand expense (research costs, calculation of air emissions and waste water treatment costs)
- Faiveley Transport Lekov: €18 thousand in expenses and €23 thousand for industrial investment in waste water treatment and waste processing;
- Faiveley Transport India: €12.5 thousand industrial investment;
- Faiveley Transport Witten: €82 thousand;
- Faiveley Transport Leipzig: €40 thousand, in particular for the cost of waste water treatment (filtering, oil separation);
- Shanghai Faiveley Railway Technology: €38 thousand for waste water treatment and a carbon filter system for the painting process);
- Shijiazhuang Jiaxiang: €12 thousand;
- Ellcon National Inc: €12 thousand for holding tanks.

A.6. Risk factors

6.1. MARKET RISKS

As part of its business, the Faiveley Transport Group is exposed to various types of market risks, in particular exchange, interest rate, raw material, credit and liquidity risks. A description of these risks is provided below and additional information is disclosed in note E.16 of the notes to the consolidated financial statements.

The Group's management of exchange rate, interest rate and raw material risks seeks to minimise the potentially unfavourable effect of the financial markets on the Group's operating performance.

The Group uses derivative financial instruments to cover its exposure to fluctuations in foreign currency exchange rates. Within the framework of its hedging policy, the Group may use currency swaps, hedges, exchange rate options and structured products.

The Group covers its exposure to interest rate risk by the use of swaps and options.

The Group hedges its raw material exposure through raw material swap contracts and structured products.

The Group does not use derivatives for speculation purposes.

– Exchange risk

The main currencies concerned are the Chinese Yuan, US Dollar, Pound Sterling, Czech Koruna and Swedish Krona.

The management of the exchange risk of commercial contracts, where permitted by regulatory requirements, is centralised by the Group Treasury Department and comprises two parts: the certain and the uncertain risk.

– Exchange risk management relating to tenders in foreign currencies (uncertain risk)

The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to put into place financial instruments to cover during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury Department uses mainly exchange options and export insurance contracts.

– Exchange risk management relating to commercial contracts (certain risk)

Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment with derivative instruments. Instruments used mainly include forward purchases and sales and exchange swaps. Group Treasury may also use options.

Information concerning derivative financial instruments currently in place to hedge the exposure to exchange risks for future purchases and sales is disclosed in the notes to the consolidated financial statements (note E.16 –Financial instruments and financial risk management).

The Group's policy is to systematically hedge against currencies, except for certain very long-term contracts and certain currencies, which are faced with the technical limitations and prohibitive cost of hedging.

At 31 March 2011, the Group's exposure resulting from all its commercial contracts was as follows:

Amounts in thousands of currency	Trade receivables (a)	Trade payables (b)	Commitments (c)	Net unhedged position (d) = a-b+/-c	Hedging instruments (e)	Net hedged position (f) = d-e
USD	33	–	19,826	19,859	20,011	(152)
GBP	2,344	(609)	31,390	33,125	26,361	6,764
CZK	(92,268)	–	(707,476)	(799,744)	(796,143)	(3,601)
AUD	–	–	5,769	5,769	5,703	66
CHF	547	(434)	2,043	2,156	2,156	–
SEK	(18,082)	–	(113,068)	(131,150)	(131,411)	261
JPY	10,964	–	37,915	48,879	54,108	(5,229)
CNY	34,061	–	68,497	102,558	100,052	2,506
HKD	(18,644)	–	(118,270)	(136,914)	(137,938)	1,023
SGD	–	–	28,767	28,767	28,767	–

The £6.8 million amount relates to the SSL project, for which £28.8 million remains outstanding.

Recurring commercial exposure, excluding the subsidiaries' projects are hedged based on the Treasury and through forward purchase or sale contracts.

Intra-group financing contracts are hedged by Treasury, through exchange swap contracts.

At 31 March 2011, the banking positions and loans in place at a Swedish subsidiary of the Group, whose functional currency is the Swedish Krona, was no longer the subject of a hedging, given its decision to adopt the Euro as functional currency on 1 April 2011.

Impacts on the income statement due to variations in the euro (+/-10%) against major foreign currencies and on items not covered and recorded at 31 March 2011 are presented in the consolidated financial statements (Note E.16.5).

– Interest rate risk

The interest rate risk to which the Group is exposed is mainly due to long-term loans amounting to €377.9 million at 31 March 2011 (see details in the consolidated financial statements, note E.15), of which €366.9 million related to the syndicated debt.

Finance is indexed on variable Euribor and US Libor interest rates. The credit agreement commits the Group to hedge against at least 60% of the principal amount due until December 2012.

To manage its risk, the Treasury Department has implemented a hedging strategy using interest rate swaps, tunnels, caps and options.

The exposure to Euro interest rates is covered for between 71% and 100% of the total debt drawn down based on interest rate fluctuations for the 2011/2012 period. The exposure to US Dollar interest rates is 100% hedged.

The estimated cost of bank debt in 2011/2012 is 2.64%, including hedges and spreads for the debt in Euros, and 2.81% for the debt in US dollars.

At 31 March 2011, outstanding Euro denominated syndicated debt was €339 million, with interest rate coverage for €315 million of this. The amount of the US dollar syndicated debt was $ 40 million, for which the total nominal value is covered.

Given the profile of the syndicated loan amortisation and interest rate hedges, net exposure at 31 March 2011 was as follows:

	Loans outstanding	Hedging instruments		Net exposure	
EURO Debt	**Variable rate**	**Fixed rate**	**Variable rate**	**Fixed rate**	**Variable rate**
Less than 1 year	45,276	45,276	–	–	–
From 1 to 2 years	45,276	45,276	–	–	–
From 2 to 3 years	248,234	82,500	–	–	165,734(1)
Over 3 years	–	10,000	–	10,000	–
TOTAL EURO	**338,786**	**183,052**	**–**	**10,000**	**165,734**

(1) Sensitivity analysis of net exposure (€165.7 million):
If the reference variable rate, "Euribor 3 month" were to increase by 100 basis points, the additional interest charge would be €1.6 million in a full year.

	Loans outstanding	Hedging instruments		Net exposure	
USD Debt	**Variable rate**	**Fixed rate**	**Variable rate**	**Fixed rate**	**Variable rate**
Less than 1 year	4,998	4,998	–	–	–
From 1 to 2 years	4,998	4,998	–	–	–
From 2 to 3 years	29,988	–	–	–	29,988(1)
Over 3 years	–	–	–	–	–
TOTAL USD	**39,984**	**9,996**	**–**	**–**	**29,988**

(1) Sensitivity analysis of net exposure (USD 29.9 million):
If the reference variable rate, "Libor USD 3 month" were to increase by 100 basis points, the additional interest charge would be $ 0.3 million in a full year.

– Raw material risk

The Faiveley Transport Group is exposed to increases in the cost of raw materials such as steel, cast iron, copper, aluminium and rubber, as well as to increases in transportation costs.

The Group has already anticipated these effects, both in the preparation of its tenders and in terms of its purchasing policy:

- Certain contracts relating to projects include price indexation mechanisms that enable the Group to absorb a large part of the increases in raw material costs.
- The vulnerability of raw material purchases is taken into account when developing the purchasing budgets. These price changes are subject to a rigorous control throughout the year by purchasing teams to limit their impact.

However, Faiveley Transport Group's sintered brake activity is exposed to fluctuations in the price of copper.

This information is disclosed in the notes to the consolidated financial statements (Note E.16.5.c).

The electronic component market went through a difficult economic situation in the beginning of 2011 due to events in Japan. The Group has put a specific policy in place to monitor this procurement risk, in consultation with its suppliers and customers.

– Credit risk

The Group enters into commercial relationships with third parties whose financial position is known to be healthy. The Group's policy is to verify the financial health of those customers wishing to obtain differed payment.

In the case of derivative instruments and cash transactions, counterparties are limited to high-quality financial institutions.

The Group also practices debt factoring and receivables sales. Details of this are provided in the Notes to the consolidated financial statements (Notes E.9 Current receivables and E.16.6 Credit risk).

– Liquidity risk

The Company carried out a specific review of its liquidity risk and considers that it is in a position to respect the future repayments.

The Group's Finance Department monitors all of the Group's liquidity in order to honour its financial commitments by maintaining a level of cash, cash equivalents and sufficient financing facilities.

On 23 December 2008, Faiveley Transport subscribed to a credit agreement with a pool of nine banks in relation to a term loan of €407 million and USD 50 million, which enabled it to reorganise its shareholding structure and refinance its existing bank debt. At 31 March 2011, in accordance with the credit agreement schedule, €339 million and USD40 million were outstanding.

A €49 million revolving credit was also subscribed in 2008 to fund the Group's general financing needs; it had not been drawn at 31 March 2011.

This debt was subject to a number of financial ratios. At 31 March 2011, the Group complied with all ratios required by the credit agreement. The details of these covenants are commented in the notes to the consolidated financial statements (note E.15 – Loans and borrowings).

Note E.16.7 to the consolidated financial statements provides additional information of the cash and cash equivalents position at 31 March 2011.

The Group had the following cash and cash equivalents at 31 March 2011:

	31 March 2011
Available credit lines (a)	83,564
Parent company's cash (b)	37,211
Subsidiaries' cash and cash equivalents (c)	160,271
AVAILABLE CASH AND CASH EQUIVALENTS (1) = (a+b+c)	**281,046**
Borrowings due in less than one year (d)	53,441
Available credit lines maturing in less than one year and bank overdrafts (e)	88,995
NET CASH AND CASH EQUIVALENTS AVAILABLE DURING THE NEXT YEAR (1-d-e)	**138,610**

The "table of future cash flows", presented in the consolidated financial statements (Note E.16.7.b) provides a breakdown of future liabilities by maturity.

– Share risk

The Group does not hold a share portfolio but deposits excess cash balances. At 31 March 2011, it had certificates of deposits of €33.6 million and fixed-term deposits of €10.5 million.

The risk of these instruments is deemed low.

6.2. LEGAL RISK

This heading provides a limited overview of the various forms of legal risks arising from the Group's operations and also the execution of its contractual requirements. The Group considers that sufficient provisions charges have been recognised to date to cover all risks and litigations.

– Risk of non-conformity

The Faiveley Transport Group may be confronted by the usual risks encountered by all industrialists that produce and sell manufactured products: these are contractual liability put forward by another professional (car builder, operator, and maintenance) in the event of non conformity of products delivered or non respect by the seller of contractual commitments in terms of timescale, reliability, life, etc. Guarantees concerning the proper operation of products delivered are granted for longer or shorter periods (between 12 or 36 months on average) according to the demands of the final customer, the type of project and its specific features. The risk related to this contractual guarantee is evaluated upstream and included in the price of the product.

The risk of cancellation for fault is low due to the understanding and technical feasibility study of the project by a specialised and dedicated team within the design office, as well as the selection of dual source suppliers to avoid any sudden interruption in the delivery of components or materials.

In order to limit the risk of non-conformity, the Group also uses the contractual technique that restricts certain types of damages, and even eliminates some of them (loss of profit, damage to image, loss of customer base or sales).

When it occurs, litigation is very frequently settled out of court and under conditions that do not endanger future relationships between the parties.

In addition, the Faiveley Transport Group uses insurers to cover operational civil liability and products adapted to its business and in compliance with customer demands.

It should be noted that, arising from the railway business, the Group and its subsidiaries are contractually bound to maintain equipment with a life span of several decades. A specific plan is set up to manage obsolescence of each project, with the participation of the manufacturer and/or operator. The requirement to keep equipment operational and reliable during this time period imposes on the equipment supplier the need to ensure leading edge technology and to set up a stock of spare parts in order to avoid a sudden break in supply. Strict contractual obligations (duty of alert, end of life orders, selection of a second source, etc) are imposed on the Group's own suppliers.

At 31 March 2011, a €23.1 million provision for risk of non-compliance of products sold was recognised in the financial statements. These risks were estimated by project managers and engineers.

During the 2010/2011 financial year, Faiveley Transport agreed to settle the dispute that was filed against its U.S. subsidiary, Faiveley Transport USA.

The Faiveley Transport, Faiveley Transport USA and Faiveley Transport Malmö companies had a writ issued against them by the Bombardier – Alstom consortium in the New York courts on 7 August 2008, as part of proceedings seeking redress for damage caused by faults (fine cracks) observed on brake discs partly supplied by the German subsidiary Faiveley Transport Witten (formerly BSI) in the years 1996 to 2000 to Knorr-Bremse. These were equipped on the Acela Amtrak operator's trains operating between Washington DC and Boston. The other brake supplier was the US company Wabtec. The manufacturer consortium, as well as the Knorr Bremse company reached an out-of-court settlement on the issue with the operator. These three companies then turned against the suppliers of the product they deemed the cause of the fault, i.e. Wabtec and Faiveley Transport. Wabtec accepted an out-of-court settlement. Faiveley Transport Group first turned down an out-of-court settlement. As a result, the Group was summoned, through its above-mentioned subsidiaries, before the courts of New York and subsequently South Carolina in February 2009. The amount of damages sought by the consortium, which represented the interests of all parties involved, was USD 55 million. The Supreme Court of the State of New York, in its ruling of 24 March 2010, dismissed the consortium's claims in full and took into consideration the arguments of the Faiveley Transport's counsels. The Group finally agreed to a settlement agreement, signed on 3 November 2010 with the consortium, Faiveley Transport agreeing to settle the $4.1 million in exchange for the dropping of all actions and legal remedies, both present and future, by all stakeholders involved in the case.

– Risk of counterfeit

In the area of intellectual property, the Faiveley Transport Group holds a portfolio of patents and brands that provide it with competitive advantages. Every entity with a design office has set up a process to monitor technology to detect all inventions patented by third parties that may constrain its future developments.

Groups within the leading technical project staff have been organised internally to detect every risk related to counterfeiting of intellectual and/or industrial property rights that may be held in third parties.

The Group avoids granting licences to countries where counterfeiting is not easily punished.

Across the selection of specialists in intellectual property, the Group has built a portfolio of patents and brands that is regularly analysed and evaluated. These specialists carry out, on behalf of the Group, surveillance of all similar patents and/or brands and take the necessary steps to protect the Group's rights in that area, both in France and abroad.

The technology, as well as the expertise held by the Group are also automatically protected by secrecy, which is reflected in the signature of confidentiality agreements with both customers and suppliers very early in the pre-contract relationship.

It should be noted here that Faiveley Transport Malmö sought, as part of an arbitration procedure carried out under the auspices of the International Chamber of Commerce, a conviction of Wabtec Corporation for the misappropriation by Wabtec, since 1 January 2006, of intellectual property relating to friction brake cylinders (BFC TBU brakes), as well as two other braking product concepts (PB-PBA actuators) that are unique to Faiveley Transport. On 24 December 2009, the arbitration was released by the arbitration committee: the arbitration award confirmed that Faiveley Transport is still the owner of trade secrets in relation to the manufacture of the products, and that Wabtec had breached the license agreement once it had been cancelled, as well as certain obligations resulting from this agreement. Furthermore, the award confirmed that the reverse engineering process implemented by Wabtec to obtain a product that is utterly different from Faiveley Transport's may be deemed tainted.

Faiveley Transport Malmö was awarded USD 3.9 million in damages plus interest from Wabtec.

Wabtec was also ordered to pay the royalties that Faiveley Transport should have received in respect of products sold by Wabtec on orders resulting from contracts signed before the licence expired and delivered from 2006. In addition, Wabtec was ordered to cease using manufacturing drawings and other documents relating to these products, except for those that enable Wabtec to fulfil orders resulting from contracts signed before the licence agreement was revoked.

The enforcement order of the arbitration award in the US was granted by a New York Court on 10 May 2010.

Following the favourable outcome of the arbitration, on 14 May 2010, Faiveley Transport initiated a new legal action against Wabtec, before the courts of New York, through its subsidiaries Ellcon National, Faiveley Transport USA, Faiveley Faiveley Transport Nordic and Faiveley Transport Amiens in compensation for damages suffered in the U.S., on the basis of unfair competition and the violation of trade secrets. In a ruling on 13 April 2011, the district court in New York acknowledged that Wabtec was responsible to the corporate plaintiffs, for acts of unfair competition, misappropriation of confidential and secret information, which was the property of Faiveley Transport, and unjust enrichment concerning the friction brake cylinders (CFB-TBU) and actuators PB-PBA.

The district court will examine the damages alleged by the plaintiffs in future hearings, which are expected to take place in June 2011.

In May 2008, the US company Wabtec Corporation issued a writ against Faiveley Transport USA in the Pennsylvania courts for unfair competition in the US territory. No figure has been put on their claim to date. This proceeding is in response to the above described two procedures, launched on the initiative of the Faiveley Transport Group. Defence conclusions were filed on behalf of Faiveley Transport USA on 22 October 2008, rejecting Wabtec's demands in full and highlighting the close connection with the above described procedures. This case is still pending before the courts of Pennsylvania. The procedure calendar refers to March 2012 for the closure of the "Discovery" operations and January 2013 for initial hearings.

– Tax risk

The Group has set up the rules required to understand the subject in an international context and uses external consultants, case by case, country by country, to best protect its interests.

Every Group subsidiary is led by a local team that must ensure that their business is conducted in compliance with the local regulations in force.

A tax audit has been ongoing since the start of 2008 on Faiveley Transport. A rectification proposal was issued on 15 July 2008 by the tax authorities. The corrections considered relate to an additional income tax payment of about €190 thousand. These corrections are still subject to proceedings initiated by Faiveley Transport against the tax authorities.

The tax audits of the companies Faiveley Transport and Faiveley Transport Tours Witten, initiated during the 2009/2010 financial year, ended during the period ending 31 March 2011. These audits generated adjustments of €184 thousand for Faiveley Transport Tours and of €283 thousand for Faiveley Transport Witten. Tax audits are being finalised for the companies Ellcon National, Faiveley Transport USA and Faiveley Transport Leipzig. In addition, a new tax audit was initiated in April 2011 on the company Faiveley Transport.

– Other risks

- **Anti-competition risks:** the Group's business sector is not significantly exposed to this type of risk. In fact, the modest number of players as well as the system for public tenders is not open to this kind of illegal behaviour.
- **Corruption risks:** certain contractual requirements have been considered and prepared to protect the Group against any abuse in this area.

6.3. INDUSTRIAL AND ENVIRONMENTAL RISK

In this area, the Group has identified exactly and fully the various classes of risks it may confront by the nature of its business.

These classes are the following:

– Product risk

Even though the Faiveley Transport Group is positioned in the sector for the production and sale of certain parts described as safety for the railway industry (brakes, doors, etc.) and thus, inherently exposed to contractual or criminal liability in respects of "product", the Group's level of exposure to such risks is considered to be medium by the civil liability insurance players. The evaluation takes into account the process of product design as well as the type and content of the markets operating between the manufacturers and the operators.

In French contracts, the legal liability for hidden defects also applies throughout the life of the product even if, between professionals, its application may be expressly excluded by contract.

Liability as a result of product defects may also have an effect in terms of risk, even if the user often only knows the operator, while the chain of contract prevails between the operator, the manufacturer and the equipment supplier.

The organisation and management of quality, the selection and monitoring of suppliers and subcontractors, the follow up of complaints and the contractual environment are adapted to the nature and potential scale of the exposures.

The production series are short. Orders for supply of raw materials and components are carried out by project. The most unfavourable case would thus be a design error impacting an entire project.

This may represent an average of several thousand parts. The nature of the fault may be rapidly understood due to the expertise of the teams and the possibility of dispatching technicians on site to find the best technical solutions for operators.

As regards suppliers, a selection process exists covering, in addition to the criteria of financial stability, an audit of selection by the supplier's quality department and follow up of performance. Every return or rejected component leads to the organisation of a Group team dedicated to resolving the problem, to analyse the causes and take a decision as to changes to be made to avoid a recurrence of the same problem.

Design and development are carried out under the guidance of Technical Management as part of a customer project or at the time of in-house R&D developments, initiated by the Group. For each project identified as critical, a formal plan is prepared, split into fundamental tasks, implemented and updated by the project manager and project coordinators. The features taken into account at the start of the project are functional and performance requirements, regulatory and legal requirements where applicable, information from previous similar designs and all other requirements required for the design and development. Project reviews are carried out and reports produced. The verification of the designs comprises execution of calculations, the realisation of AMDEC as well as verification of the plans.

The internal validation of the design is carried out by test laboratories for the prototype stage on the basis of a formalised validation plan. Prototypes are validated by the customer with certification trials and/or types followed by FAI (First Article Inspection).

Every new order for parts is subject to a material check, dimension check, and verification of compliance with legal and regulatory requirements and an environmental analysis.

All products are identified. The products carry an identification plate showing an identification number and series number, enabling the date of construction to be found and the trial notes with the name of the related operator. The series number of devices comprising a sub-assembly is identified from these notes. Small parts are traced by production batch.

Additional information, concerning a methodology of evaluating provisions for customer risks, is described in the notes to the consolidated financial statements (§C-Consolidation principles and methods, note 15.2).

Warranty provisions are calculated based on a specific percentage for each product manufactured and the reliability experienced over time. Percentages vary between 1% and 6% depending on products and are applied to sales achieved, project by project.

At 31 March 2011, the warranty provisions totalled €43.6 million.

The amount provided in respect of the warranty and Customer Services, as well as litigation declared by our customers and penalties payable, is disclosed, for the last three years, in the notes to the consolidated financial statements (Note E 14.3).

– Health and safety risk

In most European industrial sites, a safety coordinator manages all aspects of site "health, safety and environment" on a daily basis, making the necessary checks in the factory, studying and recording the product received, updating the job files and organising training.

The objective of general management is to integrate safety into the management system for quality and the environment (QHSE approach), an approach heavily sustained and supported by the Group's insurers.

The job files summarising the risks of various activities and specifying the required individual protection equipment are displayed at all work stations. Every accident with work stoppage is subject to a detailed analysis of the circumstances and causes and where necessary, leads to action being taken to prevent any recurrence.

At French sites, a single administrative document was established and a fire work permit was instituted for all third parties liable to work using hot spots on the premises.

Taking account of the number of external companies operating on the sites, improvements were made at the level of the storage point for chemicals and paint.

– Continuity of business after a disaster

The French sites now avail of in-house fire-fighting personnel, in line with insurers' recommendations. The quantity of flammable material stored in production areas has also been significantly reduced.

Each industrial site has identified potential emergency and accident situations and set up regularly tested emergency plans.

Concerning the risks of production interruption following a fire or flood, it should be noted that the major industrial sites have set up emergency procedures describing the steps to take following a large scale incident that could fully or partly paralyse the operation of the site concerned.

Survival plans are being developed at the Group's major sites in order to take the necessary steps and reduce the consequences, as soon as possible after an incident. The list of companies that can provide repair equipment as well as those specialising in decontamination of electrical devices has been listed.

Those in charge of taking the major steps after an incident have been designated beforehand to find the most adequate response. Taking account of the size of these sites as well as occasionally the proximity of other Group establishments in the same geographical area, it is necessary to consider specific and rapid solutions to reduce the consequences of a large scale incident.

The majority of production tasks can be easily subcontracted and are for the most part manual. The machines, though expensive, can be acquired relatively rapidly. In addition, the interdependence of sites is limited.

– Dependence on suppliers and/or subcontractors

As part of its business, the major operating entities of the Group may be confronted with a state of dependence on certain suppliers and/or subcontractors for certain commodities, or with certain suppliers and/or subcontractors being dependent on the Group.

The implementation of best purchasing and management purchasing practices by type of commodity and by supplier enable us to accurately assess these risks of dependence and take the necessary steps.

Increased monitoring, due to the international economic crisis, was put into place in order to anticipate any major suppliers' failure.

– Increased cost of raw material and transport risk

This information is detailed in § 6.1 and in the consolidated financial statements (note E.16.5.c).

– Environmental risk

The industrial sector, where the Group operates, is subject to compliance with restrictive and multiple environmental standards. The production processes require the use of chemical products (paint, glue, surface treatment, etc.) that may pose a risk for the environment.

The major French sites are ICPE classified (classified sites for the protection of the environment) and subject to a declaration system, and even authorisation for some of them, from the competent regional authorities.

The administrative authorities may also require steps to be taken to prevent or cure, up to the closure of sites in the event of serious violations of applicable regulations in the area of labour and/or environmental law. The Faiveley Transport Group may also be held liable by third parties under the regulations protecting the environment and the general principle of criminal liability.

The Group is fully aware of the importance of managing compliance with regulations in the area of the environment by dedicating a senior engineer to the aspects of safety – health – environment, who must verify every day whether the site he is responsible for is compliant with the various standards applicable.

Audits carried out by the insurers have disclosed some weaknesses in the manner of understanding this risk. Even though the quantity of pollutants used in the business is very small, the Group may be called on to pay rehabilitation costs, fines or damages-interest relative to the non-compliance with environmental standards.

The factories of Saint-Pierre-des-Corps and Amiens are both in industrial parks with a SEVESO classified site that stores oil and chemical products. In the event of problems on these sites close to the Group's production units, this could have a negative effect on their production capacity.

The sites of Saint-Pierre-des-Corps (Electromechanical) and La-Ville-aux-Dames (Electronics) are situated in the flood plain of the Loire and Cher rivers. According to the map of risks and the IGN69 system, the two sites are in an area of medium level risk (water depth of 1 to 2 metres with modest to nil speed or less than 1 metre with medium speed). The two sites at Saint-Pierre-des-Corps are in a Natura 2000 area.

As the constraints of safety, environment and pollution are becoming ever greater, the Group is conscious that it may be obliged to incur expenditure notably to enhance the procedures for monitoring soil, water and air pollution. However, these investments would not be significant for the Group.

In addition, in order to comply with European Directive n° 2004/35, the Group, from 31 March 2009, decided to subscribe additional guarantees in terms of insurance. Environmental damage and soil and water cleanup guarantees were added to the accidental and gradual environmental damage policies.

The Group is already committed to areas of improvement in the storage of products posing a danger to the environment (retention tank, anti-fire cabinets, management of condensates from compressors, elimination of PCB transformer, etc.) and the reduction in the emission of volatile organic compounds. The use of toxic products for surface treatment such as chromic acid and hydrofluoric acid, requires adequate and regular monitoring , (once a quarter) which is carried out by each site concerned.

Below are specific matters that the Group is confronting at the moment.

- Faiveley Transport Amiens, as the last operator of classified installations at Sevran, 4 boulevard Westinghouse, a site occupied by Sab Wabco until 1999 for the production of cylinders for braking systems, was declared to be a polluted site and in this respect likely to create a nuisance or an ongoing risk for people or the environment, under an order from the Prefect on 11 April 2005. This order requested Faiveley Transport Amiens to conform to certain instructions to rehabilitate this site. It should be mentioned here that the land concerned was sold on 16 September 2002 by Faiveley Transport Amiens and that the acquirer in an express condition of the transfer document, agreed to make it his personal business and to incur exclusively all potential cleanup work that would be

deemed necessary under the administrative procedure launched by the Prefecture of Seine Saint-Denis and whose completion was the notification of the above mentioned order. The acquirer and his successors were regularly informed and associated with the procedure in progress. The site was again sold under a legal deed signed on 16 December 2009. The new owner committed to carry out the rehabilitation, pollution cleanup and soil improvement of the site, under his own responsibility and at his own expense, in line with the current and future indications, formal notices and administrative rulings that have or are liable to be taken against Faiveley Transport Amiens (formerly Sab Wabco) and deal with any complaint, legal action, claim or proceedings relating to the environmental condition of the building, its soil and subsoil. The new owner is a specialist in this type of work.
The hearing before the Administrative Court of Montreuil resumed at the request of the town of Sevran, implicitly challenging the decision of the prefect of Saint-Denis to take no action and to terminate the investigation relating to the request for the restoration of the site to its original condition. A Court decision is expected in early June 2011. Faiveley Transport Amiens acts as an observer in this process.

- In 2003, the Brazilian subsidiary of the Sab Wabco Group, not yet acquired by the Faiveley Transport Group, sold land to the company Cyrela. A risk of pollution to the soil was identified in 2004, subsequent to the purchase of the Sab Wabco Group by Faiveley Transport, as a result of which the latter supported the costs of decontamination of the soil. Due to this risk of pollution, Cyrela retained a part of the sale price (R$3.7 million, being €1.6 million, remains outstanding).

  The situation is currently as follows:
  – work to picket the contaminated area has been completed. An environmental audit will soon be completed and decontamination work, which started in November 2009, is taking place under the agreed conditions. Site meetings are regularly held with the provider for an update on soil quality;
  – on completion of the work that will allow the contaminated soil to achieve a level of quality acceptable to local authorities, the company Cyrela may request building permits. At the issuance of these permits, the withholding of the payment may be released and the payment made.

  At 31 March 2011, a provision of R$1.4 million had been recognised in relation to this issue (€600 million).

6.4. IT RISK

The Group's unwavering concern is to protect its IT infrastructure, data and application software. Centralised applications are hosted with several partners who ensure the physical security of the hardware and software protection access within a "Service Level Acceptance" agreement.

Having developed application software that make communication and mobility increasingly easier, the Group attaches great attention to anti-intrusion systems (firewalls) and information access security profiles.

The Group is committed to a major project "Moving Forward" that aims to integrate the information system of the entire Group.

This project covers:

– infrastructure optimisation;

– unification of the communication policy;

– integration of the industrial operation of the Group via a single ERP (Enterprise Resource Planning).

To secure the rollout of a single ERP, the Group management has set up a project platform at the Group level, and called upon external consultants. To control these risks, the Group elected to have a pilot phase that will set the Group configuration before rolling out progressively to all subsidiaries.

The pilot sites are currently in production (Leipzig and Gennevilliers). A feedback is being analysed and will converge to a unique solution to be rolled out, starting in 2012, at the other Group subsidiaries.

B PARENT COMPANY FINANCIAL STATEMENTS: FAIVELEY TRANSPORT AT 31 MARCH 2011

B.1. Parent company financial statements (according to French accounting principles)

1.1. INCOME STATEMENT

	2010/2011	2009/2010	2008/2009
Sales	48,860	48,565	1,402
EBITDA*	(1,180)	146	(3,482)
% of sales	*(2.4%)*	*0.3%*	*(248.4%)*
Profit/(loss) from recurring operations	(1,600)	(235)	(3,484)
% of sales	*(3.3%)*	*(0.5%)*	*(248.5%)*
Operating profit/(loss)	**(1,600)**	**(235)**	**(3,484)**

Net finance income (expense)	(2,216)	37,156	75,161
Exceptional income/(expense)	1,317	(244)	–
Income tax	742	4,630	5,210
NET PROFIT/(LOSS)	**(1,757)**	**41,308**	**76,887**

(*) Operating profit plus amortisation and depreciation.

Faiveley Transport (formerly Faiveley S.A.) continues to provide services for the Group, as the holding and management company. The €48.9 million sales achieved in 2010/2011 were stable compared to the previous year (€48.6 million). The significant increase of the previous financial year was primarily due to the fact that the transfer of all assets and liabilities of the former Faiveley Transport company, carried out on 31 March 2009, had had no impact on the parent company income statement.

As in the past, Faiveley Transport rebilled a significant portion of its expenses to its subsidiaries. The operating loss was €1.6 million, compared to a loss of €0.2 million in 2009/2010. This decline was primarily due to an increase in non-productive fixed costs of approximately €1.5 million.

The net finance expense was €2.2 million, compared to an income of €37.2 million in the previous year. This movement was primarily due to the collection of exceptional dividends of €45.7 million in 2009/2010. In 2010/2011, dividends of €0.4 million were collected.

Excluding dividends, the net finance expense improved by €6 million in the 2010/2011 financial year. This was due, on the one hand, to a decrease of €0.8 million in the interest expense, which relates to current accounts, bank overdrafts and interest on borrowings, partly offset by interest on loans. Faiveley Transport also recorded net foreign exchange gains of €3.6 million and a positive movement of €0.9 million following the release of a provision for foreign exchange losses. The interest expense on the bank borrowings taken out on 23 December 2008 amounted to €9.8 million, compared to €11.8 million in the previous year.

The €0.7 million income tax refund recognised at 31 March 2011 reflects the tax grouping gain of €1.5 million achieved during the period, reduced by the tax charge generated by the German subsidiaries, Faiveley Transport Holding Gmbh & Co KG and Faiveley Transport Leipzig GmbH & Co KG for €0.9 million and increased by a withholding tax credit of €0.1 million.

1.2. BALANCE SHEET

	2010/2011	2009/2010	2008/2009
Net non-current assets	954,847	963,641	980,994
Current assets	46,330	44,384	52,512
Cash	286,584	248,958	234,655
TOTAL ASSETS	**1,287,761**	**1,256,983**	**1,268,161**
Equity	194,426	213,081	185,841
Provisions	960	1,972	2,548
Financial debt	1,059,357	1,005,117	1,038,257
Other liabilities	33,018	36,812	41,515
TOTAL EQUITY AND LIABILITIES	**1,287,761**	**1,256,983**	**1,268,161**

Net non-current assets take account of the recognition of a €384.8 million technical deficit, registered on the transfer of Faiveley Transport and Faiveley Management's assets and liabilities to Faiveley S.A., intangible assets of €11.9 million, equity investments of €418.9 million and receivables of €140 million attached to these investments.

Equity investments increased by €5.2 million with the acquisition of the Swiss subsidiary, Urs Dolder AG and the buyout of the minority shareholders of Faiveley Transport Lekov. Receivables from subsidiaries decreased by €17.8 million being a decrease in loans to subsidiaries of €12.1 million and a decrease of €5.7 million in current account balances due from subsidiaries.

Current assets increased by €1.9 million during the year. This increase was primarily due to the €5 million increase in trade receivables, offset by the €1.7 million decline in other receivables and a €1.4 million decline in receivables related to the tax grouping.

Cash and cash equivalents grew by €37.6 million during the year. This improvement was due to a €5.7 million increase in marketable securities and a €43.3 million increase in cash.

Equity decreased from €213.1 million at 31 March 2010 to €194.4 million at 31 March 2011. This €18.7 million negative movement may be analysed as follows:

- loss for the year: €1.8 million;
- payment of dividends: €16.9 million.

Provisions decreased by €1 million due to reversals of provisions for foreign exchange risk. This item consists mainly of provisions for litigation of €0.8 million.

Financial debt was valued at nominal value and comprised:

- the €367 million loan granted by the banking pool, with a view to reorganising the Faiveley Transport's shareholding;
- current bank and cash pooling overdrafts (Group cash management), for €228 million;
- the loan subscribed from the Faiveley Transport Malmö subsidiary, for €27.9 million;
- credit current accounts with Group companies, for €436 million;
- accrued interest in relation to the above financial debt, for €0.2 million;
- the balance of the special reserve for employee profit sharing, which is remunerated at the base lending rate, for €65 thousand.

Other liabilities also decreased by €3.8 million during the year. This movement was primarily due to a €2.6 million decline in the liability translation adjustment.

B.2. Subsequent events after 31 March 2011

On 1 April 2011, Thierry Barel was appointed as Chairman of the Management Board and Chief Executive Officer by the Supervisory Board, to replace Robert Joyeux who resigned his duties.

On the same day, the Supervisory Board also appointed Guillaume Bouhours, Group Chief Financial Officer, as a member of the Management Board.

B.3. Research and development costs

None in the Faiveley Transport financial statements.

B.4. Change of method during the year

None.

B.5. Information on non-tax deductible changes

Non tax-deductible charges at 31 March 2011 amounted to €26,322.

B.6. Information on payment terms

At 31 March 2011, trade payables posted to the balance sheet totalled €12,299 thousand, of which €10,467 thousand related to international intercompany invoices, due in 60 days at end of month, payable on the 5th of the month.

The aged analysis was as follows:

	30 days	60 days	+ 60 days	Total
Trade payables at 31 March 2011	561	429	11,309	12,299
Trade payables at 31 March 2010	1,677	1,274	10,927	13,878

B.7. Treasury shares

The company directly and indirectly holds 3.21% of the share capital.

B.8. Analysis of results and allocation of the 2010/2011 net loss

- Table of results of Faiveley Transport for the last five years:

Attached to the present report, pursuant to the provisions of Article R225-102 of the Commercial Code, is the table of the results of the Company for each of the last five years.

- Proposed allocation of net loss:

We would ask you to approve the annual financial statements (balance sheet, income statement and notes) as presented to you, showing a net loss of €1,757,423.54.

We would also ask you to approve the following allocation of net loss for the financial year ended 31 March 2011:

Loss for the year	(€1,757,423.54)
Increased by:	
Retained earnings	€86,292,398.91
Distributable profit	€84,534,975.37
– Allocation to the legal reserve:	€0
– Dividend payment, i.e. €1.20 per share:	(€17,285,653.20)

The balance of €67,249,322.17 will be allocated in full to "Retained earnings".

The dividend will be payable with effect from 19 September 2011.

Taking account of the allocation, the equity of the Company amounts to €177,139,971.16.

If at the time of the payment, the Company holds treasury shares, the profit distributable corresponding to the unpaid dividend due to the holding of the shares, shall be allocated to the account "retained earnings".

It should be noted that over the last three financial years, the following sums were paid in dividends: €17,285,653.20 for the financial year 2009/2010, €14,404,711 for the financial year 2008/2009 and €4,385,354.75 for the financial year 2007/2008.

C. INFORMATION ON THE SHARE CAPITAL

C.1. Bylaws conditions governing revisions to the share capital and corporate rights

The share capital is increased, either by the issue of new shares, or by an increase in the nominal value of existing shares.

New shares are fully paid, either in cash, or by offset against current liabilities of the company, or by incorporation of reserves, profits or share premium, or by transfer in kind, or by conversion of bonds. New shares are issued at their nominal value, or at that amount increased by a share premium.

An Extraordinary General Meeting is the only competent body to decide, on a report by the Management Board, to increase the share capital. A reduction in share capital is authorised or decided by an Extraordinary General Meeting that may delegate to the Management Board all powers to carry it out. A capital increase must be completed within five years from the date of the General Meeting that decided or authorised it.

C.2. Capital issued and capital authorised but unissued

2.1. CAPITAL ISSUED

At 31 March 2011, the share capital of the company was €14,404,711. It comprises 14,404,711 shares of €1 nominal value each, fully paid, all of the same class.

- **Revision to the share capital and rights attached to shares**

Every revision to the share capital or rights attached to securities that comprise it, is subject to the law; the bylaws do not provide for specific requirements.

- **Form and registration of shares**

Shares are in nominative or bearer form at the choice of the shareholder. Both these categories are subject to the law that relates to them.

- **Existence of thresholds in the bylaws**

Apart from the legal requirement to inform the holding company of certain fractions of the share capital, there is no particular requirement in the bylaws.

- **Identification of bearer shareholders**

Except in instances specified by the law, fully paid up shares are either held in nominative or bearer form, at the shareholders' discretion. Shares are registered in accordance with the terms and conditions provided by law.

The Company is authorised to use, at any time, the legal provisions in respect of identification of holders of securities giving, immediately or in time, the right to vote at shareholders' meetings.

- **Company share registrar**

The Company has delegated its share registrar service to Société Générale Securities Services: 32, rue du Champ de Tir – BP 81236 – 44312 Nantes Cedex.

- **Transfer of shares**

The transfer of Company shares between living persons or by death can be done freely. Company shares are transferred with regard to third parties and the Company by a transfer order from account to account. Shares in the Company that are not fully paid in respect of payments due cannot be transferred.

2.2. CAPITAL AUTHORISED BUT NOT ISSUED

Delegation of authority to increase the share capital

On the occasion of the Combined General Meeting of 22 September 2009, a resolution (tenth resolution) was approved by the shareholders in relation to an authorisation to be given to the Management Board to issue shares or marketable securities giving the right to allocate new or existing shares in the Company with, in the event of the allocation of new shares, the facility to cancel the pre-emption right to subscribe.

This resolution was adopted by a qualified majority.

Pursuant to Article L.225-136 of the Commercial Code, which was derived from the Order of 22 January 2009 that came into force on 1 April 2009, the Management Board was authorised to increase the share capital, with cancellation of the pre-emption right, with the facility of carrying it out in one or more offerings in accordance with section 2 of Article L.411-2 of the Monetary and Financial Code, and not exceeding 10% of the share capital of the Company.

This authorisation was given for a period of 26 months from 22 September 2009.

The Management Board, in the event it would decide to use the authorisation bestowed on it, would request prior approval from the Supervisory Board and would report to the following Annual Ordinary General Meeting, in accordance with the law and applicable regulations, about the use made of authorisations granted by this resolution.

This authorisation has not been implemented by the Management Board to date.

C.3. Analysis of shareholders and voting rights at 31 March 2011

3.1. According to the information supplied by Société Générale, amongst which, the register of nominative shareholders and the identification of a certain number of bearer shareholders, the shareholders and the voting rights in the Company at 31 March 2011, were as follows:

Principal shareholders at 31 March 2011	Number of shares	% of capital	Single voting rights	Double voting rights	Total voting rights	% voting rights
Financière Faiveley	6,315,375	43.84%	59,412	6,255,963	12,571,338	57.51%
François Faiveley Participations (F.F.P)	1,159,288	8.05%	354,538	804,750	1,964,038	8.98%
François Faiveley	225	0.00%	–	225	450	0.00%
Thierry Faiveley	215,190	1.49%	215,190	–	215,190	0.98%
Faiveley indivision	5,000	0.03%	5,000	–	5,000	0.02%
Erwan Faiveley	5	0.00%	–	5	10	0.00%
Total Faiveley Family	**7,695,083**	**53.42%**	**634,140**	**7,060,943**	**14,756,026**	**67.50%**
Directors and senior executives(*)	219,307	1.52%	98,680	120,628	339,935	1.56%
Treasury shares	462,777	3.21%	–	–	–	0.00%
Nominative shares(**)	747,258	5.19%	10,852	736,406	1,483,664	6.79%
General public	5,280,286	36.66%	5,280,285	–	5,280,286	24.15%
TOTAL	**14,404,711**	**100.00%**	**6,023,957**	**7,917,977**	**21,859,911**	**100.00%**

(*) Exluding E. Faiveley and F. Faiveley.
(**) Excluding Faiveley Family, senior executives and treasury shares.

To the knowledge of the Company, no other shareholder held over 5% of the share capital or the voting rights at 31 March 2011.

3.2. ANALYSIS OF THE SHARE CAPITAL OVER THE LAST THREE YEARS

	2010/2011 % of capital	2009/2010 % of capital	2008/2009 % of capital
Nominative shares	60.15	58.94	66.50
General public	39.85	41.06	33.50

3.3. SHARE CAPITAL OF THE COMPANY SUBJECT TO PLEDGES

Name of shareholder as pure nominative form	Beneficiaries	Start date of pledge	Expiry date of pledge	Condition for release of pledge	Number of shares pledged at 31 March 2011	% of capital pledged
Financière Faiveley	Société Générale and Crédit Lyonnais	24/03/2006	31/03/2016	Full repayment of loan granted	70,400	0.49
François Faiveley Participations	Société Générale and Crédit Lyonnais	24/03/2006	30/03/2013	Full repayment of loan granted	4,062	0.028

C.4. Movements in the share capital during the last six years

Date	Transactions	Increase in capital (€)	Cumulative number of shares	Capital (€)
31 March 2005	Nil	Nil	2,487,917	12,439,585
27 September 2005	Exercise of options to subscribe	90,000	2,505,917	12,529,585
15 March 2006	Reduction in nominal value of shares	Nil	12,529,585	12,529,585
31 March 2006	Nil	Nil	12,529,585	12,529,585
31 March 2007	Nil	Nil	12,529,585	12,529,585
31 March 2008	Nil	Nil	12,529,585	12,529,585
23 December 2008	Issue of new shares	1,875,126	14,404,711	14,404,711
31 March 2009	Nil	Nil	14,404,711	14,404,711
31 March 2010	Nil	Nil	14,404,711	14,404,711
31 March 2011	Nil	Nil	14,404,711	14,404,711

C.5. Employee interest in the Company's share capital

FCPE Faiveley Shares held 15,500 shares (0.11%) in the company at 31 March 2011.

Employee shareholding represented 1.12% of the share capital of the Company at 31 March 2011 (excluding shares held by Robert Joyeux).

C.6. Shareholders' agreements concerning the securities comprising the share capital of the Company

As part of the reorganisation of the Group's shareholding, carried out in December 2008, the executive shareholders of Faiveley Management SAS and Faiveley M2 received Faiveley S.A. (renamed Faiveley Transport) shares in exchange for shares in these two companies, which were transferred to Faiveley S.A.

The 557,233 Faiveley S.A. shares held by the former shareholder of Faiveley Management SAS are subject to a lock up clause, from 23 December 2008, relating to all of the shares received for a period of 2 years and 2/3 of the shares for a period of 3 years. In addition, over a period of six years from that date, any disposal by a former shareholder of Faiveley Management SAS of a block of more than 10,000 Faiveley shares is subject to a Faiveley Transport pre-emption right. On the departure of Etienne Haumont in September 2010, this requirement was waived under the settlement agreement signed between the officer and the Company.

The 147,893 Faiveley Transport shares held by the former shareholders of Faiveley M2 are subject to a vesting clause, which specifies the conditions for the purchase by Faiveley Transport, in case of a manager's departure from the Company before 12 September 2010, and were also subject to a lock up clause until 23 December 2011. In addition, over a period of six years from 23 December 2008, any disposal by a former shareholder of Faiveley M2 of a block of more than 3,000 Faiveley shares is subject to a Faiveley Transport pre-emption right.

D. CORPORATE INFORMATION RELATING TO THE GROUP

D.1. Human resources policy

Faiveley Transport is a group with an international culture and dimension. Its business is reflected in long-term contractual relationships with its customers. In order to capitalise on knowledge acquired throughout the life of these projects, the Faiveley Transport Group has resources enabling it to ensure staff loyalty over time.

The Faiveley Transport Group provides real prospects of career development thanks to a policy of geographical mobility and to shared expertise.

The Human Resources Department has been strengthened and is standardising the human resources policy on all sites, to rationalise costs, to encourage staff mobility and to optimise career management.

Since the start of 2008, new indicators have been put in place by the Human Resources Department, in all of the 47 sites in 24 countries. Today, the consolidation and analysis of these indicators provides better visibility of the needs and allows arbitrating priorities in the best way possible.

1.1. ENSURE CAREER DEVELOPMENT

The policy adopted by the Human Resources Department is based on the dynamics of mobility and exchange of experiences. The more skills are transferred and good practices exchanged among the various entities in the world, the greater the level of the Group's expertise is reinforced.

Reinforced by this conviction, Faiveley Transport encourages the development of technical and project teams as close as possible to their customers. Technical knowledge acquired by the Faiveley Transport staff, based in the four corners of the world, enables them to support their customers better and respond to their needs.

Using the strength of its expertise at a local level, the Group thus benefits from its international scale.

The Group seeks to retain its human capital, that of its engineers as well as all employees, to respond better to the overriding requirement of reliability, safety and long life of its equipment.

It is for this reason that the Group encourages internal mobility, on a professional and geographic basis. This can provide a solution to the need to adapt employment levels as well as to integrate the aspirations of the employees.

Internal mobility also provides employees with career opportunities that encourage their professional development by the acquisition of new expertise and qualifications.

In order to promote this internal mobility, a website was set up on the Group intranet portal that everyone can consult, in priority, on the positions open on all sites in the world. It is only thereafter that job offers are advertised externally.

In the same vein, the Group has been committed since 2009, with all local Human Resources executives, to continue the consideration of the tools and practices in use, to improve the contents and to ensure that in each country there is a common Group standard (in the area of training, annual performance review, etc).

For instance, a common policy was implemented for holding annual performance review interviews; a common performance review form for all entities was prepared in consultation with local Human Resources officers.

At the same time, in order to support managers in this process, training will be provided on how to conduct these interviews.

In 2010, this thought process continued via the setting up of a Group-wide induction booklet. This document is intended to provide every new hire with a comprehensive overview of the Faiveley Transport Group, as well as all practical local information necessary to their integration. This is also a mean of strengthening the sense of belonging to Faiveley Transport.

In 2011, always in the spirit of harmonising of tools and practices in use, several projects emerged:

– A Group-wide information technology charter was established and distributed to all subsidiaries. This charter is intended to formalise the rules of law, ethics and security for the use of information systems and for communication within the companies belonging to the Faiveley Transport Group.
– A time management tool has been rolled out in France in an effort to streamline and optimise payroll administration tasks.

In the context of a changing economic environment maintaining and developing employees' expertise is an essential feature of the growth and overall performance of the Group.

Professional training constitutes in this respect a major area of the Human Resources policy. The Human Resources indicators obtained in 2010/2011 revealed that the training programmes concerned all professions.

In addition to making people aware of safety measures and quality standards, the largest part of the training budget continued to be dedicated to updating technical skills. In this area, the needs have been defined by department managers together with the Human Resources departments.

Improving our understanding of English is fundamental and lessons are frequently offered to all Group employees.

The training policy is entirely translated at the local level in line with the issues of each site.

However, decentralisation does not rule out control. The Group remains vigilant and ensures that training is consistent from one site to another; practice standardisation must be carried out the right way: suitable training for each category of personnel to meet the needs of all entities.

The objectives of the training indicators implemented since 2008 are to follow up on the training budget of each entity, monitor the percentage of trained employees and managers and lastly, the nature of training organised.

Region	% of payroll dedicated to training(1) 2010/2011	% of payroll dedicated to training(1) 2009/2010
France	1.70%	1.88%
Europe (excluding France)	0.73%	1.18%
Americas	0.95%	1.00%
Asia Pacific	2.15%	0.63%

(1) Only teaching costs are included.

1.2. STRENGTHENING A COMMON CULTURE

- **Respect for cultures and standardisation of processes**

Given the growing internationalisation of the Group, the position adopted was to respect the diversity of each country and to allow local customers the possibility of retaining a local contact.

Every site therefore retained its identity, while respecting common values, which are: quest for performance and results, stimulation of creativity and sharing experience.

Through the exchange of best practices between sites, a set of rules of good practices have been defined and implemented. The standardisation of processes is fundamental to enable everyone to have a clear understanding plan and expectations.

Management uses key performance indicators, focuses its efforts on performance improvement and ensures the greatest motivation of all employees.

For this, Faiveley Transport also uses the development of the industrial excellence system based on the "Lean manufacturing" method. This method consists of seeking industrial performance, by permanent and continuous improvement and the elimination of waste. It is based on two principal concepts: just in time and automation.

The just in time tools are the production with continuous and driven flows, the rapid change of tools and the integration of logistics. The automation tools include tools to automatically stop production, the methods of elimination of causes of errors and the analysis of problems.

The rollout of these techniques is based on the human resources of the business and their integration into the areas of improvement carried out, in most cases in the field.

The following programmes deserve a special mention: QRQC and TOP5, launched in 2007, which encourage the staff to exchange ideas and develop action plans for improvement. The objective of this type of initiative is to offer solutions to the operational problems identified.

The QRQC method (Quick Response Quality Control) enables rapid solutions to be put in place for quality or other problems. The involvement of the personnel in the resolution of quality problems facilitates relations between departments and enables operators to improve their working conditions.

In the principal sites, the working day starts now with a 5-minute meeting on site. This is an opportunity to disclose problems encountered at their workstation and to propose ideas for improvement that may be rewarded on certain sites. This daily meeting enables them also to have a complete view of their results as well as the objectives to be achieved during the day.

- **Development of internal communication**

The Faiveley Transport Group also continues to rollout its various internal communication tools to enrich dialogue, promote communication among everyone and to distribute Group information.

Within the Group, information circulates up and down the organisation, via various communication tools, amongst which:
- an intranet portal accessible by all Group subsidiaries;
- a Group internal newsletter (printed in four languages including Chinese);
- an intranet network for each entity;
- a monthly information letter within certain companies;
- organisation of exchange meetings at the level of operating companies;
- organisation of annual business seminars (HR seminar, Finance seminar, Engineering seminar, etc.);
- organisation of annual meetings among the various Group managers;
- regular individual meetings organised between employees and their immediate supervisor.

D.2. Analysis and change in workforce

At the end of March 2011, the Faiveley Transport Group had 5,114 employees spread across 24 countries worldwide. The movement in employees (permanent and contract employees) during the last three years was as follows:

	31 March 2011	31 March 2010
France	1,285	1,261
Europe (excluding France)	1,914	1,861
Americas	384	331
Asia / Pacific	1,531	1,412
TOTAL FAIVELEY TRANSPORT GROUP	**5,114**	**4,865**

Analysis of workforce at 31 March 2011 by type of employment contract:

	Permanent	Fixed-term
France	1,226	59
Europe (excluding France)	1,781	133
Americas	367	17
Asia / Pacific	1,453	78
TOTAL FAIVELEY TRANSPORT GROUP	**4,827**	**287**

Of which were women at 31 March 2011:

Replacement and absenteeism at 31 March 2011:

Region	Replacement rate	Absenteeism rate
France	7.3%	3%
Europe (excluding France)	4.0%	3%
Americas	1.1%	2%
Asia / Pacific	9.9%	0.8%
TOTAL FAIVELEY TRANSPORT GROUP	**6.4%**	**2.2%**

2.1. ORGANISATION OF THE WORKING WEEK

In France, the reduction and organisation of the working week effective within the Group are subject to the law and various collective agreements. The steps taken to reduce the working time make overtime non significant.

In the rest of the world, the organisation of the working week and the management of overtime are governed by the law in each country concerned.

2.2. REMUNERATION POLICY

Efforts undertaken to control payroll expenses were continued, while retaining the principle of individualised remuneration, based on results and performance.

Generally speaking, the financial resources available for wage and salary increases within the Group are negotiated annually with personnel representatives on behalf of all staff.

The remuneration policy for staff is as follows:

- individual increase depending on the results and performance of each person;
- a variable annual bonus, which is given to staff and managers depending on Group and individual objectives, in all Group companies.

The management's objective is to maintain an increase in salaries throughout Group companies.

2.3. RECOGNITION OF EMPLOYEE BENEFITS

Employee benefits, mainly comprising pension commitments are recorded in the consolidated financial statements in accordance with IFRS. These amounted to €33 million, at 31 March 2011, compared to €35.3 million at 31 March 2010.

2.4. GENDER EQUALITY

Faiveley Transport is committed to promote, on a comparable basis, equality between men and women in their career development, access to training, salaries and position within the business.

Since the Law of 9 November 2010 on pension reform, in France, companies of 50 employees now must establish a plan of action to ensure gender equality at work from 1 January 2012. The Human Resources Management Group has already initiated this process at all its subsidiaries and will ensure its proper application.

D.3. Work accidents/health and safety conditions

The prevention of health and safety risks is a priority for the Faiveley Transport Group.

The various risks encountered in its business and the steps taken to deal with them are described in the chapter "A.6.3 Industrial and Environmental risks – "§ Health and Safety Risks".

The Health and Safety committees set up in France meet quarterly. During these meetings, critical situations are discussed and priorities defined. The cost of any required action is also reviewed and the result of such steps is assessed.

Not only does the Group hold these meetings in accordance with applicable local legislation, it also ensures that staff has an updated brochure containing information on health and safety measures within the company and on proper staff behaviour. Fire exit drills are conducted on a regular basis.

In addition to the steps implemented by the health and safety committees, progress groups are continuing to work within the various companies of the Group, focusing on diverse areas of interest in order to improve risk prevention and pursue the safety training policy.

The occurrence of work accidents is followed, analysed and communicated on a monthly basis to the health and safety committee, through a number of indicators. Encouraging results in terms of employee safety were registered as a result of total commitment by the Group's senior management.

	2010/2011				
Region	**France**	**Europe (excluding France)**	**Americas**	**Asia Pacific**	**TOTAL**
Number of accidents with work stoppage	36	48	0	6	90
Number of days stoppage	721	937	0	312	1,970
Number of accidents with no work stoppage	18	84	4	24	130

D.4. Corporate information concerning companies of the Faiveley Transport Group

4.1. COLLECTIVE AGREEMENTS

The French companies of the Faiveley Transport Group are all subject to the national collective agreement in the metal industry.

4.2. PERSONNEL REPRESENTATIVES

Most subsidiaries of the Faiveley Transport Group have personnel representatives.

Faiveley Transport Group has a European works council that meets twice a year, as well as a Group committee in France that meets once a year.

Faiveley Transport Group makes sure of organising the meetings at different sites every time. The objective is to enable the representatives of these committees to make the most of these events and visit other industrial sites and thus discover other practices and cultures.

4.3. EMPLOYMENT AND INTEGRATION OF DISABLED WORKERS

All Group companies for which local laws provide for employing a given percentage of disabled employees, comply with such local legal requirements.

Some of these subsidiaries employ a higher number of disabled workers than required by law.

The Human Resources Department pays particular attention to this issue and decided in 2010 to ask its staff to think about how to best broach this subject within the Company.

			Legal obligation to employ disabled workers			
Sites	**Annual legal obligation = BU * equivalent**	**Obligation met**	**Disabled people employed**	**BU * equivalent**	**Use of sheltered workshops**	**BU * equivalent**
Faiveley Transport	3	0.3	0	0	YES	0.3

Faiveley Transport Gennevilliers	4	2.5	4.4	1.0	YES	1.5

(*) Beneficiary Units.

4.4. OUTSOURCING

For the Group as a whole, outsourcing for the financial year 2010/2011 was valued at €33.7 million, compared to €33.1 million in the previous year.

The Group ensures that its subsidiaries comply with the fundamental provisions of working conditions in their relationships with subcontractors.

4.5. CHARITABLE ACTIVITIES

It should be noted that the vast majority of the entities in the Faiveley Transport Group allocate a significant budget to various charitable activities. For example, the support of orphans in Cambodia.

D.5. Personnel profit-sharing

An audit of employee saving plans was carried out in France during 2008/2009, with a view to simplifying and standardising practices.

The objective was:
- to ensure that all agreements comply with legal provisions (especially since the new provisions laid down by the law on employee savings plans of 3 December 2008);
- to standardise profit-sharing calculation formulae from one site to another, while at the same time respecting the specific features of each site.

Today, the Group has put into place a Group savings plan that is common to all French sites.

In 2010, the Human Resources Department decided to continue optimising its group savings policy in the following areas:
- implementation of a Group-wide retirement savings plan;
- comparison of the services of the plan manager with others in the market, and choice of financial instruments that provide a satisfactory level of performance: the best managers and best instruments were selected within an open environment.

5.1. BONUS SCHEME AGREEMENTS

All our French subsidiaries have implemented a bonus scheme agreement.

5.2. PROFIT-SHARING AGREEMENTS

All our French subsidiaries have implemented a profit-sharing agreement.

5.3. HEALTH AND WELFARE BENEFIT PLANS

An audit of health and welfare benefit plans throughout France with a view to simplifying, standardisation and optimising costs is now complete.

Today, following the results of this audit carried out in 2008 and after informing and consulting with our personnel representatives, a single insurance provider was selected. The Group now benefits in France from standardised guarantees for all the personnel of the Group's French companies, with no distinction being made between categories of employees.

5.4. EMPLOYEE SHAREHOLDING: SHARE OPTION AND SUBSCRIPTION PLANS AND ALLOCATION OF FREE, PERFORMANCE-BASED SHARES

Faiveley Transport has set up a long-term motivation plan for employees. The objective is to enable certain employees to become shareholders in the Company and drive performance improvement.

- **Share option plan of 27 September 2005:**

Since the acquisition of Sab Wabco, Faiveley Transport has implemented a share option plan for the benefit of the Group's key managers (excluding the managers who had previously invested in Faiveley Management S.A.S.).

This share option plan, covering a maximum of 325,000 Faiveley S.A. shares, was approved by the General Meeting of 27 September 2005 and implemented by the Management Board.

In order to meet its future obligation to transfer these shares to beneficiaries, Faiveley Transport began a share buyback programme on the market at the end of 2005.
- the Management Board of 24 November 2005 awarded 221,760 options to 38 employees or managers of Faiveley Transport;
- the Management Board of 29 December 2005 awarded 6,720 new options to 1 new beneficiary;
- the Management Board of 22 June 2006 awarded 31,360 options to 6 new beneficiaries;
- the Management Board of 25 October 2006 awarded 6,720 options to 1 new beneficiary;
- the Management Board of 15 November 2006 awarded 4,480 options to 1 new beneficiary;
- the Management Board of 1 December 2006 awarded 11,200 options to 2 new beneficiaries;
- the Management Board of 2 April 2007 awarded 26,880 options to 5 new beneficiaries;
- the Management Board of 19 February 2008 awarded 26,880 options to 4 new beneficiaries;
- the Management Board of 29 March 2008 awarded 13,440 options to 3 new beneficiaries;
- the Management Board of 16 July 2008 awarded 22,600 options to 1 new beneficiary.

Options granted that were neither exercised nor cancelled cover 117,541 shares.

Options can be exercised from the second anniversary of their date of grant by the Chairman of the Management Board, subject to the presence of the beneficiary within the Faiveley Transport Group on the day of exercise and their acceptance of the option regulations. It should be noted that 198,499 options had been exercised at 31 March 2011. The securities can only be disposed of from the fourth anniversary of the grant of the purchase option. No Director of Faiveley Transport was granted any share options as part of this plan.

- **Share subscription plan of 22 September 2009:**

A share subscription plan was approved by the Annual General Meeting of 22 September 2009, for the benefit of senior executives and employees. This plan was implemented in accordance with recent regulatory developments, in particular the law of 3 December 2008 on earned income and the AFEP-MEDEF recommendations of October 2008.

This plan was put forward in accordance with agreements concluded as part of the restructuring of the share capital of Faiveley Transport carried out in December 2008 and was intended to motivate and encourage the loyalty of Directors and senior executives to the Group.

The Management Board decided at its meeting of 23 November 2009 to grant, on the same date and up to 23 November 2017, options giving right to subscribe for new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91.

The terms and conditions of exercise of the options were posted or provided to the beneficiaries in a document listing the option plan regulations. Since one of the beneficiaries is a member of the Management Board and therefore a senior executive, a retention obligation was specifically provided. The Supervisory Board, at its meeting of 23 October 2009, set the number of shares to be retained by senior executives concerned. It was therefore decided that at least one third of the shares exercised in excess of the number required to fund the full exercise of options allocated and the payment of tax on the corresponding capital gains, with this rule remaining applicable until the senior executives concerned have accumulated one year of their net salary in shares.

- **Plan for the allocation of performance-based shares of 13 September 2010:**

To enable the Faiveley Transport Group to motivate and retain certain employees and officers, and to optimise the structure of remuneration within the Group, the Combined General Meeting of 13 September 2010 authorised the Management Board to proceed on one or more occasions with the allocation of free ordinary shares of the Company's, existing or to be issued, for the benefit of corporate officers as defined by the Law and to certain employees of the Company and companies related to it.

These allocations will be made within the limit, established by the General Meeting, of 1% of the share capital of the Company at 13 September 2010.

- the Management Board of 3 December 2010 awarded 64,500 free shares to 38 beneficiaries;
- the Management Board of 24 February 2011 awarded 5,200 free shares to 5 new beneficiaries;

The allocation of these shares will become final only after a period of two years and after the application of performance criteria established by the Remuneration Committee. Beneficiaries will be required to comply with a mandatory retention period of two years from the date of final allocation.

The terms and conditions of these free shares were included in a set of plan rules that was sent to the beneficiaries. One of the beneficiaries being member of the Management Board and as such an officer at the date of allocation, an additional obligation to retain the shares allocated to him was defined. At its meeting on 26 November 2010, the Supervisory Board of the Company decided that the officer should retain at least 50% of the shares that were allocated by the Management Board under the new plan, beyond the period of unavailability as defined by the regulations therein. This rule shall apply until the officer holds shares of the Company, acquired in the various plans to grant stock options or free shares of the company, worth at least the equivalent of one year's net salary.

The main features of share option purchase plans, share subscription and free share allocation plans are detailed in note-E.13-Equity to the consolidated financial statements.

E. CORPORATE BODIES AND MANAGEMENT

The Supervisory Board and the Management Board of the Company comprise the people referred to in the appendix, which discloses the terms of office and the functions of the people concerned over the last five years.

E.1. Corporate governance

1.1. COMPOSITION OF THE MANAGEMENT BOARD

The Management Board comprises between three and seven members, selected or not from among the shareholders and appointed by the Supervisory Board, which confers on one of them the position of Chairman. The members of the Management Board must be individuals.

The Management Board is appointed for a period of three years by the Supervisory Board, which may replace members who die or resign, in accordance with the law.

No one may be appointed as a member of the Management Board if they do not meet the conditions of qualification required by Directors of public limited companies, if they have been held incompatible, in default or subject to a prohibition forbidding them access to these functions, if they are a statutory auditor to the company, was or are a parent or related under the conditions set by Article L. 225-224 of the Commercial Code, if they are a member of the Supervisory Board, if they already have two other positions on the Management Boards of other companies or if they chair two other public limited companies.

Every member of the Management Board must be under 65 years old. If this age limit is reached in office, the Director concerned is considered to have resigned and a new Director will be appointed as provided by the present article.

Every member of the Management Board may be linked to the company by an employment contract that remains in force during the term of office and at its expiry. Members of the Management Board may be reappointed.

In accordance with the bylaws, the Chairman who is granted the power to represent the company carries the title "Chairman and Chief Executive Officer".

There are no family relationships between members of the Management Board.

1.2. COMPOSITION OF THE SUPERVISORY BOARD

In accordance with statutory provisions, The Supervisory Board comprises at least five members and ten at the most.

The Company, having adopted the structure of a limited liability company with a Management Board and a Supervisory Board at the Annual General Meeting held on 27 September 2005, the first shareholders, i.e. the former directors of the company incorporated as a limited liability company with a Board of Directors, had been appointed for an initial period of three years. They were reappointed by the Annual General Meeting of 17 September 2008 for a period of six years in accordance with the Company's bylaws.

The Combined General Meeting of 13 September 2010 amended Article 19 of the Company's bylaws. Board members are elected for a term of three years and may be reappointed. This decision and the immediate facts apply to current terms of office.

Every shareholder, individual or corporate, may be elected as a member subject to holding at least one share in the Company (article 19 of the bylaws).

The Supervisory Board elects from among its own members a Chairman and a Vice-Chairman who must be individuals. The Chairman and Vice Chairman are in charge of calling board meetings and directing discussions.

Where a legal entity assumes the function of a member of the Supervisory Board, it is required to designate a permanent representative who is subject to the same conditions and requirements and who has the same civil and personal liability as if he/she were a member of the Board in his/her own name.

Members of the Management Board, as well as current or former statutory auditors and their parents or relatives under the laws, may not be members of the Supervisory Board.

The training and professional experience of members of the Board are very varied, all having had high level of responsibility in business.

With regard to the six independence criteria defined by the Supervisory Board in line with those recognised by Euronext, at 31 March 2011 three of the current eight members are deemed to be independent: Christian Germa, Philippe Alfroid and Maurice Marchand-Tonel.

At 31 March 2011, the Supervisory Board comprised eight members, all French citizens, Christopher Spencer has dual French and English nationalities. The average age of the members was 58 years.

At its meeting of 24 March 2011, the Supervisory Board reviewed the provisions of the Law of 27 January 2011 concerning the equal representation of women and men on boards of directors and on supervisory boards, which came into force on 28 January, including the transitional provisions stating that when the two sexes are not represented on the Supervisory Board on 28 January 2011, at least one member of that sex should be appointed at the very next ordinary general meeting to approve the appointment of members of the Supervisory Board. The Supervisory Board has decided to entrust the Remuneration Committee to make nominations to meet this obligation while specifying that the selected candidates will be qualified as independent under the benchmark adopted by the Supervisory Board on the matter. These applications will be reviewed by the Supervisory Board in a meeting on 22 July 2011. A candidate will be proposed at the General Meeting on 14 September to serve on the Supervisory Board of the Company.

F. REMUNERATION OF CORPORATE BODIES

F.1. Remuneration and directors' fees

During 2010/2011, the total remuneration, direct and indirect, of all kind received by members of corporate bodies of the Company amounted to €2,880,190.

Pursuant to Article L. 225-102-1 of the Commercial Code, we disclose the remuneration and benefits in kind of every nature received by every senior executive, during the year, from companies controlled in the sense of Article L. 233-16 of the Commercial Code:

Name	Remuneration			Directors' fees paid by Group companies	Benefits in kind
	Fixed	Variable	Deferred		
Philippe ALFROID Chairman of the Supervisory Board	–	–	–	47,200	–
François FAIVELEY Vice-Chairman of the Supervisory Board	–	–	–	20,000	–
Edmond BALLERIN Member of the Supervisory Board	–	–	–	2,000	–
Maurice MARCHAND-TONEL Member of the Supervisory Board	–	–	–	17,200	–
Christian GERMA Member of the Supervisory Board	–	–	–	23,600	–
Didier ALIX Member of the Supervisory Board	–	–	–	10,400	–
Christopher SPENCER Member of the Supervisory Board	–	–	–	18,400	–
Serge CHOUMAKER(2) Member of the Supervisory Board, Representative of employee shareholders	110,473	29,015	–	–	–
Robert JOYEUX (1) Chairman of the Management Board	609,276	366,300	–	–	Company car
Thierry BAREL(1)(2) Member of the Management Board	410,568	249,600	–	–	Company car
Erwan FAIVELEY Member of the Management Board	132,950	27,000	–	–	Housing allowance
Etienne HAUMONT(3) Member of the Management Board	655,368	150,840	–	–	Company car

(1) Robert Joyeux retired and resigned from his position as Chairman of the Management Board on 31 March 2011. Thierry Barel was appointed Chairman of the Management Board and Chief Executive Officer on 1 April 2011.

(2) At its meeting on 3 December 2010, the Management Board awarded free performance shares to certain employees and officers of the Group, including 5,000 shares to Thierry Barel and 800 shares to Serge Choumaker.

(3) Etienne Haumont resigned his duties as member of the Management Board on 1 September 2010 and resigned his position as Chief Financial Officer on 24 September 2010.

You will also find, in the appendices to this report, a detailed description of total remuneration received by directors of the Company, in accordance with AMF recommendations.

You should also decide on the total amount of Directors' fees paid to the Supervisory Board and the Management Board for the current year, which we propose to set at €220,000.

F.2. Summary of transactions in 2010/2011 in Faiveley Transport shares by senior executives and individuals referred to in Article L 621-18-2 of the Monetary and Financial Code

Director/senior executive	Financial instruments	Nature of transaction	Number of transactions	Value

Lilian LEROUX, Member of the Executive Committee	Shares	Disposal	1	€207,900
Maurice MARCHAND TONEL, Member of the Supervisory Board	Shares	Purchase	1	€12,112
Christopher SPENCER, Member of the Supervisory Board	Shares	Purchase	1	€14,583.65
Financière Faiveley, legal entity related to Erwan Faiveley, member of the Management Board	Shares	Purchase	1	€1,007,630
François Faiveley Participations, legal entity related to Erwan Faiveley, member of the Management Board	Shares	Disposal	11	€3,123,107.71

G. BUYBACK BY THE COMPANY OF ITS OWN SHARES

At 31 March 2011, the Company held 462,777 of its own shares, representing 3.21% of its share capital. The book value of these shares was €22,426,574.64 and their market value was €23,506,689.88.

The Combined General Meeting of 13 September 2010 was called to approve, in its seventh resolution, a new share buyback programme. A description of this programme, prepared in accordance with the provisions of Article 241-2 of the AMF general regulations, is presented hereafter, as provided by Article 241-3-III of the same regulations. As a result, it will not be subject to a specific publication.

- **Objectives of the share buyback programme authorised by the Combined General Meeting of 13 September 2010**

Shares may be bought back to:
- ensure the liquidity and support the market for the Faiveley Transport share by an investment services provider via a liquidity contract that conforms to the ethics charter recognised by the Autorité des Marchés Financiers;
- grant them to employees and management of the Group according to the terms and conditions of the law (options to purchase shares, employee profit-sharing, allocation of free shares);
- cancel them by way of reduction in capital within the limits set by law;
- retain them within the limit of 5% of the capital and use them in exchange or payment, notably as part of acquisitions initiated by the Company, by way of public offer or other;
- implement all other market practice that is permitted by the Autorité des Marchés Financiers and more generally all transactions that conform to the regulations in force.

- **Maximum percentage of the share capital, maximum number and features of shares the Company is proposing to buy back and minimum purchase price**

Purchase of shares in the Company may relate to a number of shares such that the number of shares held following these purchases does not exceed 10% of the shares comprising the share capital of the Company, knowing that the percentage will apply to the capital adjusted as a function of transactions that may occur subsequent to the present Meeting.

The maximum purchase price is set at €90 per share.

The total amount allocated to the repurchase programme is €129.6 million.

Taking account of the 462,777 shares already directly or indirectly held by the Company at 31 March 2011, the maximum number of shares that the Company may acquire as part of this share buyback programme would be 977,694.

- **Term of the share buyback programme**

This authorisation remains valid for eighteen months with effect from this day, until 13 March 2012.

During the year ended 31 March 2011, 298,588 shares in Faiveley Transport were purchased by the Company.

On the occasion of the Combined General Meeting to be held on 14 September 2011, a draft resolution (tenth resolution) will be submitted to the shareholders' vote in relation to the renewal of this share buyback programme for a new period of eighteen months.

If this resolution is adopted at the next General Meeting, the authorisation granted to the Management Board will supersede that provided at the General Meeting on 13 September 2010.

H. CONTRACT TO STIMULATE TRADING OF THE FAIVELEY TRANSPORT SHARE

Since 22 September 2009, a liquidity contract has been implemented between the Company and Oddo Corporate Finance, an investment service provider that operates in full independence to stimulate the market.

The Company allocated 10,000 shares and €500,000 to Oddo as part of this contract. At 31 March 2011, Oddo Corporate Finance bought 136,768 shares and sold 138,394 on behalf of the Company.

The average price of the shares bought during the year was €60.44 and €61 for shares sold. At 31 March 2011, the Company held 4,924 shares (being 0.03% of its share capital), through the market stimulation contract, for a market value of €343,744.44, i.e. a price per share of €69.81. Oddo billed fees of €29,900 inclusive of VAT in 2010/2011 in respect of the Faiveley Transport market stimulation contract.

After having considered the report presented to you by the Statutory Auditors on this subject, your Management Board invites you to adopt the resolutions submitted to you for a vote whose text appears in appendix 5 to the present report, except of the nineteenth concerning a capital increase reserved for employees which does not appear appropriate.

1.2.6. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

A. Accounting information

Faiveley Transport is a French limited liability company (société anonyme) with a Management Board and a Supervisory Board. At 31 March 2011, its registered office was located at 143, boulevard Anatole France, Carrefour Pleyel, 93200 Saint Denis, France.

The consolidated financial statements are prepared under the responsibility of the Management Board and submitted for approval to the shareholders in the General Meeting.

The financial statements for 2010/2011 were approved by the Management Board at its meeting on 9 June 2011. They were presented to and reviewed by the Supervisory Board at its meeting on 9 June 2011. They will be submitted for approval to the General Meeting of shareholders on 14 September 2011.

The financial statements have been prepared on the basis that the Faiveley Transport Group operates as a going concern.

The Group's functional and presentation currency is the Euro. Figures are expressed in thousands of Euros unless indicated otherwise.

B. Highlights

1. SIGNIFICANT EVENTS

- Change to the term of office of members of the Supervisory Board:

  The Combined General Meeting of 13 September 2010 amended the bylaws of the Company and reduced the term of office of members Supervisory Board to three years.

- Changes in Group governance:

  On 1 September 2010, Guillaume Bouhours was appointed Chief Financial Officer to replace Etienne Haumont. On the same day, Etienne Haumont resigned his term of office as a member of the Management Board.

  Robert Joyeux resigned his duties as Chief Executive Officer and Chairman of the Management Board of Faiveley Transport at 31 March 2011. On 1 April 2011, Thierry Barel, previously Deputy Chief Executive Officer, was appointed Chief Executive Officer and Chairman of the Management Board. On the same day, Guillaume Bouhours was appointed as a member of the Management Board.

2. PLANS TO ALLOCATE SHARE PURCHASE/SUBSCRIPTION OPTIONS AND FREE SHARES

- Share option plan of 27 September 2005:

  The Extraordinary General meeting of Faiveley S.A. (renamed Faiveley Transport) held on 27 September 2005 approved the establishment of a share option plan to be served by the authorised buyback of 325,000 shares at a maximum purchase price of €180 (before five for one stock split).

  At 31 March 2011, 117,541 options had been allocated and had neither been cancelled nor exercised to date. Note that 198,499 purchase options have been exercised to date (see E.13.1 below).

- Share option plan of 22 September 2009:

  The Combined General Meeting of 22 September 2009 delegated to the Management Board its powers in relation to:
  - granting share subscription and/or purchase options;
  - issuing shares or marketable securities giving right to new or existing shares of the Company, with, in cases where new shares are granted, the cancellation of the pre-emption right.

  At its meeting of 23 November 2009, the Management Board decided to allocate, from that date and up to 23 November 2017, options giving right to subscribe for new shares of the Company, to be issued as part of a capital increase, for a total amount not exceeding €144,000, corresponding to 144,000 new shares of a par value of €1 each. The new shares will be issued at a price of €54.91 each.

- Free performance based share allocation plan of 13 September 2010:

  The Combined General Meeting of 13 September 2010 delegated to the Management Board its powers in relation to allocating free ordinary shares of the Company, either existing or to be issued, within the limit of 1% of the share capital on the date of this General Meeting.

  The Management Board decided, in its meetings held on 3 December 2010 and 24 February 2011, to implement the authorisation to issue free shares, for a total of 69,700 shares. The final allocation, in accordance with pre-defined performance criteria, will take place at the end of a two-year vesting period starting from the date of allocation. Thierry Barel, a beneficiary of free shares as part of this plan, must retain the shares allotted to him in his capacity as Chief Executive Officer. The Supervisory Board of the Company decided in its meeting of 26 November 2010 that the Chief Executive Officer must retain at least 50% of the shares allotted to him by the Management Board in relation to this plan, after the end of the vesting period established by plan regulations. This rule will apply until the Chief Executive Officer holds at least one year of net salary in Company shares granted within the framework of the various stock option or free share allocation plans of the Company.

3. CHANGES IN GROUP STRUCTURE

- Incorporation of Amsted Rail – Faiveley LLC, a US joint-venture between Faiveley Transport USA and Amsted Rail for the manufacture and marketing of components and braking systems for the freight market.
- Acquisition of 80% of Urs Dolder AG, a Swiss company specialised in heating devices for railway carriages.
- Acquisition of minority interests (25%) in the Czech subsidiary Faiveley Transport Lekov.
- At 31 March 2011, Espas was merged into Faiveley Transport Tours. This merger was recognised for accounting and tax purposes retrospectively, to 1 April 2010.

The Company's acquisitions and incorporations of the financial year are detailed in § D.

C. Consolidation principles and methods

1. BASIS OF PREPARATION

In application of regulation 1606/2002 of the European Union (EU), the consolidated financial statements of the Faiveley Transport Group are prepared in accordance with IFRS (International Financial Reporting Standards), as adopted by the European Union.

1.1. Changes in accounting policies due to new standards and interpretations of mandatory application for interim periods and financial years starting on or after 1 April 2010

- **Revised IFRS 3 – Business combinations:**

Revised IFRS 3 is applicable prospectively to business combinations carried out on or after 1 April 2010.

The acquisition method (also known as purchase accounting method) is confirmed, but the following main changes have been introduced:

- Modification of recognition rules for business combinations:
  - acquisition-related costs are no longer included in the acquisition cost but are recorded as an expense in the operating income statement;
  - earn-outs are initially recorded at fair value and subsequent adjustments made beyond the 12-month measurement period following the acquisition are systematically recognised through profit or loss.
- Possible choice between two goodwill measurement methods in the case of less than 100% acquisitions:
  - the so-called "partial goodwill" method, which was the only method permitted by the previous IFRS 3, which consists of determining goodwill based on the equity interest acquired;
  - the so-called "full goodwill" method, which consists of determining goodwill of a full acquisition based on the fair value of minority interests.

The choice of one method or the other is made on a transaction by transaction basis.

- **Revised IAS 27 – Consolidated and separate financial statements**

Under revised IAS 27, the consolidated financial statements of a group are presented as those of a single economic entity with two categories of owners: the owners of the parent company and the owners of non-controlling interests.

This new approach has the following consequences:

- changes in the recognition rules of acquisition and transfers of minority interests in fully-consolidated subsidiaries: these transactions are treated as transactions between the shareholders of these subsidiaries and are reflected by movements in consolidated equity between "group share" and "minority interests", as follows:
  - acquisitions of minority interests no longer generate acquisition goodwill but are reflected by a reduction in shareholders' equity – Group share;
  - disposals of minority interests or addition of new minority shareholders in the share capital of consolidated subsidiaries no longer generate any capital or dilution gains in the operating income statement, but are reflected by an increase in Group share of shareholders' equity.
- Changes in the rules regarding the recognition of sale options held by minority interests in fully consolidated subsidiaries: for options granted as from 1 January 2010, the difference between the option value at inception and the corresponding minority interests is no longer recognised as goodwill but as a decrease in Group share of shareholders' equity. The accounting treatment for subsequent changes in the value of these options (recognised through profit and loss or in equity) must be determined by the IFRS Interpretations Committee at a future date. However, the accounting treatment for put options granted before 1 January 2010 is not modified; changes in the value of these options continue to be recognised against goodwill, without time limitation.
- The share attributable to minority interests in companies with negative shareholders' equity is no longer borne by the Group, even if there is no explicit agreement for such minority shareholders to bear their share of the deficiency.

1.2. New standards and interpretation whose application is not yet mandatory

The Group did not opt for the early application of the sections of IFRS 9 – Financial instruments already published, whose date of mandatory application is 1 April 2013, subject to approval by the European Union.

The Group's financial statements were not affected by other new revised or amended standards and interpretations, which have been published but are not yet applicable.

The Group considered that the impact of these provisions could not be reliably established to date.

1.3. Other changes in accounting methods:

Presentation of CVAE *(value-added business tax)*:

At the 31 March 2010 year-end, the Group had not yet made a decision following the CNC communication of 14 January 2010 relating to the accounting treatment of the component based on value added (CVAE) of the CET tax (contribution économique territoriale) introduced in France by the 2010 Finance Act of 31 December 2009.

Following an analysis carried out by the Group, and in light of its specific features, it was decided to treat the value-added based CVAE as income tax, in order to remain consistent with the classification of similar taxes in Germany and Italy (*Gewerbesteuer* and *IRAP, respectively*). This decision was also based on a 2006 proposal by the IFRIC that specified that the term of "taxable profit" implies that a net amount should be considered, rather than a gross amount, without necessarily being identical to the accounting profit.

Pursuant to IAS 12, this election requires the recognition of deferred taxes at the rate of 1.5% at 31 March 2011 on temporary differences for:

- assets that produce economic benefits subject to the CVAE tax, whereas the consumption of added value are not deductible from added value: this was the net carrying amount of property, plant and equipment and intangible assets eligible for depreciation and amortisation at 31 December 2009;
- asset impairments and provisions that may not be deducted from the CVAE but that relate to expenses that will be deducted from the value added at a later date.

Since the CVAE tax is deductible for income tax purposes, deferred taxes are recognised at the standard rate for deferred tax assets and liabilities recognised for the CVAE, as described in the previous paragraph.

Since this is a change in the regulations, deferred taxes relating to the CVAE are recognised through profit and loss. The impact on the financial statements for the 2010/2011 financial year was a tax charge of €1,962 thousand and a net deferred tax asset of €140 thousand.

2. CONSOLIDATION SCOPE AND METHODS

The Group consolidates, using the full consolidation method, those companies over which it directly or indirectly exercises exclusive control. In accordance with IAS 27, exclusive control is deemed to be present when more than one half of the company's voting rights are held or when other means of control are in place.

Companies over which the Faiveley Transport Group exercises joint control are consolidated using the proportional consolidation method.

Companies over which the Faiveley Transport Group exercises significant influence over financial and operational policies are accounted for using the equity method. Significant influence is presumed when the Group holds more than 20% of the voting rights of a company.

Acquisitions or disposals arising during the financial year are reflected in the consolidated financial statements from the date on which effective control is transferred, unless the impact is not material to the income statement in the case of acquisitions carried out at the end of the financial year.

Intra-Group balances and transactions are eliminated for all consolidated companies.

Faiveley Transport Group companies that are consolidated are listed in Note G.1 to the consolidated financial statements. Note G.2 lists companies that were not consolidated due to their insignificant impact on the Faiveley Transport Group's financial statements.

3. USE OF ESTIMATES

In order to be able to prepare consolidated financial statements that comply with IFRS, the finance management is obliged to make certain estimates and use assumptions that it considers realistic and reasonable. These estimates and assumptions affect the carrying amount of the assets, liabilities, equity and results, and any contingent assets and liabilities, as presented at the balance sheet date. The finance management regularly reviews its estimates on the basis of the information available to it. When events and circumstances are not in line with expectations, actual results may differ from such estimates.

The main accounting methods whose application necessitates the use of estimates relate to the following items:

- **Recognition of the margin on long-term building and service contracts and the related provisions (see § C-6.1)**

Revenue from long term building and service contracts is recognised in proportion to the stage of completion of the contracts (see C-6 below). Project reviews are organised on a regular basis so that the stage of completion and finalisation of the contract can be monitored. If the project review identifies a negative gross margin, a provision is immediately raised in respect of the loss relating to the work not yet carried out.

The total estimated income and expenses in respect of the contract reflect Management's best estimate of the future benefits and obligations under the contract. The assumptions used to determine the current and future obligations take into account technological, commercial and contractual constraints measured on a contract-by contract basis.

The obligations under building contracts may result in penalties for delays in a contract's implementation schedule or an unexpected cost increase due to amendments to the project, a supplier's or subcontractor's failure to comply with its obligations or delays caused by unforeseen events or circumstances. Similarly, warranty obligations are affected by product failure rates, equipment wear and tear and the cost of actions needed to return to normal service.

Although the Group measures risks on a contract by contract basis, the actual costs resulting from the obligations associated with a contract may prove to be greater than the amount initially estimated. It may therefore prove to be necessary to re-estimate the costs to completion when a contract is still in progress or to re-estimate provisions when a contract is completed.

- **Measurement of deferred tax assets (see § C-16)**

The determination of the carrying amounts of deferred tax assets and liabilities and the amount of deferred tax assets to be recognised requires the Finance Department to exercise its judgement as to the level of future taxable profits to be taken into consideration.

- **Measurement of assets and liabilities in respect of retirement and similar benefits (see § C-15.1)**

The measurement by the Group of the assets and liabilities relating to the defined benefit schemes requires the use of statistical data and other parameters used to predict future trends. Such parameters include discount rate, expected return on plan assets, salary increase rate, staff turnover rate and mortality rate. When circumstances where actuarial assumptions prove to be significantly different from actual data subsequently observed, this could result in a substantial amendment to the amount of the charge for retirement and similar benefits, the actuarial gains and losses and the assets and liabilities stated in the balance sheet relating to these commitments.

- **Measurement of property, plant and equipment and intangible assets (see § C-9)**

Goodwill is tested for impairment each year on 31 March or more frequently if there are indications of impairment. The discounted future cash flow model used to determine the fair value of the cash generating units utilises a certain number of parameters including estimated future cash flows, discount rates and other variables, and consequently requires the exercise of judgment to a significant degree.

The assumptions used to carry out impairment tests are the same for property, plant and equipment and intangible assets. Any future deterioration in market conditions or the achievement of poor operating performances could result in the Group being unable to recover the current carrying amount of such assets.

- **Measurement of financial investments**

Details of the method used to measure financial investments are provided in § C-10.3.

- **Inventories and work-in-progress (see § C-12)**

Inventories and work-in-progress are measured at the lower of cost and net realisable value. Writedowns are calculated on the basis of an analysis of foreseeable trends in demand, technology and market conditions, the aim of which is to identify inventories and work-in-progress that are obsolete or surplus to requirements. If market conditions worsen to a greater degree than was forecast, additional writedowns of inventories and work-in-progress may prove necessary.

- **Stock-options and free shares**

Share subscription and/or purchase options as well as free shares granted to certain senior executives and employees of the Group are recognised in accordance with IFRS 2.

Options are measured at the allocation date. The fair value of options is a function of the expected life, exercise price, current price of underlying shares, expected volatility and share price. The Group uses the Black & Scholes mathematical model.

The fair value of free shares is estimated on the allocation date, specifically based on their expected life, the current price of the underlying shares, the expected volatility and the share price and takes into account the terms and conditions attached to the share allocation. The Group uses the Monte Carlo method for valuation.

This value is recognised as personnel cost between the date of grant and the end of the vesting period and offset under equity.

- **General provisions**

Details of the method used to measure other provisions for liabilities and charges are provided in C-15.2.

4. TRANSLATION METHODS

4.1. Foreign currency-denominated transactions

Foreign currency-denominated transactions are translated at the exchange rate on the date of the transaction when recorded. Any gain or loss arising from the movement in exchange rates between this date and the subsequent balance sheet date for all foreign currency denominated assets and liabilities are recorded in the income statement. Changes in the fair value of hedging instruments are recognised in accordance with the treatment described in § C-11.

4.2. Foreign currency-denominated subsidiary financial statements

Foreign currency-denominated subsidiary financial statements are prepared in the currency that is most representative of their economic environment. This currency is deemed to be their functional currency pursuant to IAS 21.

– Foreign currency-denominated subsidiary financial statements were translated into Euros using the following exchange rates:
  – closing rate for all balance sheet items, with the exception of the components of equity which continue to be translated at historical exchange rates (translation rates used on the date the subsidiary was acquired by the Group);
– average rate for the period: income statement and cash flow statement items.

Translation differences arising in respect of the profit or loss and shareholders' equity are recognised directly in shareholders' equity under the heading "Translation differences" in the case of the Group's share, with the portion attributable to third parties being recorded in minority interests.

On the disposal of a foreign subsidiary, the translation differences relating to it and recognised in shareholders' equity after 1 April 2004 are accounted for in the income statement.

Translation exchange rates used in the consolidation

	Closing rate			Average rate		
	31 March 2011	31 March 2010	31 March 2009	31 March 2011	31 March 2010	31 March 2009

5. BALANCE SHEET DATE

All companies are consolidated on the basis of financial statements drawn up at 31 March 2011.

6. INCOME STATEMENT PRESENTATION

6.1. Sales revenue and cost of sales recognition

Sales arising from contracts of less than one year in duration, which primarily relate to the sale of spare parts (Customer Services), are recorded upon transfer of title, which is generally at the time of product delivery to the customer and/or completion of the provision of services.

Sales arising from contracts of more than one year in duration are recognised using the percentage of completion method in accordance with IAS 11. Percentage of completion is measured on the basis of relating actual sales billed to the total contract sales value or by relating the actual costs incurred to the total costs estimated for the contract.

The total estimated cost of completion includes direct costs (such as raw materials, labour and engineering) relating to the contracts. This includes costs already committed and future costs, including warranty costs and costs specific to the probable risks. Provision charges for losses to completion and other provisions on contracts are recorded to cost of sales in the income statement if, during the review of the contracts, it seems probable that the costs to which they relate will arise.

All changes in the conditions of contract fulfilment and all changes to margins at completion are recorded to cost of sales in the income statement in the period in which they are identified.

Warranty provisions are valued based on contract terms and an assessment of risks based on sector knowledge.

6.2. Profit from recurring operations

This is the profit before restructuring costs, gains and losses on disposals of intangible assets and property, plant and equipment and exceptional accounting adjustments.

6.3. Finance income and expenses

Finance income and expenses comprise:
- interest income and expense on the consolidated net debt, which consists of borrowings, other financial liabilities (including liabilities in respect of finance leases) and cash and cash equivalents;
- dividends received from unconsolidated equity investments;
- the effect of discounting financial provisions;
- changes in financial instruments;
- foreign exchange gains and losses on financial transactions.

6.4. Profit or loss from operations held for sale and discontinued operations

The net of tax profit or loss from operations held for sale and discontinued operations that meet the criteria of IFRS 5 is presented under a separate heading in the income statement. It includes the net profit or loss of such activities during the year and up to their date of disposal, as well as the net gain or loss on the disposal itself.

6.5. Earnings per share

Basic earnings per share is calculated based on the weighted average number of shares in circulation during the financial period. Since the shares of the consolidating entity held by it are deducted from shareholders' equity, these shares are excluded from the weighted average number of shares in circulation as from the 31 March 2008 year-end.

Diluted earnings per share is calculated based on the weighted average number of shares in circulation during the financial period, adjusted for the number of shares that would be generated by the exercise of share subscription options as per the conditions of IAS 33.45 and subsequent.

7. INTANGIBLE ASSETS

7.1. Acquisition goodwill

On each acquisition, the Group identifies and assesses the fair value of all assets and liabilities acquired, particularly intangible assets and property, plant and equipment, brands, inventories, work-in-progress and all provisions for liabilities and charges.

The unallocated difference between the cost of securities in companies acquired and consolidated and the fair value of assets and liabilities is recorded as acquisition goodwill. Where this difference is negative, it is taken directly to the income statement. When this difference is positive, it is recognised in the balance sheet.

Acquisitions of minority interests in subsidiaries that are already fully consolidated

Prior to the application of revised IAS 27, the Group had elected to recognise additional acquisition goodwill, which corresponds to the difference between acquisition cost of securities and the additional share in consolidated equity that these securities represent.

Acquisitions of minority interests are now recognised as a deduction from the Group share of shareholders' equity.

Accounting treatment of put options on minority interests

By analogy with the accounting treatment used for acquisitions of minority interests, the Group elected to use the option to recognise additional goodwill as part of the accounting treatment of put options on minority interests that existed prior to 1 April 2010. Put options granted after revised IFRS 3 and IAS 27 became applicable are recognised as a reduction from equity (see below § 10.6).

7.2. Intangible assets acquired separately or pursuant to a business combination

Intangible assets acquired separately are recorded in the balance sheet at their historical cost.

Intangible assets (primarily brands) resulting from the valuation of assets of acquired companies are recorded in the balance sheet at their fair market value, determined generally on the basis of appraisals by external experts when significant in value.

Intangible assets, other than those with indefinite useful lives, are amortised on a straight-line basis over their estimated useful lives, which are as follows:

Software:	straight line basis - 1 to 3 years
Patents:	straight line basis - 5 to 15 years
Development costs:	straight line basis over 3 years, when valued at their fair value.

7.3. Internally generated intangible assets

Research costs are immediately expensed when incurred.

Development costs on new projects are capitalised if all of the following criteria are strictly met:

- the project is clearly identifiable and its related costs are separately identified and reliably measured;
- the technical feasibility of the project has been demonstrated and the Group has the intent and financial capability to complete the project and use or sell the products derived from this project;
- it is probable that the project will yield future economic benefits for the Group.

Capitalised project development costs are amortised on a straight-line basis over 3 years.

8. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are measured at their acquisition cost or at their fair value when they are measured pursuant to the acquisition of a company that is consolidated. Depreciation is calculated separately for each of the assets' components that has a distinct useful life. The useful lives of the assets concerned are deemed to be as follows:

Buildings	15 to 25 years
Fixtures and improvements	10 years
Industrial machinery and equipment	5 to 20 years
Tools	3 to 5 years
Vehicles	3 to 4 years
Office equipment and furniture	3 to 10 years

Finance leases

Assets acquired under finance leases are recorded as assets when the lease agreement transfers to the Group all the risks and rewards inherent to ownership of an asset. Lease agreements for which the risks and rewards of ownership are not transferred to the Group are treated as operating leases, with corresponding lease payments expensed on a straight-line basis over the lease term.

9. IMPAIRMENT OF ASSET VALUES

Goodwill and intangible assets with indefinite useful lives are tested for impairment each year.

Intangible assets and property, plant and equipment with finite useful lives are tested for impairment as soon as there is any indication that such assets may have become impaired. Where relevant, a provision for impairment is recognised.

Impairment testing involves comparing the recoverable amount of the asset with its carrying amount. Recoverable amount is the higher of fair value less costs to sell and value in use.

Tests are carried out on the basis of Cash Generating Units (CGUs) to which these assets are associated. A CGU is a homogeneous group of assets whose continuous utilisation generates cash inflows that are largely independent of cash inflows generated by other asset groupings.

The value in use of a CGU is determined based on the present value of the estimated future cash flows to arise from these assets, within the framework of economic assumptions and operating conditions anticipated by Group executive management. The measurement carried out is based mainly on the Group's three-year plan. Cash flows beyond that timeframe are extrapolated by applying a stable growth rate.

The recoverable amount is the sum of the present value of the cash flows and the present value of the terminal residual value. The discount rate is determined using the sector's weighted average cost of capital.

When this value is less than the carrying amount of the CGU, an impairment loss, first allocated to acquisition goodwill, is recognised.

In the event of an indication of a recovery in value, this impairment loss may eventually be reversed to the extent that it does not exceed the carrying amount of the asset at the same date had it not been subject to a writedown. Impairment losses recorded on acquisition goodwill may not be reversed.

10. FINANCIAL ASSETS AND LIABILITIES

Pursuant to IAS 32 and IAS 39, financial assets and liabilities comprise operating receivables and liabilities, financial loans and debts, shareholdings in unconsolidated companies, marketable securities, borrowings and other financial liabilities and derivative financial instruments.

On initial recognition, a financial instrument is valued at its fair market value, adjusted for issue costs:

- fair value, as defined by the applicable IAS, corresponds as a general rule to transaction value, with exceptions discussed below;
- under the IAS, the term "issue costs" is used to mean all of the accessory costs directly attributable to the acquisition or implementation of the financial instruments.

In certain specific cases, e.g. loans, borrowings, operating receivables and liabilities, which are interest-free or at beneficial rates, fair value does not correspond to the fair value on initial recognition. In such cases, fair value is calculated by discounting the cash flows associated with the financial instrument, using the market rate increased by a risk premium.

At future balance sheet dates, financial assets and liabilities are recorded at either their amortised cost or fair value depending on the class of assets or liabilities to which they belong.

The accounting treatment of identified financial instruments is as follows:

10.1. Trade receivables and payables

In accordance with IAS 11, work in progress on long-term contracts is treated as trade receivables.

At each balance sheet date, the Group assesses whether there is an objective indication of impairment of a receivable. If there are objective indications of impairment in respect of assets recognised at amortised cost, the amount of the impairment loss is equal to the difference between the carrying amount of the asset and the net present value of the estimated future cash flows discounted at the original effective interest rate. The carrying amount of the asset is reduced via the use of an impairment account. The amount of the impairment loss must be recognised in the income statement.

If the amount of the impairment reduces during a subsequent accounting period, and if such reduction can be objectively linked to an event that occurred after the recognition of the impairment, the impairment loss previously recognised must be reversed to the extent that the carrying amount of the asset does not exceed the amortised cost on the date the impairment loss is reversed. Any subsequent reversal is recognised in the income statement.

In the case of trade receivables, an impairment loss is recognised when there is an objective indication (such as a probability of the debtor suffering bankruptcy or significant financial difficulties) that the Group will be unable to recover the amounts due in accordance with the contractual terms of the invoice. The carrying amount of the trade receivable is reduced via the use of a value adjustment account.

Within the framework of the factoring of trade receivables, an analysis of the risks and rewards relating to the transfer of such receivables must be conducted pursuant to IAS 39 (credit risk and interest rate risk primarily):

- if the risks and rewards are substantially transferred, the receivables are removed from the balance sheet against cash;
- if the risks and rewards are substantially retained, the receivables are maintained on the balance sheet with a corresponding liability being recognised, the operation being accounted for as a borrowing guaranteed by receivables;
- if the risks and rewards relating to a portion of the receivables are retained, as described above, the said portion of the receivables is retained on the balance sheet.

10.2. Financial receivables and loans

These financial instruments are also recorded at their amortised cost. They are subject to valuation tests, which are realised when there is an indication that their recoverable amount is less than their carrying amount, in accordance with the same principles as those described in note C.10.1. The impairment loss is recorded to the income statement as are any loss reversals.

10.3. Shareholdings in unconsolidated companies

These financial instruments are classified as assets held for sale. They are unlisted shares for which the fair value cannot be reliably determined and therefore the carrying amount at which they are recognised is their acquisition cost.

In the event of an objective indication of impairment of the financial asset (notably a significant and sustained drop in its value), the impairment loss is recognised in the income statement and may not be reversed in a subsequent period other than on the sale of the shareholding concerned.

10.4. Cash, marketable securities and cash equivalents

Cash and marketable securities reflected on the balance sheet include cash balances, bank accounts, term deposits maturing in less than three months and securities that can be traded on official exchanges. These short term instruments only comprise money market funds. They are considered by the Group as financial assets held for trading and are valued at their fair market value, with any movements in fair value recorded directly to the income statement.

In the case of highly liquid short term investments (maturity not exceeding three months) it is reasonable to assume that their fair value is equal to their carrying amount (capitalised interest included). Such items are therefore classified as cash equivalents.

10.5. Borrowings and other financial liabilities

Borrowings and other financial liabilities are stated at amortised cost.

10.6. Put options held by minority shareholders in group subsidiaries

In accordance with IAS 32, put options held by minority shareholders in Group subsidiaries are recognised as financial liabilities if associated risks and rewards are not transferred to the consolidating entity.

The amount reflected on the balance sheet corresponds to the fair value of these minority interests at the balance sheet date, measured according to the discounted future cash flow method. This value is reviewed on an annual basis.

In relation to put options granted in place before 1 April 2010, The Group opted for the recognition of financial liabilities to be offset by:

- the cancellation of corresponding minority interests;
- and an increase in goodwill allocated to the companies concerned, for the surplus.

Subsequent fair value movements are recognised as acquisition goodwill and the impact of the reversal of debt discounting is taken to the income statement.

In relation to put options granted after the revised IFRS 3 and IAS 27 became applicable, the financial liability is recognised against equity and the impact of the reversal of discounting of the liability is taken to the income statement.

11. DERIVATIVE FINANCIAL INSTRUMENTS

The Group uses derivative financial instruments to manage its exposure to movements in interest rates and in the exchange rates of foreign currencies. As part of its hedging policy, the Group uses interest rate swaps and contracts for forward purchases and sales of currencies. The Group may also use caps, floors and options.

Exchange risk

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of its exposure to a number of currencies. The management of exchange risk is centralised by the parent company's Treasury department and comprises two parts:

– exchange risk management relating to tenders in foreign currencies (uncertain risk);

– exchange risk management relating to commercial contracts (certain risk).

The Group's policy is to hedge all expected future transactions in each major currency.

Interest rate risk

The Group manages its interest rate cash flow risk through the use of variable rate against fixed rate swaps or caps and tunnels. From an economic point of view, the effect of these interest rate swaps or caps is to convert variable rate borrowings into fixed rate borrowings. The Group may also use structured instruments that do not qualify for hedge accounting.

A detailed description of the exchange and interest rate risks is provided in Note E.16 to the financial statements: "Financial instruments and financial risk management".

Derivative financial instrument accounting rules

The majority of derivative instruments used by the Group qualify for accounting purposes as hedges if the derivative is eligible to be a hedging instrument and if the hedging is documented according to the principles of IAS 39. In practice, the derivative financial instruments not qualified as hedging by the Faiveley Transport Group are the following:

– foreign exchange options to cover tenders;

– structured interest rate swaps.

The derivative hedging instruments are recorded in the balance sheet at their fair value. The recognition of movements in the fair value of derivative instruments depends on the following three classifications:

- Fair value hedging: the movements in the fair value of the derivative are taken to the income statement and offset, to the extent of the effective part, the movements in fair value of the underlying asset, liability or firm commitment, also recorded in the income statement. For example, forward exchange transactions and exchange swaps that cover certain commitments and financial assets and liabilities denominated in foreign currencies are considered as fair value hedges.
- Hedging of future flows: the movements in fair value are recorded in equity for the effective part and reclassified in income when the item covered affects the latter. The ineffective part is taken directly to financial income and expense.
- Interest rate derivative instruments, as well as budget cash flow hedges are treated as future cash flow hedges.
- Transaction derivatives: the movements in the fair value of the derivative are recorded in financial income and expense.

12. INVENTORIES AND WORK-IN-PROGRESS

Inventories and work-in-progress include raw materials, work-in progress and finished products. They are stated at the lower of production cost and estimated net realisable value.

Raw materials are measured using the weighted average cost method.

Work-in-progress and finished products are measured at their production cost. The cost of inventories includes the direct raw material costs and, where relevant, the direct labour costs as well as overheads incurred in bringing the inventories to their present location and condition.

Write downs are recorded to take into account the risk of obsolescence.

13. NON-CURRENT ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

IFRS requires the separate disclosure in the balance sheet of the total value of assets and liabilities of operations held for sale and discontinued without any offset. IFRS also requires the separate disclosure in the income statement of the total after tax profit realised from discontinued operations.

Non-current assets held for sale may no longer be depreciated or amortised. They are valued at the lower of their carrying amount and fair market value net of disposal costs.

14. TREASURY SHARES

Faiveley Transport parent company shares held by the subsidiaries or the parent company are deducted from Group equity, with any gains or losses on their disposal being directly allocated to equity.

15. PROVISIONS FOR LIABILITIES AND CHARGES

15.1. Provisions for retirement benefits and other personnel commitments

In accordance with the laws and practices of each country, Faiveley Transport Group participates in retirement benefit plans, social security plans, medical plans and employment termination indemnity schemes, with benefits based on several factors including seniority, wages and payments made into mandatory general plans.

These plans may be defined benefit or defined contribution plans.

15.2. Post-employment benefits – defined benefits

Following retirement, Group employees receive benefits (pension or allowance) funded by a number of Group companies. These defined benefit plans primarily concern the United Kingdom, Germany, France and Italy.

In the United Kingdom and Germany, the majority of these plans involve supplementary pension plans. In the United Kingdom, commitments are pre-financed by plan assets.

In France, employees are granted, by law, a retirement benefit for an amount that varies according to the applicable collective agreement, seniority of employment and final salary. This benefit is paid by the employer when the employee retires. The 2010 pension reform, which in particular plans to raise the retirement age from 60 to 62 years by 2018 was taken into account and treated as an actuarial gain or loss.

In Italy, the law provides for the payment by companies of the "Trattamento di Fine Rapporto" (Severance pay) or TFR for the benefit of employees. The TFR is funded by a 7.4% contribution paid by the employer and is accumulated so as to provide the employee with a lump sum when leaving the company. The impact of the TFR reforms has been integrated since 31 March 2008.

Commitments for defined benefit plans are calculated based on the "projected unit credit" actuarial method, based on actuarial assumptions (such as discount rate, rate of salary increase, life tables, etc.).

Actuarial differences (resulting from changes in assumptions or experience variances) are recognised according to the corridor method. That portion of actuarial gains or losses exceeding 10% of the higher of the value of future benefits and the value of plan assets is amortised over the average remaining employment life of participants in the plan.

- **Post-employment benefits – defined contributions**

Contributions into defined contribution plans are expensed when made.

- **Other long-term benefits**

Other long-term benefits primarily concern Germany (seniority bonuses and early retirement schemes) and France (seniority awards).

Actuarial differences for this type of plan are expensed when they arise.

The net expense for retirement commitments and similar benefits is broken down between cost of sales and fixed costs, according to the distribution of the Company workforce.

15.3. Other provisions for liabilities and charges

In accordance with IAS 37, the Faiveley Transport Group recognises a provision when an obligation to a third party arises that will result in a probable loss or liability that can be reasonably measured. The Group reports a contingent liability as an off-balance sheet commitment when there is only a possibility of a resulting loss or liability or when it cannot be reasonably measured.

These provisions are determined based on the best knowledge available concerning risks incurred and their probability of realisation and are allocated to specific risks. They cover, in particular:
- probable after sales service expenditure arising from mechanical warranties;
- probable expenditure for industrial risks covered by contractual guarantees. The measurement of the provision amount is based on such factors as the products' technical complexities, their innovative nature, geographical proximity etc;
- litigation risks;
- losses on completion for the part exceeding the amounts due by the customers;
- restructuring costs when the restructuring has been officially announced and is subject of a detailed plan or whose execution has already begun.

These provisions are valued at their present value when their impact is significant and their measurement reasonably reliable.

Provisions for guarantees are calculated according to the percentage related to the type of product manufactured and experience gained of its reliability over time. The percentages vary from 1% to 6% according to the products and are applied to the sales achieved by project.

16. DEFERRED TAX

Deferred tax reflects timing differences between the accounting and tax treatments of consolidated revenues and expenses, and the unrealised tax relating to assets and liabilities revaluations arising during business combinations.

It also reflects temporary differences arising from certain consolidation restatements, in order to standardise the different valuation methods in use at the Group's subsidiaries.

Deferred tax is calculated using the liability method that takes into account tax rules known at the end of the financial year.

Deferred tax assets arising from tax losses carried forward are recognised when it is probable that the Group will realise sufficient taxable profits in the next financial year to offset against the tax loss incurred.

Deferred tax assets that are not recognised on the acquisition of subsidiaries that had generated tax losses prior to their acquisition are recognised when the tax saving is realised, by way of a reduction to goodwill in accordance with IFRS 3.

17. SEGMENT REPORTING

In light of criteria defined by IFRS 8 and given the Group's internal organisation and the structure of the market, the Group opted for a presentation similar to IAS 14, pursuant to IFRS 8. In addition, it was deemed appropriate to retain an analysis by geographic region.

As a result, the application of IFRS 8 had no impact on the information presented at 31 March 2011 by the Group.

Segment information is presented in note E.19.

18. SPECIFIC MECHANISMS LINKED TO FAIVELEY TRANSPORT SHAREHOLDING

Managers who were shareholders of Faiveley Management ("FM Manager") and Faiveley M2 ("FM2 Managers") have undertaken the following commitments in relation to their shareholdings in Faiveley Transport.

- **FM Managers commitments**

FM Managers all agreed to a lock-up commitment of all their Faiveley Transport shares for 2 years and two thirds of their shares for 3 years from 23 December 2008.

In addition, over a period of 6 years from 23 December 2008, any disposal by a FM Manager of a block of more than 10,000 Faiveley Transport shares is subject to a Faiveley Transport pre-emption right.

- **FM2 Managers commitments**

Every FM2 manager has entered into a unilateral undertaking to sell their Faiveley Transport shares to Faiveley Transport, which may be exercised in the event they leave their duties with the Faiveley Transport Group.

FM2 managers all agreed to a lock-up commitment of all their Faiveley Transport shares for 3 years from 23 December 2008.

In addition, over a period of six years from 23 December 2008, any disposal by an FM2 manager of a block of more than 3,000 Faiveley Transport shares, is subject to a Faiveley Transport pre-emption right.

D. CHANGES IN CONSOLIDATION SCOPE

1. NEWLY-CREATED COMPANIES

On 30 July 2010, Faiveley Transport's American subsidiary, Ellcon National, and Amsted Rail, worldwide leader for the manufacture of bogy components for the freight market announced the creation of a joint venture, Amsted Rail-Faiveley LLC, based at Ellcon National's premises in Greenville, South Carolina and whose share capital is under the majority control of Faiveley Transport USA.

This new company started operating on 1 October 2010.

Faiveley Transport brings to this company a wide range of AAR (Association of American Railroads) approved brake equipment destined towards the railway freight market, as well as its engineering & project management abilities and associated industrial production methods – assets which were previously held by its American subsidiary, Ellcon-National. Ellcon-National mainly retains its passenger train activities.

Amsted Rail provides the company with access to its US and international distribution network, as well as a portfolio of braking equipment that will complement Ellcon-National's contribution.

Faiveley Transport USA initially holds 67.5% of the joint venture's share capital and is in charge of appointing the management. Amsted Rail is entitled to increasing its investment from 32.5% to a maximum of 49% by re-investing the dividends received from the joint-venture.

This transaction was fully consolidated in the Group's financial statements. Ellcon's contribution was accounted for at its net carrying amount and Amsted's contribution was measured at fair value.

2. ACQUISITIONS

2.1. New acquisitions

- **Urs Dolder AG acquisition**

In the fourth quarter of 2010/2011, Faiveley Transport announced the acquisition of 80% of Urs Dolder AG, a company based in Haegendorf, Switzerland. Dolder AG employs 19 people with annual sales of €4 million. The company produces electrical heating devices for the railway industry. The acquisition price was €2,926 thousand (CHF 3,760 thousand).

Minority interests were measured based on the net assets acquired and acquisition goodwill was recognised in the financial statements in proportion to the percentage of interest acquired.

Detailed calculation of acquisition goodwill:

	CHF thousand	€ thousands[1]
Purchase price of the shares	3,760	2,926
Minority interests	213	165
	3,973	**3,091**
Group share of shareholders' equity	1,063	827
ACQUISITION GOODWILL	**2,910**	**2,264**

(1) Converted at the foreign exchange rate on the acquisition date (24 February 2011): €0.77819.

The acquisition contract includes a call option and a put option for the 20% shareholding retained by minority shareholders. The call option may not be exercised before 31 March 2017 and the put option may not be exercised before 31 March 2015.

In accordance with revised IAS 27, a financial liability of €1.1 million was recognised in the financial statements at 31 March 2011, offset in minority interests (€0.2 million) and the Group share of shareholders' equity (€0.9 million).

- **Faiveley Transport Lekov – acquisition of minority interests**

At the end of January 2011, Faiveley Transport Group acquired the 25% minority interests in its Czech subsidiary, Faiveley Transport Lekov, its centre of expertise for pantographs and associated electromechanical equipment, for €2,355 thousand (CZK 57,022 thousand).

The Group's equity shareholding in Faiveley Transport Lekov increased from 75% at 31 March 2010 to 100% at 31 March 2011.

Detailed calculation of acquisition goodwill related to the purchase of minority interests:

(€ thousands)	
Purchase price of the shares	2,355
Portion of shareholders' equity acquired	1,979
ADDITIONAL ACQUISITION GOODWILL	**376**

At 31 March 2010, a financial liability of €2,993 thousand, relating to the put option on minority interests, was recognised in the financial statements, offset against minority interests (€1,979 thousand) and additional acquisition goodwill of €1,014 thousand.

At 31 March 2011, the acquisition of minority interests during the financial year resulted in a €638 thousand decrease in acquisition goodwill.

2.2. Summary of acquisitions during the last three financial years

Companies acquired	Main business	Acquisition date	% owned	Acquisition cost
2010/2011				
Urs Dolder AG	Manufacture of electrical heating devices	24 February 2011	80%	€2,926 thousand
2008/2009				
Faiveley Transport Gennevilliers	Design and manufacture of sintered friction materials	1 April 2008	100%	€24,400 thousand
Ellcon National Inc.	Freight brake components	31 July 2008	100%	USD 71,000 thousand

2.3. Impact of additions of new acquisitions to the group structure

(*) Amounts in € thousands translated at the exchange rate on the acquisition date (24 February 2011): € 0.77819.

These financial statements have been prepared in accordance with IFRS. We have not identified any material difference in the fair value of the amounts disclosed above.

Since the acquisition date, the contribution to sales has been €313 thousand and €49 thousand to net profit before minority interests.

3. DISPOSALS AND COMPANIES NO LONGER CONSOLIDATED

Nil.

4. MOVEMENT IN ACQUISITION GOODWILL WITHIN THE ALLOCATION PERIOD

None during the period.

E. Notes to the consolidated financial statements and accompanying table (in € thousands)

1. ACQUISITION GOODWILL

To expand its product range, the Faiveley Transport Group has acquired specialised companies. The main acquisitions include the Sab Wabco Group (acquired in 2004), which focuses on brake products and couplers, Faiveley Transport NSF (acquired in 2005), which specialises in air conditioning equipment, Espas (acquired in 2006), which specialises in electronic products, Nowe GmbH (acquired in 2008), which designs sanding systems, ShiJiaZhuang JiaXiang Precision Machinery Co. Ltd (of which 50% was acquired in 2007), which develops and manufactures compressors, Ellcon National (acquired in 2008), which specialises in brake components for the rail freight market, the sintered brake pads activity of Carbone Lorraine on 1 April 2008, and Urs Dolder AG (acquired in February 2011), a manufacturer of railway heating devices. Following these acquisitions, the Group allocated acquisition goodwill and intangible assets with indefinite lives to the companies concerned. The allocation of these goodwill amounts has not subsequently been amended.

At the time of Faiveley Transport's (formerly Faiveley S.A.) acquisition of the entire minority shareholdings (both direct and indirect) in its subsidiary, Faiveley Transport, goodwill was recognised in the financial statements.

The following table provides details of the unallocated goodwill as at 31 March 2011:

	Gross	Accumulated impairment losses	Net 31 March 2011	Net 31 March 2010	Net 31 March 2009
Faiveley Transport minority interests	265,778	–	265,778	265,778	265,583
Sab Wabco Group	234,004	–	234,004	219,604	219,997
Amsted Rail-Faiveley LLC / Ellcon National Inc	32,077	–	32,077	29,162	28,614
Faiveley Transport NSF	10,057	–	10,057	10,057	10,057
Nowe GmbH	7,831	–	7,831	4,757	1,978
Faiveley Transport Tours(1)	6,061	–	6,061	6,061	6,061
Urs Dolder AG	2,264		2,264	–	–
Faiveley Transport Gennevilliers	1,013	–	1,013	1,013	1,013
Shijiazhuang Jiaxiang Precision Machinery Co. Ltd	102	–	102	102	102
Others	2,841	–	2,841	3,479	2,466
TOTAL	**562,028**	**–**	**562,028**	**540,013**	**535,871**

(1) Acquisition goodwill recognised following the purchase of Espas Group.

As part of the acquisition of Sab Wabco Group in November 2004, the Sab Wabco brand was posted to intangible assets for €20 million, as well as a deferred tax asset of €5.6 million relating to this asset.

Given that:

- cash flows related to the use of the Sab Wabco brand are not identified separately on an operational level, and;
- that historically, impairment tests were not carried out individually for this brand but were combined with impairment tests on related goodwill.

It has been decided to reclassify the net carrying amount of the Sab Wabco brand, being €14.4 million, under the related acquisition goodwill heading, with the purpose of better reflecting the assets and provide consistency with the operational control of activities.

Change 2010/2011

	Gross 1 April 2010	Adjustments to opening goodwill	Acquisitions	Disposals	Impairment	Other movements	Gross 31 March 2011
Faiveley Transport minority interests	265,778	–	–	–	–	–	265,778
Sab Wabco Group	219,604	–	–	–	–	14,400[1]	234,004
Amsted- Rail / Ellcon National Inc.	29,162	–	–	–	–	2,915[2]	32,077

TOTAL	**540,013**	**0**	**2,264**	**0**	**0**	**19,751**	**562,028**

(1) Reclassification of the Sab Wabco brand for €20 million, less deferred tax liabilities of €5.6 million recognised on inception.

(2) This movement corresponds to the additional acquisition goodwill recognised as part of the creation of the Amsted Rail-Faiveley LLC joint venture, for €4.6 million (USD 6.3 million) and the opening translation adjustment of (€1.7 million).

(3) Increase in acquisition goodwill of Nowe GmbH following the discounting of the put option on shares held by minority interests.

(4) Restatement of the Faiveley Transport Lekov acquisition goodwill following the purchase of minority interests (25%) in January 2011.

Change 2009/2010

	Gross 1 April 2009	Adjustments to opening goodwill	Acquisitions	Disposals	Impairment test	Other movements	Gross 31 March 2010
Sab Wabco Group	219,997	–	–	–	–	(393)[1]	219,604
Faiveley Transport minority interests	265,583	195	–	–	–	–	265,778
Faiveley Transport NSF	10,057	–	–	–	–	–	10,057
Ellcon National Inc	28,614	922	–	–	–	(375)[2]	29,162
Groupe Espas	6,061	–	–	–	–	–	6,061
Nowe GmbH	1,978	–	–	–	–	2,779[3]	4,757
Faiveley Transport Gennevilliers	1,013	–	–	–	–	–	1,013
Shijiazhuang Jiaxiang Precision Machinery Co. Ltd	102	–	–	–	–	–	102
Others	2,466	–	–	–	–	1,014[3]	3,479
TOTAL	**535,871**	**1,117**	**–**	**–**	**–**	**3,025**	**540,013**

(1) This change corresponds to the recognition as a reduction in the Sab Wabco goodwill of the tax savings achieved during the year relating to the subsidiaries of the former Sab Wabco group (Faiveley Transport do Brasil, Faiveley Transport Birkenhead and Sab Wabco Investments) and which had tax losses carried forward at the time of their acquisition by the Faiveley Transport Group.

(2) Translation adjustment on acquisition goodwill of Ellcon National (USD 39,307).

(3) Increase in acquisition goodwill of Nowe GmbH and Faiveley Transport Lekov a.s. relating to the recognition of put options on shares held by minority interests.

As every year, at the time of closing the accounts, the Group reviews the value of acquisition goodwill and other non-current assets reflected on the balance sheet. This review was conducted by asset groups belonging to the same activity, based on cash flows forecast from these assets as determined within the framework of a strategic analysis, performed particularly in relation to the preparation of the budget and long-term business plan.

The assumptions concerning sales growth are based on the achievement of the budget for the coming year and provisional budgets for the following two years. These forecasts are reliable due to high visibility in our markets and our significant order book. A rate of 2.5% is used for the last year of the business plan and the subsequent two years. Beyond five years and to infinity, the growth rate used is 1.5%, which is a relatively prudent assumption in relation to the growth rates expected in this market.

The calculation of the free cash flow incorporates standard data for the entity in terms of changes in working capital requirement and capital expenditure.

The reference pre-tax WACC (Weighted Average Cost of Capital) is 12.9% for the euro zone and 12.6% for the US. It is calculated using corresponding parameters:

- Market data:
  - risk-free rate on 10-year French government bonds (3.71% for the Eurozone and 3.47% for the USD area);
  - levered beta of sector (0.65);
  - market risk premium 11.43%.
- The entity's parameters:
  - estimated cost of debt: 2.72% for the 2010/2011 year (including hedges and margins);
  - equity/debt ratio at the balance sheet date;
  - a standard tax rate 33.33%.

The carrying amount at 31 March 2011 of acquisition goodwill and other non-current assets grouped together with other net assets by activity, was compared to their value in use calculated using the aforementioned method. No impairment was recognised following this review.

Furthermore, the sensitivity analyses carried out show that the use of a discount rate 1% higher or a standard annual growth rate 1% lower than those mentioned above would not have given rise to impairment, since in all assumptions the recoverable value of the Cash Generating Units remained higher than the net carrying amount of their assets.

2. OTHER INTANGIBLE ASSETS

	Gross	Accumulated amortisation	Net 31 March 2011	Net 31 March 2010	Net 31 March 2009
Incorporation and development costs	17,573	8,928	8,645	7,498	5,043
Patents, trademarks and licences	20,639	17,374	3,265	24,572	25,949
Business goodwill	12,507		12,507	12,511	12,483
Other intangible assets	21,174	660	20,514	8,372	5,491
TOTAL	**71,893**	**26,962**	**44,931**	**52,953**	**48,966**

At 31 March 2011, intangible assets were broken down as follows:

- Incorporation and development costs: only include development costs incurred as part of research programmes and that comply with the IFRS capitalisation criteria. These costs are amortised over a maximum of 3 years.
- Patents, trademarks and licences: this heading primarily includes patents acquired as part of the acquisition of Carbone Lorraine's sintered brake business (€4,000 thousand), and computer software amortised over a maximum of 5 years.
- Goodwill: comprises the goodwill generated by the acquisition of Carbone Loraine's sintered brake business (€12,457 thousand).
- Other intangible assets: primarily includes acquisition goodwill allocated as part of the creation of the Amsted Rail-Faiveley LLC joint venture, for an amount of €8,109 thousand (K$US 11,521) and costs already incurred of €12,290 thousand, corresponding to the rollout of the Moving Forward project, a significant IT system integration programme, launched in 2007, whose objective is to optimise our organisations, industrial processes, equipment and the sharing of technical data within the Faiveley Transport Group.

Change 2010/2011

TOTAL DEFERRED TAX LIABILITIES (B)	**23,466**	**479**	**(6,265)**	**(172)**	**17,508**
Impact on goodwill (2) (c)			(5,600)		
Impact on income statement (a)-(b)+(c)			**(938)**		

(1) The amount of deferred tax assets corresponding to tax losses not recognised due to the risk of non-recovery.

(2) Reclassification of deferred tax assets recognised for the Sab Wabco brand to acquisition goodwill.

(3) See note D.

On the basis of the budget and three-year plan, the Group is confident as to the recovery of the net deferred tax balance of €12.3 million.

Change 2009/2010

	As at 1 April 2009	Change in Group structure and restatement of opening goodwill[3]	Impact on income statement	Other movements	As at 31 March 2010
Provisions for inventory impairment	2,118	100	(368)	133	1,983

Sab Wabco brand	5,600	–		–	5,600
Restatements under IAS 32 and IAS 39 (cash flow)	1,109	–	2,148	–	3,257
Finance leases	399	–	20	6	425
TOTAL DEFERRED TAX LIABILITIES (B)	**19,745**	**380**	**3,184**	**157**	**23,466**
Impact on goodwill[2] (c)			(393)		
Impact on income statement (a)-(b)+(c)			**(1,273)**		

(1) The amount of deferred tax assets corresponding to tax losses not recognised due to the risk of non-recovery.

(2) The tax savings achieved during the year, relating to the subsidiaries of the former Sab Wabco group and which had tax losses carried forward on the date of their acquisition by the Faiveley Transport Group, have been recognised as a deduction from Sab Wabco goodwill for an amount of €393 thousand.

(3) Restatement of the acquisition goodwill of Ellcon National in the year of allocation.

On the basis of the budget and three-year plan, the Group is confident as to the recovery of the net deferred tax balance of €8.1 million.

7. INVENTORIES

The accounting methods used to measure inventories (including the method for determining the cost used) are described in paragraph C.12.

	Gross	Provisions	Net 31 March 2011	Net 31 March 2010	Net 31 March 2009
Raw materials	96,523	12,647	83,876	78,080	77,967
Work-in-progress	25,316	481	24,835	22,482	25,382
Finished products	15,981	1,032	14,949	23,881	25,637
Merchandise	11,390	1,168	10,222	9,843	7,106
TOTAL EXCLUDING BUILDING CONTRACTS	**149,210**	**15,328**	**133,882**	**134,286**	**136,092**
Project work-in-progress[1]	72,866	–	72,866	60,789	38,988
TOTAL	**222,076**	**15,328**	**206,748**	**195,075**	**175,080**

(1) Includes amounts due from/to customers in respect of building contracts (see note E.8).

Movements in provisions 2010/2011:

	Provisions as at 1 April 2010	Change in Group structure	Charges to provisions	Reversals provisions used	Reversals provisions not used	Other movements	Provisions as at 31 March 2011
Raw materials	11,287		4,046	(2,527)	(87)	(72)	12,647
Work-in-progress	611		203	(108)	(231)	6	481
Finished products	1,902		57	(180)	(760)	13	1,032
Merchandise	1,227		364	(110)	(62)	(251)	1,168
TOTAL	**15,027**	**–**	**4,670**	**(2,925)**	**(1,140)**	**(304)[1]**	**15,328**

(1) Including €(18) thousand in respect of translation differences and €(286) thousand in reclassifications.

During the 2010/2011 financial year, old inventories and inventories that had become obsolete were scrapped. Provisions of 85.9% of the value of these inventories had previously been raised. The impact on the income statement for the year ended 31 March 2011 was a loss of €0.5 million.

Movements in provisions 2009/2010:

	Provisions as at 1 April 2009	Restatement of opening goodwill	Change in Group structure	Charges to provisions	Reversals provisions used	Reversals provisions not used	Other movements	Provisions as at 31 March 2010
Raw materials	11,772	271	–	2,730	(2,873)	(917)	304	11,287
Work-in-progress	442	–	–	219	(71)	(174)	195	611
Finished products	1,067	–	–	1,582	(159)	(254)	(334)	1,902
Merchandise	891	–	–	288	–	(107)	155	1,227
TOTAL	**14,172**	**271**	**–**	**4,819**	**(3,103)**	**(1,452)**	**320[1]**	**15,027**

(1) Including €320 thousand in respect of translation differences.

During the 2009/2010 financial year, old inventories and inventories that had become obsolete were scrapped. Provisions of 64.1% of the value of these inventories had previously been raised. The impact on the income statement for the year ended 31 March 2010 was a loss of €1.6 million.

8. LONG TERM CONTRACTS IN PROGRESS

"Amounts due from customers on long term contracts" and "amounts due to customers on long term contracts" are presented within the balance sheet items "other operating receivables" and "current provisions for liabilities and charges" respectively.

	31 March 2011	31 March 2010	31 March 2009
Amounts due from customers on long term contracts	77,959	64,084	43,240
Amounts due to customers on long term contracts	(758)	(614)	(561)
TOTAL	**77,201**	**63,470**	**42,679**
Work in progress on long term contracts (gross)	72,866	60,789	38,988
Work in progress on long term contracts (provisions)	–	–	–
Receivables on long term contracts	7,814	6,135	
Provisions for long term contracts	(3,479)	(3,454)	(2,835)
TOTAL	**77,201**	**63,470**	**42,679**

In the financial statements, the heading "project work in progress" is used in such a way as to recognise the good level of margin, based on the stage of completion of each project. The application of this accounting principle results in the recognition of "Work-in-progress on long term contracts" under balance sheet assets. For certain projects, the heading "Work in progress on long term contracts" is a credit balance. These credit positions were recorded in liabilities within "trade payables".

At 31 March 2011, the payables position restatement totalled €13 million, compared to €10.8 million at 31 March 2010 and €10.9 million at 31 March 2009.

9. RECEIVABLES

9.1. Trade receivables

	Gross	Provisions	Net 31 March 2011	Net 31 March 2010	Net 31 March 2009
Trade receivables	283,573	4,881	278,692	260,664	247,554
Receivables sold to a factor	(94,968)	–	(94,968)	(96,079)	(98,005)
TOTAL	**188,605**	**4,881**	**183,724**	**164,585**	**149,548**

– Movements in provisions for doubtful trade receivables

Year ended:	Opening balance	Change in Group structure	Charges to provisions	Reversals provisions used	Reversals provisions not used	Other movements	Closing balance
31 March 2011	**6,994**	**154**	**4,795**	**(4,698)**	**(2,317)**	**(47)**	**4,881**
31 March 2010	3,498	–	4,706	(273)	(1,022)	85	6,994
31 March 2009	3,634	42	1,375	(587)	(1,020)	54	3,498

A provision for doubtful trade receivables is raised when there is an objective indication of the Group's inability to recover all or part of the amounts due under the terms initially laid down in respect of the transaction. Significant financial difficulties encountered by the debtor, the probability that the debtor will become bankrupt or undergo a financial restructuring, or payment default are indications of the impairment of a receivable.

– Trade receivables (gross value)*

			Receivables due				
Trade receivables	Gross value	Receivables not yet due	Total	Less than 60 days	Between 60 and 120 days	Between 120 and 240 days	More than 240 days
31 March 2011	**188,605**	**158,770**	**29,835**	**16,989**	**3,789**	**1,799**	**7,258**
31 March 2010	171,579	140,808	30,771	14,947	5,205	2,412	8,207
31 March 2009	153,046	125,674	27,372	15,351	3,782	4,607	3,632

(*) Excluding receivables in respect of contracts recognised in accordance with the percentage of completion method.

Receivables remaining unpaid beyond the contractual due date represent, in most cases, amounts confirmed by customers but in respect of which payment is subject to the retentions identified when work was inspected.

9.2. Other receivables

	Gross	Provisions	Net 31 March 2011	Net 31 March 2010	Net 31 March 2009
Receivables on projects	72,866	–	72,866	60,789	38,988

Change in advances received	12,546	21,437	7,613
Change in trade and other payables	10,835	(7,028)	30,721
TOTAL	**(4,106)**	**(9,160)**	**28,757**

13. EQUITY

13.1. Share capital

As at 31 March 2011, the Company's share capital totalled €14,404,711 divided into 14,404,711 shares of €1 each, fully paid up. Shares registered in the name of the same shareholder for at least two years have double voting rights.

As regards its capital management, the Faiveley Transport Group's main aim is to ensure the retention of a good credit risk rating and sound capital ratios in order to facilitate its activity and maximise value for its shareholders.

The Group manages its capital by ensuring that it maintains three financial ratios within the limits defined by the credit agreement relating to the reorganisation of its shareholding structure and the refinancing of its bank borrowings, i.e. the leverage ratio, the gearing ratio and total bank guarantees (see note E.15).

The Group manages its capital structure and makes adjustments depending on changes in economic conditions. With a view to maintaining or amending its capital structure, the Group may adjust the payment of dividends to its shareholders, redeem part of its capital or issue new shares. The management objectives, policies and procedures remained unchanged in 2011, 2010 and 2009.

- **Composition of the share capital**

Shares	Nominal value	31 March 2009	31 March 2010	New shares issued	Shares redeemed	31 March 2011
Ordinary	1	6,291,902	6,759,591	–	–	6,486,734
Redeemed	–	–	–	–	–	–
With preferred dividends	–	–	–	–	–	–
With double voting rights	1	8,112,809	7,645,120	–	–	7,917,977
TOTAL	**1**	**14,404,711**	**14,404,711**	**–**	**–**	**14,404,711**

- **Breakdown of share capital and voting rights**

	31 March 2011		31 March 2010		31 March 2009	
Main shareholders	% of capital	% of voting rights	% of capital	% of voting rights	% of capital	% of voting rights
François Faiveley Group and the Faiveley family	53.42	67.50	53.77	68.06	55.91	70.10
Treasury shares	3.21	–	1.97	–	2.30	–
Registered securities(1)	6.70	8.34	7.83	7.83	8.29	8.15
General public	36.67	24.16	36.43	24.11	33.50	21.75

(1) Excluding treasury shares and Faiveley Family.

- **Share purchase option plans**

Faiveley Transport implemented a share purchase option plan for the benefit of key Faiveley Transport Group management (excluding the managers who invested in Faiveley Management S.A.S.)

This share option plan, covering a maximum of 325,000 Faiveley Transport shares, was approved by the Extraordinary General Meeting of 27 September 2005 and implemented by the Management Board. The authorisation, which was granted for a period of three years, expired on 27 September 2008.

In order to meet its future obligation to transfer these shares to the plan beneficiaries, Faiveley Transport began a share buyback programme at the end of 2005.

If the share purchase options were exercised, they would result in the purchase of existing Faiveley Transport ordinary shares.

– Principal characteristics of the current share purchase option plan

(*) The exercise price is equal to the average of the 20 trading days preceding the date of the Management Board meeting that decided to grant the options, less a discount of 5%.

Following the departure of certain beneficiaries since the plan was implemented by the Management Board, at 31 March 2011, 117,541 options granted to 23 beneficiaries could be exercised.

In the knowledge that the options will become exercisable from the second anniversary of the date of their granting by the Chairman of the Management Board, subject to the requirement that the holder of the options continues to be employed by the Faiveley Transport Group at the time of exercise and accepts the option scheme rules, 198,499 options have been exercised to date.

– Changes to the plan

	31 March 2011	31 March 2010	31 March 2009
Options granted	372,040	372,040	372,040
Options cancelled	56,000	51,520	51,520
Options exercised	198,499	80,425	17,920
OPTIONS OUTSTANDING	**117,541**	**240,095**	**302,600**

- **Share subscription option plans**

The Combined General Meeting of Faiveley Transport, held on 22 September 2009, authorised the Management Board to grant share purchase and/or subscription options, up to a maximum of 1% of the share capital at 22 September 2009.

The Management Board decided at its meeting of 23 November 2009 to grant, to 15 beneficiaries, options giving right to subscribe for new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91.

– Main features of the current share subscription plan:

Share subscription features	n°1
Management Board meeting	23/11/2009
Exercise price in €(*)	54.91
Options exercisable from	22/11/2013
Options lapse on	22/11/2017
Initial number of beneficiaries	15
Restated initial number	–
Total number of options granted	144,000
Total number of options exercised	–
Total number of options cancelled	–
Number of options outstanding 31 March 2011	144,000
Percentage of share capital at 31 March 2011 liable to be issued	1%
Number of shares liable to be subscribed by members of the Management Board and the Supervisory Board	45,500
Number of shares liable to be subscribed by members of the Executive Committee	128,500
Terms and conditions of exercise	100% of options exercisable from 22/11/2013

(*) The exercise price is the average of the last twenty trading days preceding the Management Board meeting that approved the allocation, without discount.

On the allocation date, the fair value of options granted was estimated at €2.8 million, based on the Black & Scholes mathematical model, taking account of the terms and conditions of option allocation.

Calculation assumptions:
– Faiveley Transport share price on the allocation date: €55.39;
– expected maturity of option: 5 years;
– exercise price: €54.91 per option;
– no risk rate known on allocation date: 3.4%;
– full-year volatility of the Faiveley Transport share at 23 November 2009: 33%.

Based on these features, the value of the option is €19.58. In addition, it was assumed that no dividend would be paid during the period.

- **Free performance-based share allocation plan**

Faiveley Transport's Combined General Meeting of 13 September 2010 delegated to the Management Board its powers in relation to allocating free performance-based shares, either existing or to be issued, within the limit of 1% of the share capital at 13 September 2010.

At its meetings of 3 December 2010 and 24 February 2011, the Management Board allocated a total of 69,700 existing shares to 43 beneficiaries. The allocation of the shares will be final at the end of a vesting period of two years, subject to beneficiaries remaining employed by the Group at that date and to the achievement of part or all of performance criteria. This period will be followed by a retention period of a minimum of two years.

Allocation of free performance-based shares	n°1	n°2
Date of Management Board meeting	03/12/2010	24/02/2011
Date of final allocation of the shares	03/12/2012	24/02/2013
Date shares become available	03/12/2014	24/02/2015
Initial number of beneficiaries	38	5
Adjusted initial number	–	–
Total number of shares allocated	64,500	5,200
Percentage of share capital at 31 March 2011 liable to be issued	–	–
Number of free shares granted to members of the Management Board and the Supervisory Board	5,800	–
Number of free shares granted to members of the Executive Committee	43,300	–
Terms and conditions of exercise	Determination of % of shares finally allocated at 03/12/2012	Determination of % of shares finally allocated at 03/12/2013

Free performance-based shares allocation are instruments that entitle their beneficiaries to acquire a variable number of ordinary shares of the company, based on the number of exercisable performance shares and on the performance criteria set out.

These criteria are to be tested in November 2012; they have been set out for the 2010/2011 and 2011/2012 financial years.

The criteria used to reflect wealth creation for the shareholders were:
- growth in operating profit: growth of 4% per year in profit from recurring operations, before non-recurring items; and
- cash flow generation (debt reduction): cumulative cash flow from operating activities for 2010/2011 and 2011/2012 to represent 85% of the operating profit target.

In the event performance criteria are fully achieved or exceeded, each beneficiary will receive 100% of the number of shares allocated to him/her.

In the event performance criteria are partly achieved, each beneficiary will receive a percentage of the number of shares allocated to him/her:
- criteria of operating profit growth:
  - 0% if growth is nil or negative,
  - pro-rata for average growth of between 0% and 4% per year.
- Criteria of cash flow generation:
  - 0% if generation is nil or negative,
  - pro-rata for cash flow from operating activities of between 0% and 100% of the target.

The fair value of the performance-based free share plan was estimated on the allocation date by an external consultant, using the Monte Carlo method and taking into account the terms and conditions of allocation of the shares.

Calculation assumptions:
- Model: Monte Carlo method;
- Life of options: 2 years, related to the performance condition;
- Multiple of benchmark EBIT: 9.9x;
- Opportunity cost of capital: between 6.6%[1] and 7.1%[2];
- Volatility of Faiveley Transport after 2 years, debt-free: 26.6%;
- Management turnover: 15.7%

The assessment pointed to a percentage of achievement of performance criteria of between 50.7% (with a capital cost of 6.6%) and 51.2% (with a capital cost of 7.1%).

As a result, the value of performance-based shares would be between €2,044 thousand and €2,063 thousand, based on a share price of €60.94 on 13 December 2010.

The IFRS charge (plan fair value), estimated at €2.1 million, is spread over the acquisition period of two years. The charge recognised during the financial year was €0.3 million.

- **Treasury shares**

At 31 March 2011, Faiveley Transport held 462,777 treasury shares, including 457,853 in nominative form and 4,924 through its liquidity contract.

Given the purchase cost of the Faiveley Transport shares acquired to service stock option, share subscription or free share allocation plans, the exercise prices granted and the price of the Faiveley Transport share at 31 March 2011, applied to unallocated options, the unrealised capital gain on treasury shares is €1,081 thousand.

(1) Opportunity cost of the Company share capital.
(2) Capital cost used by the Bloomberg database on 18 November 2010.

13.2. Translation differences

Translation differences comprise mainly the gains and losses resulting from the translation of the equity of subsidiaries whose functional currency is other than the euro.

Breakdown of translation differences by currency:

The actual return on investments was €1.9 million in the year to 31 March 2011 (compared to a loss of €7.8 million for the year to 31 March 2010).

Contributions in respect of defined benefit schemes in the United Kingdom, Belgium and India were estimated to total €1.9 million for 2011.

The expected return on investments is estimated at €2.1 million in 2011. A one point increase in the assumed percentage rate of return would generate €0.4 million in additional income.

- **Actuarial assumptions:**

The actuarial assumptions used to measure commitments take into account the demographic and financial conditions specific to each country or Group company.

Discount rates are determined by reference to the yields on AAA bonds with similar durations to those of the commitments as at the measurement date.

The assumptions used for those countries with the most significant commitments are shown in the following table:

	31 March 2011			31 March 2010			31 March 2009		
	France	Germany	United Kingdom	France	Germany	United Kingdom	France	Germany	United Kingdom
Discount rate	4.8%	4.8%	5.6%	4.6%	4.6%	5.7%	5.5%	5.5%	7.0%
Inflation rate	2.0%	2.0%	3.7%	2.0%	2.0%	3.8%	2.0%	2.0%	3.2%
Average salary increase rate	3.0%	1.6%	5.2%	3.0%	1.6%	5.3%	3.0%	3.0%	4.7%
Expected return on investments	N/A	N/A	5.2%	N/A	N/A	5.3%	N/A	N/A	5.7%

– The sensitivity of commitments at 31 March 2011 and the cost of services rendered for the next year to a 25 basis point change in the discount rate are summarised as follows:

	0.25% increase in discount rate	0.25% decrease in discount rate
Effect on the value of commitments	(2.364)	2.488
Effect on the cost of services rendered	(0.007)	0.009

– The sensitivity of commitments at 31 March 2011 and the cost of services rendered for the next year to a 25 basis point change in the salary increase rate are summarised as follows:

	0.25% increase in discount rate	0.25% decrease in discount rate
Effect on the value of commitments	0.277	(0.267)
Effect on the cost of services rendered	0.023	(0.024)

– Structure of the investment portfolio:

The expected long term rate of return on plan assets in the United Kingdom, Belgium and India was determined by taking into account the structure of the investment portfolio.

Currently the investment portfolio contains no Group securities.

The structure of the investment portfolio is as follows:

	31 March 2011	31 March 2010	31 March 2009
Shares	48.1%	45.3%	46.0%
Bonds	48.8%	52.6%	50.7%
Other assets	3.1%	2.1%	3.3%
TOTAL	**100.0%**	**100.0%**	**100.0%**

The expected return for each category of assets is as follows:

	31 March 2011
Shares	6.2%
Bonds	4.3%
Other assets	3.9%
TOTAL	**5.2%**

(1) Including exchange differences of €927 thousand and reclassifications of € (7 thousand).

Current provisions primarily relate to provisions for guarantees and Customer Services granted to our customers and litigations and claims on completed contracts. The methods underlying the recognition of these provisions are specified in Note C.15.2.

15. BORROWINGS

Under the credit agreement relating to the reorganisation of the shareholding structure and the refinancing of bank borrowings, the Faiveley Transport Group must comply with the following three financial conditions:

- leverage ratio (net consolidated borrowings/consolidated EBITDA): must not exceed 2.5 at 31 March 2011. At this date, the ratio was 1.15;
- gearing ratio (net consolidated debt/consolidated equity): must not exceed 1.50 at 31 March 2011. At this date, the ratio was 0.35;
- total bank guarantees must not exceed 22% of the order book. At 31 March 2011, they represented 15%.

Non-compliance with one of these covenants may result in the debt becoming immediately repayable.

15.1. Breakdown and maturity of non-current and current borrowings

	2010/2011					
	Current portion	Non-current portion				
	Under 1 year	1 to 5 years	Over 5 years	Total	2009/2010	2008/2009
Loans	50,452	316,605	–	367,057	420,283	97,701
Finance leases	616	774	1,081	2,471	3,062	5,306

TOTAL	**393,752**	**442,688**	**479,405**

15.3. Breakdown by interest rate of non-current and current borrowings

	At 31 March 2011	At 31 March 2010	At 31 March 2009
Fixed rate borrowings	1,137	5,346	3,071
Variable rate borrowings(1)	376,724	425,337	470,679
TOTAL BORROWINGS(2)	**377,861**	**430,683**	**473,750**

(1) Before implementing hedging instruments.

(2) Excluding fair market value of derivatives – liabilities.

15.4. Calculation of net borrowings

	At 31 March 2011	At 31 March 2010	At 31 March 2009
Non-current borrowings	318,516	369,422	419,984
Current borrowings	53,672	56,280	34,867
Bank overdrafts	4,771	3,696	18,094
Invoices factored – not guaranteed	902	1,285	805
TOTAL FINANCIAL DEBT (a)	**377,861**	**430,683**	**473,750**
Receivables from investments	–	–	3,263
Loans	1,260	1,417	1,218
Guarantees, deposits and securities paid	5,411	4,586	1,766
Various other receivables	3,019	2,512	1,711
Current accounts	–	–	–
TOTAL FINANCIAL RECEIVABLES, NET (b)	**9,690**	**8,515**	**8,028**
Cash and cash equivalents (c)	198,382	196,705	164,077
NET BORROWINGS/(RECEIVABLES) (a-b-c)	**169,789**	**225,463**	**301,645**
Equity	454,992	376,666	296,921
Gearing ratio/equity	*37.2%*	*59.9%*	*101.6%*
Sales	913,872	875,948	852,024
Net borrowings/sales ratio	*18.6%*	*25.7%*	*35.4%*

In economic terms, net debt should be reduced by the value of treasury shares held for sale as part of the share purchase/subscription option and free share allocation plans. The liquidation value of these shares was €23.5 million at 31 March 2011, given the exercise prices granted for share purchase/subscription options and the year-end share price for shares not allocated to this plan. For accounting purposes, the value of treasury shares held is deducted from equity under IFRS; this amounted to €22 million at 31 March 2011, €8 million at 31 March 2010 and €9.5 million at 31 March 2009.

16. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

16.1. Financial instruments at 31 March 2011

		Breakdown by category					Fair value classification of instruments[1]

(1) Revised IFRS 7 requires that fair value measurements be classified in three levels. The levels of fair value hierarchy reflect the significance of data used for the measurements:

Level 1: prices (unadjusted) of identical assets or liabilities listed on active markets.

Level 2: other data than listed prices covered by Level 1, that can be noted for the asset or liability concerned, either directly (i.e. prices) or indirectly (i.e. data derived from prices).

Level 3: data relating to the asset or liability, not based on observable market data (unobservable data).

(2) This amount corresponds to the financial commitment recognised as part of the recognition of put options held by minority shareholders in Nowe GmbH and Urs Dolder AG at 31 March 2011.

16.2. Financial instruments at 31 March 2010

		Breakdown by category					Fair value classification of instruments (1)		
At 31 March 2010	**Carrying amount**	**Non financial assets and liabilities**	**Non financial assets and liabilities**	**At fair value through profit and loss**	**Available for sale financial assets**	**Fair value**	**Level 1**	**Level 2**	**Level 3**

16.4. Financial risk management

The Faiveley Transport Group's cash policy is based on overall financial risk management principles and provides specific strategies for areas such as exchange risk, interest rate risk, raw materials risk, credit risk and liquidity risk.

The Group also uses derivative instruments, mainly forward purchases and sales of currencies, interest rate swaps or caps and exchange rate contracts or raw material swaps. The aim of these instruments is to manage the exchange, interest rate and raw material risks associated with the Group's activities and financing.

The Group's policy is not to enter into derivative instruments for speculative purposes.

The Supervisory Board of Faiveley Transport examines risk management principles as well as policies covering certain specific fields such as exchange risk, interest rate risk, raw materials risk, credit risk and liquidity risk. These policies are summarised below.

The market values of interest rate and foreign exchange derivative instruments were measured based on year-end market prices. They were appraised by an independent expert.

16.5. Market risks

a) Exchange risk

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of its exposure to a number of currencies.

The major currencies concerned are the Chinese Yuan, the American Dollar, the Pound Sterling, the Czech Koruna and the Swedish Krona.

The management of exchange risk on commercial contracts is centralised by the parent company's Treasury department and comprises two parts: the certain and the uncertain risk.

- **Exchange risk management relating to tenders in foreign currencies (uncertain risk):**

The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to use financial instruments to cover during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury department uses mainly exchange options and export insurance contracts.

- **Exchange risk management relating to commercial contracts (certain risk):**

Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment. The instruments used primarily include forward purchases and sales. Treasury may also use swaps and options.

The Group's policy is to hedge all future transactions expected in each major currency. Various flows are hedged against, at a minimum of 80%, based on the annual budget.

- **Forward sales hedging financial and commercial transactions as at 31 March 2011**

	Nominal value		
	(€ thousands)	(local currency thousands)	Fair value (€ thousands)
Dollar US	55,425	74,946	2,103
Pound Sterling	32,041	27,688	1,324
Chinese Yuan	26,872	239,202	829
Singapore Dollar	20,678	28,767	0
Swedish Krona	18,798	168,582	(232)
Hong-Kong Dollar	7,190	76,053	293
Australian Dollar	7,148	14,567	(63)
Czech Koruna	3,425	84,287	(11)
Swiss Franc	1,672	2,156	2
Brazilian Real	1,494	3,624	(57)
Japanese Yen	491	54,108	28
Indian Rupee	183	10,851	14
Korean Won	154	223,815	10
TOTAL	**175,571**		**4,240**

- **Forward purchases hedging financial and commercial transactions as at 31 March 2011**

	Nominal value		
	(€ thousands)	(local currency thousands)	Fair value (€ thousands)
Dollar US	44,244	60,951	(2,642)
Swedish Krona	42,422	373,504	462
Czech Koruna	35,572	895,843	1,011
Pound Sterling	27,593	23,439	(1,263)
Chinese Yuan	17,992	136,592	(93)
Hong-Kong Dollar	17,426	181,698	(901)
Australian Dollar	1,316	1,816	(19)
TOTAL	**186,564**		**(3,445)**

- **A HKD-denominated project is partly hedged by options:**
  - a tunnel of €2 million, with a fair value of (€207 thousand) at 31 March 2011;
  - sale of a call option of €1 million, with a fair value of (€109 thousand) at 31 March.

- **Sensitivity analysis**

The following table presents, at 31 March 2011, the sensitivity to a 10% positive or negative change in other currencies:
- the effect on pre-tax profit only applies to financial assets and liabilities recognised in the balance sheet, which are denominated in a currency other than the functional currency of their controlling entity and which are not hedged against.
- the effect on equity results from the efficient portion of derivative instruments qualifying as cash flow hedges

Currency	Movement in € exchange rate	Effect on operating Profit (before tax)	Effect on reserves in equity
Australian Dollar	10%	66	(499)
	(10%)	(66)	499
Hong-Kong Dollar	10%	185	47
	(10%)	(185)	(47)
Czech Koruna	10%	167	635
	(10%)	(167)	(635)
Pound Sterling	10%	105	(496)
	(10%)	(105)	496
Indian Rupee	10%	146	–
	(10%)	(146)	–
Russian Rouble	10%	–	259
	(10%)	–	(259)

The impact of fluctuations in the Euro against the other currencies is not material.

b) Interest rate risk

The interest rate risk to which the Group is exposed arises as a result of its long term borrowings.

To manage its risk, the parent company's Treasury department has implemented a hedging strategy using swaps, tunnels, caps and options for interest rates and options.

The exposure of interest rates on loans in Euros is hedged for between 71% and 100% of the total debt bearing a Euro interest rate, depending on fluctuations for the 2011/2012 period. The exposure of interest rates on loans in US Dollar is fully hedged.

The estimated cost of bank debt of the Group in 2011/2012 is 2.64%, including hedges, for the debt in Euros and 2.81% for the debt in US dollars.

- **Instruments recognised in equity**

	On Euro loans		On USD loans			
	Nominal (€ thousands)	Fair value (€ thousands)	Nominal (USD thousands)	Fair value (USD thousands)	Nominal (€ thousands)	Fair value (€ thousands)
Swap	145,000	311	41,369	(997)	29,119	(702)
Tunnel	112,500	(124)	–	–	–	–
Cap	70,000	(15)	–	–	–	–
TOTAL	**327,500**	**172**	**41,369**	**(997)**	**29,119**	**(702)**

- **Sensitivity analysis**

The Group has implemented a diversified interest rate risk management policy aimed at limiting the impact of potential interest rate increases on its cash flow. As at 31 March 2011, the projected servicing of net borrowings based on the hedging put in place would limit the impact of a 1% increase in interest rates to €1.4 million.

The impact on equity is €1.7 million with a 0.5% interest rate increase.

c) Risk on raw materials

The Faiveley Transport Group is exposed to increases in the costs of raw materials such as steel, aluminium and copper, and to increases in transportation costs.

The Group has already anticipated these effects, both in terms of its purchasing policy and in the preparation of its tenders. As regards contracts relating to projects, price indexation mechanisms enable the Group to absorb a large part of the increases in raw material costs.

However, the Faiveley Transport Group's sintered brake pads activity is exposed to fluctuations in the price of copper. Contracts were entered into to hedge almost 50% of the 2011/2012 exposure through euro-denominated raw material swaps.

- **Sensitivity analysis**

A 1% increase in the price of copper would have a negative impact of €13 thousand on EBITDA.

d) Derivative instruments

- **The fair value of derivative instruments for hedging exchange, interest rate and raw materials risks is recorded on the balance sheet as follows:**

	31 March 2011			
	Interest rate hedging	Exchange rate hedging	Raw materials hedging	Total
Financial instruments - Assets	1,135	6,484	–	7,619
Financial instruments - Liabilities	1,603	6,424	25	8,052
Unrealised gains and (losses) in equity	(635)	278	(25)	(382)

	31 March 2010			
	Interest rate hedging	Exchange rate hedging	Raw materials hedging	Total
Financial instruments - Assets	–	2,999	–	2,999
Financial instruments - Liabilities	4,324	1,612	–	5,936
Unrealised gains and (losses) in equity	(4,493)	5	–	(4,488)

	31 March 2009			
	Interest rate hedging	Exchange rate hedging	Raw materials hedging	Total
Financial instruments - Assets	–	2,646	27	2,673
Financial instruments - Liabilities	1,724	3,929	1	5,654
Unrealised gains and (losses) in equity	(2,612)	1,329	26	(1,257)

- **Movement of the reserve in equity**

	Amount 1 April 2010	Movement in the year	Amounts recycled to income statement	Amount 31 March 2011
Interest rate hedging	(4,493)	4,361	(503)	(635)
Exchange rate hedging	5	301	(28)	278
Raw materials hedging	–	(25)	–	(25)
TOTAL	**(4,488)**	**4,637**	**(531)**	**(382)**

	Amount 1 April 2009	Movement in the year	Amounts recycled to income statement	Amount 31 March 2010
Interest rate hedging	(2,612)	(1,075)	(806)	(4,493)
Exchange rate hedging	1,329	(1,317)	(7)	5
Raw materials hedging	26	(26)	–	–
TOTAL	**(1,257)**	**(2,418)**	**(813)**	**(4,488)**

- **Horizon for release of amounts recorded in equity at 31 March 2011:**

  The amount recorded in equity, in respect of exchange rate derivatives (€278 thousand) will be recycled to the income statement in the year ending 31 March 2012.

  The amount recorded in equity, in respect of interest rate derivatives (€635 thousand) will be released to the income statement between 31 March 2011 and 31 March 2014 according to the maturity of the flows hedged.

  The amount taken to equity in relation to raw materials (€25 thousand) will be transferred to the income statement for the year to 31 March 2012.

16.6. Credit risk

Owing to its commercial activities, the Faiveley Transport Group is exposed to credit risk, in particular the risk of default on the part of its customers.

The Group only enters into commercial relationships with third parties whose financial position is known to be healthy. The Group's policy is to verify the financial health of those customers wishing to obtain credit.

In the case of derivative instruments and transactions that generate cash when they are unwound, the counterparties are limited to high quality financial institutions.

In addition, the Faiveley Transport Group makes use of factoring arrangements in France, Germany, Spain and Italy. Factoring enables the Group to sell, without recourse, part of its receivables to the factoring company and to banks. This selling without recourse has enabled the Group to improve trade receivables recovery and to transfer the risk of default or bankruptcy on the part of customers or other debtors to the factor.

At 31 March 2011, receivables sold without recourse totalled €95 million, and the amount of receivables sold and not guaranteed was €0.9 million.

As regards the risk associated with financial assets, the Group's maximum exposure is equal to their carrying amount.

16.7. Liquidity risk

Prudent liquidity risk management requires the Group to retain a sufficient level of cash and securities that can be traded on a market, to have adequate financial resources due to the implementation of appropriate credit facilities and to be in a position to unwind positions on the market. Due to the dynamism of the Group's activities, the Treasury department aims to maintain financial flexibility by retaining open but unused credit lines.

At 31 March 2011, the Group respected all the covenants specified by the credit agreement relating to the reorganisation of its shareholding structure and the refinancing of its existing bank borrowings (see note E.15).

The Group estimates that the cash flows generated by its operating activities, cash and funds available via existing credit lines will be sufficient to cover the expenditure and investment necessary for its operations, to service its debt and to pay dividends. Conversely, the Group may borrow to finance potential acquisitions.

a/ Available cash and cash equivalents

	31 March 2011	31 March 2010	31 March 2009
Available credit lines (a)	83,564	85,205	68,143
Parent company cash (b)	37,211	36,883	27,660
Subsidiaries cash and cash equivalents (c)	160,271	158,539	135,614
AVAILABLE CASH AND CASH EQUIVALENTS (1) = (a+b+c)	**281,046**	**280,627**	**231,417**
Borrowings due in less than one year (d)	53,441	56,021	34,793
Available credit lines maturing in less than one year and bank overdrafts (e)	88,995	89,272	55,715
NET CASH AND CASH EQUIVALENTS AVAILABLE OVER THE NEXT YEAR (1-d-e)	**138,610**	**135,334**	**140,909**

Cash and cash equivalents include unused factoring cash of €44.8 million (net of non guaranteed receivables factored).

The improvement in cash and cash equivalents was due mainly to the cash flow generated by the Group.

Financial debt of less than one year is disclosed in paragraph 15.1 (excluding bank overdraft, fair value of derivatives and invoices factored and not guaranteed).

Available credit lines represent credit lines granted by the banks and available immediately to the subsidiaries or the parent company. At 31 March 2011, €4.8 million was used in respect of a bank overdraft.

b/ Maturity dates of financial liabilities at 31 March 2011

At 31 March 2011	Carrying amount	Under 1 year	1 to 5 years	Over 5 years	Non-financial liabilities
